1995
PROCEEDINGS
BELTWIDE
COTTON
CONFERENCES

VOLUME 1
- Beltwide Cotton Production Conference
- Cotton Physiology Seminar
- New Developments from Industry Workshop
- Conservation Tillage Workshop
- Pima Workshop
- Sticky Cotton Workshop
- Engineered Fiber Selection® System Workshop
- Alternative Production Strategies Workshop
- Cotton Insect Management Workshop
- Biotechnology Workshop
- Cotton Disease Council
- Cotton and Other Organic Dusts Conference
- Cotton Economics and Marketing Conference
- Cotton Engineering-Systems Conference
- Cotton Ginning Conference
- Cotton Improvement Conference
- Cotton Weed Science Research Conference
- Joint: Engineering/Ginning
- Joint: Textile Processing/Quality Measurements Confs.

VOLUME 2
- Cotton Insect Research and Control Conference
- Cotton Physiology Conference
- Cotton Quality Measurements Conference
- Cotton Soil Management & Plant Nutrition Conference
- Cotton Textile Processing Conference

Editorial Coordinator: Deborah A. Richter
Asst. Editorial Coordinator: Jim Armour

National Cotton Council of America
Post Office Box 12285 • Memphis, TN 38182 • (901) 274-9030

Printed in Cooperation with The Cotton Foundation
## TABLE OF CONTENTS

**BELTWISE COTTON PRODUCTION CONFERENCE**

<table>

Fertilization of Cotton in Conservation Tillage Systems - Atlantic Coastal Plain, Midsouth and Delta

Conservation Tillage of Cotton - Nutrient Consideration

WORKSHOP: PIMA COTTON

Differences in Growing Pima and Upland Cotton in the San Joaquin Valley

Crop Monitoring and Management for Pima Cotton

Selecting Pima Varieties for Varying Productivity Levels

Growth and Development of Pima and Acala Cotton on Saline Soils

WORKSHOP: STICKY COTTON

Silverleaf Whitefly Population Dynamics and Management in the San Joaquin Valley

Cotton Aphid Biology, Pesticide Resistance, and Management in the San Joaquin Valley

Impact of Cotton Leaf-Hairs and Whitefly Populations on Yields in the Lower Rio Grande Valley

The Relationship Between Whitefly Populations, Honeydew Deposition, and Stickiness in Cotton Lint

Automation and Validation of the Sticky Cotton Thermotester

WORKSHOP: ENGINEERED FIBER SELECTION ® SYSTEM

Cotton Fiber Management Using Cotton Incorporated’s Engineered Fiber Selection ® System and High Volume Instrument Testing

Why HVI Sells Cotton

EFS ® Cotton Fiber Management System GINNet

Exchanging Cotton Data Through Electronic Data Interchange (EDI) Using Cotton Incorporated’s QRNNet

CI-EDI™: Cotton Incorporated’s New Value Added Network for Electronic Data Interchange of Cotton Information

WORKSHOP: ALTERNATIVE PRODUCTION STRATEGIES

Conversion of Cotton Production To Certified Organic Management in the Northern San Joaquin Valley:

Transition Phase Plant Growth and Yield (1992-1994)

Cover Crops in Reduced Tillage Systems

Flame Cultivation for Weed Management in Cotton

WORKSHOP: COTTON INSECT MANAGEMENT

Tarnished Plant Bug: Biology, Thresholds, Sampling, and Status of Resistance

Bollworm/Bollworm Management in the Southeast

Budworm/Bollworm Management: Insecticide Resistance and Population Trends in the Mid-South

Managing Insecticide Resistant Tobacco Budworm

Beet Armyworm Update

Budworm/Bollworm Management - Southwest

Boll Weevil Eradication - Present Status and Plans for Expansion

Pink Bollworm Management: Prospects For The Future

Boll Weevil Eradication: Growing Cotton Without the Boll Weevil

Silverleaf Whitefly: The 5-Year National Research and Action Plan - With Particular Reference To Current Status and Research Progress

Silverleaf Whitefly: Keys To Management

WORKSHOP: BIOTECHNOLOGY

How To Genetically Engineer Cotton

Strengths And Limitations of Conventional and Transgenic Breeding

Transgenic Cotton Variety Development Plans

Transgenic Cotton Variety Development Plans

Transgenic Cotton Products from Stoneville

Regulatory Pathway To Commercialize Transgenic Varieties

Bt Cotton - A New Era in Cotton Production

Weed Management With Herbicide Resistant Transgenic Cotton Varieties

Future Trends In Cotton Biotechnology

Insect Management Considerations In A Bt Cotton Production System

COTTON DISEASE COUNCIL

Minutes of the 1995 Cotton Disease Council Business Meeting

Report of the Verticillium and Fusarium Wilt Committee - 1994

Report of the Nematode Management Committee - 1994
Report of the Soil Fungicide Committee - 1994 ................................................................. G. L. Sciumbato 190
Phymatotrichum Root Rot Committee - 1995 ................................................................. Jennifer Rigs 193
Report of the Seed, Seedling, and Pathogen Research Committee - 1994 ......................... Don Blasingame 195
Distribution of Nematodes .......................................................... A. F. Robinson, J. L. Starr, R. T. Robbins 196
Symptoms of Nematode Damage and Cotton Cultivar Resistance .................................. K. M. Hartman, O. L. May 199
Interactions With Fusarium Diseases ................................................................... T. L. Kirkpatrick, P. D. Colyer, T. A. Wheeler 199
Nematode Management in the Southeast ................................................................. R. E. Baird, W. S. Gazaway, J. D. Mueller 199
Nematode Workshop Mid-South Management .......................................................... K. S. McLean, G. W. Lawrence 200
Overview of Conservation Tillage Cotton Production in the Mid-South ...................... J. F. Bradley 201
Conventional Tillage Vs. Conservation Tillage and Their Effects on Disease Severity .......... A. Y. Chambers 203
Yield Losses Associated with Columbia Lance and Root-Knot Nematodes ................. J. D. Mueller, O. L. May 201
Three Year Response of Selected Cotton Varieties to Reniform Nematodes ............... J. R. Gannaway, J. R. Akridge 212
The Reaction of Selected Cotton Varieties Against Reniform Nematode ......................... C. Overstreet, E. C. McGawley 213
Resistance to Root-Knot Nematodes-Multiple Location Tests ........................................ J. L. Starr, C. W. Smith 214
Integrated Management of Meloidogyne incognita on San Joaquin Valley Cotton ........ P. B. Goodell, J. W. Eckert, D. J. Munier, S. Wright 214
Genetic Variation Among Fusarium oxysporum Isolates From the Regional Fusarium Wilt Nursery At Shorter, Alabama ................................................................. Alois A. Bell 216
Screening Cotton for Tolerance to Verticillium Dahliae: Subjective Versus Objective Methodology ............................................................. Scott Adair, Terry A. Wheeler, John R. Gannaway 217
A Screening of New Mexico Verticillium dahliae Isolates for Cross-Infectivity To Cotton and Chile ................................................................. J. L. Riggs, C. J. Graham 218
Aspergillus flavus Infection of Developing Cotton Bolls; Interactions Among Isolates and Influence of Gossypol on Sclerotial Morphogenesis and Aflatoxin Biosynthesis .................................................. Randall K. Garber, Peter J. Cotty 221
Aspergillus flavus Infection and Aflatoxin Contamination of Cottonseed From a Subtropical Environment ................................................................. T. Isakeit, J. R. Dunlap 221
Influence of Black Root Rot on Cotton Development ...................................................... C. S. Rothrock, P. K. Miller, S. A. Winters 222
Cotton Seedling Disease: The Importance of Pathogen Preplant Density, Seed Treatment, and Microbial Activity in the Soil ................................................................. T. A. Wheeler, J. R. Gannaway, H. W. Kaufman 223
Seeding Disease Control With Hopper Box Treatments and Reduced In-Furrow Fungicide Rates .................................................................................. G. L. Sciumbato 223
Influence of Soil Properties and Chemical Treatments on Phymatotrichum omnivorum in Cotton .................................................................................. J. E. Matocha, Fred L. Hopper 224
Field Performance of Chemical and Biological Cottonseed Treatments and The Basis for Their Effectiveness or Failure .......................................................... R. H. Garber, J. E. DeVay, C. R. Howell, R. J. Wakeman, S. A. Wright 229
Efficacy of Terraclor Super X® Fungicides ........................................................................ A. W. Mitlehner 232
Efficacy of Foliar Applied Fungicide and Potassium on Late Season Leaf Spot Control .................. M. A. Newman, D. D. Howard 233
Fungicide Treatments for Control of Boll Rots ................................................................. Richard E. Baird, Gary A. Herzog 233
Effect of Selected Fungicides on Cotton Plant Development ........................................ K. S. McLean, G. W. Lawrence 234
Phomopsis longicolla on Cotton ................................................................................. K. W. Roy, S. Ratnamaye 236
Cotton Disease Losses: Progress and Opportunity ......................................................... C. D. Ranney 237
COTTON AND OTHER ORGANIC DUSTS CONFERENCE

I. Special Invited Papers

The Role of the Epithelium in the Airway: Relevance to the Response to Inhaled Noxious Agents ........................................... F. Turner, P. J. Nicholls 243

The NIOSH National Program in Agricultural Safety and Health .................................................................................. S. A. Olenchock 250

Pathogenesis of Hypersensitivity Pneumonitis .................................................................................................................. Mark Schuyler 252

II. Heat Detoxification of Endotoxin in Cotton

Endotoxin Reduction in Cotton Fiber: Summary of Heat Detoxification Research ....................................................... Marie-Alice Rousselle 255

Heat Detoxification of Endotoxin in a Bale of Cotton .............................................................. Marie-Alice Rousselle, J. A. Thomasson, John B. Price 256

Continuous-Flow Device for Heat Detoxification of Endotoxin in Lint Cotton ...................................................... J. A. Thomasson, M. A. Rousselle 260

An Assessment of the Change in Character of Cotton Detoxified by Heat ......................................................... J. B. Price, M. A. Rousselle, J. A. Thomasson 265

Cytotoxic Effect of Extracts from Tannin, Treated and Untreated Cotton on Human Pneumocytes ........................................ V. Roepstorf, T. Sigsgaard 272

In Vitro and In Vivo Pulmonary Responses to Aqueous Extracts of Treated and Untreated Cotton Dusts ........................................................................................................................................... R. S. Young, A. K. Davey, P. J. Nicholls 276

Endotoxin and (1 3)-β in Dust from Different Cottons ............................................................................................................ Ragnar Rylander, Rikard Bergström 279

III. Exposure Assessment and Animal Studies

USDA Cotton Classing Correlated to Endotoxin Content of Cardroom DustM. W. Godby, J. R. Odencrantz, M. P. Whitmer, R. E. Harrison, H. H. Perkins, Jr., S. S. Bajpayee 280

The Effect of Sodium Dodecyl Sulfate Versus Water Extraction on the Detection of Endotoxin With The Limulus Amebocyte Lysate Assay .......................................................................................................................... R. R. Jacobs, P. E. Pietrowski 283

The Response of Alveolar Macrophages to Endotoxin In Vitro .......................................................... A. K. Davey, L. Y. Chung, P. J. Nicholls 286

Effect of Endotoxin or N-Formyl-Methionyl-Leucyl-Phenylalanine (FMLP) on Endotoxin Sensitive (C3H/HeH) Mice ........................................................................................................................................ D. G. Frazer, V. A. Robinson, V. Castranova, M. Barger, M. P. Whitmer, S. A. Olenchock 297

An Investigation of the Direct Bronchoconstrictor Effect of Lipopolysaccharide on Isolated Pulmonary Tissue ............................................................................................................................................... R. S. Young, P. J. Nicholls 300

Airway Responses of the Guinea Pig to Broncho Constrictor Agents Following Exposure to Endotoxin: A New Model for Hyperreactivity ........................................................................................................ R. S. Young, P. J. Nicholls 303

Mechanisms of Chloride Secretion Inhibition by Cotton Bracts Tannin ............................................................. Michelle M. Cloutier, Linda Guernsey 308

Determinants of Airway Response to Cotton Bract Extract .................................................................................... E. Neil Schachter, Eugenia Zuskin, Anantha Reddy, Marion Buck, Nicholas Rienzi, James Godbold 310

In Vitro Pharmacologic Studies of Brewery Dust Extract .................................................................................... E. Neil Schachter, Eugenia Zuskin, Nicholas Rienzi, James Godbold, Saul Maayani, Santindra Goswami, Zvi Marom, Vincent Castranova, Michael Whitmore, Paul Siegel 312

IV. Epidemiological Studies

Six Year Follow-Up of Lung Function on Cotton Workers .......................................................... Lars Skadhaug, Torben Sigsgaard 316

Molds and Endotoxins Isolated From the Air of a Danish Paper Mill and the Relation to Diffusion Capacity and Lung-Function ................................................................................................................... Torben Sigsgaard, Lone Donback Jensen, Erik Overgaard, Birgitte Herbert Nielsen, Eva Moller Nielsen 321

Respiratory Disease Among Poultry Workers ......................................................................................... Ragnar Rylander, Yvonne Peterson 329

COTTON ECONOMICS AND MARKETING CONFERENCE

The America's Cup of Cotton Costs: Australia Versus The United States ................................................................................................................................................. Kim Fraser 339

World Cotton Outlook ................................................................................................................................. Russell G. Barlowe 342

The Structure of World Cotton Trade ......................................................................................................................... Terry Townsend, Andrei Guitchoun 346

Module Averaging and Individual Bale Classing: A Study of 1993 Results From a South Texas Gin ........................................................................................................................................... L. L. Falconer, R. D. Parker, J. D. Webb 349

Fact and Fiction in the Cloth Versus Disposable Diaper Debate: Implications for the Cotton Industry ................................................................................................................................................ Mike Ellerbrock, Dixie Walls Reaves, Eluned Jones 352

Long-Run and Short-Run Relationships Between “A-Index” and Memphis Prices ................................................................................................................................. David A. Bessler, Dean T. Chen 354

An Analysis of the Southern Regional Cotton Marketing Research Project Committee's Recommendations on the Cotton Industry in Southeast Arkansas South of the Arkansas River

Christy Lynn Emerson, Corbet J. Lamkin

Implications of the Aggregation Bias of CCC Loan Schedules in Pricing Regional Cotton Quality Attributes

Panos N. Varangis, M. Elton Thigpen

The Impact of the Uruguay Round Agreement on Cotton, Textiles and Clothing

Bob Goodman, Mike Patterson, Dale Monks

Total Factor Productivity of Continuous Cotton Production in Central Alabama

J. Novak, C. Mitchell, Jr., G. Traxler

Economics of Cotton Production Within Alternative Crop Rotation Systems

John C. Robinson, Merritt J. Taylor, M. G. Rojas, Juan Morales-Ramos, Edgar G. King

The Impact of Groundwater Protection Policies on Cotton in the Rio Grande Valley

John R. C. Robinson, Kelly J. Bryant, Merritt J. Taylor

Beltwide Cotton Production Costs 1994

K. W. Paxton, R. J. Judice, IV, L. P. Champagne

The Benefits of Using the BWACT in Year One of the Eradication Program: The Noxubee County Experience

D. W. Parvin, Jr.

Impact of Variation in Seed Index on the Cotton Industry

Emmett Elam

Government Cotton Program: Is It Worth Fighting For?

Kim Anderson, Roger Sahs, Phil Kenkel

Economic Returns Under Alternative Rental Arrangements for Cotton Producers

Lucas D. Parch, Diana M. Danforth

A Cotton Valuation Model

Helmut Deussen, Chris Faerber

I Like Options

Roger Sahs, Kim Anderson

SOS+ Cotton Model Current Status

H. E. Lemmon, N. Chuk, V. Reddy, B. Acoc, Ya. Parchepsky

Considerations For Selecting a Crop Model

Dana Osborne Porter

Effect of Row Spacing, Planting Pattern, and Varieties on Cotton Yield and Returns

Gordon R. Tupper, Fred T. Cooke, Jr., M. Wayne Ebelhar, H. C. Pringle, III

Baker's Plant Mapping Technique - An Alternative Procedure for Gossym

M.Y.L. Boone, J. M. McKinon, J. L. Willers

An Unreplicated Factorial Design Applied to the Analysis of Simulation Models

Gene Stevens, Jeffrey L. Willers, Ronolde Sequeira

Clustering and Genetic Algorithms Applied to the Regionalization of Gossym

Eric Jallas, R. Sequeira, J. Willers, J. McKinon, R. Olson

IGOS: An Interactive Data Input System for the Cotton Simulation Model, Gossym

R. A. Sequeira, G. Stevens, J. Willers, J. McKinon, R. Olson

Validating Gossym Across the Cotton Belt for Modern Cotton Cultivars

Deficit LEPA Irrigated Cotton Results at the Agricultural Complex for Advanced Research and Extension Systems at Lamesa, TX

William M. Lyle, J. Wayne Keeling, A. B. Onken

Effect of Cotton Row Spacing and Variety in the Lower Rio Grande Valley

J. R. Smart, R. J. Coleman, E. G. King

Calculating Time-Thresholds for Irrigation Scheduling

Conservation Cropping Systems For Narrow and Wide Row Cotton

A. Khallilian, M. J. Sullivan, P. M. Porter

Six Years of Field Tests With Subsurface Drip Versus Furrow Irrigation of Cotton on Sandy Soil

W. R. DeTar, C. J. Phene, D. A. Clark

COTTON GINNING CONFERENCE

Progress Report on Process Control

W. Stanley Anthony, Richard K. Byler, Bobby Greene, Dennis Scamardo

What We Know and Need to Know About Preparation

William Mayfield, Stanley Anthony, Roy Baker, Eugene Columbus

Status Report on State Implementation of Title V, 1990 Clean Air Act

Earliness Measurements for Cotton Produced in the North Texas Blacklands ...................... Steven Hague, John R. Gannaway, Donald J. Reid 516
Use of Plant Mapping to Measure Maturity of Cotton Cultivars ......................................................... G. R. McPherson, R. Whitmore, J. J. Gwyn, J. Vasak, B. Greenley 518
Variation in Growth Patterns Among Cotton Cultivars Using Nodes-Above-White-Flower ................................................. N. R. Benson, E. D. Verries, F. M. Bourland 524
Molecular Tools for Cotton Improvement ................................................................................................. Andrew H. Paterson, Xin-Ping Zhao 530
Molecular Markers in Cotton ......................................................................................................................... S. Saha, X. Feng, K. M. Soliman, M. Jaggernauth 530
Mapping Fiber Quality Traits In Interspecific Gossypium hirsutum and G. Barbadense ....................... G. R. Lazo, Y.-H. Park, R. J. Kohel 530
Use of RFLPs In Predicting Agronomic Performance ................................................................. Zachary W. Shappley, C. E. Watson, Jr., M. J. Cochran, F. M. Bourland, E. D. Justice 530
The Applications of RFLPs In Hybrid Cotton Breeding and Seed Production ...................... J. J. Gwyn, R. W. Whitmore, R. G. McPherson, J. C. Vasek, B. A. Greenley 531
Control of Cotton Diseases With Host Plant Resistance: A Success Story With Opportunities .......... C. D. Ranney 531
Progress In Breeding for Tolerance to the Reniform Nematode ................................................................. C. Cook, N. Namken, F. Robinson 535
Evaluation of F2 Hybrids Between Nematode Resistant Germplasm and Cultivars ................ Michael R. Robinson, J. N. Jenkins, J. C. McCarty, Jr. 536
Complications In Breeding for Incompatibility ....................................................................................... Claude L. Rhyme, Jack C. Carter 539
Differences of Anthocyanin Expression in Gossypium hirsutum L. and Gossypium barbadense L. .... Claude L. Rhyme, Jack C. Carter 539
Symbiosis Genetics and MAR (Multi-Adversity Resistance) in Cotton - A Causal Effect by Fusarium solani ................................................................. I. S. Bird 542
Quality Trends in San Joaquin Valley Cotton ......................................................... C. K. Bragg, C. L. Simpson, S. E. Hughes, H. B. Cooper, Dick Bassett 545
Fiber and Yarn Quality of New Cotton From Texas ............................................... Christoph Faerber, John Gannaway 551
Influence of Plant Geometry and Production Method on Trash Content and Processing Performance ................................................................. M. Dean Ethridge, John R. Gannaway, Jane K. Dever, Jennifer L. Coss, Alan D. Brashears 559
Boll Weight, Yield and Quality Relationships, Irrigated and Dryland Cotton, Texas 1986-1994 ............................................................... Dale L. Shaw 559
Effect of Salinity on Botanical Characters and Fiber Maturity of Three Egyptian Cotton Cultivars ................................................................. M. T. Nawar, A. M. Zaher, K. El-Sahhar, S. A. Abdel-Rahim 566
Automating a Cotton Breeding Program Using Computers ..................................... Don Panter, John Marshall 570
Interface and Applications of Biotechnology to Cotton Improvement ........................ K. M. El-Zik, P. M. Thaxton 571
Breeding Strategies for Development of Transgenic BXN Cotton ............................ Bruce A. Coulombre, Donald M. Panter 572
Field Performance of Transgenic BT Cotton in Multiple Locations Across the Belt ........................................................................................................... Tom Kerby, Tom Wolford, Jim Presley, John Thomas, Marc Bates, Janet Burgess 574
Analysis of Polyposidisation During Protoplast Culture in Cotton .............................. M. C. Peeters, R. Swennen 576
Performance of Five Short-Season Pima Genotypes Under Two Management Regimes ...................................................................................... Richard Percy, Jeff Silvertooth 576
Effects of Pix at Low Rate Multiple Applications on Reproductive and Vegetative Structures in Cotton ................................................................. R. W. Hayes, J. N. Jenkins, J. C. McCarty, Jr. 577
PCR-IV Responses to Upland and Pima Cottons in the San Joaquin Valley of California ................................................................. Bill Weir, Dan Munk, Ron Vergas, Steve Wright 577
Utilizing Harvest Aids on Stripper Harvested Cotton ................................................... A. D. Brashears, J. W. Keeling, K. D. Hake, K. R. Stair 579
Structure of Research and Research Projects in Cotton in the World ........................... M. Rafiq Chaudhry 581
Heterosis and Combining Ability in Top Crosses of Cotton ........................................ T. A. El-Feki, F. B. Abdel-Razik, M. A. M. Ghorab, G. M. L. Esmat 588
The Regional Fusarium Wilt Test ............................................................................. William S. Gazaway, Kathy Glass 590
National Cotton Variety Testing Survey Results .......................................................... Daryl T. Bowman 591
COTTON WEED SCIENCE RESEARCH CONFERENCE

Report of the 1994 Cotton Weed Loss Committee ..................................................... J. D. Byrd, Jr. 595
Mississippi Cotton Weed Survey ................................................................................. Todd A. Baughman, John D. Byrd, Jr. 598
Postemergence Use of Staple and How It Can Impact South Texas Cotton Production ....................................................................................... Robert H. Bierman, J. E. Bremer 599
Is Staple a Nutsedge Herbicide? ..................................................................................... J. W. Wilcut, J. S. Richburg, III 600
Will Staple Change Your Weed Control Program? .................................................... C. B. Guy, Jr. 600
Effect of Staple on Cotton Growth and Development .................................................. C. D. Monks, J. W. Wilcut, M. G. Patterson 601
Vegetable Response to Staple Carryover From Cotton .............................................. E. F. Eastin, J. W. Wilcut 601
Potential for Pursuit and Cadre Applied to Peanuts to Carry Over to Cotton .......... A. C. York, J. W. Wilcut 602
Weed Management in Conventional and Reduced Tillage BXN Cotton in Georgia ............................. J. W. Wilcut, J. S. Richburg, III 602
"Staple" Herbicide - A Five Year Review of Observations on Key Broadleaf Weeds and Nutsedge in Arizona Cotton ......................................... Jeffrey L. Pacheco 603
Weed Management in West Texas Cotton With Buctril .............................................. C. L. Jones, J. W. Keeling, K. A. Hake 603
Use of Reduced Rates of "Pot" Herbicides to Produce a Cotton-Weed Height Differential ................................................................. J. A. Kendig, C. B. Guy 603
Efficacy and Selectivity of PPI and Preapplications of Command in Cotton ............. P. C. Carter, R. E. Frans, M. C. Smith, M. McClelland 604
Control of Italian Ryegrass at Various Stages of Growth With Roundup Herbicide ...................................................................................... L. L. Gingrich 604
Strategies for Roundup Application Through Hooded Sprayers to Avoid Cotton Injury ....................................................................................... S. L. Sunderland, J. W. Keeling, C. L. Jones 604
Selectivity and Weed Control From Hooded Sprayer Application in Cotton ............. L. R. Hawf, L. L. Gingrich 604
Influence of Cover Crops on Weed Control and Cotton Development ..................... M. C. Smith, R. E. Frans, M. R. McClelland, P. C. Carter 605
Beltwide Summary of EXP31039 for Defoliation, Boll Opening and Regrowth Control in Cotton ............................................................................. J. R. Collins, C. D. Fritz 606
Potential for Staple and Buctril in Georgia Cotton ...................................................... S. M. Brown 607
Cotton and Annual Weed Response from Normal and Reduced Herbicide Inputs, 1989-1994 ................................................................. H. R. Hurst 607
Preemergence Control of Annual Weeds in Cotton on the Texas High Plains ............ J. W. Keeling, P. A. Dotray 608
