New Hybrid Vector Control for Induction Motor without Velocity and Position Sensors -- Frequency Hybrid Approach Using New Indirect Scheme
S. Shinnaka, Kanagawa University, Japan

A Speed Sensorless Induction Motor Vector Control System Using q-axis Flux with Parameter Identification
M. Tsuji, S. Chen, K. Izumi, T. Ohta, E. Yamada, Nagasaki University, Japan

Speed Sensorless Control of Induction Motor by Current Error Compensation
Y. A. Kwon, S. H. Kim, S. H. Oh, Pusan National University, Korea

Identification of Rotor Position and Speed of Standard Induction Motors at Low Speed Including Zero Stator Frequency
J. Holtz, J. Jiang, H. Pan, University of Wuppertal, Germany

Impact of Iron Loss on Speed Estimation in Sensorless Vector Controlled Induction Machines
E. Levi, M. Wang, Liverpool John Moores University, UK

Digital Realisation of Sensorless Drive: Some Practical Consideration
T. Song, M. F. Rahman, K. W. Lim, University of New South Wales, Australia

VOLUME III
EMERGING TECHNOLOGIES
SESSION ET-1 Applications of Fuzzy Logic

Fuzzy Gain Scheduled PI Speed Controller for Switched Reluctance Motor Drive
S. K. Panda, X. M. Zhu, P. K. Dash, National University of Singapore, Singapore

A Fuzzy Controller with a Fuzzy Adaptive Mechanism for the Speed Control of a PMSM
J. L. De Silva Neto, H. Le-Huy, Laval University, Canada

Application of a Clustering Adaptive Fuzzy Logic Controller in a Brushless DC Drive
J. P. Johnson, K. M. Rahman, M. Ehsani, Texas A&M University, USA

DC Brushless Servo Motor Drive Systems Using Automatic Learning Control-Based Auto Gain Parameter Tuning Scheme
K. Inoue, Shinko Electric Co., Ltd., Japan, J. Yoshitsugu, P. Boyagoda, M. Nakaoka, Yamaguchi University, Japan

Adaptive Gain Control of Pneumatic Servo Systems with Disturbance Observers and Fuzzy Logic
T. Kosaki, M. Sano, Hiroshima City University, Japan

Expert System Aided Automated Design, Simulation and Optimization of Power Converter
S. J. Wang, Y. S. Lee, K. S. Siu, Hong Kong Polytechnic University, Hong Kong, X. Z. Liu, Computer Products Asia-Pacific Ltd., Hong Kong

Embedded Controller Board for Field-Oriented AC Drives
D. Fodor, J. Vass, University of Veszprem, Hungary, Z. Katona, KFKI Research Institute for Measurement and Computing Techniques, Hungary

Session ET-2 Applications of Fuzzy Logic and Genetic Algorithms

A GA-Based Sugeno-Type Fuzzy Logic Controller for the Cart-Pole System
M-Y. Shieh, C-W. Huang, T-H.S. Li, National Cheng Kung University, Taiwan

A Multi-Operator Self-Tuning Genetic Algorithm for Optimization
T. Sasaki, C-C. Hsu, H. Fujikawa, S-I. Yamada, Musashi Institute of Technology, Japan

A Design of a Model Reference Fuzzy Adaptive Controller for Linear Systems With Time Delay Using MSGA
H. Kobayashi, C-C. Hsu, S-I. Yamada, H. Fujikawa, Musashi Institute University, Japan
Design of Stable and Robust Fuzzy Controller for Uncertain Nonlinear Systems: Lyapunov's Function Approach
H.K. Lam, F.H.F. Leung, P.K.S. Tam, The Hong Kong Polytechnic University, Hong Kong
Fuzzy Identifier Based Inverse Dynamics Control for a 3-dof Articulated Manipulator
K. Erbatur, TUBITAK Marmara Research Centre, Turkey, O. Kaynak, Bogazici University, Turkey, I. Rudas, Banki Donat Polytechnic, Hungary
Application of Genetic Algorithm to Scheduling Problem of Robot Control Computation
K. Tagawa, T. Fukui, H. Haneda, Kobe University, Japan
Genetic Fuzzy Classifier for Benchmark Cancer Diagnosis
J.Y. Ke, K.S. Tang, K.F. Man, City University of Hong Kong, Hong Kong

Session ET-3 Double-Layer Capacitors (Invited)
Overview of Electrochemical Double Layer Capacitors
D.R. Cahela, B.J. Tatarchuk, Auburn University, USA
Characterization of Double-Layer Capacitor Application Issues for Commercial and Military Applications
S.M. Halpin, Mississippi State, USA, R.M. Nelms, Auburn University, USA, J.E. Schatz, Southern Company Services, USA
Impedance Modeling of Nickel Fiber/Carbon Fiber Composite Electrodes for Electrochemical Capacitors
D.R. Cahela, B.J. Tatarchuk, Auburn University, USA
Evaluation of Double Layer Capacitor Technologies for High Power and High Energy Storage Applications
R.L. Spyker, Wright Laboratory, USA, R.M. Nelms, Auburn University, USA
The Blinking Clock Syndrome: Improving Customer Perceptions of Residential Power Quality Using Double-Layer Capacitors
B.B. Banker, J.A. Dean, E.B. Green, D.R. Kraftchick, R.M. Nelms, Auburn University, USA

Session ET-4 Applications of Neural Networks
Modified EBP Algorithm with Instant Training of the Hidden Layer
B.M. Wilamowski, University of Wyoming, USA
Speaker Verification for Security Systems Using Artificial Neural Networks
K. Vieira, B. Wilamowski, R. Kubichek, University of Wyoming, USA
Artificial Neural Network for Fault Detection, Diagnosis for Chashma Nuclear Power Plant's Liquid Waste System
M.R. Khan, W. Lang, G. He, Y. Xie, Shangai University, China
Recurrent NN Model for Chaotic Time Series Prediction
J. Zhang, K.S. Tang, K.F. Man, City University of Hong Kong, Hong Kong

Session ET-5 Application of Emerging Technologies to Industrial Electronics (Invited)
Knowledge Based Technique to Enhance the Performance of Neural Network Based Motor Fault Detectors
B. Li, G. Goddu, M-Y. Chow, North Carolina State University, USA
Totally Invariant Variable Structure Control Systems
K-K. Shyu, National Central University, Taiwan J.C. Hung, The University of Tennessee, USA
Health Monitoring of Vibration Signatures
G.G. Yen, Oklahoma State University, USA
On the Training of a Multi-Resolution CMAC Neural Network
A.B. Menozzi, M-Y. Chow, North Carolina State University, USA
Intelligent Manufacturing System by the Evolutionary Computation - Scheduling and Planning of the Flexible Transportation - .................................................................1136
N. Kubota, T. Fukuda, Nagoya University, Japan, Osaka Institute of Technology, Japan,
S. Shibatta, H. Yamamoto, Y. Inada, Toyo Engineering Co., Japan
A Fuzzy Logic-based Adaptive PWM Technique.................................................1142
C. Cecati, S. Corradi, N. Rotondale, Universita degli Studi di L'Aquila, Italy

Session ET-6 Applications of Computational Intelligence in Measurement and Sensing

Highly Sensitive Humidity Sensor for Dielectric Measurement (Water Absorption) in Glass-Fiber Resins.................................................................1148
V. Matko, D. Donlagic, University of Maribor, Slovenia
Modern Means for Axle Adjustment of Mechatronic Machine Chains...............1152
A.L. Bencsik, Z.J. Szabo, T. Kegl, Banki Donat Polytechnic, Hungary
A Distance Measurement Method Available to Texture Surface by Using Complex-Log Mapping......................................................................................1157
N. Yamaguti, S. Oe, K. Terada, University of Tokushima, Japan
A Study on Assembling of Sub Pictures Using Approximate Junctions...............1163
K. Kurosu, K. Morita, Kinki University, Japan, T. Furuya, M. Soeda, Kitakyushu College of Technology, Japan
Expert System for Diagnosing Equipment Failures..............................................1169
T.W. Martin, Z.M. Zubaer, University of Arkansas, USA

FACTORY AUTOMATION

Session FA-1 Factory Communications and Plant Electromagnetic Pollution

Distributed Allocation of Real-Time Function Blocks in an IPCMS.........................1175
A. Di Stefano, L. Lo Bello, Universita di Catania, Italy
ATM for Real-Time Manufacturing System Architectures......................................1181
B. Maaref, S. Nasri, IMAG, France
Effect of Network Induced Delay on the Stability of An Autonomous Mobile Robot..................................................................................................1187
M. Waru, K. Hentabli, M. Tadjine, A. Rachid, Universite de Picardie-Jules Verne, France
Bidirectional Transmission of Analog/Digital Data and Video Signal via Optical Fiber for use in Reliability Test.................................................................1192
M. Kamiya, Hamamatsu Industrial Research Institute, Japan, H. Ikeda, Shizuoka University, Japan, S. Shinohara, Shizuoka University, Japan, H. Yoshida, Shizuoka University, Japan
Indoor Propagation and Electromagnetic Pollution in an Industrial Plant.............1198
O. Staub, J-F. Zuercher, Swiss Federal Institute of Technology, Lausanne, Switzerland,
Ph. Morel, CSEM, Neuchatel, Switzerland, A. Croisier, Ch.des Acacias, France

Session FA-2 Petri Nets, AGV PTH Planning, and Automatic Inspection

A Petri Net Based Approach for FMS Performance Evaluation.............................1204
S. Cavalieri, O. Mirabella, G. Zingarino, University of Catania, Italy
Implementation of a Large Petri Net by a Group of Petri Net Controller..................1210
T. Kamakura, T. Shimoda, Y. Dohi, Yokohama National University, Japan, H. Murakoshi, Tokyo Metropolitan Institute of Technology, Japan
Petri Net Modeling of Manufacturing Processes for CAD/CAM and FMS Applications.................................................................1216
L. Horvath, I.J. Rudas, Banki Donai Polytechnic, Hungary, J. Bencze, EKA RT., Hungary
A Routing Table Approach for Minimum Time Traffic Control of Multiple AGV Systems................................................................. 1222
J.H. Lee, B.H. Lee, Seoul National University, Korea, M.H. Choi, Kangwon National University, Korea
On-Line Automated Inspection Based on Image Digitization Boards................................................................. 1228
P. Marino, M.A. Domínguez, University of Vigo, Spain
A New Approach for Nesting Problem Using Part Decomposition Technology................................. 1234
G-C. Han, D-I. Kim, S-K. Kim, Samsung Electronics Co., Korea, S-J. Na, Korea Advanced Institute of Science and Technology, Korea

ROBOTICS, VISION AND SENSORS

Session RVS-1
Sensors

A Sensor for Very Low-Frequency Magnetic Fields................................................................. 1240
E.C. Ejioqu, Y. Nishiyama, T. Kawabata, Ritsumeikan University, Japan, T. Tanno,
Niigata Institute of Technology, Japan, K. Karasawa, Nagano Nation College of Tech., Japan
Different Designs of Light Emitters Applied to Laser Diode Range-Finders................................. 1244
B. Journet, G. Bazin, LENS-Cachen, France
Multisensor Based Autonomous Mobile Robot Through Internet Control................................. 1248
T.M. Chen, R.C. Luo, National Chung Cheng University, Taiwan
Object Detection Using Perceptual Organization and Prediction/Verification of Hypotheses................................. 1254
P. Vasseur, C. Pegard, E. Mouaddib, L. Delahoche, University of Picardie - Jules Verne, France
Sensor-to-Sensor Target Association Algorithm in a Network of Passive Sensors................................. 1260
M. Ito, S. Tsujimichi, Y. Kosuge, Mitsubishi Electric Corporation, Japan
An Electromagnetic Sensing Technique to Detect Metallic Objects for Microtunneling System................................. 1265
K. Yoneda, H. Tetsuya, K. Yoshida, NIT, Japan

Session RVS-2
Mobile Robots I

Path Tracking Controller for a Tractor with Multiple Trailers................................................................. 1269
T. Hashizume, I. Yaginuma, H. Fujikawa, S-I. Yamada, Musashi Institute of Technology, Japan
A Natural Language Processing Approach for Mobile Service Robot Control................................. 1275
P. Drews, P. Fromm, European Center for Mechatronics, Germany
Algorithm and Simulation Development of Autonomous Robotics Search................................. 1278
B.M. Bauer, G. Cook, George Mason University, USA
Low Cost Rangemap Obtaining for Mobile Robots Based on a Triangulation Rangefinder................................. 1284
H. Lamela, J.R. Lopez, E. Garcia, Universidad Carlos III de Madrid, Spain
Fundamental Research on Human Interface Devices for Physically Handicapped Persons................................. 1288
S. Fujisawa, T. Nishi, Osaka Perectural College of Technology, Japan, K. Ohkubo,
T. Yoshida, Y. Shidama, H. Yamaura, Shinshu University, Japan
Wire Driven Robot Hand................................................................................................................................. 1293
Y. Takahashi, Y. Tomatani, Y. Matsui, Y. Honda, T. Miura, Kanagawa Institute of Technology, Japan

Session RVS-3
Mobile Robots II

Design and Implementation of Fuzzy Garage-Parking Control for a PC-Based Model Car................................. 1299
S-J. Chang, T-H.S. Li, C-W. Cheng, National Cheng Kung University, Taiwan
Session RVS-4  Motion Control Algorithms I

Control of a Rotation-Thrust Drive with Helical Motor .............................................. 1343
L. Gobel, W. Hofmann, Technical University of Chemnitz, Germany

New Prospects in the Adaptive Control of Robots Under Unmodeled Environmental Interactions .......................................................... 1349
J.K. Tar, I.J. Rudas, J.F. Bito, B. Paikai, Banki Donat Polytechnic, Hungary

PWM Driving Characteristics of Robot Hand with Fingers Using Vibration-Type Ultrasonic Motors ..................................................... 1355
K. Nishibori, S. Kondo, Daido Institute of Technology, Japan, H. Obata, Asian Industry Co., Ltd., Japan S. Okuma, Nagoya University, Japan

Planning the Motion for a Manipulator in a Dynamic Environment ........................................ 1361
C.S. Zhao, Queen’s University, Canada, M. Farooq, Royal Military College, Canada, M.M. Bayoumi, Queen’s University, Canada

Application of Fuzzy Logic Controller in the Seam Tracking of Arc-Welding Robot .............................................................. 1367
G. Xiangdon, M. Yamamoto, A. Mohri, Kyushu University, Japan

Vision-Based Redundancy Control of Robot Manipulators for Obstacle Avoidance............................... 1373
M. Mikawa, K. Yoshida, M. Tanno, M. Matsumoto, NIT, Japan

Session RVS-5  Motion Control Algorithms II

Cooperative Motion Control of Multimanipulator Based on Workspace Disturbance Observer with Variable Compliance Gain ...................................................... 1379
E. Leksono, T. Murakami, K. Ohnishi, Keio University, Japan

A Force Based Motion Control Strategy for Hyper-Redundant Manipulator ........................................ 1385
N. Oda, T. Murakami, K. Ohnishi, Keio University, Japan

Visual Servo Control in Consideration of Visual Distortion of Object .................................................. 1391
S. Fukushima, T. Murakami, K. Ohnishi, Keio University, Japan

Manipulation of a Floating Object by Two Space Manipulators .............................................. 1397
R. Katoh, K. Nakatsuka, S. Sagara, J. Kobayashi, F. Ohkawa, Kyushu Institute of Technology, Japan
Position Control of PLZT Bimorph-Type Optical Actuator by On-Off Control
Y. Morikawa, Mechanical Engineering Laboratory, Japan, T. Nakada, Tokyo
Denki University, Japan

Sensing of Groove Gap and Torch Position Using Neural Network in Pulsed MIG Welding
K. Eguchi, S. Yamane, S. Horinaka, K. Oshima, Saitama University, Japan, T. Kubota, Himeji Institute of Technology, Japan

Session RVS-6 System Architecture
Identification Techniques for a Robotic Link
E. Bassi, F. Benzi, S. Conconi, University of Pavia, Italy

Teleoperation System of Power Shovel for Subterranean Line Works
K. Kosuge, K. Takeo, Tohoku University, Japan, H. Ishida, Chubu Electric Co., Inc., Japan

A Method of Tracing Disordered Cords
S. Ishikawa, J.K. Tan, Kyushu Institute of Technology, Japan

Estimating the Strip Tension in Multi-Drive Systems
J. Ruiz C., D. Sbarbaro H., Universidad de Concepcion, Chile

Study and Resolution of Singularities for a 7-DOF Redundant Manipulator
J-S. Chen, F-T. Cheng, F-C. Kung, National Cheng Kung University, Taiwan

Optimization of Cubic Polynomial Joint Trajectories and Sliding Mode Controllers for Robots Using Evolution Strategy

A Simple Discrete-Time Robot Model and Its Control Application
R. Lai, F. Ohkawa, Kyushu Institute of Technology, Japan

Session RVS-7 Vision Systems
Face-Direction Estimating System Using Stereo Vision
T. Minagawa, H. Saito, S. Ozawa, Keio University, Japan

Machine Vision System for Color Sorting Wood Edge-Glued Panel Parts
Q. Lu, S. Srikanteswaran, W. King, T. Drayer, R. Conners, E. Kline, Virginia Tech, USA, P. Araman, US Forest Service, USA

Stereo Vision System Using Semiconductor Laser Structured Illumination to Work Under Severe Solar Irradiance
H. Lamela, J.R. Lopez, E. Garcia, S. Gomez, P. Acedo, Universidad Carlos III de Madrid, Spain

Detection of Leaked Oil Using Image Processing
N. Aoki, T. Inari, Kinki University, Japan

A 3-D Vision System for Autonomous Robot Applications Based on a Low Power Semiconductor Laser Rangefinder
E. Garcia, H. Lamela, J.R. Lopez, Universidad Carlos III de Madrid, Spain
