PROCEEDINGS
OF THE
6th EUROPEAN CONFERENCE ON
INFORMATION SYSTEMS

UNIVERSITY OF AIX-MARSEILLE III
AIX-EN-PROVENCE, FRANCE
JUNE 4-6, 1998

VOLUME II

Editor

Walter R. J. Baets
Session 13: Internet and WWW

Ethnographically informed system design: the development and evaluation of an Internet-based electronic banking application  
MARTIN, David; WASTELL, David; BOWERS, John  
A cost and performance analysis of developing and maintaining Web services: preliminary results from an empirical analysis of state agencies  
LARSEN, Kai R.; BLONIARZ, Peter A.  
The current state of business Internet use: results from an empirical survey of German companies  
KURBEL, Karl; TEUTEBERG, Frank

Session 14: Software Engineering (I)

A software process modelling quest for fundamental principles  
ROSSI, Simo; SILLANDER, Tero  
Use of case tools by a software vendor: a study of success indicators  
SMYTH, Robert W.  
The ethical issues of using cookies from a United States perspective  
SPIIOR, Janice C.; WARD, Burke T.

Session 15: IT outsourcing

The use of the risk-remedy method for evaluating tenders for outsourcing information technology in the Australian public sector  
LEWIS, Ed J. E.  
Mapping the areas of potential conflict in the management of information technology outsourcing  
KERN, Thomas; SILVA, Leiser  
Outsourcing for software applications development: issues, implications and impact  
ABBAS, Rasha; DART, Philip; O’BRIEN, Fergus; KAZMIERCZAK, Ed

Session 16: IS/IT professionals

On the sensitivity of IS professionals to the legitimacy of their interventions  
BANVILLE, Claude; LANDRY, Maurice; KEABLE, Michel  
End-user training and support: a comparison of two approaches  
REIJONEN, Pekka  
Beyond the container-view of context in IS research  
HENFRIDSSON, Ola

Session 17: Education and IT

The reconfigurable electronic textbook  
PREVELAKIS, Vassilis  
The content of information management/systems/technology courses in UK full-time master of business administration programmes: part II  
STRAY, Stephanie J.; BAKER, Bernie S. H.; GALLIERS, Bob D.
The computer and classroom teaching: towards new opportunities for old teachers
SIEMER, Julika

Session 18: Software Engineering (II)

A framework for the development of software development performance indicators
KUSTERS, Rob J.; RUYS, Hugo; HEEMSTRA, Fred J.

The software factory: contributions and illusions
AAEN, Ivan; BÖTTCHER, Peter; MATHIASSEN, Lars

The effect of quality certification on the software development process
SEEN, Megan; ROUSE, Anne

Session 19: HR and IS/IT

Organisational intelligence for human resource management: systems support for power distribution in organisations
JAMIESON, Rodger; WYATT, David

Managing Human Resources in software engineering: proposing a team approach
FINNEGAN, Pat; MURRAY, John

Barrier model: towards a theory of managing geographically distributed projects
KUMAR, Kuldeep; VAN FENEMA, Paul C.

Session 20: IS evaluation

A comparative analysis of the evaluation of information systems and other capital investments: empirical evidence
BALLANTINE, Joan A.; STRAY, Stephanie

Information systems evaluation: the interpretive paradigm
SERAFEIMIDIS, Vasilis; SMITHSON, Steve

The dynamics of IS procurement, case study of a budgeting and financial reporting system
HEISKANEN, Ari; NEWMAN, Michael

Session 21: EDI

Moderating effect of EDI embeddedness on time-based strategic capabilities
CHATFIELD, Akemi Takeoka; YETTON, Philip W.

The growing need for meta messages in electronic data interchange
HUERER, Christian

Electronic public procurement: from the international experience to the reality of the Mediterranean region
PERGIODAKIS, Vasilios Z.; MILIOTIS, Panagiotis
Session 22: Information Systems Methodologies

Uncovering the assumptions behind information systems methodologies: implications for research and practice
RUSSO, Nancy L.; STOLTERMAN, Erik

Evaluating the contribution of structuration theory to the IS discipline
ROSE, Jeremy

Beyond incommensurability: towards epistemology for innovation in IS
KAWALEK, John; JOHNSON, Phil

Session 23: Cost and benefits of IS

Managing strategic IT investment decisions: from involvement to effectiveness
CHOU, Tzu-Chuan; DYSON, Robert G.; POWELL, Philip L.

Designing information technology architectures: a cost-oriented methodology
FRANCALANCI, Chiara; PIURI, Vincenzo

The paradox of cost reductions within a support department
PEAUCELLE, Jean-Louis

Session 24: IS supported document – and documentation management

A language action approach to cooperative documentation systems
SCHOOP, Mareike; WASTELL, David G.

The politics of discoursing the need for a document control system
HARVEY, Linda

“Systems for users, not for observers” The tailorability concept
STAMOULIS, D.; MARTAKOS, D. I.; INTRONA, L. D.

Documents in infrastructure – challenges for design
BRAA, Kristin; SANDAHL, Tone Irene

Session 25: Management of IS

Integrating push technology in management support systems using UML
ROSENTHAL-SABROUX LAMSADE, Camille; DE MARCO, Marco; SORRENTINO, Maddalena; CARIGNANI, Andrea

Comparisons of alignment in managing information systems
DRURY, D. H.; FARHOOMAND, A.

Routinising DSS in organisations
MURPHY, Ciaran; ADAM, Frederic

Session 26: IS modelling and planning

A cooperative approach to model information systems
HADDAR, Nahla; GARGOURI, Faiez; BEN HAMADOU, Abdelmajid; DUCATEAU, Charles François

An Australian evaluation of Earl’s five strategic IS planning approaches
FALCONER, Donald J.; HODGETT, R. Alan
