EDITED PROCEEDINGS:
FOURTH INTERNATIONAL
CONFERENCE ON
ZINC COATED STEEL SHEET
PARIS, JUNE 1994
Contents

SESSION A: GLOBAL MARKETS AND STRATEGY FOR ZINC COATED STEEL SHEET (INCLUDING DEVELOPMENT OF EXISTING PRODUCTS AND NEW PRODUCTS)

Coated sheet: is overcapacity a permanent disease?
P Tomlinson (UK) SA1

The market for zinc-coated sheet in Europe:
A Coustenoble (France) SA2

Market and product development for zinc coated steel in North America:
R W Leonard (USA) SA3

Present situation and trends for coated steel sheet in the Japanese automotive, building and construction industries:
C Kato (Japan) SA4

Market and market development for zinc coated steel in Korea:
Hong-Yong Chung (Korea) SA5

Taiwan market: a look at the present position of hot dip galvanized steel and its future prospects:
Lung-Tan Chen (Taiwan) SA6

SESSION B: THE AUTOMOTIVE INDUSTRY

Performance of precoated products in the car: the point of view of Renault:
A Jussiaume (France) SB1

Lightweight construction with steel in the automotive:
R Winkelgrund (Germany) SB2

Fuel efficient sheet steel automobiles:
A E Matthews (UK) SB3

Intermaterial competition in the automotive industry:
P T Peterson (USA) SB4

Coated steel sheet as a material for fuel tanks:
W Warnecke, H Knoche and W Dechêne (Germany) SB5

Audi’s experience with aluminium in comparison to steel:
H-G Pabst (Germany) SB6

Corrosion resistance of alternative coated steels for fuel tanks:
L M Storozheva, V A Paramonov, A T Moroz and A I Tychinin (Russia) SF7

[Secretarial note: paper SF7 was transferred from Session F to Session B]
SESSION C: THE BUILDING AND CONSTRUCTION INDUSTRY

Exploring the possibilities:
P J Trebilcock (UK) SC1

The development of Galfan at Cockerill Sambre:
P Jodogne, L Peini and C van Campenhout (Belgium) SC2

Field performance survey of 55% aluminium-zinc coated steel roofing in Great Britain:
D Pillai (UK) SC3

Metallic coated steel sheet in construction:
J Robinson (UK) SC4

Long-term atmospheric corrosion performance of prepainted Galvalume sheet:
S A Kriner (USA) SC5

Improvement of Galfan surface appearance for coil coating uses:
S T Bluni and A R Marder (USA) SC6

Galvanized steel in the building industry:
J M Haironville (France) SC7

SESSION D: THE APPLIANCE INDUSTRY

Application of coated steel in the appliance industry in Mexico:
J Perez Chavez (Mexico) SD1

Trends in coated steel sheet for appliances in Japan:
T Shiota (Japan) SD2

SESSION E: JOINING AND FORMING/BATH MANAGEMENT/GALVANNEALING

Assembly and disassembly with coated steels:
A Hurkmans, A W Bosman, W J van der Meer and P W van Rij (Netherlands) SE1

Press joining of coated sheets in practical applications:
M Dobrikow and M Kleinert (Germany) SE2

Cracking behaviour of industrial hot dip coated steel sheets for the building industry:
S Feron, M Dubois (Belgium) and P Bourgeois (France) SE3

Influence of resistant spot welding electrode alloy type on the nature of electrode wear and tip life:
J A Wist, C L White, M D Gugel and F E Goodwin (USA) SE4

Intermetallic particle formation in continuous galvanizing baths:
R J Barnehurst, S Bélisle and M Gagné (Canada) SE5

Effect of steel surface pretreatment on the hot dip galvanizing reaction:
K Nishimura, T Yamada and K Kishida (Japan) SE6

Condition of dross formation during continuous hot dip galvanizing in zinc-aluminium baths:
P Perrot, J-C Tissier, J-Y Dauphin and J Foct (France) SE7

The application of high frequency technology to induction heating of steel strip:
P Knupfer (Belgium) SE8

Galvanizing and galvannealing: a Diamond Jubilee and a decade of change:
P W Ainscow (UK) SE9

Characterisation of galvannealed coatings by electrochemical stripping:
X G Zhang and I Bravo (Canada) SE10
SESSION F: SURFACE TREATMENTS/CORROSION/ENVIRONMENT-RELATED MATTERS

Technical developments in products available to the user:
T J Goodwin (UK) SF1

Properties of manganese/zinc coated steel sheet by vacuum deposition:
J H Jun, B M Lim and J C Shin (Korea) SF2

Improvement of the resistance to environmental damage of polyester-type resin precoated roll-formed hot dip galvanized panels:
D Laverde Cataño, J Gil Sevillano and E Villeneuva Arnaiz (Spain) SF3

The influence of marine environments on the relative corrosion performance of zinc and the zinc-based alloys used for steel sheet applications:
G A King (Australia) SF4

In-line sealing of hot-dip coated steel sheet:
J Lewandowski and B Schumacher (Germany) SF6

[Secretarial note: paper SF5 was withdrawn; paper SF7 was transferred to Session B]

SESSION G: FUTURE PROSPECTS

Recycling zinc coated steel scrap - present statement and future prospects:
C Rome and R Sempels (Belgium) SG1

Future market prospects for coil coated steel:
P Burling (Immediate Past President, ECCA) SG2

Mini mill equipment for steel for galvanized and painted strip production:
A Marchal and R Wang (France) SG3

VAI strip processing lines: response to a trend toward value-added products:
H Altendorfer, E Fuhrmann and W Pusch (Austria) SG4

Future prospects for zinc-coated automotive sheet in North America:
J F Butler and F O Altimore (USA) SG5

Opportunities in the Central and Eastern European coated sheet market to the year 2000:
A M Kotas (UK) SG6

SUMMARY OF DISCUSSION SG
