CONTENTS

Volume 1

Foreword

Plenary Session: Opening Ceremony and Invited Papers

Monday, Nov. 3  9:00 AM - 12:00 PM
Chairman: Zhaoling Wu, Zhejiang University, China

0.1 Power Electronics and Microelectronics, Tools for Future Electrical Energy Conversion
Werner Leonhard (Technical University Braunschweig, Germany).................................1

0.2 Review of Power Factor Correction Techniques

0.3 Power Electronics and Electric Vehicles
C. C. Chan, K. T. Chau (The University of Hong Kong, Hong Kong, China)..............21

0.4 On the Intelligent Control for Electric Drive Systems
Boshi Chen, Xiaogang Feng (Shanghai University, China).................................29

Session 1: Power Semiconductor Devices
Monday, Nov. 3  1:30 PM - 5:30 PM

1.1 Visualization of Inner Power Dissipation by Device Simulation of GTO
Hiroshi Sakata, Shigehiro Isomura (Ehime University, Japan).................................36

1.2 Systematic Design of Smart Power Devices
Chihao Xu (Siemens AG, Power Semiconductor Division, Germany).........................42

1.3 Improved Understanding of IGBT Forward Conduction
K. Sheng, S. J. Finney, B. W. Williams (Heriot-Watt University, U.K.)....................48

1.4 Fabrication and Characterization of a High-Power GaAs Lateral Photoconductive Switch
Wei Shi, Zhenxian Liang, Chuanxiang Xu (Xi'an Jiaotong University, China)...........56

1.5 Non-destructive Testing and Evaluation of Generation II Mos-Controlled Thyristors
Xinxiang Yan, D. Boothe, B. Watson, Dan Sable, G. Hua
Session 2: Power Factor Correction

Monday, Nov. 3  1:30 PM - 5:30 PM

2.1 Optimal PWM Control for High-Power Cascaded Multilevel Inverter with Separate DC Sources
Yongdong Li, Peng Ji, Jie Chen, Jun Liu (Tsinghua University, China)  80

2.2 PWM Reversible Rectifier Based on Tri-Level Hysteresis Current Control
Changjiang Zhan, Ping Liu, Gaoqiang Li, Jian Chen
(Huazhong University of Science and Technology, China)  86

2.3 A High Power AC/DC Current Source Converter with Sinusoidal Input Current and Unity Power Factor
F. De Winter (Allen-Bradley Canada Ltd., Canada), Y. Xiao, B. Wu (Ryerson Polytechnic University, Canada)  91

2.4 Input Current Harmonic Analysis and Parameters Choice of PWM Rectifiers with Fixed Switching Frequency
Shuyun Wan, Anwen Shen, Lijiu Wang
(Huazhong University of Science and Technology, China)  96

2.5 A New Ballast for MH Lamps with High Input Power Factor and ZVT
Weiping Zhang, Zhaolin Wu (Zhejiang University, China)  102

2.6 Simulation of an AC to DC Power Factor Corrected Boost Converter Switching Losses
Lisheng Shi, Chengqun Yin, Limin Chen
(University of North China Electric Power, China)  106

2.7 Analysis of Inherent Dynamic Characteristics of Current Source Type PWM Rectifier
Soo-Bin Han, *Gyu-Hyung Cho, Bong-Man Jung, Soo-Hyun Choi
(Korea Institute of Energy Research, Korea; *Korea Advanced Institute of Science and Technology, Korea)  112

Session 3: Simulation and Analysis of Motor Drives

Monday, Nov. 3  1:30 PM - 5:30 PM

3.1 Simulation of the Starting Performance of Induction Motors on Personal Computers
S. L. Ho, C. C. Tang, H. C. Wong
(Hong Kong Polytechnic University, Hong Kong, China)  118
3.2 Mathematical Modeling and Computer Simulation of a DC Drive System with Multimotor Couplings  
Zhongfa Cai (Zhejiang University, China),  
Minxun Chen (Shanghai Jiao Tong University, China) .......................................................... 124

3.3 SABER Simulation and Design of a High Frequency Link DC-AC-AC Converter for Electric Vehicle Drives  
S. D. Bocus, S. El Baroudi, F. Bernot, F. Grandgirard, A. Berthon  
(Institute de Genie Energetique, France) .......................................................... 130

3.4 The Simulation of a Motor-Inverter Control System with MATLAB  
Guohai Liu, Dunxiu Sun, Zhengtang Yang, Wei Wang  
(Jiangsu University of Science and Technology, China) .............................................. 136

3.5 A Dynamic Model of Brushless Double-Fed Machine  
Wei Zhang, *Satoh Kazuo, Yikang He  
(Zhejiang University, China; *Shizuoka University, Japan) ....................................... 141

3.6 Rapid Parameter Determination of Three Phase Induction Motors  
Colin Grantham, H. Tabatabaei-Yazdi  
(The University of New South Wales, Australia) .......................................................... 147

3.7 Comparison of Inverter Algorithms for AC Traction Motor Control with Nonconstant Voltage Sources  
S. L. Ho, H. C. Wong (Hong Kong Polytechnic University, Hong Kong, China) ............ 153

Session 4: Motion Control
Monday, Nov. 3 1:30 PM – 5:30 PM

4.1 Position Control of a Flying Wind-Driven, Electric Generator  
Bryan W. Roberts (University of Western Sydney, Australia) ........................................... 159

4.2 Fast AC Motor Position Control with Variable Switching Plane Controller  
Yang Xia, Xinghao Yu, Wardina Oghanna  
(Central Queensland University, Australia) .............................................................. 164

4.3 Pitching Motion Control of an Underwater Travelling Marine-Express Model Vehicle ME02  
K. Yoshida, L. Shi, H. Takami (Kyushu University, Japan) .......................................... 170

4.4 Automatic Learning Control-Based Auto-Gain Parameter Tuning DC Brushless Motor Drive Systems  
(Shinko Electric Co., Ltd., Japan; *Yamaguchi University, Japan) .................................. 174

4.5 An Intelligent Speed Control System for Square-Wave Rare-Earth Permanent Magnet Brushless DC Motor  
Bo Zhou, Xianxiang Li, Chengzhong Wang  
(Nanjing University of Aeronautics & Astronautics, China) ....................................... 180
4.6 Core Losses and Torque Pulsations in Interior Permanent Magnet Motor
S. B. Wee, K. J. Tseng (Nanyang Technological University, Singapore)..........................185

Session 5: Application of Modern Control Strategies
Monday, Nov. 3 1:30 PM - 5:30 PM

5.1 Research on the Stability of Fuzzy Controlled Drive System
Xiaogang Feng, Boshi Chen (Shanghai University, China).................................191

5.2 Development of a Fuzzy Logic Based Multi-Objective Unified Controller for Statcom
Jianye Chen, Qirong Jiang, Zhonghong Wang, Yingduo Han, *Yongkang Yang,
*Xiangrong Li (Tsinghua University, China; *Henan Electric Power Bureau, China)........197

5.3 An Adaptive Nonlinear Control Technique for Induction Motor Control
Ji-Su Ryu, Kee-Sang Lee, Soon-Chan Hong (Dankook University, Korea)......................203

5.4 Fuzzy Model Based Predictive Control of an Induction Machine Drive System
Z. Wu, D. Naunin (Technical University of Berlin, Germany).................................209

5.5 A Research on Robust Control of SRM Based on Feedback Linearization
Guojun He, Jingping Jiang (Zhejiang University, China).........................................215

5.6 Modified Predictive Current Control for the Compensation of Computation Time Delay
Myung-Ho Woo, Seung-Gi Jeong (Kwangwoon University, Korea)..............................220

Session 6: Power Electronics in Power Engineering
Monday, Nov. 3 1:30 PM - 5:30 PM

6.1 An Analysis of the Current Controllability for an Active Power Compensator with
Space Vectors Method
Mei Tong, Peiti Feng (Zhejiang University, China)..............................................226

6.2 Converter Analysis and Filtering Characteristics of Hybrid Type Series Active
Filter Used in Single-Phase Circuit
Jinjun Liu, Zhaoan Wang (Xi'an Jiaotong University, China).................................232

6.3 A New Utility Interactive Photovoltaic Power Conditioning System and
Its Maximum Power Tracking Control
Huian Dong, Hidehiko Sugimoto (Fukui University, Japan).....................................238

6.4 Utility-Interactive Instantaneous Sinewave Vector Modulated Bidirectional Three
Phase Soft-Switching Power Conditioner Using a Resonant DC Link
(Yamaguchi University, Japan; *The Kansai Electric Power Company Inc., Japan)........244

6.5 Tap Changer for 10kV Distribution Transformer: System Lay-out and Control
P. Bauer, S. W. H. de Haan, G. C. Paap
(Delft University of Technology, The Netherlands)..............................................250

6.6 Grid Interface for Renewable Energy Sources
6.7 Photovoltaic/Diesel Hybrid Generating System for Ship
Takeshi Katagi, Jaeshik Park, Yasuhiro Yamanouch, Shogo Hirayama, Takeshi Hashimoto
(Kobe University of Mercantile Marine, Japan) ................................................................. 262

6.8 An Approach to Improving the Adaptability of the AC/DC Converters to the Power Utilities
Jianlong Shao, Jianyi Guo, Wengang Che (Yunnan Polytechnic University, China) ................. 268

Session 7: Power Devices Components and Materials for Power Electronics
Tuesday, Nov. 4 9:00 AM - 12:00 PM

7.1 IGBT Switching Losses
K. Sheng, S. J. Finney, B. W. Williams (Heriot-Watt University, U.K.),
X. N. He, Z. M. Qian (Zhejiang University, China) ................................................................. 274

7.2 A Study on the Optimal Design for Plunger Type Solenoid Using Finite Element Method
Tong-Ki Paek (Juseong Junior College, Korea),
Jeong-Hwan Jin (R&D 6th GR. LG Precision Co., Ltd., Korea),
Se-Jin Seong (Chungnam National University, Korea) ................................................................. 278

7.3 Minimum Core Volume Design of High-Frequency Planar Transformers
*Yue-Quan Hu, K.W.Cheng, Y.S.Lee
(*The University of Science and Technology of China, China;
The Hong Kong Polytechnic University, Hong Kong, China) .................................................. 284

7.4 Estimation of Iron Losses in Induction Motors According to the Actual Change of Magnetic Field
S. L. Ho, H. C. Wong (The Hong Kong Polytechnic University, Hong Kong, China),
W. N. Fu (Shanghai University, China) ................................................................. 290

7.5 Simulation on Latch-up Effects of a High Power Insulated Gate Bipolar Transistor (IGBT)
Shan-Qi Zhao, *D. Planson, *J.-P. Chante (Beijing Power Electronics R&D Center, China;
*Cegely-ecpa, Insa de Lyon, France) .................................................................................. 295

7.6 A Novel Ring Anode-Shorts Design for High Power GTO
Changli Zhang, Nanping Xu (Xi'an Power Electronics Research Institute, China),
Ge Wu, Zhiming Chen (Xi'an University of Technology, China) ................................................. 300

Session 8: Converters
Tuesday, Nov. 4 9:00 AM - 12:00 PM

8.1 Novel Real Time Output Voltage Control for Series-Resonant High-Frequency AC-Linked DC-AC Converter
Session 9: Control Strategies in Motor Drives
Tuesday, Nov. 4 9:00 AM - 12:00 PM

9.1 A Research on Using Adaptive Feedback Linearization in Induction Motors
Guojun He, Jingping Jiang (Zhejiang University, China), Zhixin Zhang (Chongqing Jiangbei Power Supply Bureau, China) ................................................................. 342

9.2 High Performance Speed-Adjustable System of Ultrasonic Motor with Frequency Tracking Implementation
Jinbo Liu, Weixin Chen, Yongxiao Chen (Zhejiang University, China) ................................................................. 347

9.3 A Speed Sensorless Vector-Controlled Method for Induction Motors Using Q-Axis Flux
Mineo Tsuji, Shuo Chen, Takeyuki Ohta, Katsuhiro Izumi, Eiji Yamada (Nagasaki University, Japan) ................................................................. 353

9.4 Accurate Measurement of Instantaneous Voltage and Current for Power Electronics Circuits
Tung-Hai Chin, Motomu Nakano, Takashi Hirayama (Sophia University, Japan) ................................................................. 359

9.5 Fuzzy Control of Induction Motor with Direct Torque Control Strategy
Yang Xia, Wardina Oghanna (Central Queensland University, Australia) ................................................................. 365

9.6 High Frequency and Precision Sine/PWM Controller with Zero-Frequency MPU Intervention In the Steady-State for Distributed Power Control Systems
Jie Chang (Rockwell International Co., U.S.A.) ................................................................. 371
Session 10: Motion Control and Servo Systems  
Tuesday, Nov. 4 9:00 AM - 12:00 PM

10.1 A Novel Space Vector Controlled AC Servo System Based on Double CPUs  
Double Ports RAM Structure  
Keliang Zhou, Ping Liu, Yong Kang, Jian Chen  
(Huazhong University of Science and Technology, China) .......................................................... 377

10.2 A Dynamic Scanning Device and Its Step Motors Servo System in  
Robot Ultrasonic Visual Sense  
Yubin Xu, Jinggang Zhang, Jianchao Zeng, *Maokai Liu  
(Taiyuan Heavy Machinery Institute, China; *Harbin Institute of Technology, China) ............... 380

10.3 Attractive-Levitation and Propulsion Experiments of 1/2-Scale  
Controlled-PM LSM Maglev Vehicle  
Kinjiro Yoshida, Z.Dai, H.Takami, A.Sonoda (Kyushu University, Japan) ................................. 384

10.4 Position Control of Ultrasonic Motors Using Sliding Mode Control  
Tomonobu Senjyu, Satoru Yokoda, Katsumi Uezato (University of the Ryukyus, Japan) .......... 388

10.5 Control of Linear Servo Motors for Repetitive Motion Applied to  
Software Cam Systems  
Mi-Ching Tsai, Wu-Sung Yau, Ching-Ling Chiu  
(National Cheng Kung University, Taiwan, China) ................................................................. 394

10.6 Investigations on a High Performance Torque Controller for a Permanent  
Magnet Synchronous Motor in the Stationary Reference Frame  
L. Zhong, M. F. Rahman, K. W.Lim (University of New South Wales, Australia) ..................... 399

Session 11: Power Factor Correction and Converters  
Tuesday, Nov. 4 9:00 AM - 12:00 PM

11.1 High Power GTO Current Converter Array for SMES  
Dehong Xu, Hao Ma (Zhejiang University, China) ................................................................. 405

11.2 Analysis of a Novel Parallel Connected Current Source Converter  
Lei Liu, Wei Xu, Zhongchao Zhang (Zhejiang University, China) ............................................ 411

11.3 A Single-Stage Converter with High Power Factor Correction and Fast Regulation  
T.-F. Wu, Y.-K.Chen, M.-C.Chiang  
(National Chung Cheng University, Taiwan, China) ............................................................. 415

11.4 Analysis and Design of Switching Power Supply with Zero-Voltage-Transition and  
Active Power Factor Correction Techniques  
Shaowen Gong, Xuefei Xie, Wending Li (Beijing Institute of Technology, China) ..................... 421

11.5 A Digitized Synchronization Scheme for SCR Controllers  
Yu-Kang Lo, Huang-Jen Chiu (National Taiwan Institute of Technology, Taiwan, China) .......... 426

11.6 Low-Cost High Power Factor Rectifiers with Current Slope Control

-xvii-
11.7 Microprocessor Based Lighting System with Mutual Dimming Feature
T.-F. Wu, T.-H. Yu, Y.-J. Wu, Y.-C. Liu
(National Chung Cheng University, Taiwan, China) ........................................... 437

Session 12: Power Electronics in Power Engineering
Tuesday, Nov. 4 9:00 AM - 12:00 PM

12.1 The Study of the Transient Compensation Characteristics of Shunt Active Filter
Xiaoqing Yan, Zhaohan Wang (Xi'an Jiaotong University, China) ........................................... 443

12.2 Power Electronics in Future Power Systems
W. R. Lachs, C. Grantham (University of New South Wales, Australia) ......................... 449

12.3 A New Nonlinear Controller for AC/DC Power Transmission System
Jie Tian (Nanjing Automation Research Institute, China) ........................................... 455

12.4 Design of the Capacitor & Voltage Regulator for APFs
Zhongming Ye, Bofan Dong, Zhaoming Qian (Zhejiang University, China) ......................... 459

12.5 A New Combined System for Harmonic and Reactive Power Compensation
Shiguo Luo, Puqiao Feng, Shouren Zhao (Logistical Engineering University, China) ............ 465

12.6 Power Flow Analysis of a SVC Using Three-Level Inverter with Neutral Point Voltage Stabilizing Control
Mikihiko Matsui (Tokyo Institute of Polytechnics, Japan) ........................................... 471

12.7 A Closed Form PWM Duty Cycle Control for Advanced Static Var Compensators
Ching-Tsai Pan, Jenn-Jong Shieh, Hsing-Ho Wan
(National Tsing Hua University, Taiwan, China) ........................................... 477

Session 13p: Poster Session
Tuesday, Nov. 4 12:40 PM - 2:40 PM

13p.1 Comparison of Energy Loss and Application of Saturable Components in Regenerative and Nonlinear Dissipative Snubbers for Bridge Legs
Yan Deng, Xiangning He, Zhaoming Qian (Zhejiang University, China) ......................... 483

13p.2 Three-Band Analysis for PFC Circuits
Weiping Zhang, Zhaolin Wu (Zhejiang University, China),
Xusen Zhao, Shaowen Gong (North China Univ. of Technology, China) ...................... 489

13p.3 Fault Protection and Diagnosis for the 304KW GTO Chopper Drive System
W. Y. Wu, Y. N. Zheng, Ch. J. Zhang, W. Han, B. Ch. Wang
(Yanshan University, China) ................................................................. 492

13p.4 Optimal PWM Inverter Control Associated with Discretization Formula
Toshiji Kato, Masato Inagaki, Yoshihiro Morie, Masaru Shimura
(Doshisha University, Japan) ................................................................. 497

-xviii-
13p.5 NBI Power Supply System on the HL-1M

D.-T. Wang, G.J.Lei, S.F.Jiang, E.Y.Wang (Southwestern Institute of Physics, China),
(Nanjing Electric Tube Factory (772 Factory), China)........................................502

13p.6 The Control of Two or More Independent Invertors by a Single Microprocessor Board

I.A.El-Kassas, *L.N.Hulley, *W.Shepherd (College of Technology, Al-Ahsa, Saudi Arabia;
*University of Bradford, U.K.).................................................................508

13p.7 Three-Phase Four-Wire Pseudo Full-Bridge DCM-PFC Topology Analysis and Design

David M.Xu, Jinfu Zhang, Zhaoming Qian (Zhejiang University, China)......................514

13p.8 Intelligent AC Soft Switch Realised by Micro-Controller

Zhengshi Chen, Jishen Peng, Shaolou Song (Liaoning Technical University, China)........521

13p.9 A Novel ZCT-PWM Two-Transistor forward Converter

Wei Bao, XuanSan Cai, *Xiaodong Sun
(Tsinghua University, China; *Institute of Beijing Bilin Power Electronics, China)........526

13p.10 Fault Feature Extraction of GTOs and Diodes in ASVG Using Reference Model

Caijin Lai, Jianguo Jiang, Pengsheng Su, Zhengming Zhao
(Tsinghua University, China)........................................................................531

13p.11 A Digital Integrated Pulse-Width-Modulation Unit

Jianhua Ying, Sanqing Liu (Huazhong University of Sci. & Tech., China),
Guangjun Cao, Yanzhong Xu (De Montfort Univ., U.K.)....................................536

13p.12 A Novel Analysis Model for Power Factor Correction (PFC) Boost Converter

Ping Liu, Yong Kang, Changjiang Zhan, Jian Chen
(Huazhong University of Science and Technology, China)................................539

13p.13 A Novel Phase-Shift PWM Converter

Gaoqiang Li, Yong Kang, Jian Chen
(Huazhong University of Science and Technology, China)..................................544

13p.14 A New Type of Sinusoidal DC 48V-AC 220V Power Supply Based on
One-Cycle Control

Chongming Qiao, Zhaolin Wu (Zhejiang University, China)..................................549

13p.15 Two Amplitude Active Clamped Resonant DC Link Inverter

Jianping Ying (Zhejiang University, China),
Klemens Heumann (Technische Universit Berlin, Germany)..................................554

13p.16 Application and Design Method of the Resonant Pole in the Series Resonant Inverter

Jianping Ying, Aiming Jia, Lingling Xu (Zhejiang University, China).......................560

13p.17 A Novel Compound Soft-Switching Inverter

Lan Xiao, Chunying Gong, Yangguang Yan
(Nanjing University of Aeronautics & Astronautics, China)..................................566

13p.18 Analysis and Improvement for the Inverter of Phase-Shifted PWM

Xianlong Zhu, Boshen Chen, Youmin Gong (Shanghai University, China)..................571

13p.19 Research on Soft-Switching PWM Combined Aeronautical Static Inverter
Daolian Chen, Yangguang Yan (Nanjing University of Aeronautics & Astronautics, China)...

13p.20 Boost Converter Switching Flow Graph Nonlinear Modeling Method
Lisheng Shi, Chengqun Yin, Limin Chen
(University of North China Electric Power, China) ................................. 581

13p.21 Modeling of a Nonlinear Switched Reluctance Device Based on Fuzzy Neural Networks
Shouchen Wang, Jing Zhu, Jun Meng (Zhejiang University, China) ................. 587

13p.22 A Software Package of Design and Simulation for Switched Reluctance Motor Drives
Hao Chen, Guilin Xie. *Diji Liu (China University of Mining & Technology, China;
*Nanjing University of Aeronautics & Astronautics, China) ................................ 592

13p.23 Application of Graph Theory to Modeling and Simulation of Induction Motor Drive Systems
Jianjun He, *Zhaohui Zeng, E.Zhou, Jiabi Zhao
(Southeast University, China; *Aalorg University, Denmark) .......................... 597

13p.24 Research on General Simulation Model of Induction Motor
Ying Li, Weiguo Shi (Yunnan Polytechnic University, China) ......................... 603

Volume 2

Session 14: Converters
Tuesday, Nov. 4 3:10 PM - 5:00 PM

14.1 Ratio Control of Two DC Power Flows in a New Resonant Converter Family
Technical University of Budapest, Hungary; **The University of Tokyo, Japan) ........ 609

14.2 Soft-Switching Bi-Directional DC/DC Converter with Current Mode Control
Jinfa Zhang, Hongying Wu (Zhejiang University, China) ............................... 615

14.3 Soft-Switching Mode Resonant DC-DC Converter with High-Frequency Switching
Using SI Device
J. Watanabe, H. Ogiwara. *M. Nakaoka (Ashikaga Institute of Technology, Japan;
*Yamaguchi University, Japan) .............................................................. 620

14.4 A Three-Phase Series-Parallel Resonant Converter with Capacitive Output Filter
A. K. S. Bhat (University of Victoria, Canada) ......................................... 626

Session 15: Simulation and Analysis of Motor Drives
Tuesday, Nov. 4 3:10 PM - 5:00 PM

15.1 The Predictive Control of Synchronous Motor with More Models
Hexu Sun, Baoming Ge, Yan Chi, Yan Lin (Liaoning Technology University, China) ... 632

-xx-
