H-Y. Chen, L.W. Teufel, and Steve Schaffer, New Mexico Inst. of Mining
and Technology

Viscous Rheology and State of Stress in Unconsolidated Sands ...................... 465
C.T. Chang and M.D. Zoback, Stanford U.

Strain Hardening and Extensional Failure in High Porosity Chalk .................. 475
R. Risnes, O.J. Garpestad, M. Gilje, L.T. Oland, M. Ovesen, and E. Vargervik,
Stavanger C.
SPE/ISRM 47582 Plasticity and Permeability in Carbonates: Dependence on Stress Path and Porosity ................................................................. 485
D.P. Yale, Mobil Technology Co., and Brian Crawford, Heriot-Watt U.

SPE/ISRM 47585 Plastic Modelling of Compressible Porous Chalk and Effect of Water Injection ................................................................. 495
S. Homand and J.F. Shao, Laboratory of Mechanics of Lille, and Ch. Schroeder, U. of Liège

SPE/ISRM 47587 Water/Chalk (Or Collapsible Soil) Interaction: Part II. Results of Tests Performed in Laboratory on Lixhe Chalk To Calibrate Water/Chalk Models ................................................................. 505
Ch. Schroeder, U. of Liège; A-P. Bois, SIMECSOL; V. Maury, ELF-EP; and G. Hallé, Elf Petroleum Norge

SPE/ISRM 47589 Investigation of the Poromechanical Behavior of Shales in the Elastic Domain ................................................................. 515
O. Vincké, F. Longuemare, M. Boutéca, and J.P. Deflambre, Inst. Français du Pétrole

SPE/ISRM 47590 Laboratory Tests of Hydraulic Fracturing and Swell Healing ................................................................. 521
C.T. Christensen, Danish Geotechnical Inst.; H.F. Christensen, Maersk Oil & Gas AS; and N. Foged, Technical U. of Denmark

SPE/ISRM 50559 Past and Future Contribution of Rock Mechanics Research to Petroleum Engineering ................................................................. 527
C.J. Kenter, Shell Research & Technical Services, and P.K. Currie, Delft U. of Technology

No manuscript received in time for publication:

SPE/ISRM 47216 Fracture Mechanisms Associated with Drill Cuttings Reinjection Operations
A.S. Abou Sayed, BP Exploration Inc.

SPE/ISRM 47221 Underground Storage of Natural Gas in Unlined Hard Rock Caverns
S.M. Heath and R.C. Hodrien, BG Plc Intl. Downstream, and E. Kostakis and J.P. Harrison, Imperial College London

SPE/ISRM 47242 Finite Element Modelling of Drape Failure Over Escarpments in Sedimentary Basins
R.K. Brati, Saga Petroleum A.S.; M. Pourjavad, Femengineering Ltd.; and J.S. Bell, Sigma Consultants

SPE/ISRM 47258 The 1997 Release of the World Stress Map Database
V. Wehrle and B. Müller, U. of Karlsruhe, and K.W. Fuchs, Cahill Consulting Service

SPE/ISRM 47269 Hysteresis, True-Triaxial Stress-Path and Pore Pressure Effects on Permeability
S.S. Al-Harthy, Imperial College London

SPE/ISRM 47271 Error of Maximum Principal Stress in Hydraulic Fracturing Stress Measurements Due to Fracture Normal Stiffness
O. Stephansson, KTH

SPE/ISRM 47275 Leakoff Tests: How to Extract Important In-Situ Stress Information From a Test Originally Designed for Another Purpose
T. Jorgensen, Norsk Hydro A/S, and M. Fejerskov, Saga Petroleum A.S.

SPE/ISRM 47281 Fault Stability Considerations for Gas Injection in a Shallow and Partially Depleted Reservoir
P.A. Bogert, Shell Intl. E&P BV; E.J. Willemese, Shell Intl. Research Mij; and S. Wong, Petroleum Development of Oman

SPE/ISRM 47283 Thermal Effects in Fractured Reservoir Water Flooding
S. Xu and P. Neve, Reservoir Management Ltd., and A.J. Jupe, CSM Associates Ltd.

SPE/ISRM 47291 Laboratory Simulation of Liner Loading and Near-Wellbore Permeability Variation in Poorly Consolidated Sandstones
M. Khodaverdian, Terra Tek Inc.; A.S. Abou-Sayed, BP Exploration America; R. Ramos, ARCO Oil & Gas Co.; and Q. Guo and J.D. McLennan, Terra Tek Inc.
Stability of Horizontal Barefoot Completions and Laterals: Theory and Case History Examples
S.M. Willson, BP Exploration Inc., and B. Plischke, Isam GmbH

Wellbore Instability Experience in Australia
M.A. Addis, C.P. Tan, D. Willoughby, B. Wu, and A.F. Williams, CSIRO Petroleum

A Parametric Study of Compressional and Shear Wave Velocities in Ekofisk Reservoir Chalk

Transition Between Ductile and Brittle Mode in Rock Cutting
E. Detournay, P. Nicodeme, and T. Richard, U. of Minnesota

Source Mechanism Estimation of Induced Microseismicity by Forward Modelling
I.G. Stimpson, Keele U.

Mechanism of Downhole Sand Cavity Re-Stabilisation in Weakly Consolidated Sandstones
P. De Bree, Shell Intl. E&P BV; A.P. Kooijman, NAM B.V.; P.J. Van Den Hoek, Nederlandse Aardolie Mij.; C.J. Kenter, Shell Exploration & Production; and Z. Zheng and M. Khodaverdian, Terra Tek Inc.

Influence of Perforating and Flow Regime on Sand Production Potential in Low Strength Sandstones
S.M. Willson, BP Exploration Inc.

Stress, Subsidence, and Faulting Associated with Energy Production
P. Segall, Stanford U.

Finite Element Modeling of the Mesoscale Faulting and Small Scale Fracturing of the Garret El Gueffoul Gas Field (Algeria)
J.D. Barnichon, U. De Liege

Geomechanics Approach to Simulation of Stress-Sensitive Reservoirs: Influence of Reservoir Stress Path
M.R. Khan and L.W. Teufel, New Mexico Inst. of Mining & Tech.

Sand Failure Risk Assessment in a Compacting HP/HT Reservoir: The Shearwater Field, Central North Sea
P. De Bree, Shell Intl. E&P BV; T. Baaijens, Shell UK Exploration & Prod.; and G.J. Schreppers, TNO

Sand Management put Into Operation: The Assessment of the Quantitative Risk of Sand Failure Using a “Fully Integrated Sand Prediction Tool” (FIST)
P. De Bree, Shell Intl. E&P BV

Reservoir Compaction, Surface Subsidence, and Casing Damage at the Belridge Diatomite Field, California—Part II: Reservoir Management and Mitigation
T.A. Moroney, CalResources

Assessment of Screen Loading in Depleting Reservoirs
S.M. Willson, BP Exploration Inc.

Poroelastoplastic Simulation of a Compacting Reservoir: Consequences Upon Shape and Value of Subsidence
A. Pellegrino, AGIP SpA; M. Benso, Politecnico Di Torino; M. Brignoli, AGIP SpA; and G. Barla, Politecnico Di Torino
