RAILWAY ENGINEERING – 98

PROCEEDINGS
of
FIRST INTERNATIONAL CONFERENCE
on
MAINTENANCE & RENEWAL of PERMANENT WAY and STRUCTURES

10th July, 1998

Venue
Brunel University
London

Edited by
PROFESSOR M. C. FORDE
Tarmac Professor of Civil Engineering Construction
University of Edinburgh

ENGINEERING TECHNICS PRESS
Contents

1. Permanent Way Inspection
   • RAILROAD APPLICATIONS FOR INFRARED THERMOGRAPHY & GROUND PROBING RADAR NDT TECHNIQUES, G.J. Weil, EnTech Engineering Inc, St Louis, MO, USA ................................................................. 3
   • INVESTIGATION OF RAILWAY SURFACE CORRUGATIONS USING POWER SPECTRUM ANALYSIS, Dr A Massel, TU Gdansk, Poland ................................................................................................. 15
   • ELECTROMAGNETIC PROPERTIES OF RAILWAY BALLAST, MR Clark, R Gillespie, T Kemp, Prof DM McCann & Prof MC Forde, University of Edinburgh, Scotland .......................................... 21
   • IMAGING ATTRIBUTES OF RAILWAY TRACK FORMATION USING GROUND PROBING RADAR (GPR), R Jack & P Jackson, IMC Geophysics Ltd, Nottingham, UK ........................................................................ 29
   • APPLICATION OF GROUND PENETRATING RADAR IN THE RAILWAY INDUSTRY, GP Gallagher, QJ Leiper & R Williamson, Tarmac Construction Ltd & MR Clark & Prof MC Forde, University of Edinburgh, Scotland .... 33
   • TRACKBED INVESTIGATION - A MODERN APPROACH, Dr P Sharpe, Scott Wilson Pavement Engineering, Nottingham & Dr AC Collop, University of Nottingham, UK ......................................................... 37
   • PROBLEM OF CYCLIC TOP IN PERMANENT WAY, J Tunna, R Harvey & R Troup, AEA Technology Rail, Derby, UK .................................................................................................................. 45

2. Track Inspection & Repair
   • REALIGNING RAILWAYS IN TRACK RENEWALS - METHODS & OBJECTIVES, B Kufver, VTI Railway Systems, Linkoping, Sweden ................................................................................................ 53
   • RECUPERATION OF TRACK JOINTS WITH THE USE OF ELECTRICAL WELD, AJC. Tavares & JR Fehlberg, Companhia Vale do Rio Doce - CVRD, Brazil ............................................................ 59
   • AXIAL FORCES IN RAILWAY TRACK AND TAMPING MACHINE SHIFTING SETS, Prof A Barylski, Dr W Koc & Dr A Wilk, TU Gdansk, Poland ............................................................................. 65
   • TRACK FIXING FOR THE FUTURE, AC Dennis & SJ Dunn, Sika Limited, Welwyn Garden City, UK ................................................................................................................................. 75

3. Ballast Maintenance & Enhancement
   • BALLAST BONDING & TRACK STABILITY, PMB Daly, Thermit Welding (GB) Ltd, Rainham, UK .......................................................... 81
   • A NUMERICAL MODEL FOR THE DETERMINATION OF TRACK BALLAST LIFE, Dr EOA Awoleye, Jarvis Facilities Ltd, York .......................................................................................................... 89
   • BALLAST LIFE AND MAINTENANCE, R Collinson, Halcrow Transmark, London, UK ........................................................................... 99

4. Railway Substructure & Embankments
   • RAILWAY EMBANKMENT INSTABILITY, INSPECTION, REMEDIATION & ASSET MANAGEMENT, Dr MD Higgins, Hyder Consulting, Birmingham, & Dr MC Gallop, Hyder Consulting, Cardiff, UK ................................................................. 105
   • PERMANENT WAY PROTECTION WITH BITUMINOUS GEOMEMBRANES, EC Mathieu, Colas Limited, Andover, UK .................................................................................................. 113
   • COST-EFFECTIVE TRACK SUBSTRUCTURE DESIGN, Dr EOA Awoleye, Jarvis Facilities Ltd, York ..................................................................................... 121
   • USE OF GEOGRIDS IN THE CONSTRUCTION & MAINTENANCE OF RAILWAYS, G Carter, Tensar International, Blackburn, UK ............................................................................ 131
   • THE SUCCESS OF EMBANKMENT GROUTING WORKS ON THE WEST COAST MAIN LINE, CM Cox & Dr EOA Awoleye, Jarvis Rail Ltd, York ........................................................................ 137
   • COST EFFECTIVE DESIGN & CONSTRUCTION OF EMBANKMENT STABILISATION SCHEMES TO A PERFORMANCE SPECIFICATION, Dr D Egan & TJ Snell, Keller Ground Engineering Ltd, Wetherby, UK ................................................................. 145
5. Railway Bridge Inspection

- INSPECTION OF RAILWAY BRIDGES BY ROPE ACCESS ABOVE AND BELOW WATER, G Burnett, Reach (UK) Ltd, Doncaster, England ................................................................. 155
- TRACKBED GEOTECHNOLOGY: ITS EFFECT ON THE COLLAPSE LOAD OF RAILWAY ARCH BRIDGES, K-H Ng, Dr CA Fairfield, Prof A Sibbald, Napier University, Edinburgh, Scotland .................................................. 163
- DYNAMIC LOAD TESTING IN RAILWAY BRIDGE ASSESSMENT AND MANAGEMENT, S Rudman, Maunsell Ltd, Birmingham & M Anderson, Strainstall Engineering Services Ltd, Bath, UK ............................................................... 169
- RADAR MEASUREMENT OF BRIDGE SCOUR, Prof DM McCann, University of Edinburgh; PJ Fenning & A Brown, Earth Science Systems Ltd, Kimpton; M Clark, K Broughton & Prof MC Forde, University of Edinburgh, UK 179
- GEOPHYSICAL IMAGING OF MASONRY STRUCTURES, Dr RC Flint, Dr PD Jackson, British Geological Survey, Keyworth & Prof DM McCann, University of Edinburgh, Scotland ........................................... 195

6. Railway Bridge Management & Repair

- MANAGEMENT & MAINTENANCE OF RAILWAY STRUCTURES, D Smart, Halcrow Transmark, London, UK. 211
- YARM VIADUCT - FOUNDATION STABILISATION, MP Hughes, Roger Bullivant Ltd, East Bolden, England .... 219
- RECONSTRUCTION OF UNDERBRIDGE NO. 4 OF THE GRAND JUNCTION LINE BETWEEN BIRMINGHAM NEW STREET & LICHFIELD, P Little, Birse Rail, Birmingham & M Tindale, Tarmac Construction Engineering Services, Wolverhampton, UK .................................................. 249

7. Facilities & Case Studies

- STRUCTURAL MONITORING TO ENSURE SAFETY & TO REDUCE DISRUPTION, M Savage & M Kenley, Fugro Structural Monitoring, Hemel Hempstead, UK ........................................................................................................... 255
- INTERFERENCE BETWEEN CREW QUALITY, MAINTENANCE EXPERIENCE AND DESIGN OF THE ELECTRONIC EQUIPMENT - CASE STUDY, B Kauf, Hz-Croatia Railways, Zagreb, Croatia ......................... 275
- INNOVATIVE APPROACH TO CONSTRUCTION BENEFITS MAJOR RESTORATION WORK AT BRIGHTON STATION, P Bimson, Kier Rail, Sandy, UK .......................................................................................... 281

Keynote Paper: A CONTRACTORS ROLE IN THE UK PRIVATISED RAIL INDUSTRY, Bob Winfield, GTRM, Birmingham, UK .................................................. 293
