POWER-GEN EUROPE '97

The forum for the changing Power Generating Industry in Europe

June 17-19, 1997
Madrid, Spain

Volume II
Steam Plant Rehabilitation and Technology Advancement
Environmental Technologies, Life Extension and Co-generation

For additional information and missing papers, please contact the POWER-GEN Management:

### TABLE OF CONTENT

#### Steam Plant Rehabilitation and Technology Advancement

**Turbines Technology Advancement**

- **On Steam Turbine Performances Improvement**
  Luciano Lazzeri, A. Tolle, G. Marenzi, A. Vacca, A. Maretto, S. Cecchi, Ansaldo Energia 13

- **Steam Turbines for Advanced Steam Conditions**
  G. Simonin, GEC Alsthom 29

- **Steam Turbine Section Replacements in Record Time Means Big Payoffs to Utilities**
  Cal Lechman, GE Power Systems 57

- **Design of 1000MW Class USC Steam Turbine**
  I. Obara, Y. Tanaka, Mitsubishi Heavy Industries 67

- **Low Pressure Steam Turbine Retrofits**
  Brendon Scarlin, Edwin Krämer, Hans Huber, Nils Lannefors, ABB Power Generation 85

- **Limit Vibration Levels for Steam Turbines before and after Modernisation**
  Zenon Orlowski and Tomasz Galka, Institute of Power Engineering 101

#### Boiler Technology Advancement

- **A High Performance Pulverised Coal Boiler: Vestkraft/Esbjerg 400 MW Supercritical Unit**
  Pierre Lucat, H. Coenca, J. Leclaire, GEC Alstom Stein Industries  N/A

- **The New Generation of CFB Technology with Solids Separator and Heat Exchanger Integration into the Combustion Chamber**
  Ragnar Lundqvist and Pasi Makkonen, Foster Wheeler Energia Oy 119

- **Anthracite - Combustion in the Wet-Bottom Furnace**
  Gerhard Falk, Martin Maier, L&C Steinmüller 137

- **Blast Furnace Gas-fired Boiler for Erdemir Iron & Steel Works**
  I. Temuçin, Babcock & Wilcox Gama, E. Kimsesiz, Erdemir Iron & Steel 153

- **Low NOx Burners for Boilers and Furnaces: Design and Application**

- **Design and Commissioning of the 2x800 MW Lignite Fired Steam Generators Schwarze Pumpe**
  Mr Kehr, VEAG AG; Mr Kather, EVT Energie- und Verfahrenstechnik GmbH 185
Existing Plant Improvement

*Economic Optimization of the Cooling Water Flow of a 540 MWel Coal Fired Power Plant using Thermodynamic Simulation*

J. Kromhout, EZH, E. Goudappel, Stork Comprimo; P. Pechtl, Enter Software Inc. 203

*Spanish Fossil Power Plants: Availability Improvement and Failure Analysis*

Juan López Asenjo, RED Electrica 223

*Additional Peak Power of Condensing Power Plant resulting from Thermal Energy Storage*

Józef Portacha and Adam Smyk, Warsaw University of Technology 239

*Improvement in Efficiency by Replacing the Existing Air Preheaters with Gas Tight Plate Air Preheaters with integrated Economizer for Feedwater Heating*

Olivier Brasseur, Balcke-Dürr, Olaf Mauritz, HEW 253

*Upgrading the Excitation System, One Step towards Ultimate Station Reliability*

Dieter Hopf, Elin Energieversorgung 263

*CEZ and its Approach to Availability and Unavailability of Coal Power Plants - Methods and Results of Solution*

Jaromír Hajny, CEZ a.s. 277

High Efficiency Cycles

*Modern Trends of Hardcoal-based Power Generation in Germany*

Burkhard Stapper, VEW Energie AG 297

*Application of Circulating Fluidized Bed Technology with Supercritical Steam Parameters*

Pertti Kinnunen, Foster Wheeler Energia Oy 313

*Power Plant Design Parameters - an Economic and Environmental Evaluation*

Ulrich Häuser, ABB Kraftwerke AG, Germany; J. Thomas Sweeney, ABB Combustion Engineering, USA; Maurus Herzog, ABB Kraftwerke AG 335

*Ultra Supercritical Rankine Cycle based Power Plants - The impact on main Components of Advanced Steam Conditions*

G. Moscatelli, B. Monopoli, G. Sormani, Ansaldo Energia 359

*Innovative Steam Power Plant Technology - New Solutions for the Benefit of Customers World-wide*

G. Hagedorn and I. Paul, Siemens AG Power Generation 383

*Large Capacity Coal Fired Supercritical Pressure Boiler and Turbine Experience and Technology in Japan*

Masaki Miyazawa, Mitsubishi Heavy Industries 405
Retro/Repower/Rehabilitation

As Pontes Power Station Retrofit - the Project and Operating Results
Jesus Ramos Lage, Endesa Puentes 423

Development of Tailor Made Rehabilitation Concepts for Power Plants
R. Frank, Babcock Lentjes Kraftwerkstechnik GmbH, P. Gleß, ABB Kraftwerke 441

Condenser Refurbishment, a Key to Power Station Life Extension and Performance Improvement - Major Points of the Almarez Nuclear Power Plant Operation
C. Pouzenc, GEC Alsthom 473

Iberdrola's Experience in Retrofitting Thermal Power Plants to Achieve Dual Fuel Capabilities
Ramón Urrutia Camiruaga, Iberdrola 489

Gas Turbine Topping of a 800 MW Gas Fired Power Station in Ukraine
Ad Braam, F. van Aart, KEMA; N. Borisov, Minenergo 511

The Algeciras Power Plant No.1, Retrofitting as regards the Prospective of the Use of Natural Gas in Spain Thermal Power Stations
C. Casero and P. Zanetta, Ansaldo Energia, J.A. Blasco Manteca, Sevillana de Electricidad 529

Environmental Technologies, Life Extension and Co-generation

Desulphurisation Processes

40% Reduction in SO2 Emission during the Transient Period in the Polish Economy
Zygmunt Rozewicz and Ludwik Pinko, Energopomiar 553

Planning and Design of an Optimised FGD Plant Adapted to Site Condition Requirements
Ulrich Willibald, L&C Steinmüller GmbH N/A

Conformity of the Cogeneration Plant Chemnitz with the New Environmental Standards
Mr Hünig, Stadtwerke Chemnitz, D. Maier, H. Weiler, STEAG AG 569

New Wet FGD Process Using Granular Limestone
Hirofumi Kikkawa, Hiroyuki Kaku, Shigeru Nozawa, Kozo Kohata, Babcock Hitachi 585

NID - a New Dry Flue Gas Desulphurization System
S. Åhman, L. Jeverstam, ABB Fläkt Industri AB; Representative Laziska Power Plant 603

Retrofit of Megalopolis B'SES with an FGD Plant
A. Kravaritis, A Venetsanakos, PPC; B. Grimm, Noell-KRC 617
Life extension

Life Extension of Large Boilers
Alain Crosson, GEC Alsthom Stein Industries

An Investigation into Tube Wall Corrosion at a 350MW We Opposed Wall Coal Fired Power Station Furnace
Jose Maria Bronte, Andres Corsino Prendes, Iberdrola; Paul Williamson, Peter Hawksworth, Garry Allen, Rolls Royce International Combustion

The Renovation of the Rodenhuize Power Station and Control System Gives New Breath to this Generating Plant
Ch. Pierlot and J. van Rompuy, Tractebel

Case Studies and Worked Examples in the Frame of a Knowledge Based System for Components Life Assessment
Maite Aguado, Luis Tauroni, Tecnatom; Eduardo Santos, José Ribelles, Endesa

The Key Policies of the European Utility Requirements Document
J.C. Ferrier and P. Berbey, EDF

Condition Assessment of Turbine Blades Attachments
J. Javier Fernandez Martinez, Tomas Garcia Fernandez, Union Fenosa

Denitrification Processes

NOx Value Below 50 PPM for Coal Combustion Low NOx Burner
Pauli Dernjatin, Kati Savolainen, IVO Technology Center

Experience from the First High Dust SCR System for Waste Incineration
A.C. Larsson, ABB Fläkt Industri AB and K. Jönsson, SYSAV AB; R. Karpf, ABB Umwelttechnik

Post Combustion NOx Control Measures and Operating Experiences
Roland Kiefer, Horst Spielmann, Siemens AG Power

Long Term Experience with Non-Catalytic NOx Reduction in Municipal Waste Incinerators
Bernd von der Heide, Christian Heiermann, Nalco Fuel Tech

Intelligent Performance Optimisation of Power Station Boilers
R. Holmes, I.W. Mayes, R. Squires, Powergen, R. Chakraborty, ETSU

Improving Coal Combustion and Reducing NOx Emissions in Pulverized Coal Boilers
Juan Francisco Gonzalez, Emilio Menéndez, Pedro Otero, ENDESA, Luis Canadas University of Seville, Francisco Rodriguez, INERCO
Co-generation

The Exergy Analysis of El-To Cogeneration Power Plant in Zagreb
Branko Stanisa, Faculty of Technical Eng., Bolto Krivak, Croatian Electric Utility 813

Cogeneration for Industrial Heat and Power Supply - a Modern Concept for a Paper Mill in Germany
Dietmar Deggim, VEW Energie AG 831

Petropower Energia Project
Rafael Navazo Rivero, Foster Wheeler Energia 845

Restructuring and Modernization in the Field of East Germany’s Industrial Heat and Power Generation by example of Several Industrial Sites
Klaus Jonas, K.A.B. Kraftwerks und Anlagenbau 869

Flexible Generation of Electricity and Process Heat in Industrial Power Plants
Jürgen Kemme, Siemens AG Power Generation 889

Rehabilitation of CHP Plants TEK
Vladislav Mazac, Energoprojekt; Vladimir Nemec, Teplarny Karvina 907

Innovative Environmental Technologies

Commercial experience of 500MW CT-121 FGD plant of Hokuriku Electric Power Company in Japan
Namiki Takashi, Takao Kameda, Chiyoda Corp. 925

Ammonia Scrubbing Makes Alternative Fuels Economical
Gregory Brown, GE Environmental Systems 943

The Opportunities and Pit-falls of Product Development out of Coal Combustion By-products (CCB)
Simon Prins, Prinsholland BV 961

Demonstration of a Novel Combined deNOx/deSOx Technology
V. Boscak, S. Lading, B. Jensen, Fls Miljo 977

Alternative Materials and Gas Reheating in Desulphurization Projects for Endesa Power Plants
Jordi Martinez, Julio Gonzalez Valentin, Endesa 993

Optimal Operation of Thermal Power Plants
W. Simader, EVN AG, María Enzersdorf, C.-P. Bell, STEAG AG, H. Sanchez Roces, Hidroel. del Cantabrico, J. Kern, Ketek 1015
