Diffusion in Some Intermetallic Compounds ................................................. 1,405
H. Mehrer

Effect of Lamellar Structure on Creep Properties of Ti-48 at% Al Alloy ............ 1,415
T. Nozaki, K. Araki, M. Takeyama, and T. Matsuo

Creep Deformation in Gamma TiAl Alloys with Lamellar Structures ................. 1,423
T.G. Nieh, J.N. Wang, and L.M. Hsiung

Fatigue Behavior and Deformation Substructure of Ti3Al Single Crystals
Deformed at High Temperatures ................................................................. 1,433
Y. Umakoshi, K. Koizumi, and T. Nakano

Deformation Characteristics of Ni3Al Intermetallic Compound by Acoustic
Emission Method ........................................................................................... 1,441
K. Yoshida, H. Takagi, and K. Sakamaki

The Effect of Ru on Microstructure of TMP Treated Gamma Titanium
Aluminide ........................................................................................................ 1,449
Z. Chen and Y. Wang

High Temperature Tensile Behavior of MA Al-Ti Alloys at High Strain-Rate ...... 1,457
L.-W. Yang and P.-W. Kao

Stress and Temperature Dependence of Creep Rate in γ-TiAl Single Phase
Alloy ............................................................................................................... 1,465
T. Matsuo, O. Takahashi, and M. Takeyama

Improvement in Mechanical Properties and High-Temperature Oxidation
Resistance of Ti-Al Compounds by Aluminizing ........................................... 1,473
S. Kim, D. Paik, I. Kim, H. Kim, and K. Park

A Mechanistic Study of Multi-Step Working in Gamma TiAl Alloys ................. 1,481
D.A. Hardwick

Decomposition of High-Temperature α Phase in Gamma TiAl Based Alloy ........ 1,489
M. Takeyama, T. Horikoshi, Y. Ohmura, and T. Matsuo

Effect of Al5Ti3-Type Ordering on Plastic Behavior of Al-Rich TiAl Single
Crystals ............................................................................................................ 1,497
T. Nakano, T. Seno, K. Hayashi, and Y. Umakoshi
The Effect of Hydrogen on Microstructure and Superplastic Deformation of Ti$_3$Al Intermetallic

H. Ding, Y.H. Du, G.M. Ku, L. Dong, C.B. Zhang, and J.Z. Cui

Microstructures of Pyramidal Slip Dislocations in Ti$_3$Al Single Crystals Compressed Along the C Axis

Y. Minonishi

Microstructure Formation of Cold Rolled and Two Step Aged Ti-15V-3Cr-3Sn-3Al Alloy

T. Makino and S. Matsuda

Atomic Order and Site Occupancy in Intermetallics Containing Alloying Additions

C.J. Rossouw, P.R. Miller, M.A. Gibson, and C.T. Forwood

Dynamic Recrystallization, Ductility and Resulting Fracture Toughness of the Cubic Titanium Trialuminide Intermetallics

R.A. Varin and L. Zbroniecz

Diffusion Mechanisms in Some Ni-Based Intermetallic Compounds

T. Ikeda, H. Numakura, and M. Koiwa

MA-Induced SHS and Shock Reactive Synthesis of Mo and Ti Silicides

T. Aizawa, B.K. Yen, and J. Kihara

Effects of Stress and Temperature on Lamellar Spacing Dependent Creep Strength of Fully Lamellar TiAl Alloys

R. Yamamoto and K. Maruyama

Mechanical and Thermodynamic Properties of the Ir-Nb-Zr Intermetallic System

C.A. Freitas and J.M. Sanchez

Effect of Rare Earth Additions on the Microstructure of TiAl Alloys

C. Liu, W. Li, X. Wu, and K. Xia

High Temperature Strength and Ambient Temperature Fracture Toughness of Nb$_3$Al/Nb$_{55}$ In-Situ Composites

S. Hanada, T. Tabaru, E. Miura, R. Gnanamoorthy, and Y. Murayama

Creep Behavior of Fe-Doped NiAl Intermetallics

K. Isshiki, Y. Takaki, K. Oh-Ishi, Z. Horita, M. Nemoto, and T.G. Langdon

Effects of Microstructure on Deformation Mechanisms in Two-Phase Titanium Aluminides

H.L. Fraser and M.H. Loretto
Nano-Scale Microstructural Changes and Their Thermal Stability in a Hot-Deformed Dual-Phase TiAl Alloy ................................................................. 1,605
