Contents of Part 1

Presidential Address

Vallentyne, J. R.: No association is an island ........................................ 1

Edgardo Baldi Memorial Lecture

Horie, S.: On the significance of Paleolimnological studies of ancient lakes — Lake Biwa and other relict lakes .................................................. 13

Plenary Lectures

Goldman, C. R.: Lake Tahoe: two decades of change in a nitrogen deficient oligotrophic lake ................................................................. 45

Uhlmann, D.: The limnological background of sewage control for relieving water pollution ................................................................. 71

I. Physical Limnology

Renberg, I.: Formation, structure and visual appearance of iron-rich, varved lake sediments ................................................................. 94

Kinnunen, K., Nyholm, B. & Niemi, J. S.: Ecological model of a subarctic lake 102

Bertoni, R. & Callieri, C.: Underwater transmittance as a tool in the study of spatial distribution of particulate organic matter .................................................. 120

Wushiki, H. & Kusakabe, M.: Isotope hydrology of oases in the Abu Dibbis Depression, Iraq ................................................................. 130

Arai, T.: Climatic and geomorphological influences on lake temperature ................................................................. 135

Kuroiwa, S., Takami, S. & Yukimura, T.: Continuous solar radiation measurements and a brief comment on the underwater irradiance of Lake Biwa (Abstract) .................................................. 136

Endoh, S. & Okamoto, I.: Study on the circular currents in Lake Biwa ................................................................. 141

Fukushima, T. & Murakoka, K.: Current and vertical mixing in a shallow lake .................................................. 150

Kobayashi, D.: Separation of runoff components by stream temperature ................................................................. 155

Hata, T.: Estimation of the changes of discharge, storage and water quality in a river basin .................................................. 161

Fujinawa, K.: A finite element simulation for evaluating groundwater resources in an unconfined aquifer in Nasunohara Basin, Tochigi (Abstract) .................................................. 162

Kawanishi, H.: Upward transfer of water and accumulation of Cl in surface soil during evapotranspiration .................................................. 169

II. Chemical Limnology

Rogers, J. S., Huang, P. M. & Liau, W. K.: Chemical dynamics of mercury sorption and desorption of freshwater sediments .................................................. 174

Oscarson, D. W., Liau, W. K. & Huang, P. M.: The kinetics and components involved in the oxidation of arsenite by freshwater lake sediments .................................................. 181

Prepas, E. E. & Rigler, F. H.: A test of a simple model to predict short-term changes in the phosphorus concentration in lake water .................................................. 187

Taub, F. B., Harriss, M. C., Hartmann, H. J., Kindig, A. C. & Read, P. L.: Effects of initial algal density on community development in aquatic microcosms .................................................. 197

Fontvieille, D. & Fevotte, G.: DNA content of the sediment in relation to self-purification in streams polluted by organic wastes .................................................. 221

Jüttner, P.: Biologically active compounds released during algal blooms .................................................. 227
III. Lakes. 1. North America

LaPerriere, J. D.: Vernal overturn and stratification of a deep lake in the high Subarctic under ice.

Stockner, J. G.: Whole-lake fertilization for the enhancement of sockeye salmon (Oncorhynchus nerka) in British Columbia, Canada.

Patias, K.: Spatial structure of the crustacean planktonic community in Lake Winnipeg, Canada.

Ellis, J. D. & Tait, J. S.: Artificial destratification of a southern Ontario eutrophic kettle lake.

Beaver, J. R. & Crisman, T. L.: Acid precipitation and the response of ciliated protozoans in Florida lakes.

Crisman, T. L., Beaver, J. R. & Bays, J. S.: Examination of the relative impact of microzooplankton and macrozooplankton on bacteria in Florida lakes.

III. Lakes. 2. Europe

Raddum, G. G. & Sæther, O. A.: Chironomid communities in Norwegian lakes with different degrees of acidification.

Grøterud, O.: The dynamics of acidification from a new view elucidated by studies in a lake area in Norway.
III. Lakes. Asia

Kasymov, A. G.: Regularities in the distribution of the high-altitude fauna of the Caucasian reservoirs and its zoogeographical analysis

Kozhova, O. M.: Hydrobiological monitoring of Baikal

Wynne, D.: Phosphorus, phosphatases and the Peridinium bloom in Lake Kinneret

Löfler, H.: The winter condition of Lake Niriz in Southern Iran

Swar, D. B.: Seasonal abundance of limnetic crustacean zooplankton in Lake Phewa, Pokhara Valley, Nepal

Kunimatsu, T. & Kitamura, G.: Phosphorus balance of Lake Biwa

Ogura, K., Yamamoto, K., Natoh, Y. & Fukushima, K.: The role of clay minerals and humic substances on the behaviour of organic and inorganic compounds in fresh water

Tanaka, N. & Handa, N.: Racemization of amino acids in lake sediments determined by gas chromatography (Abstract)

Kawamura, K. & Ishiwatari, R.: Fatty acid diagenesis in a 200 m sediment core of Lake Biwa (Abstract)

Ishida, Y. & Kadota, H.: Obligately oligotrophic bacteria in Lake Biwa

Mitamura, O. & Matsumoto, K.: Uptake rate of urea nitrogen and decomposition rate of urea carbon at the surface microlayer in Lake Biwa

Okamoto, I. & Endoh, S.: Accumulation mechanism of "red tide" plankton in Lake Biwa, Japan

Negoro, K.: Studies on the phytoplankton of Lake Biwa

Tanizimu, K., Miura, T. & Higashi, M.: Effect of water movement on the photosynthetic rate of an algal community attached to reed stems
HIGASHI, M., MIURA, T., TANIMIZU, K. & IWASA, Y.: Effect of the feeding activity of snails on the biomass and productivity of an algal community attached to a reed stem

KURATA, A.: The production of B group vitamins by epiphytic microorganisms on macrophytes in Lake Biwa

OKAMOTO, K. & NARITA, T.: Seasonal change in size-selective feeding activities of Daphnia longispina and Eudiaptomus japonicus on a natural phytoplankton community in Lake Biwa (Abstract)

TOMODA, Y.: Origin of the endemic species in Lake Biwa (mainly fishes and mollusces)

MATSUMOTO, E.: Sedimentation rates in several lakes of Japan measured with $^{210}$Pb method

TANAKA, T. & FUKUHARA, H.: Behaviour of nutrients at the sediment-water interface in a eutrophic lake: laboratory and field experiments (Abstract)

HAMA, T. & HANDA, N.: The diurnal variation of organic constituents of particulate and dissolved matter in Lake Suwa (Abstract)

TOMINAGA, H. & TANAKA, S.: Limnological studies of a Japanese high mountain lake, Lake Mikuriga-ike

OHTAKE, H., DATE, Y., KONDO, K., SEIKE, Y. & NAKANE, S.: Studies on the brackish water environment of Lake Nakanoumi with special reference to the reclaimation and freshening project

SUGIURA, T.: Organic composition of particulate matter sinking in lake water

HOSOMI, M., OKADA, M. & SUDO, R.: Release of phosphorus from sediments

OTSUKI, A., KASUGA, S. & KAWAI, T.: Seasonal changes of the total phosphorus standing crop in a highly eutrophic lake: the importance of internal loading for shallow lake restoration

YAGI, O., SUGIURA, N. & SUDO, R.: Odorous compounds produced by Streptomyces in Lake Kasumigaura

TODA, H., HAMADA, A. & ICHIMURA, S.: Acceleration of the eutrophication process and community changes in biotic structure due to human activities in Lake Kasumigaura

IMAMURA, N.: Studies on the water blooms in Lake Kasumigaura

TAKAHASHI, M., NOMURA, I., KOMATSU, M. & ICHIMURA, S.: Multi-regression analysis of Microcystis bloom with various environmental parameters in eutrophic Lake Kasumigaura, Japan

IWAKUMA, T. & YASUNO, M.: Chironomid populations in highly eutrophic Lake Kasumigaura

AIZAKI, M., OTSU, A., FUKUSHIMA, T., HOSOMI, M. & MURAOKA, K.: Application of CARLSON'S trophic state index to Japanese lakes and relationships between the index and other parameters

OCHIAI, M. & UKIYA, T.: Seasonal variations of dissolved organic constituents in Lake Nakanuma during March and November 1979

III. Lakes. 4. Australia, Oceania, Antarctica

WILLIAMS, W. D.: Problems in the management of inland saline lakes

MAGICOLEK, J. & YAMADA, R.: Vai Lahi and other lakes of Tonga

STOUT, V. M.: Some year to year fluctuations in a natural and in an artificial lake, South Island, New Zealand

MATSUMOTO, G., TORII, T., FUKUI, F. & HANYA, T.: The features of organic constituents in lake sediments from Syowa Oasis in East Antarctica

NAKAYA, S., TORII, T. & YAMAGATA, N.: Geochemical aspects on the Antarctic saline lakes (Abstract)
