1996 PROCEEDINGS BELTWISE COTTON CONFERENCES

VOLUME 1
- Beltwide Cotton Production Conference
- New Developments from Industry Workshop
- Cotton Physiology Workshop
- Economics Workshop: Cotton Price Models
- Harvest Aid Workshop
- Cotton Insect Management Workshop
- Sticky Cotton Workshop
- Bt Cotton Workshop
- Alternative Production Strategies Workshop
- Precision Farming Workshop
- New Cotton Weed Control Technologies Workshop
- Economics Workshop: Regional Production Possibilities
- Information Technology Resource Workshop
- Cotton Disease Council
- Cotton and Other Organic Dusts Conference
- Cotton Economics and Marketing Conference
- Cotton Engineering-Systems Conference
- Cotton Ginning Conference
- Cotton Improvement Conference

VOLUME 2
- Cotton Insect Research and Control Conference
- Cotton Physiology Conference
- Cotton Quality Measurements Conference
- Cotton Soil Management & Plant Nutrition Conference
- Cotton Textile Processing Conference
- Cotton Weed Science Research Conference
- Joint: Engineering-Systems/Ginning Conferences
- Joint: Textile Processing/Improvement Conferences
- Joint: Textile Processing/Quality Measurements Conferences

Editorial Coordinators: Paul Dugger, Debbie Richter
Table of Contents

Volume II

Cotton Insect Research and Control Conference

Cotton Insect Losses 1995, Michael R. Williams .................................................. 670
The Environmental and Mammalian Safety Profile of Naturalyte Insect Control, P.W. Borth, P.J. McCall, R.F. Bischoff, G.D. Thompson .................................................... 690
Tracer® Naturalyte Insect Control Physical Property Attributes, M. Burton, J.D. Cobb, T.J. Jefferson, D. Williams, III, J. Winkle .................................................. 696
1995 Oklahoma Furadan 4F Monitoring Program on Cotton Fields for Adverse Findings on Non-Target Species, Ronald Buckmaster, George Graves, Miles Karner, Sandra Wells .................................................. 697
Acetylcholinesterase Activities in Laboratory-Reared and Field-Collected Strains of Tobacco Budworm, Heliothis Virescens (F.), Teresa A. Thompson, Gregory T. Payne .................................................. 700
A Method of Distributing Steinernema Riobravis in Cotton Furrow Irrigation and Pink Bollworm Larval Mortality Response, L. Forlow Jech, T.J. Henneberry .................................................. 707
Natural Enemies of Bollworm Complex and Other Foliage Feeding Worms in Northern Tamaulipas and Their Role in Cotton Production, J. Vargas-Camplis .................................................. 710
Study of the Effectiveness of Boll Weevil Control Applying Drops of a Mixture of Sexpheromone (Grandlure) and Cypermethrin through a Pistol, Walter Jorge dos Santos, Dieter Hofer .................................................. 712
Relative Cold Tolerance of Boll Weevils from Missouri, Mississippi, and Coastal Texas, Clyde E. Sorenson, Roy D. Parker, M. Blake Layton .................................................. 715
Malathion ULV Rate Studies Under Boll Weevil Eradication Program Field Conditions, Robert G. Jones, Dan A. Wolfenbarger, Osama El-Lissy .................................................. 717
Efficacy of Malathion ULV on the Cotton Boll Weevil Under Simulated Cool Temperature Regimes, Robert G. Jones, Jack W. Haynes, Joseph E. Mulrooney .................................................. 719
Efficacy of ULV Insecticides Against Boll Weevils, J.E. Mulrooney, K.D. Howard, J.E. Hanks, R.G. Jones .................................................. 720
High Speed Transplanting of Cotton for Trap Crops - A Possible Tactic for Midsouth Boll Weevil Eradication, T.G. Teague, N.P. Tugwell .................................................. 721
The Mississippi Cotton Boll Weevil GIS Project - 1995 Update, Glenn Wiygul .................................................. 725
Lower Dosages of Malathion for Boll Weevil Eradication, E.J. Villavaso, J.E. Mulrooney, W.L. McGovern, K. Howard .................................................. 727
Frequency of Insecticide Applications in Arkansas Fields Approaching Cutout as Defined by Cotman, W.H. King, Jr., M.J. Cochran, N.P. Tugwell .................................................. 732
Population Monitoring of Lygus Hesperus with Female-Baited Traps, John R. McLaughlin .................................................. 733
Effect of Destruxins from Metarhizium Anisopliae, Ivermectin and Bacillus Thuringiensis Delta-Endotoxins on Adult Silverleaf Whitefly, Bemisia Argentifolii, Elizabeth W. Davidson, Rufino Patron, Alain Vey, Roger Frutos, Raymond St. Leger, Lawrence A. Lacey, Donald L. Hendrix .................................................. 739
Microstructure of Feeding in Nymphal Bemisia Argentifolii in Cotton and Cantaloupe, Allen Carson Cohen, T.J. Henneberry, Thomas Freeman, Dennis Margosan, P. Vail, Chang-chi Chu .................................................. 740
Monitoring and Management of Whitefly Resistance to Insecticides in Arizona, T.J. Dennehy, Livy Williams, III, June S. Russell, Xiaohua Li, Monika Wigert .................................................. 743
Contrasts of Three Insecticide Resistance Monitoring Methods for Whitefly, A.L. Simmons, T.J. Dennehy .................................................. 748
Whitefly Control in Arizona: Development of a Resistance Management Program for Imidacloprid, Livy Williams, III, Timothy J. Dennehy, John C. Palumbo .................................................. 752
Proclaim: A New Insecticide for Use on Cotton, Denis M. Dunbar, Robert D. Brown, Jack A. Norton, Richard A Dybas .................................................. 756
COTTON INSECT RESEARCH AND CONTROL CONFERENCE, CONTINUED

Evaluations of In-Furrow and Foliar Applications of Fipronil and Imidacloprid for Control of Early-Season Pests and Boll Weevil, D.R. Cook, E. Burris, B.R. Leonard .......................................................... 758
Naturalyte Insect Control, G.D. Thompson, P.W. Borth, R.M. Huckaba, T.C. Sparks, J.D. Busacca, B.A. Nead, L.G. Peterson, D.J. Porteous, M.C. Shaw, J.M. Richardson, J.R. Winkle ......................................................... 758
Worldwide Development of Fipronil Insecticide, Nicholas Hamon, Richard Shaw, Henry Yang .......................................................... 759
Evaluation of Pirate Against Beet Armyworm and Cabbage Looper in Cotton, Osama El-Lissy, Wendy Shepard, Randal Schwartz, Frank Myers .......................................................... 765
Evaluation of Selected Insecticides and Insecticide Mixtures Against Beet Armyworm and Cabbage Looper on Cotton, Osama El-Lissy, Wendy Shepard, Randal Schwartz, Frank Myers .......................................................... 767
Comparison of Insecticides for Control of Flea Hoppers on Texas Coastal Bend Cotton, Roy D. Parker .......................................................... 769
Susceptibility of Lygus Bug Populations in Arizona to Acephate (Orthene®) and Bifenthrin (Capture®) with Related Contrasts of Other Insecticides, T.J. Dennehy, J.S. Russell .......................................................... 771
Seasonal Changes in Pyrethroid Resistance in Tarnished Plant Bug Populations in the Mississippi Delta, G.L. Snodgrass, W.P. Scott .......................................................... 777
Changes in Tolerance to Insecticides in Tobacco Budworm Populations, 1995, G.W. Elzen .......................................................... 779
Insecticide Resistance of Tobacco Budworm in Southern Tamaulipas, Mexico, A.P. Terán-Vargas .......................................................... 784
Relay Intercropping: Effect on Predators in Cotton, R. Montandon, J.E. Slosser .......................................................... 786
Evaluation of the Biosprayer for the Application of Trichogramma to Cotton, Allen Knutson .......................................................... 788
A Practical and Economical Insect Management Program for the Upper Coastal Bend of Texas "How We Survived the Beet Army Worm and Tobacco Budworm Assaults of 1995", Ed Hood .......................................................... 792
Susceptibility of Three Parasitoids of Heliothis Virescens to Field Rates of Selected Cotton Insecticides, P. Glynn Tillman .......................................................... 793
The Hooded Beetle: A Predator of the Tobacco Budworm, Gloria S. McCutcheon, Deborah M. Webster .......................................................... 796
Evaluation of Bacillus Thuringiensis and Ovicide Combinations for Bollworm and Tobacco Budworm, C.D. Klein, D.R. Johnson, H.B. Myers, L.M. Page .......................................................... 798
Cultural Control of the Boll Weevil - A Four Season Approach, J.E. Slosser .......................................................... 800
Boll Weevil Control with Boll Weevil Attract and Control Tubes 1995, William C. Langston .......................................................... 805
Diflubenzuron and Malathion Ultra Low Volume for Boll Weevil Eradication Program Conditions, Robert G. Jones, Osama El-Lissy, Richard R. Minzenmayer .......................................................... 806
The Cooperative Boll Weevil Eradication Program (BWEP): A Growing Success, G.L. Cunningham, W. Grefenstette .......................................................... 808
Boll Weevil Emergence Trends Across Oklahoma, 1993 - 1995, Miles Karner, Jerry Goodson .......................................................... 808
Field and Greenhouse Performance of Mustang 1.5 EW and Capture 2EC on Immature and Adult Whitefly, C.L. McKenzie, N.C. Toscano, L. Beehler .......................................................... 810
Large Scale Whitefly Management and Trials Using Insecticide Rotations to Develop IPM Strategies for Arizona Upland Cotton, D.H. Akey, T.J. Henneberry, T.J. Dennehy, P.C. Ellsworth .......................................................... 817
Silverleaf Whitefly Control in Cotton with Knack™ Insect Growth Regulator, M.J. Ansolabehere, J.P. Chernicky .......................................................... 819
Taken by Storm: A Report of the Tobacco Budworm Problem in Mississippi, Michael R. Williams, M. Blake Layton .......................................................... 823
Boll Weevil Eradication Status in Texas, Osama El-Lissy, Frank Myers, Ray Frisbie, Tom Fuchs, Don Rummel, Rick Smathers, Ed King, Fred Planer, Chuck Bare, Frank Carter, Gary Busse, Nolan Niehues, Jack Hayes .......................................................... 831
Beet Armyworm: Results of Beltwide Pheromone Trapping, 1994-95, Richard K. Srenkel, Tracey A. Austin .......................................................... 842
Efficacy of Selected Insecticides Against the Beet Armyworm, Spodoptera Exigua - Field and Laboratory Evaluations, A.N. Sparks, Jr., J.W. Norman, Jr., D.A. Wolfenbarger .......................................................... 844
Occurrence and Control of Beet Armyworm Outbreaks in the Cotton Belt, Scott D. Stewart, M. Blake Layton, Jr., Michael R. Williams .......................................................... 846
Cotton Aphid Response to Pesticides in San Joaquin Valley Cotton, Beth Grafton-Cardwell, Peter Goodell .......................................................... 849
Chemical Control of Tarnished Plant Bug - Results from Field Cage Studies and Laboratory Bioassays, T.G. Teague, N.P. Tugwell .......................................................... 850
Cotton Insect Management in Transgenic Bt Cotton in the Mississippi Delta, 1992-1995, F.A. Harris, R.E. Furr, Jr., D.S. Calhoun .......................................................... 854
The Role of Provado in Western Cotton IPM Programs, Phil McNally, Walt Mullins .......................................................... 859
Performance Summary of Fipronil Insecticide on Cotton, Richard Shaw, H.S. Yang .......................................................... 862
Pirate Insecticide-Miticide for Control of Cotton Insects in Mid-South Cotton, Ned M. French, II, C. Andy White, Kristine M. Treacy .......................................................... 865
Cotton Insect Research and Control Conference, continued

Beneficial Insects - Their Role in Cotton Pest Management Systems Founded on Naturalyte Insect Control, L.G. Peterson, D.J. Porteous, R.M. Huckaba, B.A. Nead, R.L. Gantz, J.M. Richardson, G.D. Thompson .......................................................... 872
Result of Naturalyte Insect Control Small Plot and Large Experimental Use Permit Trials in the Mid-Atlantic and Southeast Cotton Belt During 1995, R.M. Huckaba, L.G. Peterson, A.W. Weiss .......................................................... 874
Results of Tracer* Naturalyte Insect Control Small Plot and Large Experimental Use Permit Trials in Texas During 1995, D.J. Porteous, J.R. Raines, R.L. Gantz .......................................................... 875
Managing Cotton Insects in the Mid-South Cotton Belt with Naturalyte Insect Control in 1995, B.A. Nead, S.P. Nolting, P.W. Borth, J.R. Raines .......................................................... 875
Cotton Bollworm Control in North China in 1995, C.F. Sheng .......................................................... 878
IPM: Alive and Well in South Carolina, M.E. Roof, J.A. DuRant .......................................................... 880
Toxicity of Acephate, Cypermethrin, and Oxamyl to Tarnished Plant Bugs in Vial Bioassays and Cage Studies on Cotton, J.H. Pankey, B.R. Leonard, J.B. Graves, E. Burris .......................................................... 882
Control of Tarnished Plant Bug with Beauveria Bassiana and Interactions with Imidacloprid, D.C. Steinkraus .......................................................... 888
Lepton HTK: A Diagnostic Test Kit to Improve Cotton Insect Control, R.J. Cibulsky, SenSeong Ng .......................................................... 889
Cotton Aphid Insecticide Efficacy Trials in the Mississippi Delta in 1995, R.E. Furr, Jr., F.A. Harris .......................................................... 891
Cotton Aphid Infestations in Mississippi: Efficacy of Selected Insecticides and Impact on Yield, M.B. Layton, H.R. Smith, G. Andrews .......................................................... 892
Results of Wildlife Monitoring as Required under Furadan 4E Insecticide/Nematicide Section 18 Exemptions, T.I. Crumby, P. Mastrangelo, C. (Bo) Sloan, B. Finlayson, R. Hosea, M. Frostle, T. Mitchell, S. Wells, M. Karner .......................................................... 894
Six Years of Area-Wide Management of Bollworm/Budworm with Pathogens - What Does it Mean and Where Do We Go from Here, D.D. Hardee, M.R. Bell .......................................................... 897
MVP® II: An Update on the Encapsulated Bacillus Thuringiensis (Bt) Bioinsecticide, R.A. Haygood, P.S. Zorner, G.A. Bradfisch .......................................................... 902
Interaction of Cotesia Marginiventris Parasitization and Field Applied Bacillus Thuringiensis, Thiodicarb, and Their Combination on Tobacco Budworm Mortality and Parasitoid Emergence, D.W. Anwood, S.Y. Young, III, T.J. Kring .......................................................... 905
Activity of Different Formulations of Bacillus Thuringiensis on Lepidoptera in Cotton, S. Shane Hand, K. Knighten, R.G. Luttrell .......................................................... 908
Impact of Insect-Specific AaHIT Gene Insertion on Inherent Bioactivity of Baculovirus Against Tobacco Budworm, Heliothis Virescens, and Cabbage Looper, Trichoplusia Ni, M.F. Treacy, J.N. All .......................................................... 911
Effects of Large Scale Bt Cotton Production on Tobacco Budworm Populations, Wade Worley, Frank Mitchener, Tucker Miller, III, R.G. Luttrell, J.C. Schneider .......................................................... 917
Management Strategies for Large Scale Planting of Bt Cotton, H.T. Miller, III .......................................................... 920
Inter-Plant Movement and Suppression of Tobacco Budworm in Mixtures of Transgenic Bt and Non-Transgenic Cotton, J.L. Halcomb, J.H. Benedict, J.C. Correa, D.R. Ring .......................................................... 924
Potential Utility and Susceptibility of Transgenic Bt Cotton Against Bollworms, European Corn Borers and Stink Bugs in NC, J.S. Bachelor, D.W. Mott .......................................................... 927
Effects of Natural Enemy Conservation and Planting Date on the Susceptibility of Bt Cotton to Helicoverpa Zea in North Carolina, A.L. Lambert, J.R. Bradley, Jr., J.W. Van Duyn .......................................................... 931
Strategies for Managing Stink Bugs in Transgenic Bt Cotton, S.G. Turnipseed, J.K. Greene .......................................................... 935
Stink Bug Thresholds in Transgenic Bt Cotton, J.K. Greene, S.G. Turnipseed .......................................................... 936
A Review of Gaucho® Seed Treatment Insecticide Trials Across the Midsouth and Southeast, Charles T. Graham, Jr. .......................................................... 938
Effects of Early Season Thrips Feeding on Root Development, Leaf Area and Yield, B.A. Roberts, E.A. Rechel .......................................................... 939
The Effect of Early Season Terminal Bud and Square Removal on Cotton Yields in North Carolina, Robert A. Ihrig, J.R. Bradley, Jr., John Van Duyn, Ames Herbert .......................................................... 941
Early-Season Insect Control with Provalo in the Mississippi Delta, Alan Hopkins, Fred Donaldson .......................................................... 945
The Importance of Provalo for Earliness Management in Cotton, Lyndon K. Almand .......................................................... 948
Efficacy and Duration of Early Season Insecticide Applications, J.T. Ruscoe, G.L. Andrews, J.B. Phelps .......................................................... 955
The Effects of Early Season Insect Control on Fruiting Characteristics of Cotton, Jay Phelps, Jon Ruscoe, Gordon L. Andrews .......................................................... 956
Diapause Induction in the Boll Weevil, T.L. Wagner, E.J. Villavaso .......................................................... 957
Survival of Boll Weevils Exposed to Freezing Temperatures with and Without Ice Nucleators, Clyde E. Sorenson, Milon George .......................................................... 969
Pollen Feeding by Overwintering Boll Weevils, G.D. Jones, J.R. Coppedge .......................................................... 976
Late Season Control of Boll Weevil, H.B. Meyers, D.R. Johnson, C.D Klein, A.K. Holliday .......................................................... 982
Boll Weevil Reproductive Development Responses to Crowding and Variations in Host Quality, D.W. Spurgeon, J.R. Raulston .......................................................... 983
Mortality of Tarnished Plant Bug and Boll Weevils to Provado and Different Formulations of Fipronil, W.P. Scott, G.L. Snodgrass, D.A. Adams .......................................................... 987
Fipronil: A Major Advance for the Control of Boll Weevil in Colombia, Nicholas M. Hamon, Hernando Gamboa, Jairo Ernesto Melgarejo Garcia .......................................................... 990
Final Evaluation of 1994 Boll Weevil Bait Stick Test in Noxubee County, MS, Bill McGovern, Eric Villavaso, Gerald McKibben .......................................................... 994
Integration of Boll Weevil Attract and Control Tubes in Cotton Ipm Programs: Preliminary Findings in Tennessee, Philip Roberts, John Bradley .......................................................... 997
BWACT™ Test Results from Isolated Boll Weevil Infested Cotton Zones in Northeast Louisiana from 1994 - 1995, Thomas A. Plato .......................................................... 1000
Second Year Boll Weevil Control Results with BWACT™ from Alabama, Arkansas, Louisiana, Mississippi, Missouri, Tennessee and Texas in Low and Heavily Infested Zones, T.A. Plato, J.C. Plato, Jorge E. Gonzalez .......................................................... 1002
Variation in Bemisia Tabaci Populations, Based on Host Plant Associations, Developmental Statistics and Growth Parameters in Egypt, Malak F. Gergis, Khakaf M. Adam .......................................................... 1007
Photosynthesis and Stomatal Conductance of Cotton Infested by Different Whitefly Threshold Levels, W.L. Yee, N.C. Toscano, C.C. Chu, T.J. Henneberry, R. L. Nichols .......................................................... 1011
Cotton Leaf Surface Features Serve as Behavioral Cues to the Silverleaf Whitefly, Allen Carson Cohen, Chang-chi Chu, T.J. Henneberry, Thomas Freeman, James Buckner, Dennis Nelson .......................................................... 1017
Sticky Cotton and Reduction of Lint Stickiness, C.C. Chu, T.J. Henneberry, H.H. Perkins, Jr., D.L. Hendrix, Terry Steele .......................................................... 1020
Silverleaf Whitefly in the San Joaquin Valley - Year 4, Larry Godfrey, Charlie Summers, Peter Goodell .......................................................... 1023
Silverleaf Whiteflies and Cotton Leaf Hairs, Lower Rio Grande Valley, 1994-1995, John W. Norman, Jr., Alton N. Sparks, Jr. .......................................................... 1026
Chemical Control of Silverleaf Whitefly in Cotton, with Karate in Mixture with Conventional Insecticides, in Mexico, A. Obando, N. Darby, L. Navarro .......................................................... 1027
Evaluation of Insecticide Rotations and Mixtures for Delaying Insecticide Resistance in Whiteflies in Imperial Valley, CA, N. Prabhaker, N.C. Toscano, S.J. Castle, T.J. Henneberry .......................................................... 1031
Trends in Relative Susceptibilities of Whiteflies to Insecticides Through the Cotton Season in the Imperial Valley, CA, S.J. Castle, T.J. Henneberry, N. Prabhaker, N.C. Toscano .......................................................... 1032
Seasonal Control of Sweetpotato Whiteflies in Cotton Using Aerial Electrostatic Charged Sprays, M.A. Latheef, J.B. Carlton, I.W. Kirk .......................................................... 1035
Cotton Pesticide Deposition from Aerial Electrostatic Charged Sprays, J.B. Carlton, I.W. Kirk, M.A. Latheef .......................................................... 1036
Control of Insects with Ovasyn Tank Mixtures in Western Cotton, Dale Comer, Phillip Odam .......................................................... 1040
Persistence of Dimilin® (Diflubenzuron) on Cotton Foliage as Determined by Beet Armyworm (Spodoptera Exigua) Bioassay, R.T. Weiland, P.T. McDonald, N. Melnikaitis .......................................................... 1040
Efficacy of Registered and Experimental Insecticides Against Beet Armyworm, V.J. Mascarenhas, B.R. Leonard, E. Burris, J.B. Graves .......................................................... 1044
Attrition of Beet Armyworm Pupae in Insecticide-Treated and Untreated Cotton, John R. Ruberson, Stanley K. Diffie, Gary A. Herzog, Max H. Bass .......................................................... 1045
Microbial Control of Tobacco Budworm and Beet Armyworm in Alabama Cotton, W.J. Moor, R.C. McCollum .......................................................... 1048
Performance of Dimilin® 2l (Diflubenzuron) in the Control of Beet Armyworm (Spodoptera Exigua) in Cotton, R.T. Weiland, K.H. Griffith, W.S. McIntire, A.W. Dalrymple, J.G. Connell .......................................................... 1050
Cotton Insect Research and Control Conference, continued

Differences in Heliothis Virescens Resistance Development after Laboratory Selection with Profenofos, Thiodicarb and Cypermethrin, G.H. Ernst, F. Zambrano, G. Pinzon, Y. Mosos ........................................ 1069
Target Site Resistance to Pyrethroids in Larval and Adult Tobacco Budworms, Heliothis Virescens, Jonathan W. Holloway, Jocelyn E. Chernetz, B. Roger Leonard, James A. Ottoa ........................................ 1071
Insect Population Dynamics in San Joaquin Valley Cotton Fields, P.B. Goodell, Simon Narbeth ........................................ 1075
Control of Pink Bollworm Pectinophora Gossypiella (Saunders) (Lepidoptera: Gelechiidae) Larvae in Arizona and Texas Cotton Fields Using the Entomopathogenic Nematode Steinernema Rovirbavis (Cabanillas, Poinar, and Raulston) (Rhabditida: Steinernematidae), D.H. Gouge, L.L. Reaves, J.R. Van Berkum, R.A. Burke, L.J. Forlow-Jech, T.J. Henneberry ........................................ 1078
Development of a Novel Sprayable Pheromone Product for Pink Bollworm Control, Kirk Smith, Tom Walgenbach, Jeff Springer ........................................ 1085
Toxicity of Aqueous Formulations of Bifenthrin and Malathion to Boll Weevil, D.A. Wolfenbarger ........................................ 1090
Circadian Rhythms of Oviposition and Emergence of the Ectoparasitoid Catolaccus Grandis (Hymenoptera: Pteromalidae), S.M. Greenberg, J.A. Morales-Ramos, E.G. King ........................................ 1095
Comparison of In Vivo Versus In Vitro-Reared Catolaccus Grandis in the Field, J.A. Morales-Ramos, M.G. Rojas, R.J. Coleman, S.M. Greenberg, K.R. Summy, E.G. King ........................................ 1099
Laboratory Evaluation of First, Second, Fifth, and Tenth In Vitro-Reared Generations of Catolaccus Grandis, M.G. Rojas, J.A. Morales-Ramos, E.G. King ........................................ 1104
Mafes Cotton Insect Pest Management Project: Overview and First Year Results, J.T. Reed, R.G. Luttrell, F.A. Harris, S. Stewart ........................................ 1119
A Multi-State Validation of Insecticide Termination Rules Based upon the Cotman Plant Monitoring System: Preliminary Results, M. Cochran, D. Danforth, N.P. Tugwell, A. Harris, J. Reed, J. Benedict, R. Leonard, R. Bagwell, O. Abaye, E. Herbert, P. O'Leary ........................................ 1124
Efficacy of Miticides in California Cotton, Steve Wright, Manuel Jimenez, John Shriver ........................................ 1128
Evaluation of Two Seasons of Acaricide Rotation Trials on Spider Mite (Acaris: Tetranychidae) Resistance in San Joaquin Valley Cotton, Samuel J. Bruce-Oliver, Beth Graffen-Cardwell ........................................ 1128
Study for Comparing the Efficiency of Certain Acaricides Against Tetranychus Urtica Koch under Laboratory and Field Conditions, A.M. Younis, Y.A. Ibrahim ........................................ 1131
Control Studies with Nuclear Polyhedrosis Virus on Armyworm, Bollworm and Tobacco Budworm in Cotton - Mexico, 1995, N.D. Darby, A. Obando ........................................ 1134
Utilization of Biopesticides in Managing the Cotton Pest Complex in India, G.P. Gupta, Kirti Sharma ........................................ 1135
Response of Whitefly Populations to Imidacloprid in Stressed and Unstressed Irrigated Cotton, Dan A. Wolfenbarger, Charles G. Cook ........................................ 1140

Cotton Physiology Conference

The Optimum Plant Growth Regulation System for Southeastern Cotton Producers, Year 2, O.J. Turner, IV ........................................ 1145
Mid-Flowering Application of PGR-IV to Enhance Cotton Maturity and Yield, J.T. Cothren, J.A. Landivar, D.M. Oosterhuis ........................................ 1149
Farm Verification of Active Bloom Applications of PGR-IV to Enhance Yield and Maturity, Joseph A. Hickey ........................................ 1150
Effect of In-Furrow Treatments at Planting upon Early Season Vigor, B.J. Phipps, W.E. Stevens, J.N. Ward, J.B. Mobley ........................................ 1150
Effect of Ryzup Plant Growth Regulator on Lint Yield and Plant Development, Kater Hake, Kay Stair ........................................ 1152
Development and Evaluation of the Average Five Internode Length Technique to Determine Time of Mepiquat Chloride Application, J.A. Landivar, J.T. Cothren, S. Livingston ........................................ 1153
Effect of Bensulforon on Cotton Growth and Development, C.D. Monks, M.G. Patterson, D. Delaney ........................................ 1156
Early Season Uses of Pix on the Texas High Plains, Russ Perkins ........................................ 1156
Comparison of the New Pix DF® Formulation to the Standard Pix© Liquid Formulation, D.J. Munier, B.L. Weir, R.N. Vargas, A. Wrona, B.A. Roberts ................................................................. 1157
Effect of Pix Growth and Yield of Pima Cotton in the San Joaquin Valley of California, B. Weir, R. Vargas, D. Munk, S. Wright, M. Keely .................................................. 1157
Defoliation of Cotton with Ginstar on Western Cotton, Phil Odom, Dale Comer, Gary Schwarzlose, Stan Lehman, Dr. Fred Strachan ....... 1159
Evaluation of CGA-248757 as a Cotton Defoliant/Desiccant, H. Ray Smith, Gary Cloud, James Holloway, Patrick Kennedy, J. Driver, W. Bachman .................................................. 1159
International Experience with Finish (Cyclanilide + Ethephon) Boll Opener & Defoliant, T.G. Szöke, R.J. Manlove .......... 1159
Ethephon Effects on Boll Opening and Earliness of Early- and Late-Planted 'Deltapine 50', C.O. Gwathmey, R.M. Hayes .......... 1161
Application of Sub-Lethal Rates of Glyphosate to Control Regrowth in Cotton: Summary of Three Years Research, J.A. Landivar, K. Creekmore, D. Mosely ............ 1161
Relationship Between Dryland Cotton Yields and Weather Parameters on the Southern High Plains, J.K. Miller, D.R. Krieg, R.E. Peterson .......... 1165
Photoperiod Effect on the Ethylene Production of Cotton, R.L. Jasiun, J.T. Cothren ........ 1166
The Effect of Polymer Film Coatings on Cottonseed Imbibition, Electrical Conductivity, Germination, and Emergence, T.H. Struve, N.W. Hopper .................................................. 1167
Relationship Between Cotton Seedling Cold Tolerance and Physical and Chemical Properties, T.R. Speed, D.R. Krieg, G. Jividen ........ 1170
Cloning and Characterization of Cotton Fiber Genes Encoding Lipid Transfer Protein, H.C. Liu, D.P. Ma .... 1171
Molecular Cloning of a Cotton Fiber Specific cDNA Encoding Cell Wall Protein, H. Tan, D.P. Ma ........ 1172
Progress Towards Genotype Independent Transformation, Linda K. Koonce, Jane Dever, Teresa Burns, Norma Trolinder ........ 1173
New Developments in Fiber Initiation, R.B. Turley, D.L. Ferguson .......... 1174
Characterization of the Tonoplast Intrinsic Protein in Cotton (Gossypium Hirsutum L.), David L. Ferguson, Rickie B. Turley ...... 1173
Effect of Irrigation Timing on Long-Fiber Mote Frequency, G. Davidonis, A. Johnson, J. Landivar .... 1174
Mechanisms of Cool Temperature Inhibition of Cotton Fiber Cellulose Synthesis, Candace H. Haigler, A. Scott Holaday, L. Kirt Martin, James G. Taylor ........ 1175
Antioxidant Response to Cold Stress During Fiber Development, D.R. Gossett, S.W. Banks, M.C. Lucas, E.P. Millhillon .... 1175
Cotton Abscission: Ultrastructural Features and Expression of Abscission-Specific Genes, Curt M. Peterson, Narendra Singh, Livcai Chen, Roland Date ........ 1177
Isolation, Cloning and Overexpression of the Cotton Rubisco Activase Gene, M.E. Salvucci, F.J. van de Loo .......... 1178
Biosynthesis of N-Acylphosphatidylethanolamine in Germinating Cottonseeds, Kent D. Chapman ........ 1181
Volatile Terpene Profiles of A, D, and AD Genome Cottons: Implications for Origin of AD Species, A.A. Bell, E. Percival, Howard J. Williams .......... 1181
Differential Expression of (+)6-Cadinene Synthases in Cotton Cells, P. Heinlein, H. Lin, X-Y. Chen, V.J. Davisson .......... 1182
Induction of HMGR, 6-Cadinene Cyclase and Phytoalexins in Resistant and Susceptible Cotton by Verticillium Dahliae, G. Bianchini, C.R. Benedict, C. Magill, R.D. Stipanovic, A.A. Bell .......... 1183
Gossypol Biosynthesis IV. The Amino Acid Similarity of Terpenoid Cyclases, C. Magill, G. Bianchini, C. R. Benedict .... 1184
Response of Okra-Leaf Isolines from Four Contrasting Modern Cotton Cultivars to 76-cm Rows, J.J. Heitholt, W.R. Meredith, Jr. ........ 1186
Influence of Ultra Narrow Row on Cotton Growth and Development, S.D. Atwell .......... 1187
Impacts of Temik on Cotton in Nematode Soils, William H. McCarty, H. Randall Smith, Jay Phelps .......... 1187
Can Cotton Yield Be Increased by Improving Photosynthetic Capacity?, K.L. Faver, T.J. Gerik .......... 1189
Using Plant Map Data to Identify Early-Season Management Problems in Cotton, D.S. Munk, J.F. Wroble ........ 1197
CottonPro: Software for Plant Mapping and Analysis, Richard E. Plant, Linda G. Bernheim .......... 1198
Influence of Seasonal Patterns of Flower Removal on Cotton Growth and Development, M.A. Jones, R. Wells, D. Guthrie .......... 1200
Physiological Aspects of Potassium Deficiency in Cotton, Derrick M. Oosterhuis, Craig W. Bednarz .......... 1201
Mineral Nutrition and Ozone Damage to Pima Cotton, D.A. Grantz, S. Yang .......... 1203
Speck Trek, G.H. Davidonis, J.M. Bradow, O. Hinojosa, J.A. Landivar, P.J. Bauer .......... 1204
Glycoconjugate Analysis of Developing Cotton Fibers from Several Varieties Grown on the Same Site, Allen K. Murray, Judy Brown .......... 1205
Essential Steps to Successful Ultra Narrow Row Cotton Production, S. Atwell, R. Perkins, B. Guice, W. Stewart, J. Harden, T. Odeneal .......... 1210
Mepiquat Chloride Applications Based on Plant Monitoring, Ken E. Legé .......... 1212
COTTON PHYSIOLOGY CONFERENCE, CONTINUED

Field Evaluation of Plant Growth Regulators for Effect on the Growth and Yield of Cotton Summary of 1995 Results, D.M. Oosterhuis, J.N. Egilla

Effect of Seed Treatment with a Plant Growth Regulator on the Emergence and Growth of Cotton (Gossypium Hirsutum L.) Seedlings, J.N. Egilla, D.M. Oosterhuis

Increased Root Development in Herbicide Treated Soil from Early Harvest PGR Seed Treatments, Mark Crawford, Bond McInnes, Wilson Faircloth

Optimized Timing of Cyclone Applications for Cotton Desiccation, Stephen P. Biles, J.T. Cothren

Heat Unit Effects on Harvest-Aid Performance of Finish™ in the North Delta, Bob Hayes, Owen Gwathmey, Claude Bonner, Bill Robertson, Earl Vories, Gene Stevens, Bobby Phipps

Response of Cotton to Early Defoliation in the Yaqui Valley, Mexico, Arturo Hernández-Jasso, Francisco J. Gutiérrez-Zamorano

Effect of Adjuvants on Drop® Defoliant at Conventional and Ultra-Low Spray Volumes, E.J. Jones, J.E. Hank, G.D. Wills

Evaluation of Ginstar as a Cotton Defoliant for Central Arizona, John M. Nelson, Garry L. Hart

Defoliation Screening Studies in California Acala Cotton, Steve Wrigth, Bruce Roberts, Ron Vargas, Manuel Jimenez, Jr., Tomé Martin Duvall

Subsurface Microirrigation Placement Effects on Cotton Leaf N and Water Potential, Philip J. Bauer, Patrick G. Hunt, Carl R. Camp

Carbon Balance of PGR-IV-Treated Cotton Plants Grown under Two Irrigation Regimes, J. Cadena, J.T. Cothren

Photosynthetic Response and Carbon Isotope Discrimination of Cotton (Gossypium Hirsutum L.) in Response to Potassium Deficiency, C.W. Bednarz, D.M. Oosterhuis, R.D. Evans

Photosynthesis and Translocation of Sugars in Cotton Plants Subject to Drought Stress after Mepiquat Chloride Applications, J.A. Landivar, Celso Jamil Marur

Cotton Growth and Development under Different Tillage Systems, C.W. Kennedy, R.L. Hutchinson

Cotton Seedling Shoot and Root Growth Responses to Light Reflected from Straw-Covered Versus Bare Soil, M.J. Kasperbauer

Cotton Canopy Structure, Light Absorption, and Growth in the San Joaquin Valley of California, S.J. Maas

Effects of Shade on Cotton Carbohydrate Metabolism and Square Development, Duli Zhao, Derrick Oosterhuis

Low Light Conditions Compromise the Quality of Fiber Produced, W.T. Pettigrew

Limitations to Optimal Carbon Uptake Within a Cotton Canopy, G.F. Sassenrath-Cole, J.J. Heitholt

Response of Leaf Anthocyanin Levels to Cutout, Randy Wells

Laboratory Tests Used to Screen for Chilling Tolerance in Cotton Genotypes, D.H. Schutze, N.W. Hopper, J.R. Gannaway, G.M. Jividen

Isolation of cDNA Clones from Petiole Abscission Zones of Cotton, Liwei Chen, Curt M. Peterson, Narendra K. Singh

Evaluation of Selected Amino Acids on Embryogenesis of Cotton, Zhengshou Ke, J. McD. Stewart

The Relationship Between Seed Quality, Time of Radicle Emergence, and Plant Performance of Cotton under Competitive and Noncompetitive Situations, Dennis B. Reginelli, Charles C. Baskin

Cotton Fiber Physical and Physiological Maturation Variation in Response to Genotype and Environment, Judith M. Bradow, Gretchen F. Sassenrath-Cole, Oscar Hinojosa, Lynda H. Wartelle

The Use of Glycoconjugate Analysis to Monitor Growth and Environmental Stress in Developing Cotton Fibers, Allen K. Murray

Assay and Quantification of Actin in Developing Cotton Fibers, Lawrence Higginbotham, William J. Campbell, Barbara A. Triplett

COTTON QUALITY MEASUREMENTS CONFERENCE

The Flexibility of HVI Design Elements and Its Influence on Fiber Strength, Robert A. Taylor, Luther C. Godbey

Spatial Optical Attenuation Corrections for Mass Determination Across Non-uniform Tapered Beards, K.E. Duckett, R.S. Krowicki

A New Design in a Reference Tensile Tester, K.E. Duckett, R.S. Krowicki, D.P. Thibodeaux

Expansion of the Universal Cotton Standards Agreement to Include USDA’s HVI Calibration Cottons and Procedures, Mary Atienza, H.H. Ramey, Jr.

Environmentally Induced Variations in Cotton Fiber Maturity and Related Yarn and Dyed Knit Defects, Judith M. Bradow, Gayle H. Davidson, Oscar Hinojosa, Lynda H. Wartelle, Kevin I. Pratt, Katy Pusateri, Philip J. Bauer, Bobby Fisher, Gretchen F. Sassenrath-Cole, Phiroze H. Dastoor, Ann Johnson, Juan A. Landivar, Darlene Locke, Darryl Moseley

New Developments in Single Fiber Fineness and Maturity Measurements, Gordon F. Williams, Joseph M. Yankey

Predicting Neps in Ginned Fiber Using Afis Immature Fiber Fraction Values and Seed Weight Distributions, G. Davidonis, A. Johnson, O. Hinojosa, J. Landivar
COTTON QUALITY MEASUREMENTS CONFERENCE, CONTINUED

Determination of Wall Thickness and Perimeter by FMT and Diode Array HVI. Part 1: Data Analysis and Results, S.M. Buco, J.G. Montalvo, Jr., E. Stark, K. Luchter

Determination of Wall Thickness and Perimeter by FMT and Diode Array HVI. Part 2: FMT Headspace Resistance Standards, J.G. Montalvo, Jr., E. Stark, K. Luchter

The Fine Structure of Developing Cotton Fibers, You-Lo Hsieh

The Importance of Cotton Crystallite Orientation Angle in Evaluation of Bundle and/or Yarn Tensile Properties, Lloyd B. De Luca, Devron P. Thibodeaux

Small Bundle Tensile Properties of Cotton Related to Mantis® and HVI Data - A Road to Yarn Strength Prediction, Moon W. Suh, Xialiang Cui, Preston E. Sasser

Effect of Moisture on Cotton Fiber Strength, James L. Knowlton

Cotton Plant Sugars and Insect Honeydew Characterized by High Performance Liquid Chromatography, Donald E. Brushwood, Henry H. Perkins, Jr.

Prediction of Rotor Spun Cotton Yarn Quality: A Comparison of Neural Network and Regression Algorithms, Dean Ethridge, Rei Yoo Zhu

Improvement of HVI Measurement Precision. Part 1: Use of HVI for Breeding Programs; MCI Sampling Device Effect, Jean-Paul Gourlot, Michèle Vialle, Serge Lassas, Sandrine Duplan, Chantal Brunissen, Véronique Fallet

Improvement of HVI Measurement Precision. Part 2: Use of HVI for Breeding Programs; MCI Sampling Device Improvement, Jean-Luc Chanselme, Jean-Paul Gourlot, Omar Tamime

FCT - Fiber Contamination Tester - a New Instrument for the Rapid Measurement of Stickiness, Neps, Seed-Coat Fragments and Trash - for the Ginner to the Spinner, U. Mor

Applying PCA to Examine the Influence of Fiber Properties on Roving and Yarn Quality Characteristics, Wen-Bin Yu, Clarence D. Rogers

Influence of Reworkable Waste on Yarn Quality, Pamela Strause, Dr. Clarence Rogers, Wei Tian

The Characteristic Performance of Naturally Colored Cotton, Hong Yin, Clarence Rogers

Characterizing Convolutions in Cotton Fiber Using Image Analysis, Young J. Han, Yong-Jin Cho, Wade E. Lambert, Charles K. Bragg

SOIL MANAGEMENT AND PLANT NUTRITION CONFERENCE

Cotton Response to Multiple Split Applications of Nitrogen, M.W. Ebelhar, R.A. Welch

Early and Mid-Season Advantages of Folocron, a Slow Release Nitrogen Fertilizer, S.G. Morse, D.M. Oosterhuis

A Look at CRP Land: Returning to Cotton Production, Joe Johnson, Keith McGregor, Seth Dabney

Nutritional Guidelines for Potassium in Cotton, B. Weir, R. Miller, D. Munk, B. Rains, B. Roberts, R. Travis, R. Vargas, S. Wright, M. Keeley

Cotton Response to Foliar Applied Urea and Triazine Nitrogen in South Texas, B.W. Wallace, F.M. Hons, R.P. Wiedenfeld

Soil Microbial Biomass and Nitrogen Mineralization Influenced by Tillage Practices and Fertilizers, X. Liu, J.E. Matocha

Yield Response of Irrigated and Rainfed Cotton to Row Spacing, N Rate and Plant Population Density, D.J. Boquet, A.B. Coco

Alabama’s “Old Rotation” 100 Years of Cotton Research, Charles C. Mitchell

Effect of N Rate and Placement on No-Tillage Cotton, D.D. Howard

Fertilizer N and Legume Cover Crop Management Effects on No-Till Cotton Production, J.M. Thompson, J.J. Varco

No-Tillage and Reduced Tillage Cotton Production in South Texas, James R. Smart, Joe M. Bradford
### Soil Management and Plant Nutrition Conference, continued

COTTON WEED SCIENCE RESEARCH CONFERENCE, CONTINUED

Weed Control in Roundup Ready™ Cotton in Louisiana, P.R. Vidrine, D.B. Reynolds, J.M. Beauboeuf .......................................................... 1516
Postemergence Control of Devil's-Claw with Buctril in BXN™ Cotton, C.L. Jones, J.W. Keeling, P.A. Dotray ............................................. 1517
Soybean Response to Simulated Drift Rates of Pyrithiobac, W.L. Barrentine, J.E. Street ................................................................. 1517
Control of Annual and Perennial Grasses in Cotton with Selective Herbicides, Tomé Martin-Duval, Ron Vargas, Manuel Jimenez, Jr, Steve Wright ............................................................ 1517
MACMA: A New Soluble Granule Formulation of MSMA for Cotton, E. Barak ....................................................................................... 1518
PICK-Mor™: A New Cotton Defoliant/Desiccant Harvest Aid from Moore Ag, Gordon Moore, J.J. Caswell, Mark Moore, John Klepper ............................................................. 1518
A Beltwide Overview of “Staple” Performance in Cotton Weed Control Programs, R.G. Turner, L.B. Gillham ............................................. 1520
Postemergence Application of Staple for Broadleaf Weed Control in the Southern Rolling Plains of Texas, Billy E. Warrick ..................... 1522
Control of Nightshade with Staple and its Effect on Various Rotational Crops in California, Ron Vargas, Tomé Martin-Duval, Steve Wright, Manuel Jimenez ............................................................ 1524
Preemergence and Postemergence Weed Control in West Texas with “Staple” Herbicide, J.R. Pitts ......................................................... 1525
Control of Velvetleaf in a Weed Control System that Includes Staple, K.L. Smith, J.M. Chandler, E.P. Prostko ................................................. 1527
Sicklepod Management with Staple Systems, P.V. Garvey, J.W. Wilcut, A.C. York ................................................................. 1528
Roundup and Staple Interactions: Weed Control, J.A. Kendig ........................................................................................................... 1528
Weed Management with Roundup-Resistant Cotton, J.M. Robbie, J.W. Wilcut, A.C. York ................................................................. 1528
Roundup Ready™ Cotton: A Potential New Weed Management Tool for the Texas High Plains, Wayne Keeling, Peter Dotray, Cody Jones, Shay Sunderland .......................................................... 1529
Perennial Weed Control in Roundup Ready™ Cotton, J.M. Chandler, E.P. Prostko, L.D. Bradshaw ................................................................. 1529
Broadleaf Weed Control Systems in Roundup Ready™ Cotton, W.C. Elkins, D.R. Shaw, C.E. Snipes ......................................................... 1530
Weed Control in Roundup Ready™ Cotton, E.C. Murdock, A. Keeton, T.D. Isgett ................................................................. 1531
How Does Roundup Ready™ Cotton Compare to Staple™, DSMA, and Buctril-BXN™ Cotton?; Robert M. Hayes, G. Neil Rhodes, Jr., Claude W. Derting ................................................................. 1531
Weed Control Systems in Roundup Ready™ Cotton, Dewayne L. Goldmon, Charlie Guy, Marilyn McClelland, Andy Kendig ..................... 1532
Weed Management Systems Utilizing Herbicide Resistant Cotton, W.K. Vencill ................................................................. 1532
Weed Management in Conventional Tillage BXN Cotton in North Carolina and Georgia, M.D. Paulsgrove, J.W. Wilcut, A.C. York, James Collins ................................................................. 1533
Effect of Weed Size and Buctril Rate on Prickly Sida, Iyleaf Morningglory, Velvetleaf, and Smooth Pigweed Control, T.C. Mueller, R.M. Hayes, W.T. Willian ................................................................. 1534
Weed Management in No-Till BXN Cotton, A.S. Culpepper, A.C. York, J.W. Wilcut ................................................................. 1534
Weed Management in Reduced and No-Till BXN Cotton in North Carolina and Georgia with Buctril and Cotoran, R.R. Blum, J.W. Wilcut, A.C. York ................................................................. 1535
Weed Control and Cotton Tolerance to Varying Systems of Buctril, Staple, and Command Herbicide, P.C. Carter, M.C. Smith, M. McClelland ................................................................. 1540
Weed Management in BXN Cotton with Soil and Postemergence Herbicides in North Carolina, J. Isgrigg, III, J.W. Wilcut, A.C. York, T. Baughman ................................................................. 1540
Johnsongrass Control Is Antagonized by Buctril-Graminicide Combinations, C.B. Corkern, D.B. Reynolds, P.R. Vidrine, J.L. Griffin, D.L Jordan ................................................................. 1541
Morningglory Control with Staple and Buctril Applied in a Low Volume Spray, J.A. Tredaway, M.G. Patterson ................................................................. 1541
Weed Management in Reduced and No-Till BXN Cotton in North Carolina and Georgia with Buctril and Staple, J.H. Choate, J.W. Wilcut, A.C. York, J. Collins ................................................................. 1542
The Effect of a Varying Rates of Metham and Application Technique on Nutsedge Control and Cotton Vigor, Manuel R. Jimenez, S. Wright, M. Davis, J. Nunez ................................................................. 1543
Cotton Tolerance and Weed Control in Sandy Soils with Command, P.A. Dotray, J.W. Keeling, C.L. Jones ................................................................. 1546
The Potential for Early Application Timings of Command, Eric P. Webster, David R. Shaw ................................................................. 1546
Formulation Alternatives for Command Herbicide on Cotton, S.J. Stringer, T.I. Crumby, J.L. Taylor ................................................................. 1547
Minimum Tillage Weed Control on Clay Soils, H.R. Hurst ................................................................. 1550
Weed Management in Conservation Tillage Cotton, James R. Smart, Joe M. Bradford, Don J. Makus ................................................................. 1550
Cotton Weed Science Research Conference, continued

Horseweed and Cutleaf Eveningprimrose Control in No-Till Cotton, C.B. Guy, R.W. Ashcraft .............................................. 1557
Weed Management with Black Oat (Avena Strigosa) in No-Till Cotton, M.G. Patterson, D.W. Reeves, B.E. Gamble ................. 1557
Roundup Applied by Hooded Sprayer Versus Cultivation in Cotton, L.R. Havf, D.L. Wright, L.L. Gingerich ...................... 1558
Weed Management Systems in No-Till Cotton Utilizing a Hooded Sprayer, J.F. Bradley, C.L. Brown, R.M. Hayes ................ 1559
Weed Control Systems in Strip Tilled Cotton, David L. Wright, Dr. Wieslaw Kozia, Galen Wilson ................................. 1560
Purple Nutsedge Control in Reduced Tillage Cotton, C.T. Bryson ................................................................. 1564

Joint Session: Cotton Engineering Systems/Cotton Ginning Conferences

Ginning Regional Cotton Cultivars at Stoneville, W. Stanley Anthony, Steve Calhoun .............................................. 1567
Effectiveness of Air-Type Lint Cleaners at Commercial Gins, Gino J. Mangialardi, Jr. ......................................................... 1579
Initial Development of a New Portable Moisture Meter for Cotton, R.K. Byler, W.S. Anthony .................................................. 1587
Cotton Gin Drying Time Relationships, J.W. Laird, G.L. Barker .................................................................................. 1590
Water Application Method for Composting Cotton Gin Waste, J.A. Thomasson, M.H. Willcutt ................................. 1597
Cost of Ginning Cotton, William Mayfield, Herbert Willcutt, Roy Childers .......................................................... 1609
Measuring Cottonseed Moisture with the Karl Fischer Titrator, E.R. Cabrera, H.A. Mourad ............................................ 1619
Engineering Analysis and Economic Impacts of Air Pollution Abatement Strategies for Cotton Gins, Anantha R. Ramaiyer, Calvin B. Parnell, Jr., Roy Childers, Stephen Fuller, Melanie Gillis .......................................................... 1619
A Study in Wall Pressures in a Flat Clear-Span Cottonseed Storage House, M. Herbert Willcutt, S.D. Filip To ............. 1625
Biology and Control of the Stable Fly (Stomoxys Calcitrans) in Gin-Trash, Douglas M. Gaydon .............................. 1631
Air Dispersion Modeling and the Regulatory Process, Linda M. Williams, Calvin B. Parnell, Jr. ................................. 1631
Soil Profile Modification Compared to Traditional Tillage - 1994, L.A. Smith, J.R. Williford .............................................. 1641
Influence of Crop Cultivation on Cotton Physiology, W.E. Hart, F.D. Tompkins, M.S. Palmer, J.F. Bradley ..................... 1643
Results from Boll Saver Tests, Michael J. Bader .......................................................... 1650
Advancements in USDA Cotton Classing Facilities, Darryl W. Earnest ................................................................. 1651
The Value of Fiber Testing in the Ginning Industry, Joseph M. Yankey ................................................................. 1654
Laboratory Evaluation of Various Cyclone Designs, S.E. Hughes, R.V. Baker ................................................................. 1657
Physical Evaluation of Cyclone Emission Characteristics, S.E. Hughes, P.J. Wakelyn .................................................. 1661
A Nontraditional Method of Cleaning Pima Fiber, M.N. Gillum, C.B. Armijo ................................................................. 1664
Cyclone Design for Air Pollution Abatement Associated with Agricultural Operations, C.B. Parnell, Jr. ................................. 1666
Regulation of Agricultural Operations Using Emission Factors and Process Weight Tables, C.B. Parnell, Jr., P.J. Wakelyn .......................... 1670

Joint Session: Cotton Textile Processing and Cotton Improvement Conferences

Metabolic Pathway Engineering in Cotton: Biosynthesis of Polyester in Fiber, Dr. M.E. John .............................................. 1679
Bioengineering Fiber Quality: Molecular Determinants of Fiber Length and Strength, Thea A. Wilkins ......................... 1679
Regional High Quality Fiber Properties as Measured by Conventional and AFIS Methods, William R. Meredith, Jr., Preston E. Sasser, Samuel T. Rayburn .................................................. 1681
Non-Insect Related Sticky Cotton, Steven S. Hague, John R. Gannaway ................................................................. 1684
Fiber Properties and Large Scale Processing Efficiency of Two Acala Cottons, J.C. Palmer, H.B. Cooper, Jr., J.W. Pellow, K.E. McRae, D.M. Anderson .................................................. 1686
Evaluation of the Processing Efficiency of Two Acala Cottons Using Bale Lots, H.B. Cooper, Jr., John Pellow, John Palmer, Kelley McRae, David Anderson .................................................. 1687
Fineness, Maturity, Micronaire and Dyeability of Two Acala Cottons, John W. Pellow, H.B. Cooper, Jr., John C. Palmer, Kelley E. McRae ................................................................. 1691
JOINT SESSION: COTTON TEXTILE PROCESSING AND QUALITY MEASUREMENT CONFERENCES

Image Processing as a Tool to Develop High Quality Cotton Fabrics to Get Bigger Profits, M. Lauber, B. Wulfhorst ............... 1697
Cotton Trash Measurement Using Image Analysis, Bugao Xu, Yu-liang Ting, Michael Watson ........................................... 1701
Measuring Leaf, Bark and Grass Particles in Cotton with Nir Imaging, Robert A. Taylor .................................................. 1705

AUTHOR INDEX ................................................................. Please see end of this Volume
