MHD-FLOWS AND TURBULENCE II

PROCEEDINGS OF
THE SECOND BAT-SHEVA INTERNATIONAL SEMINAR
BEERSHEVA, MARCH 28–31, 1978

EDITED BY
H. BRANOVER AND A. YAKHOT
Department of Mechanical Engineering
Ben-Gurion University of the Negev

ISRAEL UNIVERSITIES PRESS, Jerusalem
CONTENTS

Preface ................................................................. ix
List of Participants .................................................. xi

I. MHD FLOWS

Some Analogous Problems in Fluid Mechanics
and Magnetohydrodynamics ................................. J. A. Shercliff 3

Thermoelectric MHD ............................................. J. A. Shercliff, P. B. Dutta-Gupta and C. J. N. Alty 19

Theoretical and Experimental Studies of Liquid Metal Flow
in Strong Non-Uniform Magnetic Fields in Ducts
with Complex Geometry ............................... R. J. Holroyd and J. C. R. Hunt 23

Rotation of a Liquid Metal under the Action of a Rotating
Magnetic Field .................................................. H. K. Moffatt 45

Streamwise Diffusion in MHD Duct Flow (Abstract) ........ H. K. Moffatt 63

MHD Flows Driven by Alternating Magnetic Field ............. R. Moreau 65

Current Status of MHD Duct Flow ............................ G. S. S. Ludford and J. S. Walker 83

Liquid-Metal Flows in Open Channels ............................ J. S. Walker and G. S. S. Ludford 97

Hydromagnetic Channel Flows with Cross-Stream Dependent Electrical
Conductivity ............................................. T. A. Trovillion, U. H. Kurzweg, R. E. Elkins and E. R. Lindgren 111

Magnetohydrodynamic Flows Through Ducts with Thin Walls of Arbitrary
Conductivities at High Hartmann Numbers .................. P. Tabeling and J. P. Chabrerie 115

The Influence of the Thickness and Conductivity of the Walls Perpendicular
to the Magnetic Field in the Case of a Couette Flow in a
Rectangular-Section Toroidal Duct ............................ P. Herve 121

Inertial Convection in Liquid Metals (Abstract) ................ M. R. E. Proctor 125

### Contents

Damping of Shear Turbulence in the Presence of Magnetic Fields:  
A Semi-Empirical Approach ........................................ P. S. Lykoudis 271

Effect of Fringe Field on Flow in Rectangular Channels with Different Aspect  
Ratios (Abstract) ............................................ H. Branover, E. Hoch, A. Landsberg,  
Y. Unger and I. Zilberman 279

Hot Film Measurements in a Channel with Azimuthal Magnetic Field  
and the Problem of Two-Dimensional  
Flow Disturbances (Abstract) .... H. Branover, P. Gershon and I. Zilberman 281

Experimental and Theoretical Study of the Transition Between Laminar and  
Turbulent MHD Annular Flows and the Question of  
Secondary Flows ............................................. P. Tabeling and J. P. Chabrerie 283

On Axial Growth of Three-Dimensional MHD-Instabilities of Jets .... P. Plaschko 295

Stability of an Interface Controlled by  
Unsteady Magnetic Fields ............................... M. A. Garnier and J. P. Garnier 305

Baroclinic Instability in the Presence of a Magnetic Field .... Y. R. Fautrelle 313

Generation of Magnetic Fields at High Magnetic Reynolds Numbers  
in a Turbulent Conducting Fluid ........ J. Léorat, U. Frisch and A. Pouquet 319

### IV. GENERAL PROBLEMS OF TURBULENCE

Further Measurements on the Small-Scale Turbulence  
Structure ...................................................... P. S. Klebanoff and F. N. Frenkiel 325

The Effect of Initial Conditions on the Two-Dimensional Turbulent Mixing  
Layer (Abstract) .......... D. Oster, I. Wygnanski, B. Dziomba and H. Fiedler 329

Development of a “Laminar Spot” Generated by a Local Perturbation  
in a Laminar Boundary Layer ................................. J. Amini 331

The Influence of the Structure of Turbulence on the Turbulent Prandtl Number  
for Turbulence Energy ........................................... M. Wolfshtein 337

Some Thermodynamic Aspects of Anisotropic Turbulence .......... D. Naot 339

Conditional Sampling Comparison of the Turbulent Wake of a Cylinder  
and Its Interaction with an Equal Wake ......................... G. Fabris 351
