PROCEEDINGS

International Symposium on Formation Damage Control

18–19 February 1998
Lafayette, Louisiana

SOCIETY OF PETROLEUM ENGINEERS INC.

<tr>
<td>SPE 39423</td>
<td>Operational Experience With Foam-Diverted Acid Jobs in the Gulf of Mexico</td>
<td>P.H. Morphy, Shell Offshore Inc., and K.G. Greenwald and P.E. Herries, BJ Services</td>
<td>59</td>
</tr>
<tr>
<td>SPE 39424</td>
<td>Acidizing Gas Wells in the Merluza Field Using an Acetic/Formic Acid Mixture and Foam Pigs</td>
<td>E.P. da Motta, M.H.V. Quiroga, A.F.L. Aragão, and A. Pereira, Petrobras</td>
<td>67</td>
</tr>
<tr>
<td>SPE 39425</td>
<td>The Effect of Near-Wellbore Fracture Geometry on Fracture Execution and Post-Treatment Well Production of Deviated and Horizontal Wells</td>
<td>Z. Chen, BJ Services Co. and M.J. Economides, Texas A&amp;M U.</td>
<td>75</td>
</tr>
<tr>
<td>SPE 39427</td>
<td>The Effect of Frac-Fluid Density on Hydraulic Fracture Growth Direction and Width</td>
<td>W.F.J. Deeg, Halliburton Energy Services Inc.</td>
<td>91</td>
</tr>
<tr>
<td>SPE 39428</td>
<td>Enhancing Fracture Conductivity Through Surface Modification of Proppant</td>
<td>P.D. Nguyen, J.D. Weaver, B.T. Dewprashad, M.A. Parker, and J.M. Terracina, Halliburton Energy Services Inc.</td>
<td>101</td>
</tr>
<tr>
<td>SPE 39429</td>
<td>Filtercake Integrity and Reservoir Damage</td>
<td>L. Bailey, G. Meeten, and P. Way, Schlumberger Cambridge Research, and F. L'Alloret, Schlumberger Dowell</td>
<td>111</td>
</tr>
<tr>
<td>SPE 39430</td>
<td>Formation Damage Prevention by Using an Oil-Based Fracturing Fluid in Partially Depleted Oil Reservoirs of Western Siberia</td>
<td>Marin Cikes, and Srecko Cubric, INA, and M.R. Moylashov, Varyeganneftegaz</td>
<td>121</td>
</tr>
<tr>
<td>SPE 39431</td>
<td>A New Model of Acid Fracture Conductivity Based on Deformation of Surface Asperities</td>
<td>M. Gong, S. Lacote, and A.D. Hill, U. of Texas</td>
<td>133</td>
</tr>
<tr>
<td>SPE 39432</td>
<td>Sand Control Completion Design, Installation and Performance of High Rate Gas Wells in the Jupiter Field</td>
<td>R.C. Burton and S.A. Boggan, Conoco Inc.</td>
<td>149</td>
</tr>
<tr>
<td>SPE 39433</td>
<td>Case History in Achieving High Rate Producers in Sub Sea Gravel Packed Completions</td>
<td>L.G. Myers, Neil Humphreys, and H.P. Kaminski, Mobil Equatorial Guinea Inc., and Elias Bou-waked and David Robertson, Mobil Technical Center</td>
<td>159</td>
</tr>
<tr>
<td>SPE 39435</td>
<td>New Chemistry and Improved Placement Practices Enhance Resin Consolidation: Case Histories From the Gulf of Mexico</td>
<td>M. Parlar, Schlumberger Dowell; S.A. Ali, R. Hoss, and D.J. Wagner, Chevron U.S.A.; and L. King, C. Zeiler, and R. Thomas, Schlumberger Dowell</td>
<td>179</td>

SPE 39437 New Criteria for Gravel and Screen Selection for Sand Control .......................... 201

SPE 39438 Development of a New Crosslinked-HEC Fluid Loss Control Pill for Highly-Overbalanced, High-Permeability and/or High-Temperature Formations ... 215
F.F. Chang, Schlumberger Dowell; S.A. Ali, Chevron U.S.A.; J. Cromb, Texaco, Inc.; and M. Bowman and M. Parlar, Schlumberger Dowell

SPE 39439 Mechanisms of Sand Control Screen Plugging From Drill-In Fluids and its Cleanup Using Acid, Oxidizers and Enzyme Breakers .................................................. 229
H.K. Ladva; Mehmet Parlar, Colin Price-Smith, and L.J. Fraser, Schlumberger Dowell; and S.A. Ali, Chevron U.S.A. Production Co.

SPE 39442 Investigation on Formation Damage Control of the Methylglucoside Fluids ... 241
Yan Zhang, Zhu Chen, and Jienian Yan, U. of Petroleum

SPE 39443 Water Base Drilling Fluid Replaces Oil Base Mud to Control Formation Damage .......................................................... 249
A.K. Ray, L. Singh, R.S. Dinesh, and D. Singh, Oil & Natural Gas Corp. Ltd.

SPE 39444 Eliminate Formation Damage Caused by High Density Completion Fluid—Crude Oil Emulsion .......................................................... 259

SPE 39445 Technique for Fluid-Loss Control and Enhanced Cleanup ........................................ 269

SPE 39446 Asphaltene Near-Wellbore Formation Damage Modeling ........................................ 277
K.J. Leontaritis, AsphWax Inc.

SPE 39447 Removal of Asphalt Deposits by Cosolvent Squeeze: Mechanisms and Screening .................. 289
L. Minssieux, Inst. Français du Pétrole

SPE 39449 Scale Dissolver Application: Production Enhancement and Formation Damage Potential .................................................. 303

SPE 39450 A Stimulation Treatment and Evaluation of a Gravel Pack Well, A Case Study From the Staffjord Field .......................................................... 313
Raymond Børeng and Olav Vikane, Statoil; Thomas Hagen, Champion; and Eyvind Sørhaug, Nalco Exxon Chemicals Norge AS

SPE 39451 Economic and Technical Features of a Revolutionary Chemical Scale Inhibitor Delivery Method for Fractured and Gravel Packed Wells: Comparative Analysis of Onshore and Offshore Subsea Applications .................................................. 323
P.J.C. Webb, AEA Technology plc; T.A. Nistad, Saga Petroleum ASA; B. Knapsstad, Norsk Hydro ASA; and P.D. Ravenscroft and I.R. Collins, BP Exploration Operating Co. Ltd.

SPE 39452 Modelling of Scale Inhibitor Treatments in Horizontal Wells: Application to the Alba Field .......................................................... 337

SPE 39453 Perforating Requirements for Fracture Stimulations ............................................... 349
L.A. Behrmann, Schlumberger Perforating and Testing Center, and K.G. Nolte, Schlumberger Dowell

SPE 39455 Use of Perforation Tunnel Permeability as a Means of Assessing Cased Hole Gravelpack Performance ............................................... 359
R.C. Burton, Conoco Inc.

SPE 39457 Effect of Sand-Grain Size on Perforator Performance ........................................... 371
I.E. Brooks, W. Yang, and L.A. Behrmann, Schlumberger Wireline & Testing

SPE 39458 Micro-Mechanical Modeling of Perforating Shock Damage ........................................ 381
R.P. Swift, Los Alamos Natl. Laboratory; L.A. Behrmann, Schlumberger Perforating & Testing; P.M. Halleck, Pennsylvania State U.; and K.E. Krogh, Los Alamos Natl. Laboratory
SPE 39459  Performance Evaluation of Extreme Overbalanced Perforating  
A. Ghalambor, U. of Southwestern Louisiana; M. Asadi, Stim-Lab Inc.; and M. Azari,  
Halliburton Energy Services  

SPE 39461  Polymer Loss in Filter Cakes  
A.M. Przepasniak and P.E. Clark, U. of Alabama  

SPE 39463  Physics and Modeling of Permeability Damage Induced by Particle Deposition  
G. Chauveteau, L. Nabzar, and J-P. Coste, Institut Français du Pétrole  

SPE 39464  Controlling Formation Damage Caused by Kaolinite Clay Minerals: Part II  
A. Hayatdavoudi and A. Ghalambor, U. of Southwestern Louisiana  

SPE 39465  Near-Wellbore Formation Damage by Polyelectrolytes: Effects of pH and Salinity  

SPE 39466  Use of Downhole Diagnostics Enhances Determination of Damage Mechanisms  
V.J. Yeager, Halliburton Energy Services, Inc.  

SPE 39468  Distribution of Mud Induced Damage Around Horizontal Wellbores  
Bimal Thomas and M.M. Sharma, U. of Texas  

SPE 39469  Horizontal Gravel Packing Technique for Slim, Cased Holes in Highly  
Permeable Zones: A Single Well Case History  
E.R. Upchurch, THUMS Long Beach Co.  

SPE 39473  Wellbore Cleanup in Horizontal Wells: An Industry Funded Study of Drill-in  
Fluids and Cleanup Methods  
D.B. Burnett  

SPE 39474  Optimization of the Performance of High-Permeability Fractured Wells  
T.M. Aggour and M.J. Economides, Texas A&M U.  

SPE 39476  Methodology of Fluid Leakoff Analysis in High-Permeability Fracturing  
I.N. Ispas, U. of Oklahoma; L.K. Britt, Amoco Technology Center; D. Tiab, U. of Oklahoma;  
and P. Valko and M.J. Economides, Texas A&M U.  

SPE 39477  A Coupled Wellbore-Hydraulic Fracture Simulator for Rigorous Analysis  
of Frac-Pack Applications  
Terri Sherlock-Willis, Jean Romero, and Surya Rajan, Dowell  

SPE 39481  New Acidizing Techniques Prove Useful in the Deep Offshore Environment  
R. Harvey, Amoco E&P Co.; G.S. Dunk and M. Wylie, Mobil E&P U.S. Inc.; and J.L. Gidley,  
John L. Gidley & Assoc. Inc.  

SPE 39482  Fines Migration Control in High-Water-Cut Nigerian Oil Wells:  
Problems and Solutions  
Toni Ezeukwu, Ashland Oil Nigerian Co.; R.L. Thomas, Schlumberger Dowell; and  
Terje Gunneroa, Schlumberger Dowell Nigeria  

SPE 39483  Aluminum Scaling and Formation Damage Due to Regular Mud  
Acid Treatment  
H.A. Nasr-El-Din and J.A. Hopkins, Saudi Aramco, and C.E. Shuchart and T. Wilkinson,  
Halliburton Energy Services  

SPE 39485  Damage Characterization and Production Optimization of the Hassi-Messaoud  
Field, Algeria  
A. Alloutti and A. Ziada, Sonatrach, and W. Ramses and F.E. Fragachán,  
Schlumberger Dowell  

SPE 39487  Water Quality Requirements and Restoring the Injectivity of Waste Water  
Disposal Wells  
H.A. Nasr-El-Din and A.A. Al-Taq, Saudi Aramco  

SPE 39581  Do Fluid Loss Control Additives Perform as Claimed in  
Acid-Fracturing Treatments  
N.A. Mumallah, Phillips Petroleum Co.  

SPE 39582  New Guidelines for Applying Curable Resin-Coated Proppant  
P.D. Nguyen, R.G. Dusterhoft, B.T. Dewprashad, and J.D. Weaver, Halliburton Energy  
Services Inc.
SPE 39583 Novel Application of Emulsified Acids to Matrix Stimulation of Heterogeneous Formations .................................................. 601
M.A. Buijse and M.S. van Domelen, Halliburton B.V.

SPE 39584 Evaluation of Clay Stabilizers for a Sandstone Field in Central Saudi Arabia .......... 613
H.A. Nasr-El-Din, A.A. Al-Mulhem, and J.D. Lynn, Saudi Aramco

SPE 39586 Injectivity Decline in Wells With Nonuniform Perforation Properties ................ 631
T. Hofsaess, Consulting, and W. Kleinitz, Preussag Energie GmbH

SPE 39587 Influence of Pore Size Distribution on Damage Profile ................................. 641
K. Aminian, H.I. Bilgesu, and S. Ameri, West Virginia U.

SPE 39589 “Micro-Bubbles”: New Aphron Drill-In Fluid Technique Reduces Formation Damage in Horizontal Wells ..................................... 645
Tom Brookey, ActiSystems Inc.

SPE 39590 A Study of CO₂ Effects on Reservoir Fluid Sensitivities in Preparation to a CO₂ Flood ................................................................. 657
Randall Freeman, Henry Lopez, and Steven Metcalf, BJ Services Co. U.S.A.

SPE 39591 High Permeability Channels in Proppant Packs Containing Random Fibers ........ 665
P.R. Howard, Schlumberger Cambridge Research; S.G. James, Schlumberger Dowell; and D. Milton-Taylor, FracTech Ltd.

SPE 39592 A New Material and Novel Technique for Matrix Stimulation in High-Water-Cut Oil Wells ....................................................... 675
F.F. Chang, R.L. Thomas, and D.K. Fu, Schlumberger Dowell

SPE 39593 Current Materials and Devices for Control of Fluid Loss .................................. 683
C.M. Ross and B.L. Todd, Halliburton Energy Services

SPE 39595 Designing a Remedial Acid Treatment for Gulf of Mexico Deepwater Turbidite Sands Containing Zeolite Cement .................................. 693
B.A. Rogers, M.K. Burk, and S.A. Stonecipher, Marathon Oil Co.

SPE 39597 Sand Jet Perforating Revisited ........................................................................ 703
J.S. Cobbett, Consultant
