ARTIFICIAL RECHARGE
OF GROUNDWATER

Proceedings of an International Symposium, Helsinki, Finland
June 3-5, 1996

Edited by Anna-Liisa Kivimäki
and Tuulikki Suokko

Nordic Hydrological Programme
NHP Report No. 38

The Nordic Coordination Committee
for Hydrology (KOHYNO)
1996
CONTENTS

Preface

Topic 1: THE CURRENT SITUATION AND FUTURE TRENDS OF ARTIFICIAL RECHARGE

Artificial groundwater recharge in Finland
Hatva Tuomo, Keynote lecture

New Developments in Groundwater Recharge and Water Reuse
Bouwer Herman

Artificial Recharge - attempt to develop guidelines
Dahlström Kim & Pedersen Morten

Investigation of a future artificial ground water supply of greater Stockholm
Hjort Jan & Ericsson Per

Artificial groundwater recharge as an alternative for the water supply of the Stockholm region, - a feasibility study
Johansson Per-Olof, Knutsson Gert, Djurberg Håkan, Eriksson Anders & De Geer Jan

Artificial Recharge of Groundwater in Germany - State of the Art in Research and Practice
Schöttler Uwe

Topic 2: DESIGN AND OPERATION OF ARTIFICIAL GROUNDWATER PLANTS

Processes affecting the quality of bank-filtered water
Literathy Peter & László Ferenc, Keynote lecture

Proposals for injecting effluent for aquifer storage and recovery scheme
Gerges Nabil Z.
Study of Triazine Behaviour in Soil Water and Risk Estimation of Groundwater Contamination

169

Liming of infiltration ponds as a measure to increase hardness and alkalinity in groundwater
Jacks Gunnar & Frycklund Cristina

179

Removal of cyanobacteria and their hepatotoxins in soil and sediment columns
Lahti Kirsti, Kilponen Jaana, Kivimäki Anna-Liisa, Erkomaa Kirsti & Sivonen Kaarina

187

Changes in microbiology and water chemistry during slow sand filtration
Lehtola Markku, Miettinen Ilkka, Vartiainen Terttu, Martikainen Pertti J. & Partanen Helena

197

Changes in water microbiology and chemistry during bank filtration of humus-rich lake water
Miettinen Ilkka T., Vartiainen Terttu, Martikainen Pertti J.

203

Decrease of organic load from the surface water by biological treatment
Mälkki Esko

209

Succession of microbial communities during bank filtration and artificial groundwater recharge
Preuß Gudrun, Nehrkorn A.

215

Elimination of pollutants during artificial recharge and bank infiltration: a comparison
Stuyfzand Pieter J. & Kooiman J.W.

223

Powdered limestone in infiltration basins a measure to raise alkalinity and hardness
Sundlöf Bertil

233

The behaviour of fluorine in a lake-water infiltration plant in the Viborg rapakivi area
Vuorinen Antti

239

Pesticides and artificial recharge of groundwater via slow sand filtration - elimination potential and limitations
Zullei-Seibert Ninette

247
