</table>
Construction of metropolitan center subway entrances and exits harmonizing functional requirements with esthetic urban views
Y. Ishikawa, M. Torigoe & Y. Katakura

Planning and construction of an underground station with a large arch cross section
A. Yamagishi, T. Kashima & T. Kobayashi

New requirements for fire resistance of road tunnels in France
D. Lacroix

Safety and security in the Amsterdam North/South Metroline
A. J. M. Snel & J. C. G. van Liebergen

Analysis peculiarities of the underground structure refractoriness
N. F. Davydkin, V. L. Strakhov, S. F. Pankina & I. Y. Dorman

Review of video based incident management in road tunnels
J. Versavel & B. Boucke

Dublin Port Tunnel – Effects on design of the contract form ‘design and construct’
J. Wageneder & P. Strasser

Risk assessment helps select the contractor for the Copenhagen Metro System
J. Kampmann, J. W. Summers & S. D. Eskesen

Design considerations of a turnkey contract for an underground LRT system
N. A. Munfah & S. Zlatanic

An ‘ERASE’ approach to eliminate and control risks in tunnelling before work starts
J. M. Anderson

The effective utilization of excavated soil during subway construction
Y. Inoue & H. Takayama

A new concept of building subway shallow lines
I. S. Frolov & I. E. Krouk

Construction method and cost regarding Brasilia South Wing tunnelling
G. M. Paula Pinto

The new Tomei-Meishin Expressway project
K. Miura, H. Yagi, T. Otsu & K. Nakano

Crossing under a river in Madrid without overburden
M. Arnaiz, S. Estefania, A. Fernandez Cota & C. Oteo

Construction of the new ‘Meteor’ automated metro line in Paris
H. David

Design and construction of the first bored tunnel across the Nile River
D. Richards, P. Ramond & O. Ezzeldine

2 Design criteria, geotechnical and structural aspects

Geotechnical aspects of design criteria for bored tunnelling in soft ground
R. J. Mair
General report: Design criteria for tunnels in metropolises  
A. Negro Jr  

Face stability calculation for a slurry shield in heterogeneous soft soils  
W. Broere  

Stability analysis of a large tunnel driven in a stiff, fissured soil mass  
C. M. de A. Prado & R. Kochen  

Preliminary design using block analysis for underground excavation in jointed rock  
S. Sun & Y. Hou  

Model tests on face stability of tunnels in granular material  
T. Domon, T. Konda, K. Nishimura & M. Matsui  

Contribution to the definition of tunnel face stability of deep tunnel in continuous media  
S. Fuoco, A. Lucarelli & E. Pasqualini  

Building and utility damage assessments, risk, and construction settlement control  
S. J. Boone, B. Garrod & P. Branco  

Movement of the Piccadilly Line Tunnels caused by the new Heathrow Express Tunnels  
M. L. Cooper & D. N. Chapman  

Stability and subsidence phenomena due to approaching of two excavation faces in a tunnel  
P. Colonna & O. Tragni  

Centrifuge modelling of the influence of surface structures on tunnelling induced ground movements  
R. N. Taylor & R. J. Grant  

Overview and a new hypothesis on earth pressure acting on circular tunnel lining  
T. Iftimie  

NMT support concepts for tunnels in weak rocks  
N. R. Barton  

An evaluation of the application of both sets of classes ‘Q’ and ‘MR’, in urban tunnel, in Rio de Janeiro  
J. M. de Siqueira, W. R. Mori & A. Davidovitsch  

Analysis of bedded ring model for shield tunnels in the Netherlands  
R. G. A. de Waal, D. Postma & C. van der Veen  

Designing multi-layer linings of shallow tunnels  
N. N. Fotieva, N. S. Bulychev & L. N. Antziferova  

Prediction of lining loads from case histories  
H. J. Kim & Z. Eisenstein  

Improved Monte-Carlo method for structural reliability analysis of tunnel lining  
Z. Tan, M. Wang & B. Guan  

Tunnel post-construction actions and stresses in the final lining  
A. F. T. Flor & C. Santos-Pereira
Analysis of an underwater tunnel with the consideration of seepage forces
I.M. Lee, K.J. Park & S.W. Nam

Analysis of ground-support interaction for underground excavations in rock
C.A. Lauro & A.P. Assis

Design of steel fiber reinforced concrete and shotcrete for tunnel linings
M.A. Vandewalle

Fibre reinforced shotcrete lining at the Covanca Tunnel
J.A.R. Ortigao, A. Davidovitch, A. Moraes & D. Vallejos

Time factor in shotcrete lining design
D. Peila, P.P. Oreste & S. Pelizza

Shotcrete as final lining for tunnels
G. Palermo & P.R. do Lago Helene

The use of mercury-filled pressure cells for measuring stresses on and in shotcrete linings

The new hardware and technological processes at constructions of underground buildings
V.I. Petrenko & V.S. Rahutin

Calculation of parameters of side station tunnels reinforcing temporary support
L.V. Novikova, K. Abdullakh, S.N. Likhman & G.F. Kalinichenko

Technical criteria for the precast segments design in the new lines of the Madrid subway
M.J. Melis, M. Arnaiz, F. Mendaña & C. Oteo

Settlements above tunnels constructed in weathered granite
J.H. Shin & D.M. Potts

Tunnel construction simulation with Critical State Theory using finite elements
P.I. Braga de Queiroz, M. de Souza S. de Almeida & F.M. Kuwajima

Influence of the $K_o$ coefficient on the design of tunnels in hard soils
A. Guilloux, J. Robert, A. Bernardet & H. le Bissonnais

Collapse criteria for tunnelling in porous clay
M.M. Farias, S.C. Luna & A. P. Assis

The wall conditions below the base of the cut and the movements induced by an excavation in clay
M. Matos Fernandes, E. Fortunato & A. Silva Cardoso

Prediction and measurement of stresses in sprayed concrete lining (Brasilia South Wing tunnels)
A. Negro, R. Kochen, G.G. Gonçalves, R.M. Martins & G.M.P. Pinto

On lining stress and behavior of surrounding ground of shield tunnel in sand observed in a centrifuge
S. Imamura, T. Nomoto & O. Kusakabe

Numerical prediction of the behavior of an excavation in residual soils
J.G. Zornberg, R. F. Azevedo & A.B. Parreira
Conventional resort to groundwater recharge near deep excavations and its frequent fallacies  
V.F.B.de Mello, A.C.S.Sobral & W.Bilfinger

Tunnel wriggle  
R.B.Clay

One pass liner for the Rio Subterraneo, Buenos Aires, Argentina  
C.Criado, B.W.Martin & R.Leray

Cracking of unreinforced concrete linings in the TAG motorway tunnels  
A.Memon

Fire tests in a compressed air tunnel at up to 3 bar pressure  
D.R.Lamont, I.Buckland, R.J.Bettis, S.F.Jagger & R.T.Hambleton

Quantification of rock damage for tunnel excavation by blasting  
C.Dinis da Gama

3 Maintenance and rehabilitation

Maintenance and repair of underground structures and tunnels  
A.Haack

General report: Maintenance and repair of underground structures  
J.A.Richards

Assessment of influence in ground water surroundings at urban tunnels  
Y.Ohnishi, H.Ohtsu, T.Yasuda & K.Takahashi

Improving of French specifications and technics in waterproofing for underground works  
J.F.Jaby, J.L.Mahuet & J.L.Reith

Polyurethane grouting for sealing leakages in tunnels  
B.P.Kriekemans

Systems of waterproofing for existing masonry lined tunnels  
P.Whitchurch

Control of leaks in the Bilbao Metro  
J.R.Madinaveitia

Development of the waterproof membrane spraying method in NATM tunnels  
M.Kondoh, T.Matsuike, A.Kurano & S.Kisaichi

Drainage maintenance  
R.B.Clay

Rehabilitation of railroad and highway tunnels without closing traffic  
H.W.Parker, R.A.Robinson, P.M.Godlewski & W.A.Hultman

Increase in clearance in a railway tunnel in British Columbia, Canada  
P.J.Branco, C.H.MacKay & M.C.Harris

Rehabilitation concepts for brick lined tunnels in urban areas  
V.Gall, K.Zeidler, T.Predis & J.Walter
Tunnel repair – An innovating technique using self-supporting shells in reinforced shotcrete 547
A.Julien & A.Saitta

System of anomalies listing in the São Paulo Subway 553

Structural evaluation of New York City Transit under-river tunnels 559
M.Irshad & M.Naik

Investigation and shaking table tests of subway structures of the Hyogoken-Nanbu earthquake 567
T.Iwatate, T.Iino, M.Takeuchi, S.Samata & Y.Sato

Restoration of the collapsed subway station due to Hyogoken-Nanbu earthquake, January 17, 1995
T.Umehara, H.Iida, S.Nakamura & Y.Yamahara

Seismic rehabilitation of two immersed tube tunnels 581
B.Schmidt & Y.M.A.Hashash

An innovative solution for replacement of the Lake Mathews Outlet facilities 587
T.E.Tellers

Specific features of transport tunnel lining performance during construction and operation 593
S.N.Vlassov

A new technique for sewer rehabilitation applicable to noncircular cross sections:
Development and application 597
H.Yokoyama, K.Osako, S.Koiwa, N.Kitahashi & E.Akimoto

Design guidelines in case of long term interruption in NATM tunneling 603
K.Hori, G.Palermo & H.C.Rocha

Conversion of the Hawaii H3 exploratory tunnel into a maintenance tunnel 607
D.A.Oyenuga, P.G.Bibbes & T.M.Richardson

Author index 613
