INDEX 567

Volume III

11. Fuzzy Decision-Making and Mathematical Programming

FUZZY MATHEMATICAL PROGRAMMING I

Cadenas J.M., Verdegay J.L.
Using ranking functions in multiobjective fuzzy linear programming ............... 3

Kato K., Sakawa M.
An interactive fuzzy satisficing method for multiobjective block angular 0-1 programming problems involving fuzzy parameters through genetic algorithms with decomposition procedures ........................................... 9

Nishizaki I., Sakawa M.
Equilibrium solutions of multiobjective fuzzy bimatrix games incorporating fuzzy goals 15

Sakawa M., Kato K.
An interactive fuzzy satisficing method for multiobjective block angular linear fractional programming problems with fuzzy parameters ........................................... 21

Shibano T., Sakawa M.
An interactive fuzzy satisficing method for multiobjective 0-1 programs with fuzzy numbers through genetic algorithms ........................................... 27

FUZZY MATHEMATICAL PROGRAMING II

Inuiguchi M., Sakawa M.
Membership function elicitation in possibilistic programming problems ............... 33

Ramík J.
Fuzzy goals and fuzzy alternatives in goal programming problems ..................... 39

Romero P.R., Yamauchi A.
Job-shop scheduling problem: a general linear programming approach .................. 43

Tanaka H., Guo P., Zimmermann H. J.
Possibility distributions of fuzzy variables in fuzzy Linear programming problems 48

Yano H., Sakawa M., Shibano T.
An optimalization method for fuzzy multiobjective 0-1 programming problems through genetic algorithms and its application to media selection planning ............... 53

FUZZY DECISION-MAKING I

Haven E. E.
The use of revealed preference in a fuzzy setting some preliminary results ............... 58

Manic M., Milutinović S.
Fuzzy preference relation depending on different operators and fuzzy numbers ............. 64

Mareš M.
Fuzzy coalition forming ........................................... 70

Van De Walle B., De Baets B., Kerre E.
A comparative study of completeness conditions in fuzzy preference structures ............. 74

Yarushkina N.
Soft hierarchy analysing method for economic experts system .......................... 80
FUZZY DECISION-MAKING II

Bordogna G., Fedrizzi M., Pasi G.
The evaluation of consensus in group decision making: a linguistic approach 83

Ekel P., Pedrycz W., Popov V., Junges M., Moraes M.
Models and methods of multicriteria decision making in a fuzzy environment and their applications 89

Fedrizzi M., Fedrizzi M., Pereira R. A. M.
An interval equity principle in the dynamics of group decision making 95

Ostasiewicz W.
Using fuzzy sets in group decision making 99

Seo F.
On construction of fuzzy group utility functions 103

12. Fuzzy Optimization Procedures

FUZZY CLASSIFIERS I

Frelicot C.
Learning rejection thresholds for a class of fuzzy classifiers from possibilistic clustered noisy data 111

Grabisch M., Bienvenu G., Ayoun A., Grandin J.F., Lemer A., Moruzzi M.
A formal comparison of probabilistic and possibilistic frameworks for classification 117

Masulli F., Artuso M., Bogus P., Schenone A.
Fuzzy clustering methods for the segmentation of multivariate medical images 123

Ozols J., Borisov A.
Pattern classification and feature extraction on the basis of composition of fuzzy relations 129

Setnes M., Babuška R.
Fuzzy relational models for classification 135

Vatlin S. I.
Improvement of the consistently and degenerate self-guessing fuzzy classifiers 141

FUZZY OPTIMIZATION

Alexeyev A. V.
Towards precise fuzzy solution of fuzzy linear programming problem 144

Granat J.
Aspiration-reservation based decision support and specification of user preferences in terms of fuzzy sets 148

Haven E. E.
The use of fuzzy multi-criteria analysis in evaluating projects with identical net present values and risk 154

Ishii H., Katagiri H., Itoh T.
Some inventory problems with fuzzy shortage cost 159

Jiménez F., Verdegay J. L.
On interval and fuzzy solid transportation problem 165

Pap E., Boshnjak Z., Boshnjak S.
Application of different t-norms in the interpretation of portfolio matrices in strategic management 171

SCHEDULING AND PLANNING

Esogbue A. O., Liu B.
Stochastic multi-joint reservoir operation via fuzzy criterion dynamic programming . . .
Hong T.-P., Chuang T. N.
A new fuzzy Johnson algorithm for continuous fuzzy domain 183

Okada S., Soper T.
A method for solving path problem on the network with fuzzy arc lengths 189

Tanaka K., Vlach M.
Single machine scheduling with fuzzy due dates 195

Yoshida Y.
An optimal stopping problem in a continuous-time dynamic fuzzy system 200

FUZZY CLASSIFIERS II

Dave R. N., Sen S.
On generalizing the noise clustering algorithms 205

Kim J. S., Lee C. S., Bien Z., Choi B. T., Song K. J.
A dynamic hand gesture recognition system for virtual reality 211

Kuncheva L. I., Bezdek J. C.
A fuzzy generalized nearest prototype classifier 217

Nakao Z., Chen Y. W., Kina Y., Ali F., Takashibu M.
CT image reconstruction by the Boltzmann machine 223

Nauck D., Kruse R.
What are neuro-fuzzy classifiers? 228

13. Fuzzy Control

FUZZY CONTROL I

Castro J. L., Castro J. J., Zurita J. M.
The influence of implication functions in fuzzy logic controllers with defuzzification first and aggregation after 237

Cordon O., Herrera F., Peregrin A.
A study on the use of implication operators extending the Boolean conjunction in fuzzy control 243

Katai O., Higushi T., Horiuchi T., Sawaragi T.
Self-organizing fuzzy control systems by GA-Based group selection of constraint–interval control rules 249

Matia F., Jimenez A., Delgado L., Gutierrez J. E., de Antonio A.
SINCR0 — an on-line tool for fuzzy control using FMEA technology 255

Xu H. Y., Takahara K., Wakaitsu H., Kaguei S.
Comparison between fuzzy and adaptive controls of respiratory system 261

Zrilic D. G., Yuan B., Ramirez J.
A new robust fuzzy controller using sigma-delta techniques 266

FUZZY PETRI NETS — CONCEPTS AND MODELING

Ammar H.H., Yu L.
Reachability analysis of fuzzy marking Petri nets 273

Barro S., Bugarin A., Carinena P., Felix P., Fraga S.
Petri nets for fuzzy reasoning on dynamic systems 279

Blyumin S. L.
Algebraic foundations of fuzzy Petri nets theory: fuzzy sets algebra axioms 285

Fay A., Schnieder E.
Knowledge representation and reasoning with fuzzy Petri nets for expert system design and application 288

Pedrycz W., Peters J., Ramanna S., Furuhashi T.
From data to fuzzy Petri nets: generalized model and calibration abilities 294
Sandri S., Cardoso J.
Management of incomplete information in the processing of scale Petri nets with fuzzy durations ................................................................. 300
Scarpelli H., Gomide F., Yager R.
High level fuzzy Petri nets and inference based on alpha-level sets .......... 306

FORMAL MODELS OF FUZZY CONTROL I

Concha J., Cipriano A.
A new design method of fuzzy controllers based on stability analysis .......... 312
Homafar A., Bkdash M., Clifton C.
Approximating an optimal feedback control law by a generalized Sugeno controller .......... 318
Jamshidi M.
Fuzzy control of complex systems: structures and implementation .......... 324
Oliveira J. V., Lemos J. M.
Simplifying fuzzy relational structures for adaptive control .......... 330
Palm R., Driankov D.
Design of a fuzzy gain scheduler using sliding mode control principles .......... 336
Smith F. S., Shen Q.
Choosing the right fuzzy logic controller .......... 342

FUZZY CONTROL II

Butkiewicz B. S.
Control error of fuzzy system with different reasoning and defuzzification methods .......... 348
Haber R. E., Peres C. R., Alique A., Ros S., Alique J. R., Rosetti A.
Optimal tuning of hierarchical fuzzy controller applied to vertical milling process .......... 354
Kim J.H., Sung H. K., Song W. K., Yang S. H., Bien Z.
Fuzzy lateral controller design for AHS (Automatic Highway System) .......... 360
Kosaki T., Tanaka K., Sano M.
Application of model-based fuzzy control to a magnetic suspension system .......... 366
Song Y. S., Choi J. G., Kim Y. T., Lee H. Y., Sung S. K.
Design of a fuzzy control system for automatic combustion of refuse incineration plant .......... 370
Tanaka K., Kosaki T., Taniguchi T., Wong H. O.
An LNI approach to Backer–Upper control of a truck with ten trailers .......... 376

FUZZY CONTROL III

Crockett W. E.
A general fuzzy logic process controller .......... 382
Martins A., Carvalho A.
Multivariable fuzzy controller for supervision of electronic equipment .......... 388
Otsubo A., Hayashi K.
Realization of nonlinear and linear PID controls using simplified indirect fuzzy inference method .......... 393
Rencik L.
Fuzzy controller design: methods classification and parameters choice .......... 398
Sheikhholeslam F., Tahani V.
Stability analysis of fuzzy systems and design of fuzzy controllers for linear plants .......... 404
Yubazaki N., Yi J., Otani M., Hirota K.
SIRMs dynamically connected fuzzy inference model and its applications .......... 410

FORMAL MODELS OF FUZZY CONTROL II

Cervinka O.
Automatic tuning of parametric t-norms and t-conorms in fuzzy modeling .......... 416
