VOLUME I

Proceedings of
Unified International Technical Conference on Refractories
Fifth Biennial Worldwide Congress

Refractories—A Worldwide Technology

Edited by Mark A. Stett

Hosted by
The American Ceramic Society
735 Ceramic Place
Westerville, Ohio 43081 USA
www.acers.org

November 4–7, 1997
Radisson Hotel
New Orleans, Louisiana USA
CONTENTS

Volume I

Wednesday, November 5, 1997

I. MONOLITHICS

Session A—Spinel
Chairpersons: Donald A. McIntyre, A.P. Green Industries, Inc., USA
Christopher Parr, Lafarge Aluminates, France

Effects of MgO Addition on Al₂O₃-SiC Castable
T. Yoshimoto*, T. Suzuki, K. Sugiyama, and K. Furukawa, Harima Ceramic Co., Ltd., Japan

Chemical Interactions in Calcium Aluminate Cement Based Castables Containing Magnesia
Thomas A. Bier*, Christopher Parr, Catherine Revais, and Hervé Fryda, Lafarge Aluminates, France

Slag Corrosion Mechanisms of Cement-Free Al₂O₃-MgO Castables
T.F. Vezza*, T. Richter, and R.A. Landy (Consultant), North American Refractories Company, USA

Relationship Between Composition and Properties of MgO-Spinel Castables
Zhenyong Bi*, Ningsheng Zhou, and Xiangchong Zhong, Luoyang Institute of Refractories Research, China

Session B—Low Cement, Ultra-Low Cement
Chairpersons: Adam Holterhoff, Jr., Lehigh Portland Cement Company, USA
Bjorn Sandberg, Elkem Refractories, Norway

Substitution of Reactive Alumina with Microsilica in Low-Cement and Ultra-Low Cement Castables, Part I: Properties Related to Installation and Demoulding
Bjørn Myrhe* and Aase M. Hundere, Elkem Refractories, Norway

Comparative Evaluation of Fracture and Thermal Shock Behavior of Conventional, Low-Cement and Ultra-Low Cement Castables
Properties of Fused Silica Conventional and Low-Cement Castables .......................... 63
  Dilip Jain* and David Tucker, C-E Minerals, USA

Interpretation of the Creep Behavior of Low-Cement Refractory Castables Based on the Properties of the Interaggregate Glassy Phase ............................. 71
  A. Rendtel and H. Hübner*, Technische Universität Hamburg—Harburg, Germany; J.A. Rodrigues and V.C. Pandolfelli, Federal University of São Carlos, Brazil

Ageing of a Low-Cement Castable .................................................. 81
  Christopher Parr*, Catherine Revais, Nancy Bunt, Lafarge Aluminates, France; and Duncan Jones, Morganite Thermal Ceramics, United Kingdom

Substitution of Reactive Alumina with Microsilica in Low-Cement and Ultra-Low Cement Castables, Part II: The Effect of Temperature on Hot Properties .... 91
  Aase Marie Hundere* and Bjørn Myhre, Elkem Refractories, Norway

Development of Low- and Ultra-Low Cement Gunning Castables for Application in the Iron and Steel Industry .............................................. 101

The Influence of a Thermal Treatment on the Reactivity of Calcium Aluminate Phases ..................................... 109
  Wolfgang Geßner*, Steffen Möhmel, Institute of Applied Chemistry, Germany; Angelika Rettel, Lafarge Laboratoire Central de Recherche, France; Jean-Pierre Bayoux, Lafarge Centre Technique Europe Centrale, Austria

II. Refractories for the Steel Industry

Session A—BOF/Ladles
  Chairpersons: James W. Stendera, Martin-Marietta Laboratories, USA
  Shoji Itsuka, Krosaki Corporation, Japan

KOBM Bottom Refractory Improvements at Dofasco .... 121
  Thomas A. Vert*, Dofasco, Inc., Canada

Modern Steel Ladle Lining and Wear Monitoring Practice at Raahe Steel .................................................. 131
  Jaakko Kärjä*, Hannu Nevala, and Rautaruukki Oy, Raahe Steel, Finland

Investigation of the Corrosion of MgO-Graphite Ladle Refractories by High Lime/Silica Slags Via a Laboratory Slag Test ........................................... 139
  S. Akkurt* and H.D. Leigh, Clemson University, USA
Purging Plugs for Steel Ladles—Laboratory and Plant Results from a BOF Steel Plant 143

Jens-Ulrik Becker, Rainer Berger, Andreas Buhr*, Wolfgang A. Rasim, and Horst Tiemann, Krupp Hoesch Stahl AG, Germany

**Session B—Ladles**

Chairpersons: Paul Williams, A. P. Green Industries, Inc., USA
Tsuyoshi Okamoto, Kawasaki Refractories Co., Ltd., Japan

Top-Quality Gunning Mixes for BOF, EAF, and Ladles 155
Franz Petio*, Veitsch-Radex AG, Austria

Optimum Castable Lining for Steel Ladles in Japan 165
S. Itose*, T. Isobe, K. Sugiyama, K. Furukawa, Harima Ceramic Co., Ltd., Japan

The Development of MgO Rich MgO-Al2O3-C Brick for Ladle Metal Line 175
Kyungho Nam*, Byungmoo Kwon, and Daehun Chung, Posco Refractories Co., Ltd., South Korea

Mineralogical Studies of Alumina Magnesia Carbon Steel Ladle Refractories 183
Paul Williams* and Ann Hagni, A.P. Green Industries, Inc., USA

Resin Bonded Alumina-Magnesia-Carbon Brick for Ladles 193
Shyam Miglani* and James J. Uchno, North American Refractories Co., USA

Development of MgO-CaO-Al2O3 Castable for Steel Ladle Slag Line 203

Effect of Service Conditions on Wear Mechanisms of Steel Ladle Refractories 213
Philippe Blumenfeld*, Michel Puillet, Jacques de Lorgeril, and Dominique Verrelle, SOLLAC, France

**Session C—Degassers**

Chairpersons: Richard J. Volk, Wellsville Fire Brick Company, USA
P. Tassot, SOLLAC Dunkirk, France

Recent Developments and Performances from RHOB at Sollac Dunkirk 223
P. Tassot*, D. Verrelle, and Ch. Vromen, SOLLAC Dunkirk, France

Wear of Magnesia-Chromia Brick for RH-OB Vessel 231
Gi-Gon Hong*, Uong Chon, and Hyo-Joon Kim, Research Institute of Industrial Science and Technology, South Korea
The Application of Magnesia-Spinel Castable to the Snorkel in the RH Degasser .......................... 241
Donghwan-Son*, Youngkoog-Kim, and Jaeeick-Yang, Posco Refractories Co., Ltd., South Korea

Corundum-Spinel Castable for RH-OB Snorkel ........... 247
He Huiqing*, Liu Xingping, Sun Xianfeng, Chen Deling, and Zheng Qipuo, Ministry of Metallurgical Industry, China

Session D—General
Chairpersons: Leonard P. Krietz, Plibrico Co., USA
Rainer Prange, Wulfrath Refractories, Germany

Monolithic Refractories in the Steel Plant of Voest-Alpine Stahl Linz .................. 255
Peter Reisinger*, Hubert Preblinger, Herbert Mayrhofer, and Norbert Fischer, Voest-Alpine Stahl Linz GmbH, Austria

Introduction of Basic Castables into Steelmaking Practice ........................................ 265
F. Etienne*, J. Lee, and P. Meunier, Lafarge Refractaires Monolithiques, France

Environmental Impact on Refractories for Steel Making ........................................ 275
Remco de Jong*, Hoogovens Steel, Netherlands

Development of High Alumina Sintered Block as an Alternative to Fusion Cast Blocks for Solid Hearth of Pusher Type Reheating Furnace .............. 281
P. Nandi*, R.K. Singh, A. Garg, and P. Barua, Steel Authority of India Limited, India

Spray Insulating Coating for Refractory Articles ........... 287
Regis M. Perich*, North American Refractories Co., USA

Recent Developments of Basic Refractories for the Stainless Steel Production ................ 295
Johannes Hartenstein*, Rainer Prange, and Jürgen Stradtmann, Wulfrath Refractories, Germany

Research on Silica Brick for Hot Stove After 10 Years Service in Baosteel ................... 305
Feifang Gan*, Baoshan Iron & Steel Corporation, China
III. ENGINEERING

Session A
Chairpersons: John P. Willi,
Riverside Refractories, USA
Hitoshi Nishiwaki,
North American Harima Ceramic Co., Ltd., Japan

Design and Performance of Ceramic Matrix Steel
Fiber Reinforced Composites in Refractory
Applications .......................................................... 315
David T. McKeeffrey*, Wahl Refractories, USA; David R.
Lankard, Lankard Materials Laboratory, Inc., USA

Castable Anchoring Optimization to Improve
Service Life of Refractory Linings ................................. 317
Cécile Andrieux-Mamdy*, Victor Gabis, Alain Gasser, and
Philippe Boisse, University of Orleans, France; Rouzbeh
Rezakhanlou, DER, Electricité de France, France

Thermal and Stress Analysis of Casting Ladles by an
Integrated FEM Code ............................................... 327
Gustavo Sánchez Sarmiento, Universidad de Buenos Aires,
Argentina; Análía Gastón*, Universidad Nacional de
Rosario, Argentina

Development of a Method for Quantitative
Assessment of Flexibility and its Application for
Evaluating MgO-CaO-ZrO₂ Bricks ................................ 337
Yoshiharu Kajita*, Satoru Kariya, Hisao Kozuka, Toru Honda,
and Shigetoshi Ota, Mino Ceramic Co., Ltd., Japan

Session B
Chairpersons: John H. Ainsworth,
North American Refractories Company, USA
G. Aliprandi,
University of Genoa, Italy

Thermomechanical Stress Analysis in Brick Linings
by FEM Using Non-Linear Boundary Condition ............ 349
Katsunori Takahashi*, Yoko Miyamoto, and Masato Kumagai,
Kawasaki Steel Corporation, Japan

A Computational Method on the Analysis of
Refractory Material with the Use of Neural Network
and FEM .............................................................. 359
Mitsuo Sugawara*, Hiroshi Kubota, Hiroyuki Miyamoto,
Yuuke Urita, and Minoru Katoaka, Krosaki Corporation,
Japan; Seiya Hagihara and Michihiko Nakagaki, Kyushu
Institute of Technology, Japan

Finite-Element Study of an RH Degasser Bottom and
Throat Area .......................................................... 369
Michael W. Maupin*, National Steel, USA; En-Sheng Chen,
Thermomechanical Design, Inc., USA

Selection of Ladle Lining Materials for
Thermomechanical Performance ............................... 379
En-Sheng Chen*, Thermomechanical Design, Inc., USA;
Hamit Ozurtk and Craig Roulston, BHP Refractories Pty
Ltd., Australia
Thermomechanical Analysis of a Complex Refractory Tundish Flow Modifier During Preheating 389
Jay J. Tu*, Foseco, Inc., USA and Albert E. Segall, The Pennsylvania State University, USA

Correlation Between Thermochemical Reactions and Dimensional Variations in MgO-C Samples 399
R. Gastien* and R.B. Topolevsky, Instituto de Investigaciones Científicas y Técnicas de las Fuerzas Armadas, Argentina; A.E. Pinto, Servicio Geológico Minero Argentino, Argentina

How Ferrous Slag Affects Refractory Performance 409
William J. LaFramboise*, Auburn Analytical Lab, Inc., USA

IV. Refractories for Incinerators and the Glass Industry
Chairpersons: K. Lawrence Stover, Zedmark, USA
J. D. Panda, Dalmia Institute of Scientific and Industrial Research, India

Refractory Experience in Chemical Agent Incineration 431
Charles E. Semler* and Michael S. Crowley, Semler Materials Services, USA; Ed Dean, Raytheon Engineers & Constructors, USA

Long Term Success of a Fiber Lining in Incinerator Ducts 439
Charles E. Semler* and Robert R. Pierce, Semler Materials Services, USA; Robert P. Dominak, Northeast Ohio Regional Sewer District, USA

Mineralogical and Physical Properties of Indian Silica Bricks Used in Glass Tank 447
J. D. Panda*, G. Goswami, and P. Sahu, Dalmia Institute of Scientific and Industrial Research, India; S.K. Choudhury, OCI, India Limited, India

Exudation Behavior of Fused Cast Refractories 455
Dr. Michael Dunkl*, Didier-Werke AG, Germany

V. Recycling of Refractories
Chairpersons: James Bennett, Albany Research Center, DOE, USA
Robert T. Oxnard, Maryland Refractories Co., USA

Waste Minimization in Industries Using Refractory Materials 465
Donald E. Abrino*, North American Refractories Company, USA

Recycling of Spent Refractories and Other Used Materials to Refractory Raw Materials by Fusion 473
William W. Wellborn*, Washington Mills Electro Minerals Corp., USA
Recycling of Spent Refractory Material from Carbon Baking Furnaces

Len Holmes, Kaiser Aluminum and Chemical Corporation, USA; Nick Schubert and Art Mooney, Aluminum Company of America, USA; James Bennett* and Kyei-Sing Kwong, Albany Research Center, DOE, USA

The Recycling of a 70% Al₂O₃ Spent Refractory

K.S. Kwong*, J.P. Bennett, and K.W. Collins, Albany Research Center, DOE, USA; A.E. Wynne III, National Metals, Inc., USA

Recycling Cement Kiln Refractory Brick at Ash Grove Cement Company

Barbara D. Theriot*, Walter L. Greer, and Kenneth J. Rone, Jr., Ash Grove Cement Company, USA

High Temperature Recovery of Spent Refractories at INMETCO

W.J. Koshut*, R.H. Hanswald, and D.M. Hoffman, INMETCO, USA

An Economic, Logistic, and Technological Approach to Refractory Recycling

Jeffrey D. Smith*, Kent D. Peaslee, Amy S. Barnes, and Hui Fang, University of Missouri-Rolla, USA
