Tunnels and Metropolises

Edited by
Arsenio Negro Jr
Bureau de Projetos e Consultoria Ltda & FEFAAP, São Paulo, SP, Brazil

Argimiro A. Ferreira
Companhia de Metropolitano de São Paulo – Metrô, São Paulo, SP, Brazil

VOLUME 2
### Table of contents

#### 4 Mechanized tunnelling

- **Current mechanized shield tunneling methods in Japan**  
  K. Kurihara  
  615

- **General report: Mechanized tunnelling**  
  G.W.E. Milligan  
  623

- **High speed shaft construction method (QUIC4000)**  
  H. Shikata, W. Kurahashi, F. Honda, K. Itakura, M. Kawakami & K. Matsuo  
  637

- **'Twist tunneling' by the multiface shield method**  
  A. Ueda, S. Matsumoto, M. Igarashi & M. Nakagawa  
  643

- **Application of the dual shield method to a tunnel having two different cross-sections**  
  H. Watahiki & K. Matsuo  
  649

- **Rapid tunnel excavation by hard rock TBMs in urban areas**  
  K. Nishioka & K. Aoki  
  655

- **Rapid excavation of a soft-rock tunnel: Development of a multifunctional full-face excavator**  
  M. Kimura, H. Yagi, Y. Nishida & H. Tanase  
  663

- **Rapid shield tunneling method using lattice jack mechanism**  
  K. Matsui, K. Furukawa, A. Kurano & K. Kaminaga  
  671

- **Application of mechanical shield docking method under high ground water pressure**  
  H. Kawaguchi & S. Suzuki  
  677

- **Construction of a large-section tunnel adjacent to an existing tunnel by new pre-lining support method**  
  K. Fujishita, H. Motomura, T. Otsu & S. Terauchi  
  685

- **Developments in polymer application for soil conditioning in EPB-TBMs**  
  L. H. Babendererde  
  691

- **New developments in earth pressure equipment for boring underground guided transit lines in France (VAL)**  
  F. Mauroy  
  697

- **The introduction of modern microtunnelling systems into South America and their operation**  
  D. Abbott  
  703
Construction of earth-retaining walls by the Box Shield Method
M.Ukegawa, A.Shizeki, T.Taniguchi, T.Hotta & Y.Iwai

Prediction of boulder obstructions
S.J.Boone, J.Westland, J.R.Busbridge & B.Garrod

Application of high precision gyrotheodolites in tunnelling
N.Korittke & H.Klapperich

Analyses of driving performance in mechanized tunnelling: Determination model and actual examples
R.Stempkowski

Catsby signal aided boring: A new concept for slurry TBM in urban areas
P.Aristaghes & V.Blanchet

Slurry TBM in urban areas: Connection between calculation and driving
P.Aristaghes & P.Autuori

2-D cutting models of tunnelling processes in saturated sand
J.S.He

Safety of machinery and work safety as an integral part of quality management in tunnelling
M.Bandmann & W.Chromy

The use of wet mix sprayed concrete
D.Zängerle

New developments in large-diameter tunnel design, manufacture and utilisation for world-wide projects
M.Herrenknecht

5 Urban constraints on underground works

General report: Urban constraints on underground works
L.E.Sozio

High speed railway line Cologne to Frankfurt, tunnel under the motorway intersection
H.Quick & R.Katzenbach

Urban constraints on underground works – The Cairo Metro: Case histories
M.E.Abdel Salam

Large cross section underground enlargement of a shield driven tunnel in the center of a large city
H.Katayama, M.Joshima, T.Tsujii & T.Usui

Peculiarities of ground freezing under conditions of underground waters movement
V.N.Kiselev & K.P.Nikiforov

Tunnel construction under the expressway piers by shield method
Y.Yamaguchi, Y.Kagami, K.Tajitsu & A.Takeda

Ground water control in sensitive areas, the Arlanda project and other projects
D.Morfeldt
Ground water control through pre-grouting for the Northern Link of the Stockholm Ring Road
Ö. Sjöström

The Arlanda link and other subsurface challenges in Sweden
T. Franzén & M. Forhaug

Pre-injection in tunnelling as part of Single Shell permanent support solutions
K. F. Garshol

Some observations for design ideal ground water control with injection process
H. G. Choi, Y. K. Choi, B. S. Chun & E. Yanagisawa

Access tunnel to the Arcovrde Station of the Rio de Janeiro Subway: Design and construction
L. Guilherme de Mello, W. Bilfinger, M. S. M. Fialho, P. Rideg, C. P. Primo & M. A. de Lima Rocha

Neighboring construction of portal part in large cross-sectional diversion tunnel by NATM
N. Kotake, T. Taji & K. Imai

Soil grouting: Full scale injection test North/South Metro Line Amsterdam
A. E. E. van der Stoel, E. F. Holtrop & A. E. van Tol

Pile and surface settlements at full scale tests North/South Metro Line Amsterdam
E. A. H. Teunissen & M. Hutteman

Interferences affecting the excavation of Brasília South Wing Tunnels
R. Kochen, A. Negro Jr, R. de Melo Martins & G. M. Paula Pinto

Design and construction of the enlargement of a tunnel section of unusual dimension
D. Nogueira Targas, D. Mattar Júnior & R. Ayer de Oliveira

Mechanical pre-cutting for the construction of the 21.5 m span arch of the ‘Baldo degli Ubaldi’ Station on the Rome Underground
P. Lunardi & A. Focaracci

Field observation of large tunnel supported by umbrella method – Case of Maiko Tunnel in Kobe, Japan

Drainage method of the Maiko Tunnel in water-bearing gravel strata
M. Murata, H. Aono, K. Kurokawa & J. Seki

Brazilian experience in jet grouting treatments in difficult tunnels’ construction
G. Guatteri, P. Mosiici, V. Doro Altan & A. Koshima

Porto City Tunnels: Site investigations in urban conditions: Objectives and constraints
I. Pöschl, J. Kleberger & F. Graf

A new theory for steel pipe umbrella design in tunnelling
P. P. Oreste & D. Peila

Crossing of an underground tunnel bored in clayey sand under an old railway tunnel in Madrid
M. Melis, C. Oteo, J. Trabada & P. Sola

</table>
Application of large-scale soundproof dome to tunnel and shaft construction
T.Ohgiya, T.Kawasaki, T.Yamamoto, H.Goshima & T.Yasuoka

NFPA 520 standard for subterranean spaces
J.D.Lake

Monitoring of the Concourse Tunnel at Heathrow Express Terminal 4 station constructed using the NATM
J.P.van der Berg, C.R.I.Clayton, D.B.Powell & M.Savill

Lisbon Metro – Behaviour of a shallow tunnel in stiff clays
P.Malato, J.Torrado da Silva, F.Marques & J.Almeida e Sousa

The requirement of protective measures for buildings affected by ground movements due to shield tunnelling in soft ground
F.Prinzl & A.R.A.Gomes

Building assessment and monitoring during the construction of an underground railway
R.A.Forth & C.B.B.Thorley

Ground movements associated with soft ground tunnelling in Bangkok
P.Noppadol

Ground behavior and settlement control of twin tunnels in soil ground
T.Matsuda, K.Terada, M.Igarashi & K.Miura

Installation effects of HCCP in an overconsolidated clay
J.A.de Mello Jr & A.C.S.Sobral

Advanced monitoring data evaluation and display for tunnels
W.Schubert & A.Steindorfer

6 Small size tunnels

Essential urban tunnel services: View of African metropolis taking South African cities as an example
J.G.McKelvey

Essential urban tunnel services: View of an Asian metropolis, with special reference to Delhi MRTS Project
C.B.K. Rao

Essential urban tunnel services – View of a Latin American metropolis taking the example of São Paulo
T.B.Celestino

Urban tunnelling technology contributing to the development and expansion of the sewerage system in Tokyo – Shield tunnelling and pipe jacking methods
K.Osako

Trenchless technology for utility networks – An important part of the development of mega-cities
D.Stein
Advanced use of small sized tunnels for the development of modern metropolises, taking Paris as an example from Europe

M. Affholder
