Unified International Technical Conference on Refractories
Fourth Biennal Worldwide Conference on Refractories

"Global Development of Refractories"

PROCEEDINGS

Hosted by

The Technical Association of Refractories, Japan

Kyoto International Conference Hall, Kyoto, Japan

November 19–22, 1995

in conjunction with The 8th Annual Colloquium on Refractories, Japan
CONTENTS

-Vol. I-

Monday Morning, November 20
Room A

Opening Ceremony

Plenary Session - I
Chairperson Mr. M. Hayase, Shinagawa Refr., Japan

PS-1. Refractories for Steelmaking in Japan,
Mr. S. Kataoka
(Technical Association of Refractories, Japan)  1

PS-2. The International Refractory Contractor:
A Borderless World,
Mr. R. J. Reintjes, Sr.
(American Ceramic Society)  28

PS-3. Demands on Refractory Material for Clean Steel Production,
Dr.-Ing. N. Bannenberg
(German Refractories Association)  36

Plenary Session - II
Chairperson Mr. M. Mori, Krosaki Corp., Japan

PS-4. The Latin American Steel Industries and Their Refractories Requirements,
Mr. P. R. H. M. Bittencourt
(Latin American Association of Refractory Manufacturers)  60

PS-5. Refractories Developments for Iron and Steel Making in China,
Prof. Dr. X. C. Zhong
(Chinese Ceramic Society)  75

PS-6. Refractory Applications - Challenges of the 21st Century,
Mr. R. Jhunjhunwala
(Indian Refractory Makers Association)  86
I. Refractories for Coke Oven, Blast Furnace and Torpedo Car

T. Session I - 1 Chairpersons
T. Matsui, Nippon Steel, Japan
M. Spreij, Hoogovens, Netherlands

2. Glaze Coated Cordierite Blocks for Coke Oven Precast in Reduced Pressure, H. Honda, K. Tokuda, S. Takahara and Y. Wada, Krosaki Rozai, Japan (No. 2)

3. Optimizing the Throughput Capacity of Torpedo Ladles with Al₂O₃-C-SiC Refractories in Brazil, A. B. Lopes, J. Braha and S. C. Frasson, Carboranda do Brazil Ltda. and O. R. Marques and P. S. S. Delgad, CSN, Brazil (No. 206)

4. Effect of Frit Addition to Al₂O₃-SiC-C Bricks for Torpedo Car, J. H. Bum, S. R. Choi and Y. S. Choi, Chosun Refractories Co., Ltd., Korea (No. 202)

T. Session I - 2 Chairpersons
M. Iiyama, NKK Corp., Japan
J. W. Cudby, KSR International, UK

5. Evolution of Taphole Clays Properties during Ageing, P. Hubert, B. Philippon and C. Ruer, T. R. B. and F. Lambert, CNRS, CRMD, France (No. 74)

7. Developments of a Wear Factors Modelisation for Blast Furnace Main Troughs, P. de Lafarge, B. Clavaud, R. Avis and M. Gondolf, Lafarge Refractories Monolithiques; and H. Le Doussal and P. Dedenis, French Ceramic Society, France (No. 128)

13. A Decade of Development with the Ceramic Cup for Blast Furnace Hearth Linings, J. Schoennahl, X. Tong, B. Hitier and R. McNally, Savoie Refractories, France (No. 193)

II. Refractories for Glass and Cement Industries

T. Session II-1 Chairpersons
K. Hayashi, Kyoto Inst. of Tech., Japan
J. Stradtmann, Dolomitwerke, Germany

15. Investigation of Behavior of Glass Exudation from Fused Cast Refractories, T. Ishino*, Asahi Glass Co., Ltd., Japan (No. 59) 209

17. The Reactions between Zirconia from MgO-ZrO\textsubscript{2} Refractories and the Compounds of Portland Cement Clinker, S. Radovanovic*, Magnohrom-Institute, Yugoslavia (No. 38) 224

18. A New High Alumina Brick Used in Cement Kilns and Glass Tanks in China, X. D. Liu*, China Building Materials Academy, China (No. 26) 233

T. Session II-2 Chairpersons
Y. Kaneko, Nihon Cement, Japan
J. W. Stendera, Martin Marietta Labs, USA

21. Further Improvements of MgO-CaO-ZrO\textsubscript{2} Bricks for Burning Zone of Rotary Cement Kiln, H. Kozuka², Y. Kajita, K. Tokunaga, K. Sakakibara and S. Ohta, Mino Ceramic Co. Ltd., Japan (No. 163) 256

23. Development of Castables for Cement Kilns in China, G. Liu², Research Institute of Refractories, China Building Materials Academy, China (No. 17) 272
III. Refractories for Non-Ferrous Metal Industries

T. Session III-1 Chairpersons
N. Yasuda, Harima Ceramic, Japan
B. Sandberg, Elkem Refr., Norway

24. Reaction of Fireclay Refractories in Aluminium Reduction Cells, O. J. Siljan*, Norsk Hydro Research Center, Norway (No. 22) 280

25. Al₂O₃-AlN Ceramics as Lining Refractory Materials for Aluminium-Magnesium Melting Furnace, S. Shimomura, H. Nishida and T. Kishimoto*, Yotai Refractories Co. Ltd., Japan (No. 142) 289

26. Refractory Lining Optimization for Pressure Oxidation Autoclaves, C. E. Semler*, Semler Materials Services; and H. J. H. Pieterse and R. A. Williams, Barrick Goldstrike Mines Inc., USA; and K. G. Thomas, Barrick Gold Corp., Canada (No. 53) 297

27. Studies on the Refractories Used in Non-Ferrous Metals Smelting Furnace and their Application in China, Y. Li, Luoyang Refractories Factory, China (No. 82) 305
IV. Basic Science

T. Session IV- 1 Chairpersons
T. Kitai, Harima Ceramic, Japan
O. J. Siljan, Norsk Hydro, Norway

28. On the Influence of the Specific Surface Area and Na₂O Content of Aluminas on the Hydration Processes in CaO·Al₂O₃/Al₂O₃ Mixes, W. Gessner² and S. Mohmel, Institute of Applied Chemistry; and A. Schmaistieg, Technical University, Berlin, Germany; and A. Rettel and J. P. Bayoux, Lafarge Coppee Recherche; and A. Capmas and A. Mathieu, Lafarge Aluminates, France (No. 7) 313

29. The Hydration of Mono Calcium Aluminate at 50°C in the Presence of Aluminas, Different in Reactivity, S. Mohmel², W. Gessner and D. Muller, Institute of Applied Chemistry; and R. Trettin and G. Oliew, Technical University, Berlin, Germany; and A. Capmas and A. Mathieu, Lafarge Aluminates, France (No. 8) 321

30. Calcium Aluminates for Refractory Castables: Synthesis and Hydration Behaviour, D. A. Fumo and A. M. Segadaes², Universidade de Aveiro, Portugal; and M. R. Morelli, Univ. Federal de Sao Carlos, Brazil (No. 47) 329

31. The Effect of Cement Substitution for 3-Alumina Partial Additions on the Thermo-Mechanical Properties of a Low Cement Refractory Concrete, S. C. Maestrelli and J. B. Baldo², Federal Univ. of Sao Carlos-DEMa; and L.L.H.C. Ferreira, Elfusa Geral de Eletrofusao, Brazil (No. 126) 337

T. Session IV- 2 Chairpersons
S. Sakamoto, Asahi Glass, Japan
B. M. Kwon, Posco Ref., Koria

33. The Effect of the Matrix Mass Fraction and the Defloculant Type on the Development of a Self-Flowing Low Cement Refractory Concrete, J. B. Baldo² and A. C. Morelli, Federal Univ. of Sao Carlos-DEMa, Brazil (No. 125) 351
34. Admixtures and their Interactions with High Range Calcium Aluminate Cement, T. A. Bier*, B. Espinosa, A. Mathieu and C. Marcelon Lafarge Aluminates, France (No. 42)  

35. Effect of MgO and Fe₂O₃ Additions on the Sintering Behavior of Mullite, R.H.G.A. Kiminami*, University of Sao Carlos, Brazil (No. 117)  

36. Sintering, Microstructure and Alkali-Resistance of the Materials in Al₂O₃-Si₃N₄ System, N. Li* and Y. Wu, Wuhan Iron & Steel Univ., China (No. 6)  

T. Session IV- 3 Chairpersons  
K. Mukai, Kyushu Inst. of Tech., Japan  
T. Bier, Lafarge Aluminates, France  

37. Effect of Corundum/Periclase Sizes on Expansion Behavior during Synthesis of Spinel, Z. Nakagawa*, N. Enomoto and I. S. Yi, Tokyo Institute of Technology; and K. Asano, Nippon Steel Corp., Japan (No. 48)  

38. Spinel Formation in the MgO-Al₂O₃ System Relevant to Basic Castables, M. Rigaud*, S. Palco and N. Wang, Ecole Polytechnique, Canada (No.151)  

39. Thermochemical Formation and Stability of Spinel(MgO·Al₂O₃) under Strongly Reduction Conditions, M. A. Sainz and A. Caballero*, Inst. de Ceramica y Vidrio, Spain; and A. Mazzoni and E. Aglietti, CETMIC, Argentina (No.160)  

A LIST OF CORRIGENDA

CONTENTS

-Vol. 1-
T. Session IV-1 Chairpersons
2 LINE: T. Kitai, T. Tsuchinari

-Vol. 2-
T. Session VI-1 Chairpersons
3 LINE: ~, Koria, Korea

T. Session VIII-1 Chairpersons
2 LINE: A. Tsuchinari, T. Kitai

-Vol. 3-
T. Session X-3 Chairpersons
3 LINE: D. Whitemore, Harbison-Walker Refr.,
G. MacZura, Alcoa Indu. Chem.

T. Session X I-2
147. Application of Monolithic Lining for the Steel Ladle at
Kobe Steel, Japan (No.110)

147. Use of High Strength Insulation to Improve Lining Stability
and Energy Efficiency in Steelmaking Ladle, D. A. Bell*, CERAM
Research, UK; and E. S. Chen, Thermomechanical Designs Inc.,
USA; and D. Drolet, Pyrotek Inc. Canada, Canada (No.78)

T. Session X I-4
156. Use of High Strength Insulation to Improve Lining Stability
and Energy Efficiency in Steelmaking Ladle, D. A. Bell*, CERAM
Research, UK; and E. S. Chen, Thermomechanical Designs Inc.,
USA; and D. Drolet, Pyrotek Inc. Canada, Canada (No.78)

156. Application of Monolithic Lining for the Steel Ladle at
Kobe Steel, Japan (No.110)
