Proceedings of the

2nd International Modal Analysis Conference & Exhibit

February 6-9, 1984
Holiday Inn, International Drive
Orlando, Florida

DIRECTORS:
Peter B. Juhl, Director
Dominick J. DeMichele, Director

UNION COLLEGE
Aaron Feinsot, Dean, Graduate and Continuing Studies
Rae D'Amelio, Administrator

Sponsored by:
Union College
Schenectady, New York 12308
# Table of Contents

## Volume I

### General Session

**Keynote Address "Who Needs IMAC?"** ......................................................... xi  
M. H. Richardson

### Technical Program

#### Session 1. Experimental Case Histories I

- **Modal Testing of a Large Test Facility for Space Shuttle Payloads** .................. 1  
  J. M. Haughton, D. C. Talapatra

- **A Technique for Modal Data Acquisition in Remote Locations Using Hand Portable Instrumentation** .......................... 8  
  B. W. Van Hoy, W. D. Strunk

- **Prediction of Vibration Levels on MCPO1 Platform by Means of the Compliance Method and Using Only Experimental Data** ........................ 15  
  P. Vanhonacker

#### Session 2. Analytical Methods I

- **Longitudinal Vibrations of Rods of Finite Length with Radial Deformation** ............. 20  
  J. J. Wu, W. H. Chen

- **Application of the Component Synthesis with Least Square Method to Achieve the Desired Frequencies and Mode Shapes** .......................... 28  
  G. Tsai, J. A. Palladino

- **Data Dependent Systems Approach to Modal Parameter Identification** .................. 35  
  S. M. Pandit, N. P. Mehta

- **Determination of the Material Constants of an Anisotropic Lamina by Free Vibration Analysis** .......................... 44  
  W. P. De Wilde, H. Sol, B. Narmon, M. Roovers

#### Session 3. Structural Dynamics Modification I

- **Analytical and Geometric Substructuring Via Dual Modal Space Structural Modification** .................... 50  
  Y. W. Luk, L. D. Mitchell

- **Direct Structural Modification Using Frequency Response Functions** .................. 58  
  J. R. Crowley, A. L. Klosterman, G. T. Rocklin, H. Vold

- **Experimental-Theoretical Study of Modal-Space Control** .......................... 66  
  G. R. Skidmore, W. L. Hallauer, Jr., R. N. Gehling

- **EDASP: Structural Modification Program** .......................... 75  
  W. Djordjevic, S. Anagnostis, T. M. Tseng

#### Session 4. Linking Analysis and Test I

- **Selection of Measurement and Parameter Uncertainties for Finite Element Model Revision** .................... 82  
  W. B. Walton, K. D. Blakely

- **Statistical Identification of the Dynamic Parameters of an Astromast from Finite Element and Test Results Using Bayesian Sensitivity Analysis** .......................... 89  

- **Optimal Identification of Vibrating Structures** ........................................... 96  
  K. Vepa

- **Using Experimental Modal Analysis to Characterize Automobile Body Joints and Improve Finite Element Analysis** ........................................... 106  
  M. R. Good, D. J. Macioce
SESSION 5. PROCESSING MODAL DATA I

Applications of the Poly Reference Technique in Experimental Modal Analysis .......................... 111
R. J. Allemang, S. M. Crowley

The Rotating Vector Method for Decoupling of Beating Signatures in Modal Analysis .................. 118
C. S. Li, M. H. Chen

The Practical Use of the Polyreference Modal Parameter Estimation Method .......................... 126
D. L. Hunt, G. T. Rocklin, J. R. Crowley, H. Vold

SESSION 6. SEISMIC TOPICS

Seismic Qualification of Equipment Through Experimental Modal Analysis and Finite Element Analysis ...................................................... 134
J. H. Bond, S. A. Lehrman

Modal Test of a Concrete Gravity Dam .................................................. 142
P. F. Mlakar, V. P. Chiarito

Dynamic Analysis of a Coupled Large Piping/Small Piping System with Closely Spaced Modes ........ 149
C. W. Lin, T. C. Esselman

Modal Synthesis of Two Substructures with Soil-Structure Interaction for Seismic Loads ................. 157
P. R. Millarke, S. C. Cheng

SESSION 7. MODAL TEST METHODS I

DSCS Multi-Shaker Sine Modal Testing .................................................. 163
R. Spykerman, R. Winslow, C. Stahle

Single and Multiple Input Modal Analysis. A Comparison of Averaging Techniques and Results .......... 172
C. Van Karsen, R. J. Allemang

A Multi Channel Modal Analysis System .................................................. 179
M. A. Clifton, J. M. Keller, D. S. Hanna

Normal Mode Testing Using Multiple Exciters Under Digital Control ...................................... 185
B. S. Gabri

A Flexible Multichannel Measurement System for Dynamic Analysis ....................................... 194
H. Van der Auweraer, P. Van Herck, R. Snoeys

SESSION 8. TOPICS IN STRUCTURAL DAMPING

Modal Analysis of Plates with Partial Constrained-Layer Damping Treatments .......................... 201
K. K. Stevens, R. A. Bhat

Fourier Analysis of Non-Linear Structural Response .................................................. 208
T. J. Lagnese, D. J. Koester

Prediction of Damping for Flexible Spacecraft Appendages .................................................. 218
M. L. Soni

Design of Damped Structures Using Modal Analysis .................................................. 223
M. Thomas, R. Elmaraghy

SESSION 9. MODAL TECHNIQUES FOR ROTATING EQUIPMENT

Stability Analysis of Turbomachinery Using Constrained Modal Analysis .................................. 228
E. J. Gunter, R. R. Humphris, H. Springer

Factors Affecting the Modal Frequencies of Reactor Coolant Pumps ...................................... 239
A. P. Villasor, Jr., G. A. Villasor

Experimental and Analytical Modeling of a Machine Tool Spindle Using Component Mode Synthesis .... 246
D. R. Houser, R. Comparin
SESSION 9. MODAL TECHNIQUES FOR ROTATING EQUIPMENT (CONT.)

The Dynamic Optimum Design for the Wheel Head of a Cylindrical Grinding Machine ............... 254
W. Zheng

Exact Point Speed Method for Balancing of Non-Linear Rotors .............................................. 259
A. El Khatib, S. S. Al Annaz

SESSION 10. EXPERIMENTAL CASE HISTORIES II

The Identification and Solution of a Jet Engine Vibration Problem Using Digital Dynamic Analysis Techniques .......................................................... 267
M. P. Bouchard, M. L. Drake

Analysis and Attenuation of Disturbance Vibrations in Notched Bar Impact Testing .................. 275
X. Q. Dong

An Application of Modal Analysis for Evaluating the Effectiveness of Constrained Layered Damping Composite ......................................................... 280
S. Rajesham, V. C. Venkatesh

SESSION 11. ANALYTICAL METHODS II

Dynamic Response of Spur Gear Teeth ......................................................................................... 286
G. L. Ostiguy, I. Constantinescu

Analysis of Grand Coulee Pumping Plant Discharge Pipe Vibrations ........................................ 292
R. V. Todd

Finite Element Analysis with a Personal Computer ...................................................................... 298
M. S. Darlow, E. C. Willstaedt

Application of Modal Analysis to the Design of a Large Fan-Foundation System .................... 304
S. C. Ulm

Mathematical Model of Machine Tool Dynamics Via State Space Vector Methodology ............ 311
Z. Peng, G. Wang

Analytical Method of Modal Testing of Large Power Foundation .............................................. 317
G. Li

SESSION 12. ANALYTICAL METHODS III

A General Algorithm for Decoupling Equations of Motion Using Non-Orthogonal Measured Modes ...... 324
F. H. Chu, C. F. Chao

Linking of Modal and Finite Elements in Structural Vibration Analysis ..................................... 330
O. Friberg, R. Karlsson, B. Akesson

Modal Analysis in Non-Conservative Dynamic Systems .............................................................. 340
D. J. Inman, M. Ahmadian

Nonlinear Dynamic Response of a Spacecraft Appendage by Modal Analysis .......................... 345
J. H. Leete

A Mathematical Expression of Random Decrement Technique ............................................... 355
Z. Q. Tang, Z. H. Zhang

Mechanics of a Cameroonian Xylophone Using Euler-Helmholtz Approximations ............... 362
J. Njock Libii

SESSION 13. MODAL TEST METHODS II

The Dynamic Analysis of a Space Lattice Structure Via the Use of Step Relaxation Testing .......... 368
G. F. Mutch, F. Vigneron, H. Vold

Feasibility of Impact Technique for Studying Nonlinear Systems .......................................... 378
S. K. Tamhane

SESSION 18. ANALYTICAL METHODS V

Three Dimensional Aeroelastic Stability of a Bundle of Two Conductors .............................. 512
Y. T. Tsui

Nonlinear Vibration Analysis of Stack-Like Structures by the Perturbation Method .................. 518
I. C. Chang

Non-Linear System Simulation by the Modal Method ............................................................. 528
H. Ito, E. Kobayashi, S. Murai

Cable Element Models for Dynamic Analysis ................................................................. 535
M. L. Gambhir, B. deV Batchelor

Modelling of Spatial Mechanisms' Plain Analogues and Their Analysis and Designing Using Machine Graphics ................................................................. 540
J. M. Uplisashvili

SESSION 19. MODAL TEST METHODS III

Measurement of Rigid Body Modes for Dynamic Design ....................................................... 545
N. Okubo, T. Furukawa

Design of a Large Space Structure Vibration Control Experiment ........................................ 550
F. M. Ham, J. W. Shipley, D. C. Hyland

Modal Analysis Using the Time Series Analysis Method (AR or ARMA Model) and Its Computer Program Design ................................................................. 559
Z. Q. Tang, Y. Qiu

Summary of Excitation Signals for Structural Testing ......................................................... 566
R. Rost, M. Good

SESSION 20. LINKING ANALYSIS & TEST III

Life Time Prediction Based on the Combined Use of Finite Element and Modal Analysis Data ........ 572
E. Verdonck, R. Snoeys

Comparison of Modal Analysis, Energy Methods, and Finite Element Analysis for Estimation of Natural Frequencies ................................................................. 580
L. L. Blakely

Development of Mass and Stiffness Matrices for an Analytical Model Using Experimental Modal Data ................................................................. 585
J. C. O'Callahan, R. Leung, P. Avitabile

Modification of Finite Element Models Using Experimental Modal Analysis ................................ 593
B. J. Dobson

SESSION 21. PROCESSING MODAL DATA III

Bispectral Identification of Nonlinear Mode Interactions ..................................................... 602

K. E. Smith

Computer Graphics for Modal Character .............................................................................. 616
L. S. Yu

SESSION 22. STRAIN GAUGES IN MODAL TESTING

Verification of Modal Testing and Analysis Techniques for Predictions of Dynamic Strain in Impact Loaded Structures ................................................................. 620
J. M. Komrower, M. P. Pakstys
SESSION 22. STRAIN GAUGES IN MODAL TESTING (CONT.)

The Use of Strain Gauges in Force Determination and Frequency Response Function Measurements ...
B. Hillary, D. J. Ewins

Acoustic Test Response Analysis of the Space Shuttle Orbiter Body Flap .......................... 635
J. S. Cheng, M. Dunham, J. C. Joanides

Finite Element Model Adjustment Using Experimental Vibration Data .......................... 638
H. Berger, J. P. Chaquin, R. Ohayon

SESSION 23. EXPERIMENTAL CASE HISTORIES IV

The Analysis of Dynamic Behaviors of a Computer Disk Unit ...................................... 643
N. Okubo, K. Yokoki, M. Kasuga, T. Koizumi, Y. Sato

Modal Analysis of a Production-Mill Stand ......................................................... 648
E. A. Unver

Advanced Composite Damage Detection Using Modal Analysis Techniques .................. 655
J. J. Tracy, D. J. Dimas, G. C. Pardoan

A Modal Survey Test Facility for Shuttle Payloads .................................................. 661
N. W. Smith

SESSION 24. ANALYTICAL METHODS VI

A Quadratic Reduction Method for Eigenvalue Problems ........................................ 667
T. C. Cheu, C. P. Johnson, R. R. Craig, Jr.

A General Superelement Approach by the Component Mode Synthesis Method ............. 676
C. F. Shu, F. H. Chu

Reduced Component Modes in a Damped System .................................................. 683
K. H. Ghlaaim, K. F. Martin

Changes in Modal Parameters Resulting from Small Cracks ...................................... 690
P. Gudmundson

A Matrix Perturbation of Vibration Modal Analysis ................................................ 698
S. H. Chen, Y. L. Liu, D. P. Huang

The Impedance Matrix in Finite Dynamic Element Method for Free Vibration Analysis .. 705
L. Zhao, J. Chen

SESSION 25. MODAL TEST METHODS IV

Multiple Input Estimation of Frequency Response Functions ........................................ 710
R. J. Allemang, R. W. Rost, D. L. Brown

Application of Multi-Point Random Excitation and Polyreference Analysis to a Centrifugal Blower . 720
G. L. Nessler, J. R. Crowley, A. J. Wolfer, H. Void

Modal Synthesis: A Performing Way of Using Modal Analysis ..................................... 728
D. Bonnecase, J. Roumagoux

Impact Testing Considerations ................................................................. 735
D. A. Corelli, D. L. Brown

Design, Construction and Performance of an Inertia-Mass Modal Test Facility ............. 743
C. Voorhees, G. Clark

A Study of the Vibration Measurement Method Using Unequalized Random Excitation .... 748
H. Li, Z. Tong, Y. Cheng, Y. Sun

SESSION 26. LINKING ANALYSIS AND TEST IV

Correlation of Finite Element and Modal Test Studies of a Practical Structure .......... 756
D. J. Ewins, J. Sidhu
SESSION 26. LINKING ANALYSIS AND TEST IV (CONT.)

Modal/Structural Analysis of NOVA Laser Structures ........................................... 763
H. J. Weaver, J. W. Pastelnak, D. E. Fields

Design Optimalisation of Dynamical Structures by the Combined Use of Modal Analysis (M.A.) and the Finite Element Method (F.E.M.) ........................................... 769
W. P. De Wilde, H. Sol, R. Snoeys, E. Verdonck

SESSION 27. ACOUSTIC TOPICS I

Noise Control and Modal Analysis: A Survey .................................................. 776
R. J. Bernhard

Modal Analysis of a Gear Housing Plate Using Acoustic Intensity Measurements ................ 784
R. Singh, G. J. Zaremsky, D. R. Houser

Investigation of the Sound Radiation Mechanism from the Shell of Hermetic Refrigerant Compressors .. 791
M. Waser, J. F. Hamilton

SESSION 28. MODAL TESTING OF THE GALILEO SPACECRAFT

Galileo Modal Test and Pre-Test Analysis .................................................. 796
J. C. Chen, M. Trubert

Data Acquisition and Analysis System for the Galileo Spacecraft Modal Survey .................. 803
H. P. Bausch, R. C. Stroud

Galileo Modal Tests/Multiple Sine Dwell .................................................. 809
M. Trubert

Advanced Methods Used on the Galileo Spacecraft Modal Survey .................................. 813

Comparison of Various Modal Analysis Test Results ........................................... 820
J. C. Chen

SESSION 29. GENERAL SESSION

SESSION 30. ANALYTICAL METHODS VII

A New Method for Nonlinear Dynamic Analysis of Composite Skew Plates ..................... 825
M. Sathyamoorthy

The Role of Eigenvectors In Practical Modalized-Observer Design ................................ 830
E. Y. Shapiro, J. C. Chung. A. N. Andry, Jr.

Frequency and Response Analysis of Structural, Mechanical and Robotic Systems Using Spatial Irregular Finite Line Element, Mode Uncoupling and Matrix Exponential Methods ..................... 836
C. Bagci

Extension of Modal Analysis to Nonlinear Structure by Using Hilbert Transform ................ 852
T. Vinh, A. Haoui, Y. Chevalier

The Method of Mode Synthesis with Complex Mode Substructures ............................. 858
J. Qin

Discussion on Some Problems of Parametric Identification .................................... 865
L. C. Lin, J. M. Tung

SESSION 31. MODAL TEST METHODS V

A Method of Designing Stingers for use in Mobility Testing .................................. 872
L. D. Mitchell, K. B. Elliott

An Estimation Method for Rotational Degrees of Freedom Using A Mass Additive Technique ........ 877
D. L. Brown, R. J. Alleman, P. J. Riehle, C. Yasuda
SESSION 31. MODAL TEST METHODS V (CONT.)

Modal Parameter Estimation Via Shaker Vs Speaker Excitation
H. J. Weaver, J. K. Dowdell

Excitation Functions for Structural Frequency Response Measurements
N. Olsen

Automatic Force Appropriation--A Review and Suggested Improvements
P. Ibanez, K. Blakely

The Dynamic Calibration of Electro-Magnetic Exciting Force for Rotating Surfaces
B. Xu, R. Ying, H. Cheng

SESSION 32. EXPERIMENTAL CASE HISTORIES V

Structural Dynamics Characteristics Using Impact Tests
B. B. Seth, N. L. Field

Solution of a Gimbal Line-of-Sight Stabilization Problem Utilizing Experimental Modal Analysis
E. J. Tanner, Jr., R. C. Varga

Trouble-Shooting in Power-Plant Piping Through Combined Test and Analysis
Z. Revesz, F. Ferroni

SESSION 33. STRUCTURAL DYNAMICS MODIFICATION II

Implementation of the Dual Modal Space Structural Modification Method
L. D. Mitchell, Y. W. Luk

Rotational Degrees-of-Freedom in Structural Modification
R. G. Smiley, B. A. Brinkman

REANALYSIS--A User-Oriented Computer Program for the Reanalysis of Structural Systems
F. H. Chu, D. Gross, B. P. Wang

Study of a Structural Modification Procedure with Three Dimensional Beam Elements Using a Local
Eigenvalue Modification Procedure
J. C. O'Callahan, C. M. Chou

Structural Modifications Using Finite Substructures
L. J. Petrick

Influence of Design Modifications on the Vibrational Characteristics of Plane Frame Structure
M. M. El Nomrossy

SESSION 34. ACOUSTIC TOPICS II

A Numerical Method for Computing the Sound Radiated by Vibrating Structures
B. Soenarko, A. F. Seybert

Identification of Energy Sources and Absorbers
G. Rasmussen, P. Rasmussen

Reduction of Suspension Spring Forces by a Modal Procedure
R. J. Bernhard, N. Gupta

The Determination of Correlation Between Structure Vibration and Radiated Noise by Modal Analysis
J. X. Huang

SESSION 35. PROCESSING MODAL DATA IV

A Method for the Derivation of Optimal Modal Parameters from Several Single-Point Excitation Tests
J. Kirshenboim, D. J. Ewins

On the Use of Constraint Equations in the Global Fitting Algorithms of Transfer Functions
L. I. Carrascosa, J. G. Gimenez
SESSION 35. PROCESSING MODAL DATA IV (CONT.)

A New Approach Modeling Complex Mechanical System and Estimating Modal Parameters ............ 1004
Z. Wang

Identifying the Structure Modal Parameters by Using Optimized-Iteration Method for the primary Value ................................................................. 1010
D. P. Huang, S. X. Yang, S. L. Wang

SESSION 36. ANALYTICAL METHODS VIII

J. R. Gartner

An Approximate Model for the Extensional and Flexural Vibrations of Elastic Plates .................. 1024
E. A. Unver, G. C. Gaunaud, A. Kalnins

Elements for the Modal Analysis of Symmetric and Non-Symmetric Transfer Matrix Structures ........ 1035
R. Bigret

Dynamic Couplings Between Mechanical System and Its Surroundings ........................................ 1043
K. S. Wang, S. T. Chu

Composite Modal Synthesis for Fluid-Structure Coupling Vibration ........................................ 1049
W. J. Yun, G. B. Duan

SESSION 37. EXPERIMENTAL CASE HISTORIES VI

The Effect of Suspension Method on Modal Tests of a Business Jet Aircraft .......................... 1056
D. C. Cone

Evaluation of Condensation Oscillation Loads Using Spectral Analysis Techniques .................. 1063
R. H. Adams, V. Kumar

An Efficient Scheme for Modal Analysis Applications ............................................................ 1071
M. Val, R. Elmaraghy

Application of Modal Analysis Techniques to the Resolution of Some Dynamic Problems in Railways .. 1075
J. G. Gimenez, L. I. Carrascosa

BIBLIOGRAPHIES

Experimental Modal Analysis Bibliography .......................................................... 1085
R. J. Allemang

Modal Analysis Bibliography--An Update--1980-1983 ..................................................... 1098
L. D. Mitchell, L. D. Mitchell

Author Index ............................................. 1115
