Proceedings of
Unified International Technical Conference on Refractories
Fifth Biennial Worldwide Congress

Refractories—A Worldwide Technology
Volume II
Thursday, November 6, 1997

VI. Monolithics

Session C—Shotcreting
Chairpersons: Joseph S. Masaryk, National Refractories & Minerals Co., USA
Yukitoshi Kubota, Shinagawa Refractories Co., Ltd., Japan

Advanced Equipment Systems for Refractory Placement
William G. Allen*, Master Builders, Inc., USA

Shotcreting Self-Flow Refractory Castables
N. Cassens, Jr., R.A. Steinke, and R.B. Videtto*, National Refractories & Minerals Corporation, USA

Development of Spray Operation Method for Self-Flow Castables
Yasushi Ono*, Satoshi Sakamoto, and Eiitchi Kudou, Asahi Glass Co., Ltd., Japan

Spray-Gunning Refractories
S. Banerjee*, Answer Technology, USA; H. Harbin and E. Reno, Reno Refractories, USA

Advanced Monolithic Refractory Technology for Pre-Mixed Castables (PMC)
Rainer Fries*, Rumico Feuerfeste Baustoffe GmbH, Germany; Jürgen Schütz, Basalt-Feuerfeste GmbH, Germany; Hideaki Ohashi, Takashi Hori, and Nobuyuki Izumoto, Nippon Crucible Co., Ltd., Japan

Dewatering Monolithic Refractory Castables: Experimental and Practical Experience
R.E. Moore*, J.D. Smith, and T.P. Sander, University of Missouri-Rolla, USA; N. Severin, Hotwork, USA

Effect of Organic Fiber Additions on Permeability of Refractory Concrete
Jason M. Canon*, Todd P. Sander, Jeffrey D. Smith, and Robert E. Moore, University of Missouri-Rolla, USA

Development and Installation of Low and Ultra-Low Cement Wet Spray Mixes
J.P. Sutton*, Harbison-Walker Refractories Company, USA; M. Kataoka, K. Kawasaki, M. Koga, and V. Tsuji, Krosaki Corporation, Japan
Session D—Self-Flow

Chairpersons: Nancy Bunt, Lafarge Aluminates, France
              M.V. Murugappan, Carborundum Universal Ltd., India

A Model Analysis of Refractory Castables: Self-Flow for Testing Optimization 605
- Edison S. Octaviano, Academia da Força Aérea Campo Fontenelle, Brazil;
  Sylma C. Maestrelli, Walter Libardi, and João B. Baldo*, Universidade Federal de São Carlos, Brazil

Rheology Studies on Binding Systems for Self-Flow Refractory Castables 613
- G. Oprea*, Clayburn Refractories, Canada; T. Troczynski and F. Esanu, University of British Columbia, Canada

The Effect of Aggregate Shape and its Aspect Ratio on the R-Curve Behavior of a Refractory Castable 625
- Flávia N. Cunha, Laura B. Prata, Walter Libardi, and João B. Baldo*, Universidade Federal de São Carlos, Brazil

Flow Control of Low-Cement Self-Flow Castables 635
- Vicki Jones*, Alcan Chemicals Limited, United Kingdom

The Matrix Advantage System, New Raw Materials for Low Moisture, Self-Leveling, and Vibration Placed Alumina and Magnesium Aluminate Spinel Castables 645
- G.W. Kriechbaum*, J.O. Laurich, D. van Garsel, V. Gnauck, Alcoa Industrial Chemicals Europe, Germany; J. van der Heijden, Alcoa Nederland B.V., Netherlands

Role of Aggregates on Properties and Performance of ULCC Based Products 657
- Bashir Mohammed*, S.K. Chaudhuri, N.K. Mishra, and Prasenjit Saha, OCL India Limited, India

Pozzolans in Calcium Aluminate Cement Castables 667
- K. Sujata* and Adam Holterhoff, Jr., Lehigh Portland Cement Company, USA

Compositional Variables and Their Effect on Steel Slag Resistance and Hot Strength of High Alumina-Spinel Castables 675
- Robert A. Marra*, Scott Haling, and Siva Soora, Alcoa Industrial Chemicals, USA
VII. Refractories for the Steel Industry

Session E—Blast Furnace/MgO-C

Chairpersons: James J. Uchno, North American Refractories Co., USA
D.T. Evans, Hepworth Refractories, United Kingdom

The Slag Under Load Technique Applied to Blast Furnace Taphole Mixes 683
Luis Augusto Marconi Scudeller*, USIMINAS, Brazil; José de Anchieta Rodrigues, and Victor Carlos Pandolfelli, Federal University of São Carlos, Brazil

Development and Application of High Al₂O₃ Taphole Clays for Blast Furnace 693
S.I. Youn*, K.C. Kim, and M.I. Choi, Chosun Refractories Co., Ltd., Korea

The Properties of SiC-Based Refractories and Their Application in Blast Furnace 705
Zhao Junguo*, Zhang Zhiping, Huang Haihuang, and Huang Zhaohui, Luoyang Institute of Refractories Research, China

High Viscosity Glass-Forming Additions in Magnesia-Graphite Brick 711
Stefan Palco* and Anton Rybar, Resco Products, Inc., USA; Vladimir Kovac, Ecole Polytechnique, Canada

Latest Achievements in Tempering of Pitch and Resin Bonded Basic Bricks 721
Jürgen Mendheim*, Georg Mendheim GmbH, Germany

Development and Application of Lower Emission Magnesia-Graphite Product for Steelmaking Vessels 725
D.T. Evans*, M. Frith, and I. Strawbridge, Hepworth Refractories, United Kingdom; R. Sainsbury and I. Seward, Hepworth Minerals and Chemicals, United Kingdom

Inductively Heated Refractories and Their Applications 735
Raimund Brückner*, Daniel Grimm, and Jivan Kapoor, Didier Werke AG, Germany

Session F—MgO-C

Chairpersons: Jeffrey D. Smith, University of Missouri-Rolla, USA
N. Sahoo, Dalmia Institute of Scientific and Industrial Research, India

Mineralogy of the Carbon Containing Steelmaking Refractories 745
Musa Karakus*, Jeffrey D. Smith, and Robert E. Moore, University of Missouri-Rolla, USA

Thermodynamic Calculations of Reactions Inside MgO-C-Antioxidant Linings 755
R.J. Sarkkinen* and J.J. Härkö, University of Oulu, Finland
Different Compositions of MgO-C Bricks Used in 
Ladle Slag Line .................................................. 765
L.A. Zamboni and R.E. Caligaris, Universidad Tecnológica 
Nacional, Argentina; A. Vanola* and C. Gisbert, R.A.S.A. 
S.A., Argentina

The Effect of Organic Fiber Additions on the 
Mechanical Properties of MgO-C Bricks .................. 775
Eduardo Sereno*, Refractarios Mexicanos, S.A. de C.V., 
Mexico; Denis A. Brosnan, Clemson University, USA

Replacement of Magnesia Chrome Refractory Bricks by 
Magnesia Carbon in VOD Ladles ......................... 783
N. Sahoo* and J.D. Panda, Dalmia Institute of Scientific and 
Industrial Research, India; S.K. Choudhury and S. 
Mukhopadhyay, OCL India Limited, India

The Effect of B4C and CaB6 Additions in MgO-C 
Bricks ............................................................... 789
Klaus Hunold*, Elektroschmelzwerk GmbH, Germany; 
Markus Ollig and Jürgen Pötschke, DIFK, Germany; 
Tadeusz Rymon-Lipinski, EUROMAT GmbH, Germany

Environmentally Friendly MgO-C Products with 
Non-Phenol Resin .............................................. 799
Yasuhiro Hoshiyama*, Hidenori Tada, Atsushi Torigoe, 
Osamu Nomura, and Kenji Ichikawa, Shinagawa Refractories 
Co., Ltd., Japan

Effects of Boron Bearing Additives on Oxidation and 
Corrosion Resistance of Doloma-Based Carbon-
Bonded Refractories ........................................... 807
Fangbao Ye*, Michel Rigaud, Ecole Polytechnique, Canada; 
Xiangchong Zhong, Luoyang Institute of Refractories 
Research, China

VIII. RESEARCH

Session A - SiC/Al2O3-C
Chairpersons: James L. Hill, 
A.P. Green Industries, Inc., USA
R. Jhunjhunwala, 
Orissa Industries Limited, India

Advances in Alumina-Carbon Refractories ............. 821
R. Jhunjhunwala*, M.M. Sahu, and R.K. Koley, Orissa 
Industries Limited, India

The Nature of the Bond in Silicon-Containing 
Alumina-Carbon Refractory Composites—Part I ......... 831
Waldir Vieira, Jr.*, Magnesita S.A., Brazil; Brian Rand, 
University of Leeds, United Kingdom

The Effect of B4C Addition on the Oxidation 
Resistance of Al2O3-C and Al2O3-SiC-C Refractories .... 841
Hiroyuki Sunayama*, Masayasu Kawahara, and Toshiharu 
Mitsuo, Kumamoto University, Japan; Keisuke Sumitomo, 
Wake Refractory Co., Ltd., Japan
Microstructure Development in Pitch-Containing Alumina-Carbon Refractory Composites
Waldir Vieira, Jr.*, Magnesita S.A., Brazil; Brian Rand, University of Leeds, United Kingdom

A Comparison of Al, Si, and Al₄SiC₆ Added to Al₂O₃-C Refractories
Shaowei Zhang* and Akira Yamaguchi, Nagoya Institute of Technology, Japan

Effects of Slag Compositions on the Oxidation Behavior of Silicon Carbide (II)
Ronne Hendrajaya, Makoto Ishikawa*, Mitsuru Wakamatsu, and Koji Watanabe, Taiko Refractories Co., Ltd., Japan; Nobuyuki Takeuchi and Shingo Ishida, Kyoto Institute of Technology, Japan

Dissolution Kinetics of SiC Refractories in COREX Smelting Reduction Slag
Chen Haiyan*, Wu Xuezhen, and Zhang Zhiping, Luoyang Institute of Refractories Research, China

Session B—Alumina
Chairpersons: D.S. Whittemore, Harbison-Walker Refractories Company, USA
A.K. Chattopadhyay, The Associated Cement Cos., Ltd., India

Mullite Bonded Tabular Alumina Brick Exposed to a Ca-Mn-Fe Slag
Richard J. Volk*, Wellsville Fire Brick Company, USA

Mullitization of Andalusite in Bricks and Castables
Jean-Pierre Ildefonse and Victor Gabis, Université d’Orléans, France; Michel Rigaud* and Lionel Rebourillat, Ecole Polytechnique, Canada; Pierre Daniellou and Pierre Dubreuil, Damrec, France

Thermal Shock Resistance of 60 to 80% Alumina Brick
D.S. Whittemore* and S.R. Pavlica, Harbison-Walker Refractories Company, USA

Properties and Phase Relationships of Alumina-Chromia Refractory Systems
B.J. Hauer, D.P. Heitzenrater, and P.L. Yoder*, BMI France, USA

Effect of Mullite in the Decomposition and Densification of Aluminum Titanate
P.D.D. Ferrari, J.L. dos Santos, and R.H.G.A. Kiminami*, Federal University of São Carlos, Brazil

Refractory Sheet-Type RSLE—A New Family of Low-Expansion Fiber Reinforced Ceramic Matrix Composites
David Hamling*, ZIRCAR Products, Inc., USA
Thermomechanical Properties of Corundum-Mullite-Zirconia Materials ........................................... 943
X.C. Zhong* and G.C. Sun,
Luoyang Institute of Refractories Research, China

Phosphate Bonded High-Alumina Refractories ............ 953
Yubang Zheng, University of Wollongong, Australia

IX. RAW MATERIALS

Session A

Chairpersons: Charles G. Marvin,
The Refractories Institute, USA
P.G. Whiteley,
Hepworth Refractories, United Kingdom

Crystalline Silica—An Update ................................. 967
Charles G. Marvin*, The Refractories Institute, USA

Phenolic Resins as Impregnating Agents for
Refractories—Present State of Development ............. 975
A. Gardziella and J. Suren*, Bakelite AG, Germany

A Rigorous Introduction to Natural Graphites: Part I—
The Mineralogy, Geology, Molecular, and
Crystallographic Structure of Natural Graphite ..... 999
Albert V. Tamashausky*, Asbury Graphite Mills, Inc., USA

A Rigorous Introduction to Natural Graphites:
Part II—The Schematic Growth of Natural Graphite,
Bonding and Anisotropy, Form and Function .......... 1003
Albert V. Tamashausky*, Asbury Graphite Mills, Inc., USA

Influence of Sintermagnesia Properties on Their
Resistance to Attack by BOF Slags ......................... 1005
A.M. Ryder* and G.F. Quinn,
Premier Periclase Limited, Ireland

Modification of Raw Refractory Materials by TiO₂
Coating ............................................................. 1019
Jingkun Yu*, Satoru Ueno, and Keisuke Hiragushi,
Okayama Ceramics Research Foundation, Japan

Session B

Chairpersons: Dilip C. Jain,
C-E Minerals, USA
G. Banerjee,
Central Glass & Ceramic Research Institute,
India

Utilization of Serpentine for the Development of
Forsterite Refractories ......................................... 1031
Central Glass & Ceramic Research Institute, India
Thermal Shock Resistance and Chemical Wear Resistance of Various Refractory Raw Materials of Magnesia .................................................. 1037
Uong Chen*, Doo Ha Jeong, Seok Keon Lee, and Hyo Joon Kim, Research Institute of Industrial Science and Technology, South Korea; Bo Kuk Jang, Posco Refractories Co., Ltd., South Korea

Development of Magnesium Aluminate Spinel by Solid Oxide Reaction .................................................. 1053
Ritwik Sarkar, Kaberi Das, S.K. Das, and G. Banerjee*, Central Glass & Ceramic Research Institute, India

Lime Refractories of General Use .................................................. 1059
G.I. Kuznetsov*, V.M. Gropyanov, and A.V. Gropyanov, St. Petersburg Institute for Refractories, Russia

Investigation on Pyrophyllite (Roseki) Produced in Japan and its Application to Artificial Refractory Raw Materials .................................................. 1067
Keisuke Hiragushi* and Yu Jihkun, Okayama Ceramics Research Foundation, Japan

Brown Tabular Alumina—A Unique Indian Experience with a High-Performance Synthetic Refractory Aggregate .................................................. 1077
A.K. Chattopadhyay*, I.N. Chakraborty, and A.K. Jain, The Associated Cement Companies, Ltd., India

Development of Hydraulic Zirconia Cements and their Application for Producing Refractory Items .................................................. 1089
Nicolai Ilyoukha* and Valentina Tinofeeva, The Technical University, Ukraine

Characterization of Refractory Material During its Evolution from Natural Raw Material to Circulated Material .................................................. 1099
Kyosti Ruotanen*, BET-KER OY, Finland

The Status and Development of Bauxite in China .................................................. 1109
Wu Lizhong* and Liu Shuhe, Ministry of Metallurgical Industry, China

X. EDUCATION

Session A
Chairpersons: Richard C. Bradt, The University of Alabama, USA
Victor Carlos, Federal University of São Carlos, Brazil

Overview of the Refractories Education in Japan .................................................. 1121
Akira Yamaguchi*, Nagoya Institute of Technology, Japan

The Brazilian Experience on Refractories Education .................................................. 1125
José de Anchieta Rodrigues* and Victor Carlos Pandolfelli, Universidade Federal de São Carlos, Brazil
Education on Refractories in Germany—How to Acquire Candidates for Current Markets .......................... 1135
P. Dietrichs*, R. Telle, and W. Schulle,
Institut für Gesteinshüttenkunde, RWTH, Germany

Refractories Education in the United States of America ........................................................................... 1137
A. Clare and V. Burdick*, Alfred University, USA; J. Wenzel, Rutgers University, USA

Some Ongoing Research Programs on Refractories for Graduate Students in China ................................. 1145
Xiangchong Zhong*,
Luoyang Institute of Refractories Research, China

Refractories Education in India ................................ 1153
N.R. Sircar*, Indian Ceramic Society, India; P. DasGupta, Indian Refractory Makers Association, India

Refractories Education by Short Courses/Seminars ................................................................. 1161
Richard C. Bradt*, The University of Alabama, USA; Denis A. Brosnan, Clemson University, USA; Michael S. Crowley, M.S. Crowley, Ltd., USA; Michel A. Rigaud, Ecole Polytechnique, Canada; Charles E. Semler, Semler Materials Services, USA

What Could be Done to Restore Refractories Education in France .......................................................... 1169
Victor M. Gabis*, The University of Orleans, France

Refractory Educational Programs in Iran ............................................................. 1173
Farhad Golestani-Fard*, Iran Univ. of Science & Technology, Iran; Mohammad Ali Bahrevar, Materials & Energy Research Centre, Iran

Session B
Chairpersons: Charles E. Semler, Semler Materials Services, USA
Xiangchong Zhong, Luoyang Institute of Refractories Research, China

Refractories Education in the U.K. ........................................ 1183
W.E. Lee*, University of Sheffield, United Kingdom

Refractories Education in Mexico ........................................ 1189
Anabel Alvarez-Méndez and Leticia M. Torres-Martínez*, Universidad Autonoma de Nuevo León, Mexico

Education on Ceramics in Italy with Particular Reference to Refractories ........................................... 1199
G. Aliprandi*, University of Genoa, Italy

Refractories Education in Portugal ........................................ 1203
Ana M. Segadões*, University of Aveiro, Portugal

Refractories Education in Finland ........................................ 1209
J.J. Harkki* and R.J. Sarkkinen, University of Oulu, Finland

Challenge in Science and Engineering of Refractory Materials in Romania ...................................... 1215
E. Volceanov*, A.T. Abagiu Metallurgical Research Institute, Romania; A. Volceanov, University "Politehnica" of Bucharest, Romania
Refractories Education in China .......................... 1223
   Li Nan*, Wuhan Yejin University of Science and Technology, China

Refractory Education in Canada .......................... 1229
   Michel Rigaud*, Ecole Polytechnique, Canada

Refractories and Glass Education: A Comparison .... 1235
   Jack Wenzel*, Rutgers University, USA

Refractory Education in Australia ........................ 1243
   D.E. Ellson*, Advanced Refractories Consultants Pty. Ltd., Australia

INDEX ...................................................... I–1
