Environmental Issues and Waste Management in Energy and Mineral Production

Edited by
A.G. Paşamehmetoğlu
Atılım University, Ankara, Turkey
A.Özgenoğlu
Middle East Technical University, Ankara, Turkey
Table of contents

Foreword XV
Organization XVII

1 Sustainable mineral and energy resources development, environmental regulations

A resource-oriented analysis of metallic raw material flows
P.N.Martens, H.Koch, T.Willmen, K.Schetelig, C.Bauer & P.Sliwka 3

Wind energy potential calculations in the Marmara region of Turkey
A.D.Şahin, A.Gündüz & Z.Şen 9

Innovative environmental technology and training development for hazardous cleanup operations
A.B.Szwilski & J.W.Hooper 13

A case study of mine development in the Kakadu region
R.S.Needham & A.P.Zapanis 17

Construction material supply for the urban area of São Paulo City, Brazil
L.Soares, H.Born & K.S.Mendes 23

Strategies regarding the environmental problems in Valea Jiului coal basin
G.Babut, R.Moraru & I.Matei 29

The environmental conditions in coal mining regions
E.Y.Dickolenko 33

Construction material industry’s ecological effectiveness
K.K.Abdrahmanova 37

Control for the passing minerals mining and usage at the collieries of Ukraine
G.G.Pivnyak & I.L.Gumenik 41

To the quarries projection in the regime of the resources preservation
B.Rakishev, B.Gurjevsky & Zh.Imashev 45

Restructurisation and resources development of Moscow Coal Basin
V.E.Savchenkov, N.P.Ivatanova, N.S.Bulychev & N.N.Fotieva 49
Estimation of the entrails use at completeness and complexity level
B.Rakishev, B.Gurjevsky & Zh. Imashev

Environmental legislation in India – An overview
D.P.Tripathy

Legal and environmental aspects on mine tailings disposal dams
W.T.Hennies, F.Fujimura, L.Soares & D.Migliorini Jr

2 Environmental management, risk assessment
Introduction of modern environmental management and regulation at Christmas Island Phosphates, Australia
P.W.Waggitt

Environmental impact assessment and management in the mining industry
K.Sinding

A rational approach to the assessment of environmental issues in stone quarrying districts
R.Ciccu, E.Imolesi & G.Mocci

Exploitation planning in marble quarries minimising landscape recovery costs
J.Ribeiro & H.G.Pereira

Pollution, risk assessment and rehabilitation at the Lavrion Technological and Cultural Park, Greece
A.Kontopoulos, K.Komnitsas & A.Xenidis

Risk-cost analysis of environmental regulations for arsenic in Chile
R.O’Ryan & M.Díaz

Environmental cost benefit analysis for a coal-fired power plant: An application of dispersion modelling coupled with GIS
M.Oğuz & T.Balta

Fuzzy modelling and visualisation for risk assessments in land recycling projects
K.Heinrich

3 Environmental impact assessment, pollution case studies
Fugitive dust modeling: A case study for Seyitömer coal-fired power plant
A.Hamzaoğlu, S.Kaym, G.Tuncel & C.Yurteri

Modelling dispersion of particulate matter in the mining environment
G.Calviac & V.Vesovic

Air pollution modelling in practice: The advantages and limitations of current models
P.R.Johnston & S.Durucan

Quantitative estimates of greenhouse gas emission from coal mines in Japan
M.Sagisaka & A.Inaba

Heating degree-day variations in Turkey
M.Kadıoğlu, Z.Şen & L.M.Gültekin
A comparative study on numerical simulation methods used for the prediction of blast vibration
Y.Hirai, M.Yamada, S.Kunimatsu, S.Durucan, M.A.Farsangi & G.J.Johnston

Peak particle velocity as a blast performance index

Environmental noise near a processing plant: A case study
S.Durucan, K.Pathak, B.O'Reilly & S.Kunimatsu

Environmental problems associated with the operation of belt conveyors
M.Hardygöra

An investigation of noise pollution in İstanbul Metro tunnel drivages
G.Ökten, Z.Tuncel & C.Kuzu

Correlation of subsidence parameters and damage assessment due to underground mining
Z.Agioutantis & M.Karmis

The implications of groundwater rebound on the stability of shallow, abandoned room and pillar mineworkings
D.J.Reddish & G.M.Swift

A data-base system for seepage characteristics of geomaterials
Ö.Aydan

New approach to evaluate the stability process in rock slopes
F.Fujimura, W.T.Hennies, L.Soares & N.K.Yoshikawa

Estimation of condition of geosphere
M.A.Zhuravkov, I.A.Tyashkevich & B.I.Belyaev

Underground mining and environmental protection on the Maardu granite deposit
J.-R.Pastarus

Monitoring of underground waste storage: Induced seismicity and evaluation of dilatancy in rock massif
V.A.Mansurov & V.A.Anikolenko

Atmospheric environment responses to fossil energy and renewable energy alternatives
Z.Şen

The use of artificial neural networks in short-term river flow prediction
S.Durucan & C.E.Imrie

Investigations concerning the protection of underground waters against pollution within some tailing dam areas in Romania
L.Badea, V.Prodea, N.Viditchi & I.Lupulescu

Statistical and spatial assessment of heavy metal contamination around Lavrio mine workings, Greece
S.Durucan & A.Korre

Measurement of heavy metals by the electrical conductivity method
M.K.Kayyal
Geostatistical methods applied to contaminated land by abandoned metal mining
A. Ersoy & M. D. Waller

Integration of GPS monitoring with ground movement protection techniques for subsidence planning in high production longwall panels
Z. Agioutantis, S. Mertikas & M. Karmis

The monitoring of condition of aggressive waste dams
S. Andreiko, V. Vagin, M. Zhuravkov, N. Prohoroff & D. Musalev

Geoinformation system for geomechanical monitoring of mining regions
M. A. Zhuravkov, I. S. Nevelson, S. I. Slavashevich & O. A. Beletskiy

Methods of artificial recharge, in areas with open pit exploitations: Case of South Field Open Pit, West Macedonia, Greece
D. Dimitrakopoulos, J. Koumantakis, K. Heliadis & G. Poutios

The impact of mining activities over flora and fauna at Jiu’ Valley, Romania
M. Georgescu & C. Biro

New concept in environmental protection in rare metal and radioactive ores exploitation
V. Arad, S. Arad, A. M. Cosma, D. Cosma, T. Iuhas & D. Cosma

Ecological impact produced by hard coal mining in Petrosani coal basin and pollution reduction at Jiu River
V. Arad, S. Arad & Gh. Marchis

Environmental problems caused by bituminous schist and possible solutions
N. Elmas, H. Aykul, K. Erarslan & I. G. Ediz

Comparative studies regarding the impact on environmental factors of the uranium mining activity in some areas from Romania
D. Georgescu, M. Popescu, A. Sporea & St. Petrescu

The influence of the mining activity in the Oltenia region on the underground water resources and their quality
G. Baican, D. Fodor & I. Rotunjanu

Influence of Romanian Apuseni mountains mining industry on the environmental factors
D. Fodor, I. Lupulescu & N. Tebies

Coal mining impact upon the social and environmental situation and health of the population
V. A. Kharchenko, M. A. Revazov & V. K. Schukin

Estimation of coal quality parameters using disjunctive kriging
A. E. Tercan

4 Health and safety

Total health and safety management in mineral industries
Y. P. Chugh & G. A. Wangler

Intellectual supporting system of VACS operator based on the fuzzy diagnostic model
I. V. Lockshina & N. S. Batugina
The first recirculation trial for dust control in a Turkish colliery
S. Saraç, O. Çetin & C. Şensoğut

Suppression of coal dusts using surfactants in combating coal dust explosions
I. G. Ediz, M. A. Seyfettinoglu & D. W. Dixon-Hardy

Clean technology is the safe technology: A success story of dimensional limestone mining
S. C. Agarwal

Gravimetric dust sampling: The South African gold and platinum mine experience
A. D. Unsted & G. L. Smith

5 Petroleum production and environment

Environmental considerations within the abandonment of oil/gas production fields
H. Wolff

Environmental management in systems of drill oil well, Brazil
H. L. Lira, C. M. M. Silva, N. G. Carvalho, H. L. Lira & A. Stellin Jr

Downhole disposal of oil-rig drill cuttings
R. Junin

The use of ilmenite as weighting material in drilling mud
R. Junin, A. K. Idris & A. R. Ismail

Numerical simulation of 3D non-steady displacement of oil by water
V. V. Vidyakin, A. A. Klechenny, O. L. Konovalov & V. M. Volkov

Sorption of oils onto dry aquatic plant biomass

6 Mine site closure, acid mine drainage, decommissioning and rehabilitation

The decommissioning and rehabilitation of the Nabarlek uranium mine, northern Australia
P. W. Waggitt

Remediation progress at Canada’s Britannia Mine
R. G. McCandless & W. J. Kuit

Environmental aspects of hard coal mines closure in Poland
M. Chaber, L. Gawlik & K. Krogulski

Negative consequences of coal mines liquidation and methods for their reduction
A. V. Kharchenko, I. V. Petrov & V. K. Schukin

Layered co-mingling, multiple-barrier ARD control – Laboratory trials
R. Poulin, A. Lamontagne & J. Hadjigeorgiou

Mechanisms of metal removal by manures and cellulosic waste in anaerobic passive systems
C. Duc, K. Adam & A. Kontopoulos

Eco-friendly technology for waste dumps management in India
7 Role of computer and geographic information systems (GIS) in solving environmental problems

Incorporation of landform evolution modelling in mine rehabilitation planning
K.G. Evans, G.R. Willgoose & M.J. Saynor

Utilizing the ARC/INFO data model to build conceptual models for environmental simulations
N.I. Fedounets & O.E. Fomitcheva

A GIS-based information management system for open-pit mining and reclamation operations
S. Peppas, A. Antoniadou, M. Patesti & G.N. Panagiotou

8 Coal combustion byproduct and mine waste management and utilization

Field pavements using conventional and clean coal technology by-products
N. Ghafoori, L. Wang & S. Kassel

Integrated engineering and cost model for management of coal combustion byproducts
H. Sevim & S. Renninger

Management of coal combustion products in Illinois underground mines: An overview
Y. P. Chugh, H. Sevim & S. Renninger

Filling abandoned mines with fluidized bed combustion ash grout

Field demonstration of mine grout made from fluidized bed combustion ash
T. L. Robl, R. F. Rathbone, U. Graham & J. C. Hower

Feasibility of an integrated coal mining and waste disposal system
E. Topuz, K. Basu & M. Karfakis

Positive uses of cement dust of Assiut Cement Company, Egypt, in constructional purposes

Possibilities of waste disposal in abandoned underground coal mines in Zonguldak Region
H. Gerçek, E. Hamarat & A. Özarslan

Possibilities of wastes location in coal mine workings
V. I. Salli, A. B. Ivanov & V. N. Boytchenko

New goaf fill technology for underground mines
A. B. Ivanov, V. B. Vishnya & G. V. Kuznetsov

Use of mine waste rock for civil engineering purposes
E. I. Galpern, L. V. Pashchenko & V. I. Bratchun
9 Coal processing and utilization technologies for a cleaner environment

Generating products from coal combustion fly ash using physical separations
R.Q. Honaker, K. Mondal, B. Arnold & G. Shirey

High quality coal extraction and environmental remediation of fine coal refuse ponds using advanced cleaning technologies
R.Q. Honaker, M.K. Mohanty & A. Patwardhan

The reclamation of carbon containing waste by burning in fluidized bed
E.I. Galpern, A.P. Borysov, L.V. Pashchenko & V.I. Saranchuk

Trends of NO\textsubscript{x} and SO\textsubscript{x} emission decrease upon fuel-oriented usage of coal
A.M. Gulemaliyev & N.G. Golovina

The gasification of waste after production of humic acids from low-grade coals
L.V. Pashchenko, T.G. Shendrik & V.I. Saranchuk

Reduction of coal sulphur content by microbiological method
Yu. F. Vasyuchkov

Cleaning of Seytömer thermic power plant’s fuel by selective flocculation
H. Koca

Increase of high-sulphur coals quality with the help of high pressure water
V.A. Brenner, V.V. Platonov, A.B. Zabin, O.V. Pronin, U.N. Naumov & N.A. Taran

Modernization of coal preparation technologies in Romania for a cleaner environment
S. Arad, V. Arad, R. Marhan, M. Popescu & L. Radermacher

Pilot scale single stage fine coal dewatering and briquetting process
S.W. Kan, J.W. Wilson, Y.C. Ding & B.S. Aksoy

Environmental issues in utilization of lignite of Kansk-Achinsk coal pit
B.N. Kuznetsov

Problems of hard coal desulphurisation in Poland in processes of coal preparation
W. Blaschke, L. Gawlik, R. Nycz, Z. Starzak & L. Tazbirek

Improving coal quality by microwave treatment
B.K. Pal

Oil agglomeration of coal slurries
Z. Blaschke

The influence of seam non-homogeneity on the composition of the gas produced by underground conversion of coal
R. Czibula

Use of SEM for the analysis of the physical characteristics of carbonatic rocks
F.C. de Moraes, E.R.R. Santana, S.R. Bragança & A. Jablonski

Spiral separation of coal floatation tailings
P.I. Pilov, A.S. Kirnarsky & M.V. Rogoza

Development of spiral separation technology for coal slimes treatment
A. Kirnarsky & M. Sbitnev
10 Waste water treatment and cleaning

Emerging biotechnology applications in large scale treatment of metals bearing waste waters 665
M.Tsezos, E.Re mou daki & A.Hatzikioseyian

Chemical and electrochemical processes for the decontamination of acidic mine wastewater 673
M.Pavel, L.Pop a, D.Antonescu, A.Pescaru & G.Fodor

Acoustic/screen filter for continuous waste water cleaning: Preliminary test 677
J.R.Woolsey & S.Z.Shkundin

Treatment of industrial waste water containing various chemical matters 679
M.A.Seyfettinoglu, N.Ediz, H.Ozdag, A.Sandikci & N.H.Afyon

Computer models for analysis of wastewater treatment 683
M.Sario lu & N.J.Horan

Effect of waters containing complex cyanides and their treatment in Baia de Aries mountains mining area, Romania 687
E.Turcu, L.Pop a, M.Pavel & A.Pescaru

11 Mineral processing

Removal of iron from silica sand: Oxalic acid leaching with leachate treatment by photochemical reduction and biodegradation 695
A.W.L.Dud eney, A.Narayanan & I.I.Tarasova

Iron ore pelletizing at GIIC and the environment – Practices and improvements 701
A.Basdag & A.I.Arol

Treatment of Turkish zinc plant waste materials 707
Y.A.Topkaya & I.Karakaya

Processing zinc secondary raw materials via ammonium carbonate leaching 711
R.L.Nyirenda

Sepiolite as an adsorbent for elimination of mine wastes 717
M.Kara, E.Sabah, H.Yuzer & M.S.Celik

Microelements in wastes of humic acids production 723
T.G.Shendrik

Combined methods for the beneficiation of pyrite concentrates with lower gold content 727
L.Popa, M.Pavel, A.Grecu, G.Fodor & A.Pescaru

Studies on the application of AVR to a cyanide effluent from Riacho dos Machados ore, Southeastern Brazil 731
C.H.Sampaio, G.L.Miltzarek, R.M.Kautzman, G.Dalpiaz & E.F.Tochtrop Jr

Application of zeolite minerals as an in-situ amendment for heavy metal polluted soils 737
S.S.Gaydardjiev & S.Atanasov

Effect of pH in the natural degradation process of cyanide 743
N.Gonen, E.Demir & M.Kose
Concentration of Bigadiç and Kestelek colemanite tailings in abatement of boron contamination

*M.Z. Doğan, Y. Kaytaz, G. Önal & K.T. Perek*
