21 Biomedical DSP I

21.1 Application of Methods of Non-Linear Dynamics in Comparison to Traditional Methods in Heart Rate Variability Analysis ........................................ 483
A. Voss, J. Kurths, H.J. Kleiner, A. Witt, R. Dietz, P. Saparini, N. Wessel

21.2 Multiple Knot Spline Approximation for ECG Data Compression ........... 487
Marta Karczewicz, Matti Hamalainen, Moncef Gabbouj

21.3 Application of Nonlinear Filters to Analysis of Sleep Process .............. 491
A. Asano, A. Varri, N. Takano, J. Hasan, P. Loula, V. Hakkinen

21.4 A Comparison of Linear and Nonlinear Techniques for Distinguishing Phase-Dissimilar VEP’s ................................................................. 495
André J.W. van der Kouwe, Pierre J. Cilliers

21.5 Non Linear Dynamics in Heart Rate Variability Signal Through Deterministic Chaotic Approach ................................................................. 499
Maria G. Signorini, Sergio Cerutti, Angela Filannino, Stefano Guzzetti

22 Color Image Filtering, Analysis and Applications Special Session

22.1 Multichannel Filters Using Composite Distance Metrics ..................... 503
S. Fotopoulos, G. Economou

22.2 Optimal Multichannel L Filters Based on Reduced Ordering ................ 507
N. Nikolaidis, I. Pitas

22.3 Colour Image Edge Detection Using Directional Operators .................. 511
J. Scharcanski, A.N. Venetsanopoulos
22.4 Directional Segmentation of Color Images ........................................ 515
P.E. Trahanias, D. Karakos, A.N. Venetsanopoulos

22.5 ‘Color’ Spaces for Visual and Physical Image Processing ................. 519
M. Mahy, P. Wambacq, A.

22.6 New Methods for Dithering of Color Images .................................. 523
Lale Akarun, Yasemin Yardimci, A. Enis Çetin

22.7 Visual Industrial Inspection and Colour ........................................... 527
M. Petrou, C. Boukouvalas

22.8 Uniformity Inspection of Color Textures ......................................... 531
Rusen Meylani, Aytul Ercil

22.9 Colour Image Processing Using Fuzzy Vector Directional Filters .......... 535
K.N. Plataniotis, D. Androutsos, A.N. Venetsanopoulos

23 Nonlinear Signal and Image Processing with Higher and
Fractional Lower Order Statistics
Special Session

23.1 Higher-Order Spectra Based Deconvolution of Ultrasound Images ........ 539
Udantha R. Abeyratne, Athina P. Petropulu, John M. Reid

23.2 Blind Blur Identification and Multichannel Image Restoration
Using Cyclostationarity ................................................................. 543
Georgios B. Giannakis, Wei-ge Chen

23.3 Comparison between Four 2D Signals Bispectral Estimators ............... 547
J.M. Le Caillec, R. Garello, T. Wardyn, B. Chapron

23.4 Bispectral Analysis of Continuous-Time Processes Under
Irregular Sampling ........................................................................... 551
Keh-Shin Lii, Tai-Houn Tsou

23.5 Improvements of a Third-Order Cumulant Classifier by Lag Selection ... 555
C. Ottonello, S. Pagnan
23.6 Parallel Algorithms and Architectures for the Estimation of Higher Order Statistics ................................................................. 559
Elias S. Manolakos, Haris M. Stellakis, John Kalamatianos

23.7 Array Signal Processing in the Alpha-Stable Framework: Detection and Localization of Sources in Impulsive Noise Environments .................. 563
Panagiotis Tsakalides, Chrysostomos L. Nikias

23.8 Modelling, Parameter Estimation, and Signal Detection in Radar Clutter with Alpha-Stable Distributions ........................................ 567
George A. Tsihrintzis, Chrysostomos L. Nikias

23.9 A New Filter for Highly Impulsive $\alpha$-Stable Noise ....................... 571
S. Ambike, D. Hatzinakos

23.10 Robust Signal Detection Based on Fractional Lower-Order Statistics ...... 575
George A. Tsihrintzis, Chrysostomos L. Nikias

24 Neural Networks III

24.1 A Growing-Decreasing Method for Designing Neural Filters ............... 579
Adriana Dumitras, Vasile Lazarescu, Adrian T. Murgan

24.2 A Neural Network Approach to Sequential Robust Detection ............... 583
Evriclea Voudouri-Maniati, Ludwik Kurz

24.3 Deconvolution and Separation of Signals using Neural Networks .......... 587
Stanislaw Osowski, Piotr Bojarczak

24.4 Learning with Discipline: Smart Neural Nets .................................. 591
B.W. Dahanayake, A.R.M. Upton

24.5 Classification of Newspaper Image Blocks Using Neural Networks ......... 595
George M. Papadourakis, Ioannis Kavaklis

24.6 Information Reduction by Linear and Nonlinear Digital Filters
Richard Harvey, J. Andrew Bangham, Richard V. Aldridge, Graham D. Tattersall

XXI
Included in the Late Arrival Section

24.7 Parameter Estimation with Neural Networks for Multipath Radio Channels
Alexandru Murgu
Not arrived at the date of printing

25 Restoration and Median Filtering

25.1 Edge Deblur by Separating the Laplacian into a Positive and a Negative Component ........................................... 599
John Immerkaer

25.2 Parallel Tabu Search for Robust Image Filtering .............................. 603
Robert Laganière, Amar Mitiche

25.3 An Adaptive Nonlinear Filter for Detection and Removal of Impulses .......... 607
Ralph Sucher

25.4 On Selection Probability Matrices and DOS-filters ........................... 611
S. Siren, P. Kuosmanen, K.O. Egiázarian

25.5 Model Based Approach to Optimal Stack Filter Design in the Threshold Domain .................................................. 615
Ioan Tăbăuș, Moncef Gabbouj

25.6 Rank Filters as an Instrumentation Tool for Image Processing ............... 619
Leonid P. Yaroslavsky

25.7 An Impulsive Noise-Robust Wiener Filter with a Rank Conditioned Preprocessor ......................................................... 622
Soon Young Park

25.8 A Novel Nonlinear Vector Filter for Grey-Level Image Filtering ............... 626
Kaijun Tang, Moncef Gabbouj, Jaakko Astola

25.9 A Vector “Rank Filter” Application to Multi-Spectral Image Filtering ........ 630
Wael Alshatti, Philippe Bolon, Patrick Lambert

XXII
25.10 Multivariate Median Filtration from Multivariate Ordering .......................... 634
Duncan Tamsett, Stephen J. Impey, J. Andrew Bangham

25.11 Neural Least-Squares Image Filter with Positive Constraints
Jaroslav Szostakowski, Slawomir Skoneczny
Not arrived at the date of printing

25.12 Non-convex Regularisation
Mila Nikolova
Not arrived at the date of printing

26 Speech and Communications

26.1 Definition of a New Non-Linear Modulation Scheme ................................. 638
Niels D. Aakvaag, Bernard Lacaze

26.2 Multi-Component Signal Demodulation and Reconstruction
Using AM-FM Modulation Models .......................................................... 642
Joseph P. Havlicek, David S. Harding, Alan C. Bovik

26.3 Compensation of Nonlinear Distortions on QAM Signals
by an Improved Simple TCM Technique .................................................. 646
C.E. Dimakis, A.T. Hiladakis, S.S. Kouris

26.4 Real-Number Error-Control Coding as a New Technique
for Nonlinear Filtering ................................................................. 650
Jiun Shiu, Ja-Ling Wu

26.5 A Multiresolution Extended Kalman Filter to Estimate
Parameters of a Passive Acoustic Signal .............................................. 654
Anthony Reid

26.6 Dereverberation of True Speech Recordings: A two Channel
Blind Deconvolution Approach ......................................................... 658
Suresh Subramaniam, Athina P. Petropulu, Christopher Wendt

26.7 Non-Linearities in Speech .............................................................. 662
Jes Thyssen, Henrik Nielsen, Steffen Duus Hansen
26.8 Speech Enhancement by Soft Thresholding in the Perceptual Wavelet Domain .................................................. 666
István Pintér

26.9 Robust Modified Generalized Likelihood Ratio (MGLR) Algorithm for Speech Abrupt Change Detection ....................... 670
Milan Milosavljević, Mladen Veinović, Branko Kovačević

26.10 Statistical Study of Cepstrum Coefficients Derived from a Random AR Process .................................................. 674
Jean-Yves Tourneret, Bernard Lacaze

26.11 Prefiltering-based MUSIC for Harmonic Retrieval in Non-Gaussian ARMA Noise
Ying-Chang Liang, Xian-Da Zhang, Yan-Da Li
Not arrived at the date of printing

27 Image Analysis

27.1 Occlusion Analysis of Two-Dimensional Objects .......................... 678
Cuneyt Taskiran, Bulent Sankur, Emin Anarim, Yorgo Istefanopulos

27.2 Selective Attention within a Visual Processing Pyramid ..................... 682
John K. Tsotsos, Evangelos E. Milios

27.3 Real Time Image Recognition Experiments Using Holographic Memories .................. 686
D. Psaltis, A. Pu, X. An, M. Levene, R. Denkewalter, G. Barbastathis

7.4 Is the Visual Cortex a “Lie Algebra Machine”? -Invariant Object Recognition using Lie Algebra of Perceptual Vector Fields ..................... 690
nhui Chao, Kenji Minowa, Akira Karasudani, Shigeo Tsujii

5 Efficient Parallel Algorithms for the Extraction of Invariant age Features .................................................. 694
Nolle, G. Schreiber, H. Schulz-Mirbach

XXIV
28 Motion

28.1 Optic Flow Field Segmentation and Motion Estimation Using a Robust Genetic Partitioning Algorithm ................................................................. 698
Yan Huang, K. Palaniappan, Xinhua Zhuang, Joe Cavanaugh

28.2 Median Radial Basis Functions Network for Optical Flow Processing .......... 702
Adrian G. Borș, Ioannis Pitas

28.3 Nonlinear Estimation of Image Motion in a Sequence of Images ...................... 706
Florence Germain, Thomas Skordas, Patrick Bouthemy

28.4 Motion-Partitioned Adaptive Block Matching for Video Compression ............. 710
Yan Huang, Xinhua Zhuang

28.5 Motion Estimation by Using Artificial Neural Networks ............................. 714
Olaf Schnelting, Bernd Michaelis, Rudiger Mecke

29 Nonlinear Image and Image Sequence Processing
Special Session

29.1 Extraction of High-Resolution Frames from Video Sequences ....................... 718
Richard R. Schulz, Robert L. Stevenson

29.2 Morphological Representation of Wavelet Data for Image Coding ................. 722
Sergio Servetto, Kannan Ramchandran, Michael Orchard

29.3 Model-Based Motion Estimation with Adaptive Data Dimensionality ............. 726
Regis J. Crinon

29.4 Orderings Analysis and Stack Filters ......................................................... 730
Mohit K. Prasad

29.5 Nearest Neighbor Filters for Multivariate Data ......................................... 734
Visa Koivunen, Saleem A. Kassam

29.6 Fuzzy Stack Filters - Their Definitions, Fundamental Properties and Application in Image Processing ....................................................... 738

XXV
29.7 Image Interpolation using Wiener Filters and Neural Networks .......... 742
Gin Man Cheung, Bing Zeng

29.8 Multichannel Permutation Filters: Definition and Optimization ........ 746
Samit K. Basu, Gonzalo R. Arce, Kenneth E. Barner

29.9 Nonlinear Image Restoration in Confocal Microscopy: Stability under Noise .................................................. 750
J.B.T.M. Roerdink

29.10 Nonlinear Redundant Wavelet Methods for Image Enhancement ........ 754
M. Lang, H. Guo, J.E. Odegard, C.S. Burrus

30 Nonlinear Dynamic Image Processing using the CNN Paradigm and Analogic Visual Microprocessors
Special Session

30.1 The Analogic CNN Paradigm: Constructive Spatiotemporal Dynamics ...... 758
Leon O. Chua

30.2 Design and Learning with Cellular Neural Networks ............................................. 760
Josef A. Nossek, Georgios Papoutsis

30.3 A Stored Program Analogic CNN Universal Chip ................................................. 764
Servando Espejo, Angel Rondriquez-Vazquez, R. Dominguez-Castro

30.4 Classes of Analogic CNN Algorithms and their practical use in Complex Image Processing Tasks ...................... 767
Tamás Roska, Tamás Szirányi

30.5 Using CNN to Unravel Space-Time Processing in the Verterbrate Retina
Frank Werblin, Adam Jacobs
Included in the Late Arrival Section
31 Fractals and Multiscale Difference Equation Models
Special Session

31.1 Coding and Decoding Techniques for Multiscale Difference Equation Signal Models ................................................. 771
Murtaza Ali, Ahmed Tewfik

31.2 The Application of Fractal Signals to Communications ................................................................. 775
Graham C. Freeland, Tariq S. Durrani

31.3 Multiresolution Models for Fractals and Their Uses in Statistical Signal and Image Processing ........................................... 779
Alan S. Willsky, P. Fieguth

31.4 Multiresolution Representations and Algorithms for Fractal Point Processes ...................................................... 783
Warren M. Lam, Gregory W. Wornell

31.5 Statistical Models for Channel Combination and Selection .............................................................. 787
J.A.F. Leite, E.R. Hancock

32 Biomedical DSP II

32.1 A Multiresolution Entropy Approach for Detecting Epileptiform Activity in EEGs ............................................. 791
Maria Torres, Lucas Gamero, Carlos D'Attellis

32.2 Nonlinear Signal Dynamics of Short-Term EEG Time Series Containing Slow Transients ........................................ 795
D. Popivanov, A. Mineva, J. Dushanova, I. Krekule

32.3 Esophagus Inner Wall Detection on Echo-Endoscopic Images Sequence ................................................ 799
Florence Pipelier, Patrice Danduran, Basel Solaiman, Christian Roux, Robaszkiewicz

32.4 Data Cylinders in Medical Image Fusion .................................................. 803

32.5 Combined Analysis of Multichannel MEG and EEG revealing Epilepsy Related Signals in Background Activity of the Brain .......................... 807

XXVII
32.6 Evaluation of Work Load in 3D Positron Emission Tomography Image Reconstruction using Backprojection Filtering
V. Di Lecce, E. Di Sciascio, A.R. Manni

811

32.7 A Cellular Backprojection Algorithm for 3-D Positron Emission Tomography Image Reconstruction
V. Di Lecce, E. Di Sciascio

815

32.8 LIP-based 3D-Image Reconstruction and Visualization of Human Jaws
P. Gremillet, J.L. Coudert, M. Jourlin, J.C. Pinoli

819

33 Detection, Estimation, Modeling

33.1 A Contribution to Nonlinear System Theory
Hans Burkhardt, Hans Schulz-Mirbach

823

33.2 Optimal and Suboptimal Filtering for Radiation Signals
Arnaud Doucet, Patrick Duvaut

827

33.3 Estimation of 1/f Processes
Brett M. Ninness

831

33.4 Robust Modeling of Multivariate Signals by Iteratively Reweighted Nonlinear Least Squares
Yasemin Yardimci

835

33.5 Signal Detection and Classification in Multiplicative and Additive Noise
Ananthram Swami, Georgios B. Giannakis

839

33.6 A General Complexity Measure for Signal Identification Using Bayesian Inference
Anthony Quinn

843

33.7 Misadjustment Analysis of the Multistage Constant Modulus Array

847

XXVIII
33.8 Robustness Issues in Bispectral Estimation ........................................ 851
Ronald K. Pearson, Athina P. Petropulu

33.9 Estimation of Wiener Kernels of a Nonlinear System by means of
Digital Laguerre Filters and their Fast Algorithm .................................... 855
Hisanao Ogura

33.10 Detection of Abrupt Changes in a Signal
Tania Stathaki, A.G. Constantinides
Included in the Late Arrival Section

34 Novel Implementations of Nonlinear Operators
Special Session

34.1 Hardware Implementation of the Watershed Zone Algorithm
Based on a Hierarchical Queue Structure .............................................. 859
J.C. Klein, F. Lemonnier, M. Gauthier, R. Peyrard

34.2 An Objective Quality Index for Self-Evaluation of
Image Segmentation by Cellular Operators ........................................ 863
Jérome Dauvillier, Francis Devos

34.3 A Dedicated Hardware System for the Extraction of Grid
Patterns on Stamped Metal Sheets ..................................................... 867
R. Peyrard, P. Soille, J.-C. Klein, M. Bilodeau, A. Tuzikov, H. Bruneel, I. De Rycke

34.4 Fast Running Max/Min Filters .................................................... 871
Dinu Colțuc, Ioannis Pitas

34.5 Novel VLSI Architectures for Morphological Filtering ...................... 875
Sezer Goren, Sina Balkir, Gunhan Dundar, Emin Anarim

XXIX
35 Parallel Processing Techniques
Special Session

35.1 Threshold Boolean Filtering Based on Pattern Classification .......................... 879
J.T. Astola, K.O. Egiazarian, D.A. Akopian, D.Z. Gevorkian

35.2 Parallel Digital Signal Processing Algorithms on
Barrel Shifter Computers ................................................................. 883
G. Angelopoulos, I. Pitas

35.3 The Effect of Changing the Weighting of Errors in the Mean
Absolute Error Criterion upon the Performance of Stack Filters ...................... 887
J.-J. Huang, E.J. Coyle, G.B. Adams III

35.4 A Parallel Programmable Architecture for Linear and
Nonlinear Filtering ................................................................. 891
Lori Lucke, Chaitali Chakrabarti

35.5 Trading off Concurrency for Low-Power in Linear and
Nonlinear Computations ................................................................. 895
Keshab K. Parhi

36 Median filters II

36.1 Matched Median Filters for Polyphase Pulse Compression ......................... 899
Risto Wichman

36.2 Nonlinear Image Filtering by Use of Topological Information ......................... 903
D. Del Bianco, A. Sericano, F. Fontana, S. Dellepiane

36.3 Adaptive L-filters Based on Fuzzy Rules ........................................... 907
Akira Taguchi, Mitsuhioko Meguro, Fabrizio Russo

36.4 Extended Threshold Boolean Filters: Representations and Design .................. 911
Ryeongjang Jeong, Jongkwan Song, Yong Hoon Lee

36.5 Weighted Median Filters with Sigma-Delta Modulation Encoding .................. 915
Gonzalo R. Arce, Nikolai A. Grabowski, Neal C. Gallagher

XXX
36.6 Analysis and Optimization of RCRS filters with Fixed Rank Selection Probabilities .................................................. 919 Heikki Huttunen, Pauli Kuosmanen, Jaakko Astola

36.7 Breakdown Probabilities of Stack Filters .................................................. 923 Pauli Kuosmanen, Jaakko Astola

36.8 Stack Filters and Free Distributive Lattices .................................................. 927 I. Shmulevich, T.M. Sellke, M. Gabbouj, E.J. Coyle

36.9 Multiscale Decomposition: the Recursive Median Datasieve and its relation to other Sieves J. Andrew Bangham, Paul Ling, Robert L. Young Included in the Late Arrival Session

37 Polynomial Filters
Special Session

37.1 A Third-Order Frequency-Domain Adaptive Volterra Filter ......................... 931 Sungbin Im, Edward J. Powers

37.2 Competitive Estimation of Polynomial Filter Banks ................................. 935 Carlos J. Pantaleon-Prieto, Anibal R. Figueiras-Vidal

37.3 Adaptive Stabilization of Recursive Second Order Polynomial Filters by Means of a Stability Test .............................................. 939 Alberto Carini, Enzo Mumolo

37.4 A Novel Algebraic Formulation for the Development of Adaptive Volterra Filtering Algorithms .................................................. 943 Alberto Carini, Enzo Mumolo

37.5 2-D Nonlinear Adaptive Filtering for Image Restoration .............................. 947 Kyung Sub Joo, Tamal Bose, Jon W. Hall Jr.

37.6 Volterra Filter Approximations ................................................................. 951 Robert D. Nowak, Barry D. Van Veen

XXXI
37.7 Instantaneous Energy Operators: Applications to Speech Processing and Communications ........................................ 955
Petros Maragos, Alexandros Potamianos, Balasubramaniam Santhanam

37.8 Two-Dimensional Teager Operators and Their Image Processing Applications ........................................... 959
Sanjit K. Mitra, Stefan Thurnhofer, Michael Lightstone, Norbert Strobel

37.9 A Simple Cubic Operator for Sharpening an Image ................................................................. 963
Giovanni Ramponi

37.10 Adaptive Binarization of Document Images ............................................................. 967
Shan Mo, V. John Mathews

38 Mathematical Morphology and Fuzzy DSP

38.1 Bounded Gray-Level Morphology for Image Representation .............................................. 971
Demin Wang, Joseph Ronsin

38.2 Rank-Order Morphological Filters: A New Class of Filters ........................................ 975
Neal R. Harvey, Stephen Marshall

38.3 1D and 2D Jordan Decomposition Filters ................................................................. 979
Dinu Colțuc, I.Pitas

38.4 Morphological Signal Decomposition ................................................................. 983
Dinu Colțuc, I.Pitas

38.5 A Fast Algorithm for Min/Max Filters Along Lines of Arbitrary Orientation .............................................. 987
Pierre Soille, Edmond J. Breen, Ronald Jones

38.6 Parallel Watershed Algorithm Based on Sequential Scanning .............................................. 991
A. N. Moga, T. Viero, M. Gabbouj, M. Nolle, G. Schreiber, H. Burkhardt

38.7 Quadtree and Bit-Plane Decompositions as Particular Cases of the Generalized Morphological Skeleton .............................................. 995

XXXII
R. Kresch, D. Malah

38.8 "Almost-2D" Granulometry: Model and Simulation ............................................. 999
M. Jourlin, I. Fillere, J.M. Becker, M.J. Laboure

38.9 Watershed Segmentation of Time-Frequency Images ............................................ 1003
Valérie Pierson, Nadine Martin

38.10 Fuzzy Morphological Operators for Image Processing
Based on Equal-Membership Regions .............................................................................. 1007
Yannis A. Tolias, Ioannis Theocharis, Stavros M. Panas

38.11 Evidence Reasoning Logic and Fuzzy Set Theory:
Combined Method for Resolving Conflict Assignments in Attributes Data Association Systems ......................................................... 1011
Albena Tchamova

38.12 Coastal Water Quality Assessment Using Fuzzy Arithmetic ................................. 1015
Jacques Ganoulis, Iraklis Bimbas, Petros Anagnostopoulos

38.13 Applying Fuzzy Logic to Sequential Segmentation of Step-like Signals
Ali M. Reza, Mahmood Doroodchi
Not arrived at the date of printing

38.14 Head Segmentation from Human Figure using Morphology
Satoshi Abe, Koji Nakamura, Mamoru Maekawa, Mikio Takagi
Not arrived at the date of printing

Late Arrival Section

14 Very Low Bitrate Coding: Which Way Ahead? ......................................................... 1019
E. Reusens, O. Egger, T. Ebrahimi, M. Kunt

24.7 Information Reduction by Linear and Nonlinear Digital Filters ......................... 1023
Richard Harvey, J. Andrew Bangham, Richard V. Aldridge, Graham D. Tattersall

4.5 Blind Deconvolution with Application to Astronomical Imaging ......................... 1026
Julian C. Christou

XXXIII
33.10 Detection of Abrupt Changes in a Signal ........................................... 1030
Tania Stathaki, A.G. Constantinides

30.5 Using CNN to Unravel Space-Time Processing in
the Vertebrate Retina .............................................................. 1034
Frank Werblin, Adam Jacobs

36.9 Multiscale Decomposition: the Recursive
Median Datasieve and its relation to other Sieves .............................. 1038
J. Andrew Bangham, Paul Ling, Robert L. Young
