Robert O'Shea
George Coghill
Tom Gedeon
(Editors)
Contents, Volume 2

Part III: Intelligent Information Systems and their Applications

Hybrid Systems ................................................................................................................. 753

A Model of Logical Inference Like Association by Distributed Pattern Memory ................... 754
T. Omori, M. Nishizaki and A. Mochizuki

Information Integration of the Office-Conversant Mobile Robot Jijo-2 .................................. 758
H. Asoh, S. Hayamizu, I. Hara, Y. Motomura, S. Akaho and T. Matsui

Knowledge Agency and Knowledge Networks .................................................................... 762
A. Namatame and Y. Shimoyama

An Agent Architecture with On-Line Learning of Procedural and Declarative Knowledge .......... 766
R. Sun

Making Neural Networks More Intelligible by Incorporating Prior Knowledge ....................... 770
S. Zhao and T. S. Dillon

Hybrid Multiple Component Neural Network Learning with Efficient Pattern Partitioning and PCA 774
C. Park and H. Lee

Neuro-Fuzzy and Multivariate Statistical Classification of Fruit Populations Based on Visible-Near Infrared Spectrophotometry Data ............................................................... 780
J. Kim, A. Mowat, P. Poole and N. Kasabov

A Membership Function Selection Method for Fuzzy Neural Networks .................................. 785
Q. Zhou, M. Purvis and N. Kasabov

Dynamic Neuro-Fuzzy Decision Making System .................................................................. 789
J. Shim, S. Seo and C. Hwang

Investigation on a Special Group of Fuzzy Implication Operators and Fuzzy Inference Mechanisms Using a Simplified Rule Base System ............................................................... 793
M. Takács

Neural Expert System for Loading of Overhead Lines .......................................................... 797
M. Negnevitsky and T. L. Le

Comparative Study of Numeric, Fuzzy, and Cognitive Aggregations on Two Opinions .......... 801
H. Lin and W. Shaw

Virtual Meaning and the Architecture of Neural Networks .................................................. 806
V. Dimitrov and B. Hodge

Rough Sets and Other Intelligent Techniques for Knowledge Discovery .............................. 810
I. Jagielska

Using Argumentation for the Decomposition and Classification of Tasks for Hybrid System Development ................................................................. 814
A. Skabar, A. Stranieri and J. Zeleznikow

Deriving IF-THEN Rules for Intelligent Decision Support via Inductive Learning ............... 818
J. Kacprzyk and G. Sztatula

Modular Recurrent ANN Architectures: Some New Directions from Neuroscience ............... 822
J. G. Wallace and K. Bluff
Competitive Learning Clustering for Information Retrieval in Image Databases ......................................................... 906
I. King and T. K. Lau

Mosaic Learning: A New Algorithm for Self Organising Neural Networks to Learn Dynamic
Channel Assignment Schemes .................................................. 910
D. Tissainayagam, D. Everitt and M. Palaniswami

Discovering Inter-Attribute Relationships ........................................ 914
G. Holmes

Intelligent Control and Robotics ........................................................ 918

A Neuro-Fuzzy Approach for the Sensor-Based Driving Situation Identification ......................................................... 919
W. Hauptmann, F. Graf and K. Heesche

Imagine that You are the Brain in a Robot! ........................................ 923
J. H. Andreae

Linguistic Geometry: A Formal Language for Intelligent Control ........................................................ 927
B. Stilman

Integrating Positioning, Communication and Control in a Mobile Computing Environment ........................................... 931
Z. Salcic, E. Chan, H. Fok and A. Ip

Performance of Neural Networks Based Adaptive Backthrough Control ......................................................... 935
V. Kecman and T. Rommel

Traffic Control Model with Neural Network Analogy .................................................. 939
T. Ohira, K. Inoue and Y. Takeshima

Behaviour-Based Control Applied to Robotic Handling of Variable Objects ........................................... 943
W. E. Friedrich and P. K. Lim

A Reactor Control System Selection Expert System ........................................... 947
L. A. De Meio and C. J. Williamson

Decision Support for Command and Control Systems ........................................... 951
P. Wilson

Adaptive Control Design for Linear Multivariable Systems via Backstepping Approach ........................................... 955
Y. Wu and X. Yu

System Identification Problems via a Single-Layer Feedforward Neural Network ........................................... 959
S. M. M. Rahman, X. Yu and M. Zhihong

Adaptive Control Design for Linear Time Varying Systems ........................................... 963
Y. Wu and X. Yu

Robust Control of Bilinear Systems in the Presence of Parametric Uncertainty ........................................... 967
P. Shi, S. Shue, Y. Shi and R. K. Agarwal

A Multinet Neural Architecture for Evolving Collective Robotic Intelligence ........................................... 971
B. Zhang and Y. Hong

Using Trainable Computing Networks in the Optimization of Lake Regulation ........................................... 975
M. Huttunen, E. Ukkonen and B. Vehviläinen

Improving Inverse Control on Real Time by Means of Neural Networks ........................................... 979
D. Barrios, I. M. Galván, P. Isasi and J. Ríos
Prediction

Numeric Prediction Using Instance-Based Learning with Encoding Length Selection
D. Kilpatrick and M. Cameron-Jones

The Application of Neural Networks and Partial Least Squares in Korea Weather Prediction
D. Hwang and M. Han

Forecasting a Variable Multiple Cyclic Process with Confidence
D. L. Tuck

$H_2$ Filtering of Continuous-Time Systems with Jumps and Norm-Bounded Uncertainties
P. Shi and Y. Shi

Prediction of Atmospheric Pollution by Particulate Matter Using a Neural Network
P. Perez, A. Trier, C. Silva and R. Montano

A Network of Neural Nets to Model Power System Networks for Fault Diagnosis
R. K. Rayudu and S. Samarasinghe

Optimisation and Scheduling

Finding Multiple Solutions in Order Based Problems Using a Multi-Chromosome Genetic Algorithm
S. Ronald and S. Kirkby

Optimizations of TSP by SOM Method
T. Maenou, K. Fujimura, H. Tokutaka and S. Kishida

Scheduling Trains with Genetic Algorithms
A. E. Bud and A. E. Nicholson

A Hybrid Heuristic for Scheduling a Hybrid Flowshop Maximum Completion Time Problem
F. Riane and A. Artiba

Simulation Based Smart Scheduler for Manufacturing Systems
C. Raczy and A. Artiba

A Genetic Algorithm Approach to Job Shop Scheduling
K. Lee, T. Yamakawa, E. Uchino and K. Lee

Genetic Algorithms Applied to University Exam Scheduling
N. Jenkins and T. Gedeon

A Phased Evolutionary Approach for the Timetable Problem: An Initial Study
E. K. Burke and J. P. Newall

An Efficient Algorithm for Estimating Higher-Order Spectra of Time Series Based on Neural Network Auto-Regressive Model
N. Toda and S. Usui

Genetic Evolution of a Neural Network's Input Vector for Meteorological Estimations
J. McCullagh, B. Choi and K. Bluff

Signal Processing and Speech Recognition

Voice Command II: A DSP Implementation of Robust Speech Recognition in Real-World Noisy Environments
A Methodology for Speech Data Analysis and a Framework for Adaptive Speech Recognition Using Fuzzy Neural Networks .......................................................... 1055

The ARISTOTLE Speech Recognition System .......................................................... 1061
C. Waters and B. MacDonald

Quasi-Orthogonal Maps for Dynamic Language Recognition ...................................... 1065
A. D. Blair and J. B. Pollack

Neural Predictive Coding: Application to Phoneme Recognition .................................. 1068
J. L. Zarader, B. Gas, J. C. Didiot and P. Sellem

A Study on the Continuous Wavelet Transform for the Vietnamese Speech Processing .... 1072
T. Le-Tien

An Agent Based Framework for Modular Speech Recognition and Language Processing Systems .......................................................... 1076
A. R. Gray, R. I. Kilgour and N. K. Kasabov

HMM Training Using Incremental Neural Network on Speech Recognition .................. 1080
J. H. Park, T. J. Ki and W. D. Lee

Efficient Parsing of Word-Graphs for Speech Recognition ........................................ 1084
C. Waters and B. MacDonald

Methods of Linear Combination Based on Different Features ...................................... 1088
L. Wang, K. Chen and H. Chi

Nonlinear Filter Techniques Using Evolutionary Programming for Interference Suppression in DS Spread Spectrum Systems ......................................................... 1092
Z. Meng and Z. He

The Hybrid ANN/HMM Method with Double MLP Structure for Continuous Speech Recognition .......................................................... 1096
T. Lee and D. Chen

Distant-Talking Speech Recognition with Microphone-Array Sound Pickup and NN/MLLR Environment Equalization .......................................................... 1099
Q. Lin, J. Flanagan and C. W. Che

Robust Speech Recognition in Telephone Network ..................................................... 1103
M. Han, G. Park, J. Park and J. Han

A Between-Word Distance Calculation in a Symbol Domain and its Applications to Speech Recognition .......................................................... 1107
K. Tanaka and H. Kojima

Hybrid HMM-NN Modeling of Stationary-Transitional Units for Continuous Speech Recognition .......................................................... 1112
D. Albesano, R. Gemello and F. Mana

Discriminative Isolated Digit Recognition in Noisy Environments Using Multilayer Perceptron Networks .......................................................... 1116
P. Salmela, K. Laurila, M. Lehtokangas and J. Saarinen

Pattern Recognition and Image Processing ................................................................. 1120

Neural Networks for Feature Selection ................................................................. 1121
N. R. Pal

Fuzzy Radial Basis Function Network ................................................................. 1125
S. Mitra and J. Basak

Neural \( \alpha \)-Feature Detector: Feature Detection by Controlling \( \alpha \)-Entropy ................................................................. 1129
R. Kamimura
An Experimental Evaluation of the Cascade-Correlation Network in Pattern Recognition Problems .......................... 1133
G. C. Vasconcelos and J. N. G. Ribeiro

Object Selection by a Neural Oscillator Network ................................................................. 1137
D. L. Wang

Color Management Using Neural Networks ................................................................. 1141
S. Usui, Y. Arai and S. Nakauchi

Color Gamut Mapping Based on Mutual Color Conversion by Neural Networks .......... 1145
S. Nakauchi and S. Usui

Face Basis Selection for Human Face Representation and Identification ............... 1149
A. Z. Kouzani, F. He and K. Sammut

A Neural Network Based Universal Window Filter Plug-in ........................................ 1153
M. Siroki, R. H. Pugmire, R. M. Hodgson and R. I. Chaplin

High-Speed X-ray Image Enhancement Using FPGA Customised Hardware ............. 1157
Z. Salcic and J. Sivaswamy

Handwritten Character Recognition Using a Fuzzy Associative Memory ......... 1161
T. Odahara, J. Nakanishi, T. Morifuji, S. Nagasugi, N. Inagawa and T. Yamakawa

Self-Organization of Feature Columns and its Application to Object Classification .... 1166
S. Suzuki and N. Ueda

Wane Detection Using a Universal Neural Network Window Filter ..................... 1170
R. I. Chaplin, M. Siroki, R. M. Hodgson and R. H. Pugmire

Rotation, Translation, and Scaling Tolerant Recognition of Complex Shapes Using a Hierarchical Self-Organising Neural Network ...................................................... 1174
T. Sabisch, A Ferguson and H. Bolouri

Automatic Face Recognition for Access Control Using Horizontal and Vertical Features Based on Facial Symmetries ................................................................. 1179
S. Kim, H. Sung, K. Park and H. Choi

Context-Free Multiple-Object Segmentation Using Edge-Preserving Attention Operator Based on Modified GST .............................................................. 1183
T. Koo, J. Jeon, J. Kim and H. Choi

An Adaptive Restoration of Spatially Varying Blurred Images Based on Local Edge Information ................................................................. 1187
J. Lee, J. Chang, H. Sung and H. Choi

Texture Image Segmentation Method by Using Pyramid Linking and Self-Organizing Neural Network ............................................................. 1191
J. Zhang and S. Oe

Color Edge Detection via Neural Networks ................................................................ 1195
I. Vicarte Mayer and H. Takahashi

Nonlinear Image Interpolation by Radial Basis Function Networks ...................... 1199
M. Yasukawa, T. Ikeguchi, M. Takagi and T. Matozaki

A Coloring Method of Gray-Level Image Using Neural Networks .............................. 1203
J. Yoo and S. Oh

Results of an Automated Hierarchical Image Matching System ............................. 1207
S. A. Israel

A Nonlinear Prediction Search Algorithm with Successive Differentiation for Video Coding ................................................................. 1211
L. Luo, C. Zou and Z. He
Unconstrained Handwritten Numerals Recognition Using Line Features Extracted by DOG Filters 1215
M. Sasaki and Y. Hirai

Lattice Neural Network Model and its Application to Handwritten Word Recognition 1219
K. Yamanaka, S. Kuroyanagi, H. Sakai and A. Iwata

Combining Neural Network and Stroke-Based Method for Handwritten Numeral Recognition and its Application to Tax-form Processing 1223
P. K. Kim and H. Lim

Improved Mixed Thai and English OCR Using Two-Step Neural Net Classification 1227
C. Tanprasert, W. Sinthupinyo, P. Dubey and T. Tanprasert

Handwritten Digit Recognition by Combining Structure-Adaptive Self-Organizing Maps 1231
S. Cho

Structure Adaptive Multilayer SOM with Partial Supervision for Numeral Recognition 1235
P. N. Suganthan

The Temporary Degradation of the Stored Information on Cross-coupled Network and its Application for Separation of Overwritten Patterns 1239
M. Shimono, T. Miki and T. Yamakawa

Application of Neural Deformable Templates to Hand Written Digit Classification 1243
D. S. Banarse and A. W. G. Duller

Contour Segmentation from Handwritten Numbers Overlapping a Frame by Using NN Based Adaptive Thresholding 1247
I. Nagayama and H. Fukushima

Applications of AI and Intelligent Systems in Engineering, Business and Medicine 1251

A Fuzzy Approach to Fault-Tree Construction 1252
N. Vojdani

Application of Simulation and Fuzzy Logic for the Optimisation of Multi-Stage Production Processes in a Steel Mill 1255
B. Hellingrath, M. Hoenen and C. Mazzocco

Prediction of Thermodynamic Properties for Chemical Engineering with the Aid of Computational Intelligence 1259
P. Ulbig, T. Friese, H. Geyer, C. Kracht and S. Schulz

A Generalization of the MURAI-KITADA-SATO Method of Generating Fuzzy k-Partitions 1263
H. Thiele

An Application of a Way of Generating Fuzzy k-Partitions to Fuzzy Clustering 1267
T. Murai, A. Kitada and Y. Sato

Variable-Structured Systems with Fuzzy Tuning for Power Generation Control 1271
Q. P. Ha and M. Negnevitsky

Neural Network Approach to Surface Finish and Force Estimation in Turning 1275
V. Karri and M. McGregor

Direct and Inverse Modelling of Turning Performances Using Neural Networks 1279
M. McGregor and V. Karri

The Application of Fast Fuzzy Logic Control in 3-Phase Switched Rectifier Systems 1283
K. Hoffman
