Proceedings of the

NINTH INTERNATIONAL SYMPOSIUM ON AVIATION PSYCHOLOGY

April 27-May 1, 1997

Sponsored by

The Department of Aerospace Engineering,
Applied Mechanics, and Aviation
The Aviation Psychology Laboratory
The Ohio State University
Columbus, OH 43210

The International Journal of Aviation Psychology

and

The Association of Aviation Psychologists

Edited by

Richard S. Jensen and Lori A. Rakovan

Dr. Richard S. Jensen, General Chair
Lori A. Rakovan, Technical Chair

Volume I
CONTENTS

Foreword ......................................................................................................................... i

ACCIDENT INVESTIGATION

The Development of Flight Control Skills in Children, With Reference to the Jessica Dubroff Accident ................. 1
Jan Berkhout, University of South Dakota

Human Factors of TWA Flight 800 ............................................................................. 4
Agnes J. Huff, Fraser/Young, Inc.

Some Lessons From TWA 800 ................................................................................. 9
Jerome Lederer, ISASI

Investigating for Human Factors: An Integrated Approach ........................................... 12
James Nottrodt, Transportation Safety Board of Canada
M. Hill, E. McCullough

Spatial Disorientation in U.S. Civil Aviation Helicopter Accidents ................................. 16
Rudolf G. Mortimer, University of Illinois at Urbana-Champaign

An Analysis of Naval Flight Mishap Recommendations: Some Theoretical Implications ...................... 21
John K. Schmidt, Naval Safety Center
P. Kinzey

Why Would an Experienced Aviator Fly a Perfectly Good Aircraft Into the Ground? ...................... 26
Scott A. Shappel, Embry-Riddle Aeronautical University and the U.S. Navy
D. Wiegman

Human Performance Investigation: The Bureau of Air Safety Investigation's Perspective .................... 33
Michael B. Walker, Bureau of Air Safety Investigation

Human Factors in Balloon Accidents .......................................................................... 39
Wolf Dietrich Zuzan, Austrian Road Safety Board

AGING

Age, Flight Experience, Time-Sharing Performance, and Perceived Workload ....................... 42
Pamela Tsang, Wright State University

Age-Related Changes in Pilot Variables Contributing to General Aviation Accidents .............. 47
Julie A. Yates Harkey, American Trans Air
W. McCurry

AQP DATABASES

Guidelines for Maximizing the Diagnostic Power of the Advanced Qualification Program Database .......... 53
Douglas R. Farrow, Federal Aviation Administration

Data Warehousing for AQP Databases ..................................................................... 58
Robert W. Holt, George Mason University

AQPing CRM ............................................................................................................ 64
Susan J. Mangold, Battelle Memorial Institute
D. Neumeister
Implementing the Model AQP Database: Lessons Learned ................................................................. 70
David M. Neumeister, Battelle Memorial Institute
S. Mangold

ATC

COMMUNICATION

The Extent to Which Pilots and Controllers Consider Accents or Dialects Cause Difficulties in ATC Communication...
Brian J. Fallon, NATCA Safety Office, NY Tracon

Vocal Cues and Pilot/ATC Communications ................................................................. 81
Amy Fegyveresi, Dowling College

Analysis of Gender Bias In Controller-Pilot Communications .................................................. 85
Mary Ann Turney, Dowling College

Factors that Affect Controller/Pilot Communications: Readbacks, Volume of Information, Experience Level, Personal Problems, Standard Phraseology, and the Relationship to Safety ............................................. 90
Bernard Wulle, Purdue University
A. Zerr

HUMAN FACTORS

Evaluation of a New Descent Procedure For Airline Pilots ....................................................... 95
Barry Crane, San Jose State University Foundation at NASA Ames Research Center
E. Palmer, N. Smith

Field Evaluation of Flight Deck Procedures for Flying CTAS Descents .................................. 101
Everett Palmer, NASA Ames Research Center
P. Cashion, B. Crane, S. Green, M. Feary, T. Goka, N. Johnson, B. Sanford and N. Smith

Measuring Air Traffic Controller Visual Scanning .............................................................. 107
Earl S. Stein, DOT/FAA WJH Technical Center
B. Willems

PERSONAL ISSUES

Employing Air Traffic Controllers- 1981 to 1992 ................................................................. 113
Jay C. Aul, Federal Aviation Administration

Dana Broach, FAA/Civil Aeromedical Institute

Ability Requirements for Different ATC Positions ............................................................ 123
Hinnerk Eissfeldt, DLR

ATCS Field Training Programs, 1981-1992 .................................................................. 129
Carol A. Manning, FAA/Civil Aeromedical Institute

Current FAA Controller Workforce Demographics, Future Requirements and Research Questions ......................................................... 135
David Schroeder, FAA/Civil Aeromedical Institute
D. Broach, W. Farmer

Organizational Context for the Air Traffic Control Specialist Workforce ............................. 142
Richard C. Thompson, Federal Aviation Administration
SELECTION

Predictive Validation of FAA Selection Instrument in Europe .............................................. 148
René Kraneveld, Air Traffic Control, The Netherlands

Current Issues on Selection Tools for ATCO Selection .................................................... 154
Hermann Rathje, Eurocontrol
Z. Golany

Air Traffic Specialist Screening Programs, 1981-1992 ....................................................... 160
Pamela Della Rocco, Federal Aviation Administration/Civil Aeromedical Institute

The Comparative Effects of Video Game vs. PC Experience on Computer-Based Air Traffic Controller Specialist, Air Traffic Scenario Test Scores .................................................. 165
Willie C. Young, Federal Aviation Administration/Civil Aeromedical Institute
D. Broach

TEAMWORK

Controller Teamwork Evaluation and Assessment Methodology (CTEAM) ............................. 175
L.L. Bailey, Federal Aviation Administration
D.M. Broach, R.J. Enos

A Methodology for Simulation Training and Assessment of Tower Cab Team Skill Competencies ............................................................ 181
Dr. David P. Baker, University of Central Florida
K. Smith-Jentsch

Team Resource Management in European Air Traffic Services .......................................... 187
Manfred Barbarino, Directorate EATCHIP Development

Developing and Assessing Cognitively-Based Competencies: Measures of Cue-Strategy Association and Mental Models ............................................................. 193
Kurt Kraiger, University of Colorado at Denver and HR Avantis
A. Winckler

Defining and Training Tower Cab Teamwork ..................................................................... 201
Kimberly A. Smith-Jentsch, Naval Air Warfare Center Training Systems Division
R. Zeisig, J. Cannon-Bowers, E. Salas

TECHNOLOGY

Conflict Detection and Decision Making in ATC: Some Implications for Automation ............ 207
Paola Amaldi, CENA
J. Cellier

Multimodality and Cooperation in Complex Work Environments: Some Issues for the Design and Validation of a Decision Support System in Air Traffic Control ........................................... 212
Marie-Christine Bressolle, Centre d’Etudes de la Navigation Aerienne (ARAMITHS CNRS - CENA)
M. Leroux

Air Traffic Control: A Starting Point .................................................................................. 219
Sharon Jones, University of Texas Aerospace Crew Research Project

Evaluation of Advanced Decision Aids for En-Route ATCOs: Towards an Operational Deployment .............................................................................................................. 225
Marcel Leroux, CENA
AUTOMATION TRAINING

Behavior-Based vs. System-Based Training and Displays for Automated Vertical Guidance ................................................. 231
Michael Feary, NASA/SJSUF
E. Palmer, L. Sherry, P. Polson, M. Alkin, D. McCrobie

Transition Training and the Glass Cockpit .......................................................... 237
G.C.L. Fletcher, Defence Evaluation and Research Agency

Training for Use of Automation: The Value of 'Free-Play' as a Complement to Traditional Transition Training .............. 243
Paul J. Sherman, University of Texas at Austin Aerospace Crew Research Project
R. Helmerich

Controlled Flight Into Terrain - A Validation Study ................................................. 249
William D. Shontz, Boeing Comercial Airplane Group
D. Carbaugh, R. Rugaber

An Analysis of The Relationship Between Procedure Support Documentation and Task Performance ...................... 255
Nancy Smith, San Jose State University Foundation
E. Palmer

COCKPIT TECHNOLOGY

INTERNATIONAL SYSTEMS

Experimental Studies of Intent Information on Cockpit Traffic Displays .......................................................... 261
Richard Barhydt, Massachusetts Institute of Technology
R. J. Hansman, Jr.

Recognizing Pilot Goals to Facilitate Agenda Management .......................................................... 268
Woo Chang Cha, Oregon State University
K. Funk

Pilot Non-Conformance to Alerting System Commands .......................................................... 274
Amy R. Pritchett, Georgia Institute of Technology
R. J. Hansman

Lance Sherry, Honeywell
J. Kelley, D. McCrobie, P. Polson, M. Feary, E. Palmer, M. Alkin, C. Hynes

MILITARY

A Review of Attitude Symbology Research for Helmet-Mounted Displays .......................................................... 287
Eleanor C. Davy, Air Human Factors Group, Systems Integration Department
H. Dudfield, J. Campbell, D. Farnborough

Developing Automatic Luminance Controls for Liquid Crystal Displays in Military Cockpits ............................................ 294
Jennie J. Gallimore, Wright State University
J. Stouffer, N. Brannon, J. McCraken

Advanced Performance Helmet-Mounted Systems Design and Testing .......................................................... 299
Randall W. Brown, Armstrong Labatory, Wright Patterson Air Force Base
R. Gunderman
An Examination of System Sensitivity in a Biocybernetic Adaptive System .......................................................... 305
G. Hadley, Old Dominion University
P. Mikulka, F. Freeman, M. Scerbo, L. Prinzel

Speech Recognition Systems For Military Aircraft Cockpits: From Laboratory to Flight Test ........................................ 310
Kristen K. Liggett, Vehicle-Pilot Integration Branch, Wright-Patterson Air Force Base
K. Ober, D. Williamson, J. Reising

Performance Effects of Adaptive Allocation ...................................................................................................................... 316
Stephen F. Scallen, University of Minnesota
P. Hancock

PRIMARY DISPLAYS

Effects of Display Superimposition on Monitoring of Automation ...................................................................................... 322
J.A. Duley, The Catholic University of America
S. Westerman, R. Molloy, R. Parasuraman

Improving Traffic Awareness with a Head-Up Flight Path Highway Display ................................................................ 329
Steven Fadden, University of Illinois
C. Wickens

Evaluation of a Display with Both Quickened and Status Information for Control of a Second Order System .................. 335
Matthew J. Neal, Embry-Riddle Aeronautical University
J.A. Wise, J.E. Deaton, D.J. Garland

FMS 3D Map ........................................................................................................................................................................ 341
Gary L. Owen, Rockwell-Collins, Inc.
J. Suiter

Part-Mission Simulation Evaluation of Issues Associated with Electronic Approach Chart Displays .............................. 347
Elfriede F. Hofer, University of Illinois
C. Wickens

TRAFFIC DISPLAYS

Augmented TCAS Advisories Using a 3-D Audio Guidance System ..................................................................................... 353
Durand R. Begault, San Jose State University
E. Wenzel, W. Lathrop

DATIDS - The University of Minnesota Distributed Air-Traffic Information Display Simulator ......................................... 358
James Klinge, University of Minnesota
K. Smith, P. Hancock

Perspective and Coplanar Representation of Air Traffic: Implications for Conflict and Weather Avoidance ...................... 362
David H. Merwin, University of Illinois
J. O’Brien, C. Wickens

Influence of Color Cockpit Displays of Traffic Information on Pilot Decision Making in Free Flight .............................. 368
Stephen F. Scallen, University of Minnesota
K. Smith, P. Hancock

Perspective and Predictive Information in the Cockpit as a Target Acquisition Aid .......................................................... 374
Leo van Breda, TNO Human Factors Research Institute
COGNITIVE FACTORS

An Investigation of the Relationships Between the Angle of Mental Rotation Required for Spatial Orientation, Response Times, and Accuracy ................................................................. 380
Ronald D. Archer, Embry-Riddle Aeronautical University
G. Gibb, J.A. Wise, & R.S. Gibson

Evaluating the Concept of Anticipation Range in Air Traffic Control ................................................................. 386
Nicole Boudes, Centre d’Etudes de la Navigation Aerienne
J. Cellier

A Preliminary Cognitive Model of En-Route Air Traffic Control ................................................................. 391
Helge Helbing, Technical University of Berlin

Measuring Cognitive Complexity in Glass-Cockpits: A Generic Framework and its Application to Autopilots and their Modes ................................................................. 397
Denis Javaux, University of Liege, Belgium

Root Causes and Cognitive Processes: Can They be Combined in Accident Investigations? ................................. 403
Mauro Pedrali, European Commission - Joint Research Centre

Cognitive Learning Preferences Among Airline Pilots ........................................................................................................ 409
Stephen M. Quilty, Bowling Green State University

Cognitive Rigidity: The Effects of Mission Planning and Automation on Cognitive Control in Dynamic Situations .................................................................................................................. 415
R.M. Taylor, DERA Centre for Human Sciences
S. Finnie, C. Hoy

COMPUTER BASED TRAINING

Human Factors Computer Based Training in Air Traffic Control .............................................................................. 422
A. Bellorini, Human Factors Consultant
P.C. Cacciabue, M.N. Larsen and E. Falcinelli

Intelligent Tutoring Systems for 'Trained Novices': Building Expertise in Mode Management ................................. 428
Alan R. Chappell, Georgia Institute of Technology
C. Mitchell

Enhancing Vertical Navigation Performance in Glass-Cockpit Aircraft .................................................................... 434
Daniel McCrobie, Honeywell Air Transport Systems Division
M. Alkin, L. Sherry, M. Feary, P. Polson, E. Palmer

Considerations in the Design and Use of Personal Computer-Based Aircraft Training Devices (PCATDs) for Instrument Flight Training: A Survey of Instructors .......................... 440
William F. Moroney, University of Dayton
S. Hampton, D. Biers

PC Based Assessment and Training of Aviation Decision Making Skills .................................................................... 446
Rodney Pierce, The Ohio State University
R. S. Jensen

CRM

ASSESSMENT

Tools for Investigating Rater Reliability and Accuracy ................................................................................................. 452
David P. Baker, University of Central Florida
R. K. Dismukes
Empirical Interrater Reliability for Military Instructors/Evaluators
Michael T. Brannick, University of South Florida
C. Prince, E. Salas

457

Pilot Abilities and Performance
Deborah A. Boehm-Davis, George Mason University
R. Holt, J. Hansberger

462

Behavioral Markers for CRM
Rhona Flin, University of Aberdeen
L. Martin

468

Crew Resource Management Tools and Techniques for the Air Force Tanker Community
Jerry W. Hedge, Personnel Decisions Research Institute
M. A. Hanson, F. Siem, K. Logan, K. Bruskiewicz

473

Towards a New Measurement Approach for Cockpit Resource Management Attitudes
John C. Morey, Dynamics Research Corp.
G. Grubb, R. Simon

478

Facilitating Los Debriefings: A Training Manual
Lori K. McDonnell, San Jose State Univ./NASA Ames Research Center
K. Jobe, R. K. Dismukes

484

Understanding Leadership/Followership Skills
Maureen A. Pettitt, Federal Aviation Administration
J. Dunlap

485

Loft Assessment Methodology: One Strategy
Selma L. O. Ribeiro, M. Ed. & Monique, R. de Assis, Physical Activity Sciences Institute

490

Inter-rater Reliability Tool Development and Validation
Kim M. Schultz, Atlantic Coast Airlines
T.L. Seamster, E.S. Edens

495

Methods for the Analysis of CRM Skills
Thomas L. Seamster, Cognitive and Human Factors (FAA)
F. Prentiss, E.S. Edens

Methods for the Analysis of CRM Skills

500

Identification of Key Behaviors for Effective Team Coordination in Special Operations Forces
Steven J. Tourville, Hughes Training, Inc.

505

The Role of the Check Airman in Error Management
Frank J. Tullo, Continental Airlines
T. Salmon

511

Training for Inter-Rater Reliability: Baselines and Benchmarks
Donna M. Williams, George Mason University
R. W. Holt, D.A. Boehm-Davis

514

CABIN CREW

Relationship Between the Passenger and the Crew
Liliana Arostegui,
C. Pla, R. Rubio, P. Lorenzo

521

Evaluation of Cabin Crew Technical Knowledge

527
Melisa G. Dunbar, San Jose State University/ NASA Ames Research Center
R. Chute, K. Jordan,

Speak up for Safety! Encouraging Flight Attendants to Share Their Safety Concerns With Pilots ........................................ 532
Marvin Karlins, University of South Florida
C. H. Cheah

CRITIQUE

The Need for Operational Validation of Human Relations-Centered CRM Training Assumptions................................. 536
Robert O. Besco, AAL

CRM Training: Which Crossroads to Take Now?.................................................. 541
J. Norman Komich

CRM: Past, Present, and Future ........................................................................ 547
Danial E. Maurino, International Civil Aviation Organization (ICAO)

How to Fix CRM................................................................................................. 550
David A. Simmons, United Airlines

Is The Aviation Industry Experienceing CRM Failure? .................................... 554
Hal Sprogis, Aviation Research Associates, LTD

TRAINING

Evolvement of Crew Attitudes in Military Airlift Operations After CRM Course ................................................................. 556
Jean-Yves Grau, IMASSA
C. Valot

Making it Happen: The CRM Experience at Ansett Australia ............................ 562
Harry Holling, Ansett Australia
B. Hayward

Briefing and Debriefing Techniques for Instructors in Aviation ....................... 568
Mark B. Klair, Federal Express

The Importance of CRM Skills in an AQP .......................................................... 574
Joy Lanzano, United Airlines
T. Seamster, E. Edens

The General Aviation Cockpit Resource Management Workshop .................. 580
Bruce J. Mayes, Century Flight Management Inc.

Recent Experience and Tanker Crew Performance: The Impact of Familiarity on Crew Coordination and Performance ............. 586
Earl McKinney, USAF Academy
J. Barker, J. Woody, J. D. Garvin, W. Olson

What Do We Train When We Train CRM? (And How Do We Know We’ve Trained It?) ....................................................... 591
Carolyn Prince, Federal Aviation Administration
E. Salas

Development and Implementation of a CRM Course for Cabin: An Approach of Integrating Regulations; Scientific Findings and the Customer’s Needs and Objectives ............................................... 597
Solveig Proske, Lufthansa German Airlines
B. Foese, A. Schiewe
CULTURAL ISSUES

“CRM is in the Heart (of Asia)” ................................................................. 615
Jose M. Anca, Jr., Philippine Airlines
M. Sarmiento

The Winds of Change - International Developments in Airport Emergency Planning ............................................. 620
Morgan Fahey, Consultant to ICAO Asia/Pacific

How to Challenge the Captain’s Actions .................................................. 624
Ute Fischer, Georgia Institute of Technology
J. Orasanu

Stress of Flight Instructors Teaching Students of Non-Native English Speaking Backgrounds .................................. 629
Irene Henley, University of Western Sydney
L. Berlioz-Nott

CRM and Culture: National, Professional, Organizational, Safety ................................................................. 635
Robert L. Helmreich, University of Texas at Austin
J. Wilhelm

Local Solutions for Global Problems: The Need for Specificity in Addressing Human Factors Issues ...................... 641
Robert L. Helmreich, The University of Texas at Austin
A. Merritt

From Training to Safety: The Cultural Links ........................................................................................................... 645
Thorsten Hisam, Embry Riddle Aeronautical University
S. Hampton

Passenger Knowledge of Airline Safety Icons: A Cultural Study ............................................................................. 651
Bridget L. Mattingly, ERAU
J.A. Wise, J.M. Cunningham, & J.E. Deaton

Human Factors, CRM and Aviation Safety - ICAO’s Perspective ................................................................. 656
Daniel E. Maurino, ICAO

“Who Are You Calling a Safety Threat?! A Debate on Safety in Mono-Versus Multi-Culture Cockpits” ......................... 661
Ashleigh C. Merritt, The University of Texas
S. Ratwatte

Replicating Hofstede: A Study of Pilot Attitudes in Eighteen Countries ................................................................. 667
Ashleigh C. Merritt, University of Texas at Austin

What Did He Say? Culture and Language Barriers to Efficient Communication in Global Aviation ......................... 673
Judith Orasanu, NASA - Ames Research Center
J. Davison, U. Fischer

DATA LINK

Pilot Evaluation of Data Link Services for General Aviation ......................................................................................... 679
Divya C. Chandra, MIT Lincoln Laboratory
ATC Data-Link in an Airbus A340 Cockpit
G. Huettig, Berlin University of Technology
G. Anders, A. Tautz

Pilot Performance in Automated Cockpits: Event-Related Heart Rate Responses to Data Link Applications
Peter G. A. M. Jorna, National Aerospace Lab

Flight Crew Support for Automated Negotiation of Descent and Arrival Clearances
Thomas Prevot, National Research Council
E. Palmer, B. Crane

DECISION MAKING

The 3U’s of Decision Making — What is Understood, What is Unknown, and What is Unconscious
Richard J. Adams, Florida Institute of Technology

An Exploration of Options in Value Based Aeronautical Decision Making
Adam Dershowitz, MIT
R. J. Hansman

Impact of Ambiguity on AWACS Team Communications and Decision Making
Linda R. Elliott, USAF Armstrong Laboratory
K. Neville, M. Dalrymple, S. Tower

Recognition-Primed Decision Model in Air Traffic Controller Error Analysis
Robert J.B. Hutton, Klein Associates Inc.
M. Thordsen, R. Mogford

Risk Management in General Aviation: Making Your Own Rules
Richard S. Jensen, The Ohio State University

A Proposed Measure of Expert Aeronautical Decision Making for Training Programs
Maxine Lubner, Columbia University
P. Hwoschinsky, F. Hellman

Application of the Recognition-Primed Decision Model to the Study of Air Traffic Controller Decision Making
Richard H. Mogford, FAA
K. Allendoerfer, M. Snyder, R.J.B. Hutton, M. Rodgers

Framing of Task Performance Strategies: Effects on Performance in a Multi-Attribute Dynamic Decision-Making Environment
Thomas E. Nygren, The Ohio State University
T. Ransom-Flint

Simulator and Flight Tests of General Aviation Piloting Skill
Kathleen Tagliaferri, The Ohio State University
R. Tigner, J. Wollard, R. Jensen

The Validation of a Computer-Based Program for the Development of Pre-Flight Decision-Making Skills Amongst Pilots
Scott Taylor, University of Newcastle
M. Wiggins

The Design and Development of a Computer-Based Pilot Judgement Tutoring System for Weather-Related Decisions
Mark Wiggins, University of Western Sydney
D. O’Hare, J. Guilkey, R. Jensen
FAILURE DETECTION

Automation Effects in General Aviation: Pilot Responses to Autopilot Failures and Alarms ........................................ 767
Dennis B. Beringer, FAA/CAMI

The Effects of Experience and Automation on Failure Detection ................................................................. 773
Sheryl L. Chappell, TransQuest, Inc.

Instrument Failure Detection and Workload in Simulated General Aviation Flight During Manual and Automated Lateral Tracking .................................................. 780
Anthony J. Masalonis, Catholic University of America
E. Byrne, J. Duley, R. Parasuraman

FATIGUE

Managing Sleep to Sustain Alertness and Effective Performance in Combat/Operational Settings ......................... 786
Gregory Belenky, U.S. Army Aeromedical Research Lab

Interactions of Work-Rest Schedules with Sleepiness and Fatigue for French ATC Operators ................................ 792
S. Bougrine, University of Paris
R. Mollard, P. Cabon, B. Cointot, A. Martel, A. Coblentz

Gender Does Not Affect Susceptibility to Performance Decrements as a Function of Sleep Deprivation ................ 798
John A. Caldwell, Aeromedical Research Laboratory
Fr. and J. Lynn Caldwell

The Management of Crew Endurance in Army Aviation: A System for Aviation Personnel ................................. 804
C.A. Comperatore, U.S. Army Aeromedical Research Laboratory

The Implementation of Controlled Rest on the Flight Deck. ................................................................................... 810
Hans De Ree, KLM Royal Dutch Airlines
R. Simons, P. Valk, F. da Bruijn

Fatigue and Sleepiness: Same or Different? A Research in Aviation ................................................................. 815
R. Mollard, University of Paris
S. Bougrine, P. Cabon, F. Mourey, A. Coblentz

The Fatigued Pilot: A Factor in Lost Situation Awareness ..................................................................................... 821
Richard O. Reinhart, Business & Commercial Aviation and HFR, Inc.

Analysis of the Mental Stress in Captains of Brazilian Civil Aviation ............................................................ 824
Selma L.O. Ribeiro, Physical Activities Sciences Institute
C. David, E. Lacerda, M. Assis, L. Lelles

AUTHOR LIST (End of Volume I) .................................................................................................................. 830a-e

FLIGHT DECK (Begining of Volume II)

DESIGN

Flight Deck Improvement vs. Commonality: Human Factors Implications for Mixed Fleet Operations .................. 831
Stephen P. Boyd, Boeing Commercial Airplane Group
P. Harper

Elaboration of Ergonomic Criteria for Flight Deck Design .................................................................................... 837
Florence Buratto, Aerospatiale
