TRANSACTIONS OF THE 14th INTERNATIONAL CONFERENCE ON STRUCTURAL MECHANICS IN REACTOR TECHNOLOGY
Lyon, France, August 17-22, 1997

VOLUME 4
Division G
Fracture Mechanics

Coordinators
R. Gillot
YJ. Kim
G.M. Wilkowski

French Correspondent
S. Bhandari

Editor
Michel Livolant

The International Association for Structural Mechanics in Reactor Technology (IASMIRT) and Commissariat à l'Energie Atomique (CEA)
Electricité de France (EDF)
FRAMATOME
Institut National des Sciences Appliquées de Lyon (INSA)
# TABLE OF CONTENTS

**DIVISION G**: Fracture Mechanics

**G01/1** - Shallow-flaw fracture technology development ........................................ 1  
*Pennell W.E., McAfee W.J., Bryson J.W., Bass B.R.*

**G01/2** - Application of revised fracture toughness curves in pressure vessel integrity analysis ................................................................. 13  

**G01/3** - Effect of biaxial loading on fracture toughness .................................... 21  
*Brumovsky M., Lauerova D., Palyza J.*

**G01/4** - Pressurized thermoshock tests on model pressure vessels of VVER 440 RPV steel ................................................................. 29  
*Keinanen H., Talja H., Rintamaa R., Ahlstrand R., Nurkkala P., Karzov G.P., Timofeev B., Blumin A.*

**G02/1** - Pre-test results from the NESC spinning cylinder project .................. 37  
*Wintle J.B., Hurst R., Hemsworth B.*

**G02/2** - Benchmark studies on the treatment of residual stresses in fracture assessments of pressure vessels ............................................... 45  
*May K.A., Keim E., Bhandari S., Guichard D.*

**G02/3** - Constraint effects on fracture under primary and secondary loads ....... 53  
*Ainsworth R.A., Jackson A.D., Sanderson D.J., Hooton D.G., Sherry A.H.*

**G02/4** - Finite element analysis of warm pre-stressing of pressure vessel steel ...... 61  
*Fowler H., Smith D.J.*

**G02/5** - Parametric studies in the framework of RPV integrity assessment ...... 67  
*Liu X., Sievers J.*

**G03/2** - A new and simplified method for estimating residual stress in welded structures with complicated shape using inherent strain .................... 77  
*Mochizuki M., Hattori T., Hayashi M.*

**G03/3** - Effect of internal pressure on the tearing of a surface crack in a branch pipe submitted to out of plane bending ........................................ 85  
*Chapuliot S., Moulin D.*

**G03/4** - Fracture assessment of reactor outlet header of 500 MWe PHWR ...... 97  
*Bhasin V., Kushwaha H.S.*

**G03/5** - Modelling of surface cracks in piping tee junction ............................. 105  
*Chawla D.S., Bhate S.R., Kushwaha H.S.*

**G04/1** - Fatigue crack growth and penetration behavior in pipe subject to bending load ................................................................. 113  
*Ahn S.H., Hidaka A., Ando K.*
G04/2 - Crack shape changes with fatigue crack growth of carbon steels in high temperature water

Asada Y., Ando K., Kanno S., Urabe Y., Kikuchi M., Sanoh J.

G04/3 - Evaluation of J on a pipe subjected to mechanical and thermal loading

Papin M.H., Drubay B., Ignaccolo S., Michel B., Gilles Ph.

G04/4 - Elastic plastic fracture analysis of elliptical circumferential surface flaws in cylinders under pressure and bending

Barthelet B., Valeta M.P.

G04/5 - Evaluation of crack growth behavior for through-wall-cracked pipe subjected to cyclic loading with large-scale yielding-Consideration of intermediate stress ratio

Miura N., Kashima K., Miyazaki K., Kanno S.

G04/6 - Toughness trends under dynamic and cyclic loading on nuclear steels

Rudland D., Wilkowski G.M.

G05/2 - The new elastic plastic stress state method for calculating J integral

Heliot J., Benoit M.

G05/3 - FEM analysis of longitudinally cracked pipes and elbows

Malekian C., Gérad R., Meessen O.

G05/4 - Numerical and simplified analyses of large scale ductile tearing tests on cracked elbows

Gilles Ph., Bois C., Le Delliou P.

G05/5 - Fracture assessment of straight pipes and elbows with through-wall cracks : using R-6 method

Rastogi R., Bhasin V., Kushwaha H.S.

G05/6 - Limit load analysis of straight pipes and elbows with through wall cracks

Chattopadhyay J., Bhattacharya A., Dutta B.K., Kushwaha H.S.

G06/1 - Industrial 3D computation of cracked elbows

Martelet B., Ignaccolo S., Eymard I.

G06/2 - Fracture resistance of cracked duplex stainless steel elbows under bending with or without internal pressure

Sémété P., Le Delliou P., Ignaccolo S.

G06/3 - Comparisons of experimental and simplified method for instability on circumferentially cracked elbows

Papin M.H., Drubay B., Nedelec M., Horowitz H.

G06/4 - Development of simplified analysis procedure for cracks in elbows

Wilkowski G.M., Mohan R., Kilinski T.

G06/5 - Stress intensity factors for elbows with axial surface crack at crown

Viswanatha N., Bhat S.R., Kushwaha H.S.
G07/1 - Calculation of leak rates through pipes and slits
Chang K.S., Park I.K., Lee C.S., Choi J.T. ........................................ 243

G07/2 - Importance of pipe system interactions on leak rate and fracture
behavior for LBB ................................................................. 251
Ghadiali N., Olson R.J., Rahman S., Wilkowski G.M.

G07/3 - LBB (Leak-Before-Break) evaluation considering local and residual
compliance of the cracked piping system ..................................... 259
Yu Y.J., Kim Y.J.

G07/4 - Framatome experience on leak before break ........................................ 267
Franco Ch., Gilles Ph., Ensel C.

G07/5 - Study on LBB evaluation of main steam system piping in Tokai-II
power station ........................................................................... 277
Oritani N., Sakata K., Miyazaki K., Tsuda T., Eguchi F.

G07/6 - Universal fracture criterion in the LBB concept .............................. 285
Ziliukas A.

G08/1 - Strategy for fracture assessment of pipings in the ductile regime ...... 293
Keim E., Senski G., Wellein R., Kastner W.

G08/2 - Critical circumferential through wall cracks in straight pipes under
pressure and bending load regarding the relaxation by the local rotation of the
flawed section ........................................................................... 301
Bartholome G., Keim E., Senski G., Steinbuch R.H., Wellein R.

G08/3 - Leak-before-break assessments of pressurised components .......... 309
Sharples J.K., Gilles Ph., Wellein R., Buckthorpe P., Little G.

G08/4 - Applicability of leak-before-break concept to the pressure headers of
RBMK nuclear power plants ......................................................... 317
Sharples J.K., France C.C., Bougaenko S.E., Smirnov Yu., Arjaev A.

G08/5 - Development of modified piping evaluation diagram for LBB
application ................................................................................ 327
Kim Y.J., Huh N.S., Pyo C.R., Park S.D., Yang J.S.

G08/6 - Reliability oriented LBB concept for ASME Class 1 small diameter
pipings ...................................................................................... 335
Zdarek J., Pecinka L.

G09/1 - A new versatile materials irradiation facility ..................................... 341

G09/2 - Fracture toughness evaluation of a low upper-shelf weld metal from the
Midland reactor using the master curve .......................................... 349
McCabe D.E., Sokolov M.A., Nanstad R.K.

G09/4 - Response of neutron-irradiated RPV steels to thermal annealing ........ 357
Iskander S.K., Sokolov M.A., Nanstad R.K.
G09/5 - Experimental measurement of the near-tip strain field in Zr-2.5 Nb pressure tube material ................................. 365 Himbeault D.D., Ellis R.B.

G09/6 - Structural integrity analysis on irradiated Zircaloy-4 tubes ................. 373 Asta E., Cambiasso F.A., Balderrama J.J.

G10/1 - The AMES network and its reference laboratory ........................................ 381 Debarberis L., von Estorff U., Tjoa G.L., de Vries M., Horsten M.

G10/2 - Pre-test material characterisation of the NESC spinning cylinder ....... 389 Rintamaa R.H., Von Estorff U., Wintle J.

G10/3 - Plastic zones at fatigue crack tips and at notch tips ....................... 399 Taniuchi K.

G10/4 - Behavior of surface cracks in aged duplex stainless steel plates submitted to a bending load ........................................ 407 Chapuliot S., Moulin D., Mineau V.

G11/1 - Evaluating crack arrest fracture toughness from Charpy impact testing .......................................................... 415 Planman T., Wallin K., Rintamaa R.

G11/2 - Development of a computer program for the prediction of fracture resistance curves ........................................ 423 Chang Y.S., Seok C.S., Kim Y.J.

G11/3 - Fracture properties of carbon steel material for main primary heat transport system piping ........................................ 431 Singh P.K., Chattopadhyay J., Kushwaha H.S.

G11/4 - A new model for fracture toughness prediction .................................... 439 Karzov G.P., Margolin B.Z., Shvetsova V.A.

G11/5 - An estimation model for resistance of pressure vessel materials to fracture at different stages of service taking into account actual dimensions of the construction ........................................ 447 Pokrovsky V.V., Kaplunenko V.G., Troshchenko V.T., Bylley D.V., Sednev V.A.

G12/1 - Charpy impact properties of diffusion bonded joints of alumina dispersion strengthened copper to 316 stainless steel ................. 455 Nishi H., Muto Y., Eto M.

G12/2 - Brittle fracture analysis of primary nozzle of VVER 440 reactor pressure vessel ........................................................................ 463 Keinanen H., Talja H.

G12/3 - Study on the fracture behavior of bi-material made of A508 steel and incoloy 825 ................................................................. 471 Kikuchi M., Sasamoto H.

G12/4 - Justification of J-integral calculations in the case of bimetallic junctions. 479 Wadier Y., Martelet B., Cambefort P.
G12/5 - Deformation and fracture of the metal of a dissimilar steels weld under conditions of complex stress state and elevated temperatures ................................................. 487
Giginyak F.F., Lebedev A.A.

G13/1 - The use of failure assessment diagrams for prediction of the initiation of creep crack growth................................................................. 495
Hooton D.G., Green D., Ainsworth R.A.

G13/2 - Creep fatigue crack growth on CT25 specimens in an 316L(N) stainless steel at 650°C ................................................................................. 503
Polvora J.P., Drubay B., Piques R., Laiarinandrasana L., Martelet B.

G13/3 - Evaluation of creep-fatigue crack growth in type 316L (N) steel ........ 511
Smith D.J., Curbishley I., Huthmann H.

G13/4 - Creep-fatigue crack growth assessment under combined mechanical and thermal loading with a simplified approach .................................. 517
Michel B., Poette C., Albaladejo S., Martelet B.

G13/5 - High temperature leak before break experimental studies of austenitic stainless steel centre cracked plates ....................................................... 525
Poussard C, Chapuliot S., Curtit F., Autrusson B.

G13/6 - Application of LBB concept to LMFR components .......................... 533
Turbat A., Deschanels H., Noe H., Faidy C.

GMW/1 - Probabilistic fracture mechanics analyses of nuclear pressure vessels and piping : a review of japanese activity ............................................. 541
Yagawa G., Yoshimura S.

GMW/2 - Simplified probabilistic approach to determine safety factors in deterministic flaw acceptance criteria ..................................................... 553
Barthelet B., Ardillon E.

GMW/3 - The assessment of partial safety factors for fast fracture analysis in power plant components ................................................................. 561
Heliot J., Meister E., Barthelet B.

GMW/6 - Fracture mechanics considerations concerning the revised IAEA-TECDOC-717 guidelines ................................................................. 571
Warnke E.P., Bounin D.

GMW/8 - Concept for flaw tolerance evaluation in pipings .......................... 579
Otremba F., Benitz K.

GMW/9 - An approach for reliability analysis of defected pipelines .......... 587
Lanza M., Lanzone C., Reale S., Servetto C.

GMW/10 - Determination of R/t limits for ASME Code Case N-494 FAD curve procedure .......................................................... 595
Mohan R., Wilkowski G.M., Bass B.R., Bloom J.M.

GMW/11 - Development of new Z-factors for the evaluation of a surface crack in nuclear pipings ................................................................. 603
Choi Y.H., Lee J.B., Wilkowski G.M.
GMW/13 - Crack propagation sensitivity index concept of engineering components and its practical use .................................................................611
Toth L.

GW/1 - Modelling of scatter and size effects in ductile and brittle fracture ......619
Pineau A.

GW/2 - Advances in the numerical simulation of ductile fracture ..................631
Leblond J.B., Devaux J.

GW/3 - Application of local approach methods for nuclear installations ..........643
Schmitt W., Keim E., Nagel G., Sun D.Z.

GW/4 - The application of local approach to fracture to the structural integrity assessment of cladded vessels under thermal loading .......................655
Moinereau D., Brochard J., Valeta M.P., Bhandari S., Guichard D., France C., Sanderson D.J., Sherry A.

GW/5 - Analysis of a cruciform bending specimen under biaxial loading ........665
Valeta M.P., Moinereau D., Bhandari S., Duplouy A.

GW/7 - On the simulation of ductile crack growth using the Rousselier model .................................................................673
Poussard C., Seidenfuss M.

GW/8 - Crack effects on the fracture behaviour in the duplex steels .............681
Kozak V., Dlouhy I., Holzmann M.

GW/9 - On the simulation of warm-prestressing and ductile crack extension by constitutive modeling .....................................................689
Arndt S., Klingbeil D., Svendsen B.

GW/10 - Ductile failure of notched specimens of ferritic reactor steel ............697
Fekete T., Krallics Gy., Tatar L.

GW/11 - Ductile tearing predictions in a 304L stainless steel .......................705
Marques Vieira E., Louvigné P.F., Gilles Ph.

GW/13 - Modelling the ductile tearing of austenitic welded joint with local approach of fracture .................................................................713
Devaux J., Joly P., Leblond J.B.
