Heft 15

Proceedings of a RILEM-WTA-Seminar on High Performance of Cement-Based Materials held at ETH Zürich, September 22nd, 1997

High Performance of Cement-Based Materials

Edited by
Folker H. Wittmann

AEDIFICATIO Verlag GmbH
D - 79104 Freiburg und CH - 8103 Unterengstringen/Zürich
Fraunhofer IRB Verlag
D - 70569 Stuttgart

Table of Contents

Preface	VII
Table of Contents	IX
F. H. Wittmann High Performance Cement-Based Materials: Versatile New Products	3
P. Schwesinger, G. Ehlert, and G. v. Haza-Radlitz High Strength Concrete, Properties and Design	15
W. Schwarz Concrete with High Early Strength	31
A. Bergamini High Fracture Energy, High Ductility	73
Å. Skarendahl and Ö. Petersson Self Compacting Concrete	101
M. Corradi and R. Khurana New Generation of Superplasticizers	119
P. Lunk and F. H. Wittmann High Resistance with Respect to Chloride Penetration	133
A. Gerdes Protective Coatings of Concrete Structures for High Durability	157

G. Martinola, L. Trausch and H. Sadouki The Ring Test for Optimizing Low Shrinkage Concrete	173
A. Schiegg Cement-based Materials with High Resistance to Hydrolysis	197
Brief Bibliography	213
