Electromagnetic
and Light Scattering
- Theory and Applications III. -

Proceedings of the 3rd Workshop on
Electromagnetic and Light Scattering
- Theory and Applications -

March 16-17, 1998
Bremen, Germany

Thomas Wriedt - Yuri Eremin
(Editors)

Universität Bremen, Bremen 1998

V. F. Kravchenko, V. A. Rvachev
R-function theory and its application for the solution of boundary value problems in arbitrary domains

V. F. Kravchenko
Methods for solving boundary value problems of electrodynamics of superconducting structures

Y. Leviatan
On the use of Gabor-like and wavelet-like expansions in the method of fictitious current models for efficient solution of scattering problems

H. Lemke, M. Quante, O. Danne, E. Raschke
Backscattering of radar waves by non-spherical atmospheric ice crystals: An application of the discrete dipole approximation

V. N. Lopatin, N. V. Shepelevich, I. V. Prostakova
Basic mechanisms of formation of integral scattering indicatrix of optically soft spheres

V. V. Lopushenko
Modelling of light scattered by microroughness of filmed wafers

B. Michel
Distorted wave approach to the optical properties of inhomogeneous spheres

F. Obelleiro, J. L. Rodriguez, L. Landesa
Hybrid GMT-MoM-method for solving electromagnetic scattering problems

Y. Okuno, H. Ikuno
Yasuura's method, its relation to the fictitious source methods, and its advancements in the solution of 2-D problems

N. Orlov
Light scattering from defects of filmed silicon wafers by method of discrete sources

V. I. Ovod
Modeling of multiple scattering suppression in photon correlation spectroscopy

N. B. Piller, O. F. Martin
Scattering by anisotropic bodies with the generalized multipole technique

M. Quinten, R. Wannemacher, A. Pack
Scattering and extinction of evanescent waves by spherical particles

T. Quinteros, M. Bjuggren
The discrete dipole approximation used to model the optical behavior of clusters of pigments in paper coatings

V. A. Sterligov
Elastic light scattering by structure defects

G. Videen
Polarized light scattering from surface contaminants

R. Zaridze, G. Bit-Babik, K. Tavzarashvili, N. Uzunoglu, D. Economou
Some recent developments in method of auxiliary sources for inverse and scattering problems on large and complex structures
