FLIGHT DECK (Beginning of Volume II)

DESIGN

*Flight Deck Improvement vs. Commonality: Human Factors Implications for Mixed Fleet Operations* .................................................. 831
Stephen P. Boyd, Boeing Commercial Airplane Group
P. Harper

*Elaboration of Ergonomic Criteria for Flight Deck Design* ................................................................. 837
Florence Buratto, Aerospatiale

*Tracking Operator Activities in Complex Systems: An Experimental Evaluation Using Boeing 757 Pilots* .............. 842
Todd J. Callantine, Georgia Institute of Technology
C. Mitchell, E. Palmer

*Flightdeck Automation: Evidence for Existing Problems* ................................................................. 848
Beth Lyall, Research Integrations, Inc.
M. Niemczyk, R. Lyall, K. Funk

*Human Factor Program at AEROSPATIALE* ................................................................. 853
Florence Reuzeau, Aerospatiale

*Clean Slate Flight Deck Design: Theory Based Solutions Provide Useful Design Goals* .................................. 859
William H. Rogers, Honeywell, Inc.
P.C. Schutte

*Wings: A New Paradigm in Human-Centered Design* ................. 865
Paul C. Schutte, NASA Langley Research Center

MANAGEMENT

*Using Interruptions to Identify Task Prioritization in Part 121 Air Carrier Operations* .................. 871

*Automation and Situation Awareness: The Accident at Cali, Columbia* ........................................... 877
Mica Endsley, Massachusetts Institute of Technology
B. Strauch

*Perspective Primary Flight Displays in the 4D ATM Environment* ........................................... 882
Eddie L. Flohr, Leiden University, Department of Experimental and Theoretical Psychology
H. Huisman

*Expanding the Functionality of Existing Airframe Systems Monitors: The Agenda Manager* ................ 887
Kenneth H. Funk II, Oregon State University
R. Braune

FREE FLIGHT

*Experimental Investigations of Pilot Workload in Free Flight* ........................................... 893
Diana Avans, University of Minnesota, Human Factors Research Laboratory
K. Smith

*Free Flight in the Terminal Area: Where Real Capacity Improvements Can Be Made* ................ 900
Bill Corwin, Honeywell Technology Center

*Free Flight and Air Traffic Controller Mental Workload* ........................................... 906
Brian G. Hilburn, NLR
GROUND OPERATIONS

The Human Factors of Runway Incursions Caused by “Pilot Error”: A Survey of U.S. Airline Pilots .............................................. 911
David R. Kelley, MITRE Corporation
G. Adam

On the Job Training of CRM Principals on the Ramp: One Airline’s Early Experiences .......................................................... 918
Steven C. Predmore, Delta Air Lines
V. Mancuso, T. Johnson

HUMAN ERROR

Reducing the Impact of Human Error on the World-Wide Aviation System ................................................................. 922
James Reason, University of Manchester

HUMAN PERFORMANCE

IN EXTREME ENVIRONMENTS

A Preliminary Systems and Human Factors Analysis of the 1996 Mount Everest Disaster .................................................. 928
Dwight A. Holland, University of Virginia, School of Medicine

Human Performance During Spaceflight .................................................. 929
Dietrich Manzey, German Aerospace Research Establishment
B. Lorenz

The Society for Human Performance in Extreme Environments ................................................................. 936
M. Ephimia Morphew, Johnson Space Center Medical Operations Branch

Psychobiological Antecedents of Panic in Scuba Diving .................................................. 938
John S. Raglin, Indiana University

Human and Team Performance in Environmental Extremes: Antarctica .................................................. 942
Jack Stuster, Anacapa Sciences, Inc

Patrick R. Veillette, Montana Smokejumpers

MODELING

Adapting Human Performance Modeling for use in Crew Systems Design Process .................................................. 953
Holly S. Bautsch, Logicon Technical Services Inc.
M. McNeese

On the Types of Modes in Human-Machine Interactions .................................................. 959
Asaf Degani, San Jose State University

Models, Methods, and Metrics: A Structured Approach for the Evaluation and Redesign of Autoflight System Interfaces .................................................. 965
Michael T. Palmer, NASA Langley Research Center
C. Mitchell

Assessing Mental Model Content and Function: A Metric of Effective Crew Performance .................................................. 971
Megan M. Thompson, Defence & Civil Institute of Environmental Medicine
D. Jamieson, K. Hendy
INCIDENT ANALYSIS

What ASRS Data Tell About Inadequate Flight Crew Monitoring ................................................................. 977
Robert Sumwalt, Battelle’s Aviation Safety Reporting System Program Office
R. Morrison, A. Watson, E. Taube

INCIDENT REPORTING SYSTEMS

New Approach to Systematically Understanding of Operational Misuse: The Aircrew Incident Reporting System (AIRS) ................................................................. 984
Matthias Schmidlin, Airbus Industrie
J. J. Speyer

MAINTENANCE HUMAN FACTORS

Reactive and Proactive Methods for Human Factors Studies in Aviation Maintenance .............................................. 991
Monica Bacchi, European Commission Joint Research Centre
P. C. Cacciabue, S. L. O’Connor

Operational Interventions to Maintenance Error ..................................................................................................... 997
Barbara G. Kanki, NASA Ames Research Center
D. Walter, V. Dutschinos

Maintenance Resource Management (MRM) Training and Crew Resource Management (CRM) Training:
Analysis, Prescriptions and Proscriptions .............................................................................................................. 1003
Ronald J. Lofaro, FAA

A Preliminary Taxonomy For Human Error Analysis In Civil Aircraft Maintenance Operations .................... 1008
Sarah O’Connor, Defence Evaluation and Research Agency
M. Bacchi

An Integrated Approach to Maintenance Human Fact .............................................................................................. 1014
William L. Rankin, Boeing
J. Allen, R. Sargent, R. C. Graeber

Empirical Results of Maintenance Resource Management Training for Aviation Maintenance Technicians .... 1020
James C. Taylor, University of Southern California
M. Robertson, S. Choi

Human Factors in Aviation Maintenance - Eight Years of Evolving R&D ......................................................... 1026
William T. Shepherd, Federal Aviation Administration, Office of Aviation Medicine
W. Johnson

ORGANIZATIONAL ISSUES

A Safe Culture or Safety Culture? ......................................................................................................................... 1029
Graham R. Braithwaite, The University of New South Wales

Organizational Factors in Aviation Accidents ......................................................................................................... 1033
Anthony Ciavarella, School of Aviation Safety, Naval Postgraduate School
R. Figlock

Adding Value - Customer Perceptions of Safety Culture ......................................................................................... 1039
Angela Dahlberg, Dahlberg & Associates

Opening Pandora’s Box: Implementing a Proactive Airline Safety Program ....................................................... 1045
Graham Edkins, Bureau of Air Safety Investigation
PERFORMANCE ASSESSMENT

Combining Information: The Evaluation of Pilot Performance ................................................................. 1051
Elise L. Amel, State University of New York - Oswego
B. Wulle

Development of Behaviorally-Anchored Scales for Rating Commuter Pilot Job Performance ......................... 1055
William J. Bramble, Jr., University of Central Florida

The Development of the Aviation Test of Performance Strategies (ATOPS): A Method of Measuring Performance Enhancement ............................................................................................................. 1062
Steven C. Caberto, USAF/Armstrong Laboratory
T. Lombard, J. Callister, P. Retzlaff, G. Pauchman
Flight Crew Performance in Standard and Advanced Technology Aircraft ...................................................... 1066
William E. Hines, The University of Texas

A New Device for Monitoring Performance and Environmental Factors in the Field: Possible Applications in Aviation Research ......................................................................................................................... 1073
Harris R. Lieberman, US Army Research Institute of Environmental Medicine

Some Benefits and Pitfalls of Qualitative Investigation as Conducted in the ‘Real-World’ of Aircrew Work .......... 1076
Iain S. MacLeod, Aerosystems International

Experimental Studies of Pilot Performance at Collision Avoidance During Closely Spaced Parallel Approaches ..... 1083
Amy R. Pritchett, Georgia Institute of Technology
R. Hansman

Evaluation of Pilot Performance Using Conventional Electromechanical and Electronic Aircraft Engine Monitoring Displays .................................................................................................................. 1089
Alan F. Stokes, Florida Institute of Technology
J. Downs, J. Pharmer, M. Bohan

Problems in Formulating an Automatic Rating Technique (ART) for Measured Flying Quality Ratings ............. 1094
Charles Suchomel, USAF, Flight Dynamics Directorate

PERSONALITY FACTORS

The Myth of a Pilot Personality and the Need for Accurate Personality Assessment .............................................. 1100
Joseph D. Callister, Armstrong Laboratory
R. King, P. Retzlaff

Personality Variables and Simulator Performance in the Prediction of Flight Training Performance ...................... 1105
Walter Davis, Georgia Institute of Technology
J. Koonce, D. Herold, D. Fedor, C. Parsons

Behavior-Orientated Assessment of Interpersonal Skills in Pilot Selection Concepts, Methods, and Empirical Findings .................................................................................................................................................. 1110
Hans-Juergen Hörmann, German Aerospace Research Establishment
D. Manzey, P. Maschke, Y. Pecena

The Aircrew Behavioral Compass: A Descriptive Model for Categorizing and Understanding the Personal Behavioral Styles of Pilots ................................................................................................. 1116
Marvin Karlins, University of South Florida
F. Koh, L. McCully, C.T. Chan

PHYSIOLOGICAL FACTORS

The Effect of Moderate Levels of Simulated Altitude on Sustained Cognitive Performance ................................. 1120
C.J. Bartholomew, University of North Dakota

Measurement and Evaluation Issues in Determining Intervals for Aerospace Physiology Refresher Training ............... 1123
Winston Bennett, Armstrong Laboratory Human Resources Directorate
W.J. Phalen, J. Buchhorn, K. Zukor

Advanced Spatial Disorientation Demonstrator “TROOP TRIAL” Results -- SD Illusions .............................................. 1131
William R. Ercoline, Systems Research Laboratories
D. Yauch, S. Holoviak

The Effects of Alcohol on Pilot Performance ................................................. 1137
Valerie J. Gawron, Calspan SRL Corporation
The USAF Advanced Spatial Disorientation Demonstrator -- A Framework for Future Spatial Orientation Training ............................................. 1143
Samuel J. Holoviak, USAF - School of Aerospace Medicine
D.W. Yauch, F. H. Previc, W.R. Ercoline

The Identification of Stressors Experienced By Pilots of a Leading South-African .................................................. 1149
R. Marais, University of Pretoria
H.E. Brand, S.W. Theron

A Snapshot of the Relationship Between Gender and Deployment Status on Perceived Mental and Physical Health in USAF Aviators .................................................. 1154
Tamara Nuebauer Lombard, USAFAeromedical Consultation Service, Armstrong Laboratory
S. Caberto, D. Neubauer Lombard, S. Chao

Advanced Spatial Disorientation Demonstrator -- Component, Profile, and Training Evaluation .................................. 1160
David W. Yauch, Armstrong Laboratory
W. Ercoline, S. Holoviak

PILOT EDUCATION

Developing Self-Awareness and Self-Directed Learning Skills Through the Use of Reflective Journals .............................. 1166
Prue Anderson, Univ. of Western Sydney, Macarthur
I. Henley

Developing Scenario Event Sets for LOE: A Data-Driven Approach ................................................................. 1172
David P. Baker, University of Central Florida
T. Chidester, M. Brannick

From PCs to Flight Simulators Cost Effective Aircrew Training Devices for Aeronautical Decision Making and Crew Resource Management .................................................. 1178
Sarah Barber, The Ohio State University

Training For New Technology - Practical Perspectives .................................................................................. 1184
John Bent, Cathay Pacific Airways

CADS as a Tool For Improved Loft Evaluator Effectiveness at US Airways .............................................................. 1190
Jim Blanchard, Embry-Riddle Aeronautical University
L.G. Nemeth

Development and Evaluation of a Human Factors Training Program for Pilot Instructors ........................................ 1194
Norman Dowd, Transport Canada
S. Trollip, N. Hamilton, L. DeBliquey, R. Telfer

PC Computer-Based Aviation Training Devices, Curriculum Development, and Student Affect ......................... 1198
Tom W. Emanuel, Jr., University of Illinois

Clueless in the Cockpit: Situation Awareness of Instrument Flight Students
Donna Forsyth Wilt, Florida Institute of Technology

THE ATM SYSTEM

THE FUTURE

Cognitive Complexity in Management by Exception
Sidney W.A. Dekker, The Ohio State University
D. Woods

Communication Technologies and Procedures in Support of Future Air Traffic Management (ATM) Operations
Nadine B. Sarter, University of Illinois - Institute of Aviation

Can Automation Enable a Cooperative Future ATM System?
Philip J. Smith, The Ohio State University
C. Billings, D. Woods, C.E. McCoy, N. Sarter, R. Denning, S. Dekker

THE PRESENT

Design Issues in the Present ATM System
Rebecca Denning, The Ohio State University
C. Elaine McCoy, P. Smith, D. Woods, C. Billings, S. Dedder, N. Sarter

Impact Analysis of New Air Traffic Management System Designs
Andrew R. Lacher, MITRE Corporation
D. Mooch-Mooney

A Summary of Human Factors Issues and Recommendations Drived from a Knowledge Elicitation Study Regarding the Design of a More Flexible ATM System Based on the Expanded National Route Program
C. Elaine McCoy, Ohio University Department of Aviation
P. Smith, D. Woods, C. Billings, N. Sarter, R. Denning, S. Dekker

Managing Irregular Operations in a Free Flight Environment
Judith Orasanu, NASA-Ames Research Center
J. Davison, M. Rodvold, P. Smith, C. E. McCoy, T. Owsley, R. Bullingtoon, L. France

TRAINING

Improving Airport Security Checkpoint Effectiveness Through Supervisor Training
Gerald D. Gibb, Embry-Riddle Aeronautical University
C. Wabiszewski

VISUAL PERCEPTION

The Discrimination Between Compressed and Non-Compressed Pictures: Validation of a Vision Model .................................. 1513
Michael S. Brickner, Pamam-Human Factors Engineering Ltd.
J. Silbiger, J. Lubin

Using 'Invisible Stimuli' to Provide a Warning of Inappropriate Visual (OCULAR) Accommodation Responses
With Head-up Displays (HUDS) .................................................................................................................. 1519
Graham K. Edgar, British Aerospace
J. Wolffsohn, N. McBrien

Depth Perception: A Possible Role for Pictorial Information in Aviation .................................................. 1525
Anthony H. Reinhardt-Rutland, University of Ulster

The Effects of Random Linear Target Direction in a Computerized Dynamic Visual Acuity Task ................... 1530
Joseph P. Shevlin, U.S. Military Academy
A. Prestrude, K. Shevlin

WORKLOAD

Reliability of Autonomic Components for Cardiovascular Assessment of Mental Workload in Flight Simulation ........... 1536
Richard W. Backs, Central Michigan University
J. Lenneman, and J. Sicard

PC-Based Brain Actuated Control ......................................................... 1543
Matthew S. Middendorf, Middendorf Scientific Services
D. Ingle, G. Calhoun, G. McMillan

Assessing Individual Differences in Decision Making Styles and Preferences for Mental Workload Levels .................. 1549
Thomas E. Nygren, The Ohio State University

Aging and Workload on Monitoring of Automation Failures in Flight Simulated Tasks .................................. 1556
Dennis A. Vincenzi, University of Central Florida
M. Mouloua, B. Muldoon, D. Hardy, R. Parasuraman

EEG Desynchronization and Synchronization as Measures of Mental Workload in a Multi-Task Environment ........... 1562
Glenn F. Wilson, Armstrong Laboratory, Wright Patterson AFB
L. Fournier, C. Swain

LIST OF PARTICIPANTS .......................................................................................................................... 1568

9th SYMPOSIUM REPRESENTATION LIST ......................................................................................... 1595

AUTHOR INDEX ............................................................................................................................... 1599
