Pier Repairs in Mexico ................................................................. 651
DENNIS B. CLARK, Overman Associates, P.C., Virginia Beach, VA; Ing. JOSE
RAMON GONZALEZ De Salceda, A&W Troy de Mexico, Polanco, Mexico;
WILLIAM M. BOONE, Overman Associates, P.C., Virginia Beach, VA

Rehabilitation of a Berthing Structure ........................................ 661
S. GHOSH, Consulting Engineering Services (India) Ltd., New Delhi, India

SESSION 10B
PILE INSPECTION AND MAINTENANCE

The Limnoria Has Landed! ........................................................... 672
SUSAN G. METZGER, Lawler, Matusky & Skelly Engineers, Pearl River, NY;
KARIMA. ABOOD, Lawler, Matusky & Skelly Engineers, Pearl River, NY

Pile Jackets: Issues in Design and Performance .......................... 682
THOMAS J. COLLINS, Collins Engineering, Inc., Chicago, IL; MICHAEL J.
GARLICH, Collins Engineering, Inc., Chicago, IL

Underwater Cracking of Prestressed Concrete Piles ...................... 691
VALERY M. BUSLOV, Han-Padron Associates, Long Beach, CA; RONALD E.
HEFFRON, Han-Padron Associates, Long Beach, CA; MORT ROWGHANI, Port of
Los Angeles, San Pedro, CA; THOMAS E. SPENCER, Blaylock Engineering
Group, San Diego, CA

SESSION 1C
KEY TRANSPORTATION LINKS

Key Harbor and Channel Improvement Projects Underway in the United States:
Planning for the Future World Fleet ........................................... 701
MARK R. POINTON, US Army Corps of Engineers, Alexandria, VA

A Transportation Link in Crisis: The U.S. Inland Waterway System .......... 710
DAVID V. GRIER, US Army Corps of Engineers, Alexandria, VA

Port Access and Productivity: A Systems Approach ........................ 720
RICHARD L. WALKER, US Maritime Administration, Washington, DC; JON S.
HELMICK, US Merchant Marine Academy, Kings Point, NY

U.S. Trade Growth: Are Ports, Rails and Roads Enough? ................... 730
JAMES R. CARMAN, Preinvest, Inc., Annapolis, MD

SESSION 2C
MARINE FENDERING

Ships, Barges, and Fenders: Preventing Things That Go Bump ............. 740
LOUIS R. NUCCI, Nucci Vine Associates, Newburyport, MA

Use of Temperature & Velocity Correction Factors in Establishing Marine Fender
Performance ................................................................. 747
TATEO MURAMATSU, Bridgestone Corporation, Yokohama, Japan; SHIGERU
UEDA, Tottori University, Tottori, Japan
Protective Fender System, Waterfront Park, Louisville, Kentucky ..........................755
McCoy L. Butler, Moffatt & Nichol Engineers, Raleigh, NC; Jeffery G. Sheldon, Moffatt & Nichol Engineers, Raleigh, NC

Composite Fiberglass Pile Dolphins .............................................................................764
John W. Bryan, S.T. Hudson Engineers, Inc., Camden, NJ; Joseph M. Volk, Delaware River & Bay Authority, New Castle, DE

SESSION 3C
SMA L K CRAFT HARBORS AND RECREATIONAL PIERS

State Fish Pier, Gloucester, Massachusetts: Design and Reconstruction of North Wharf ........................................................................................................773

Pier A Replacement Project .........................................................................................783
Anne Siemion, Port of Seattle, Seattle, WA; Todd Nottingham, Peratrovich Nottingham & Drake, Seattle, WA

69th Street Composite Pier Design in Brooklyn, New York ........................................................................................................792
Jonathan Goldstick, Han-Padron Associates, New York, NY; Robert J. Asaro, University of California at San Diego, San Diego, CA

The Rehabilitation of the “Kishon” Fishermen’s Port in the Port of Haifa, Israel ........802
Rami Raviv, R. Raviv - Consulting Engineers Ltd., Haifa, Israel

SESSION 4C
COMPOSITE TECHNOLOGY

High-Strength Fiber-Reinforced Polymer Composites Offer New Significance to Marine Pier Design .........................................................................................812
Dustin Troutman, Creative Protrusions, Inc., Alum Bank, PA

A New Generation of Fiber-Reinforced Polymer Rebars for Marine Construction ......818
Salem Faza, Marshall Industries, Jacksonville, FL; William Mathers, Mathers Engineering Corp., Stuart, FL; Rick Pauer, Reichold Chemicals, Raleigh, NC

Market Advancement for Composite Marine Piling and Timber ................................824
Frank A. March, Seaward International, Inc., Clearbrook, VA; Marie T. Colturi, Seaward International, Inc., Clearbrook, VA

FRP Composite Piling Systems for Waterfront Applications ..................................830
Richard Lambo, US Army Corps of Engineers, Champaign, IL; Thomas Nosker, Rutgers University, New Brunswick, NJ; Piyush Dutta, US Army Corps of Engineers, Hanover, NH; Robert Odello, US Naval Facilities Engineering Service Center, Port Hueneme, CA
SESSION 5C
VESSEL MOORINGS I

Computer Mooring Load Analysis To Improve Port Operations and Safety .............840
JOHN F. FLORY, Tension Technology International, Inc., Morristown, NJ;
STEPHEN P. BANFIELD, Tension Technology International, Ltd., Eastbourne, UK;
ALAN RACTLIFFE, Tension Technology International, Ltd., Stockbridge, UK

The Application of Modeling to Container Ship Mooring Design ......................850
JAMES R. WALKER, Moffatt & Nichol Engineers, Long Beach, CA; RICHARD
WITTkop, Port of Los Angeles, San Pedro, CA; DOUG SETHNESS, Port of Long
Beach, Long Beach, CA; YING-KEUNG POON, Moffatt & Nichol Engineers, Long
Beach, CA

Evaluating Operational Impact of Waves Along Proposed Harbor Piers ...............860
EDWARD F. THOMPSON, US Army Corps of Engineers, Vicksburg, MS;
STANLEY J. BOC, JR., US Army Corps of Engineers, Fort Shafter, HI;
FREDERICK S. NUNES, State of Hawaii, Honolulu, HI

SESSION 6C
VESSEL MOORINGS II

Mooring Dynamics Due to Wind Gust Fronts ............................................870
WILLIAM N. SEELIG, Naval Facilities Engineering Command, Washington, DC;
JOHN HEADLAND, Moffatt & Nichol Engineers, New York, NY

Alternative Mooring and Fender Design To Reduce Container Ship Motions ..........880
YING-KEUNG POON, Moffatt & Nichol Engineers, Long Beach, CA; JAMES R.
WALKER, Moffatt & Nichol Engineers, Long Beach, CA; JOHN HEADLAND,
Moffatt & Nichol Engineers, New York, NY

Design of Anchor Pile for Ship Mooring Facilities ....................................890
CLOVIS L. MORRISON, Morrison & Associates, Baton Rouge, LA

SESSION 7C
TRANSPORTATION - LANDSIDE LINKS

Container Port Throughput Enhancement Using Hub and Shuttle Concepts ...........897
JEFFREY S. HILLER, VZM/TranSystems, Oakland, CA; WILLIAM B.
HUBBARD, SR., SBIR, Sequim, WA

Planning Intermodal Capability at West Coast Container Terminals ..................907
LARRY W. NYE, Moffatt & Nichol Engineers, Long Beach, CA

Heavy Truck Movement Model for the Port of Miami ...................................917
HAITHAM M. AL-DEEK, University of Central Florida, Orlando, FL; GENE S.
JOHNSON, University of Central Florida, Orlando, FL

Alameda Corridor: The Challenge of Regional Mobility ...............................926
KERRY CARTWRIGHT, Port of Long Beach, Long Beach, CA; BRYCE LITTLE,
Moffatt & Nichol Engineers, Carson, CA

xii
SESSION 8C
ENVIRONMENTAL ISSUES I

Innovative Approaches to Environmental Permitting on the Central Artery/Tunnel (CA/T) Project ......................................................... 934
JEFFERY M. PAUL, Parsons Brinkerhoff, Boston, MA; CHARLOTTE C. FLEETWOOD, Parsons Brinkerhoff, Boston, MA

Approaches to Port Compliance with Storm Water Regulations ................................. 944
STACEY CROUCH, Port of Long Beach, Long Beach, CA; BARBARA KLOS, Woodward-Clyde International, Santa Ana, CA; MIKE MILNE, Woodward-Clyde International, Seattle, WA

PIANC and the Environment .................................................................................. 954
ROBERT M. ENGLER, US Army Corps of Engineers, Vicksburg, MS

SESSION 9C
ENVIRONMENTAL ISSUES II

Evaluation of the ChemTech Soil Treatment Process To Clean Up Metals and Hydrocarbon Contaminated Soils ......................................................... 963
ROB STEPHENSON, Klohn-Crippen Consultants Ltd., Richmond, B.C., Canada; VITA YAN, Klohn-Crippen Consultants Ltd., Richmond, B.C., Canada; SENG LIM, Klohn-Crippen Consultants Ltd., Richmond, B.C., Canada; IAN ROKEBY, Klohn-Crippen Consultants Ltd., Richmond, B.C., Canada

Port of Seattle - Southwest Harbor Cleanup and Redevelopment Project: Implementation of Environmental Controls During Construction ......................... 975
ELIZABETH LEAVITT STETZ, Port of Seattle, Seattle, WA; ANDREW GATES, Remediation Technologies, Inc., Seattle, WA

Environmental Assessments To Facilitate Property Acquisitions for a Transportation Corridor Realignment: Case Study in the Port of Los Angeles ............... 984
TIMOTHY MARSHALL, Woodward-Clyde International, Santa Ana, CA; BETSY FOLEY, Port of Los Angeles, San Pedro, CA; DARYL HERNANDEZ, Woodward-Clyde International, Santa Ana, CA

Outlook on Seattle: A Port of Seattle Park with a Community Point of View ................. 994
WILLIAM M. ARMOUR, KPFF Consulting Engineers, Settle, WA; CHARLES SHELDON, Port of Seattle, Seattle, WA; GEORGE V. BLOMBERG, Port of Seattle, Seattle, WA

SESSION 10C
FERRY TERMINALS

Today’s Automobile Ferry Terminal Improvements Solve Tomorrow’s Intermodal Transportation Needs ........................................................................... 1004
ALEXANDRA GLOVER, Washington State Ferries, Seattle, WA; STEPHANIE KIRBY, Washington State Ferries, Seattle, WA; THOMAS J. McCOLLOUGH, CH2M Hill, Bellevue, WA

New Passenger Only Ferry Program Provides Bridge for Puget Sound Commuters ................................................................. 1013
JOEL C. COLBY, Washington State Ferries, Seattle, WA; DOUGLAS R. PLAYTER, CH2M Hill, Bellevue, WA
Design and Construction of Three Ferry Terminals on the Mid-Coast of British Columbia for the New “Discovery Coast Passage” Ferry Route ........................................1023

JOHN S. WOOD, Westmar Consultants Inc., North Vancouver, B.C., Canada;
PETER ACTON, Westmar Consultants Inc., North Vancouver, B.C., Canada;
STANLEY R. COWDELL, Westmar Consultants Inc., North Vancouver, B.C., Canada

Hydro-Bridge: Articulated Bridges for Outer Side (Off-Quay) Access to Vessels.......1033

CHRIS JONES, GHD-Macknight Ltd., Brisbane, Australia

SESSION 1D

COASTAL ENGINEERING

Numerical Modeling of Marine Environmental Changes for the Basic Design of Yongil New Harbor ..........................................................1041

JANG-WON CHAE, JAE-KWI SO, SOK KUH KANG, KYUNG DUCK SUH,
JAE-YOULL JIN and WEON MU JEONG, Korea Ocean Research and Development Institute, Seoul, Korea

Developing and Applying Shallow Draft Harbor Entrance Criteria.................1051

JACK C. COX, Michael Baker Jr. Inc., Alexandria, VA; MARK A. PIRRELLO,
Michael Baker Jr. Inc., Alexandria, VA

Poplar Island Restoration Project: Coastal Engineering Aspects ......................1065

PETER W. KOTULAK, Moffatt & Nichol Engineers, Baltimore, MD; JOHN R.
HEADLAND, Moffatt & Nichol Engineers, New York, NY

SESSION 2D

DREDGING I

Bottom Shear Stress from Propeller Jets....................................................1074

STEPHEN T. MAYNORD, US Army Corps of Engineers, Vicksburg, MS

CHIRP Sonar: A Viable Tool for the Management of Contaminated Sediments and Dredging Activities.......................................................1084

JEFFERY S. BURDICK, Geraghty & Miller, Inc., Mahwah, NJ; RICHARD M.
ROBINSON, Geraghty & Miller, Inc., Mahwah, NJ

A Surveillance System for Dredged Material Disposal..................................1091

STEPHEN D. PACE, Science Applications International Corp., Newport, RI;
DONALD L. DORSON, Bathy Systems, Inc., West Kingston, RI; SCOTT E.
McDOWELL, Science Applications International Corp., Newport, RI

A User-Friendly GIS for Ocean Disposal Management................................1101

SCOTT E. McDOWELL, Science Applications International Corp., Newport, RI;
BRIAN A. MAY, US Army Corps of Engineers, New York, NY; JAMES E.
CLAUSNER, US Army Corps of Engineers, Vicksburg, MS; J. CRAIG SWANSON,

SESSION 3D

DREDGING II

Feasibility Study for Homeporting of Nimitz Class Aircraft Carriers................1111

EDWARD J. SCHMELTZ, Fredric R. Harris, Inc., San Pedro, CA; KEVIN A.
PIERCE, Fredric R. Harris, Inc., San Pedro, CA; C. ALLAN HUBLER, Fredric R.
Harris, Inc., San Pedro, CA
Environmental Impacts of Dredging To Support the Homeporting of a Nimitz Class Aircraft Carrier at Naval Air Station, North Island, Coronado, California

ALAN ALCORN, Moffatt & Nichol Engineers, San Diego, CA

Planning and Design Aspects for the Poplar Island Restoration Project

RICHARD F. THOMAS, Gahagan & Bryant Associates, Baltimore, MD; JOHN R. HEADLAND, Moffatt & Nichol Engineers, New York, NY; FRANK L. HAMONS, Maryland Port Administration, Baltimore, MD; CECILIA DONOVAN, Maryland Environmental Service, Annapolis, MD; RAM K. MOHAN, Gahagan & Bryant Associates, Baltimore, MD

Dredging and Site Engineering Design for the Poplar Island Restoration Project

RICHARD F. THOMAS, Gahagan & Bryant Associates, Baltimore, MD; DENNIS C. URSO, Gahagan & Bryant Associates, Baltimore, MD; RAM K. MOHAN, Gahagan & Bryant Associates, Baltimore, MD

Design of Artificial Islands for Dredged Material Disposal

JOHN R. HEADLAND, Moffatt & Nichol Engineers, New York, NY

SESSION 4D

BREAKWATERS

New Small Craft Harbor for the U.S. Coast Guard

CHRISTOPHER M. CARR, Han-Padron Associates, LLP, New York, NY; DAVID ANDERSON, Han-Padron Associates, LLP, New York, NY; LAZAR LOUNDINE, Han-Padron Associates, LLP, New York, NY

Bell Street Pier Wave Barrier

JEFFERY F. GILMAN, Peratrovich, Nottingham & Drage, Inc., Seattle, WA

Recent Experience: Antifer Cube Units in Breakwater Construction

CHRS JONES, GHD-Macknight Ltd., Brisbane, Australia; JORGE TRINDADE, GHD-Macknight Ltd., Brisbane, Australia; TAE BUM LEE, Hyundai Engineering and Construction Co., Seoul, Korea

Design of a Perforated Breakwater

MICHAEL ISAACSON, University of British Columbia, Vancouver, Canada; JOHN BALDWIN, University of British Columbia, Vancouver, Canada; NORM ALLYN, Westmar Consultants, Inc., North Vancouver, Canada; STAN COWDELL, Westmar Consultants, Inc., North Vancouver, Canada

SESSION 6D

DREDGING III

Navigating the Planning and Implementation Efforts of a Dredging Project Amidst the Myriad of Local, State and Federal Bureaucratic Floating Mines

DOUGLAS A. HOTCHKISS, Port of Seattle, Seattle, WA; D. MICHAEL JOHNS, EVS Environmental Consultants, Seattle, WA; DAVID K. SOIKE, Port of Seattle, Seattle, WA

The Federal Administration's Plan to Expedite Dredging in the Port of New York and New Jersey: Progress of Execution at the Local Level

Proposed Naval Station Container Terminal Dredging & Disposal ...........................................1219
KEVIN A. PIERCE, Frederic R. Harris, Inc., San Pedro, CA; TOM JOHNSON, Port of Long Beach, Long Beach, CA; HANK STEINORTH, Frederic R. Harris, Inc., San Pedro, CA; PATRICIA KNIGHT, Black & Veatch, Long Beach, CA

Dredging and Reclamation for the Development of the Mina Raysut Container Terminal ..........................................................................................................................................................................................1229
BERNARD M. LUBETKIN, Han-Padron Associates, New York, NY; EDWARD AGOGLIA, Han-Padron Associates, New York, NY

SESSION 7D
DREDGING IV

Sediment Management Strategy for the Port of New York and New Jersey ..........................1239
THOMAS H. WAKEMAN III, Port Authority of New York and New Jersey, New York, NY; DENNIS J. SUSKOWSKI, Hudson River Foundation, New York, NY; PETER DUNLOP, Port Authority of New York and New Jersey, New York, NY

Adaptive Dredged Material Discharge for the Port of Miami .............................................1249
JOHN R. PRONI, Atlantic Oceanographic and Meteorological Laboratory, Miami, FL; CHRIS MCArTHUR, US Environmental Protection Agency, Atlanta, GA; GLENN SCHUSTER, US Army Corps of Engineers, Jacksonville, FL

Contaminated Dredged Material Disposal: Approaches and Experience ..........................1258
WALLY LI, Moffatt & Nichol Engineers, Long Beach, CA; CHIMIN CHIAN, Moffatt & Nichol Engineers, Long Beach, CA; JAMES R. WALKER, Moffatt & Nichol Engineers, Long Beach, CA

Port of Oakland Inner Harbor Waterway Design Considerations .................................1268
VLADIMIR SHEPSIS, Pacific International Engineering, Edmonds, WA; R. ANDREWS, Port of Oakland, Oakland, CA; C. HOLLAND, Hartman Consulting Group, San Francisco, CA

SESSION 8D
MILITARY FACILITIES

Combination Breakwater and Pier, Naval Station Everett .............................................1277

Seismic Design Criteria for Navy Piers and Wharves ...................................................1287
JOHN M. FERRITTO, US Naval Facilities Engineering Center, Port Hueneme, CA

Repair of Concrete Drydocks .............................................................................................1297
JOSEPH A. STOCKWELL, Berger/ABAM Engineers, Inc., Federal Way, WA; JOSEPH L. SULLIVAN, Puget Sound Naval Shipyard, Bremerton, WA

Modular Concepts for Rapid Repair of Navy Waterfront Structures ..........................1307
SAM YAO, Ben C. Gerwick, Inc., San Francisco, CA
SESSION 9D

NAVIGATION

Guidelines for Design of Approach Channels
M.W. McBRIDE, HR Wallingford Ltd., Wallingford, UK; J.V. SMALLMAN, HR Wallingford Ltd., Wallingford, UK; S.W. HUNTINGTON, HR Wallingford Ltd., Wallingford, UK

Using DGPS Ship Transit Data for Navigation Channel Design
DENNIS W. WEBB, US Army Corps of Engineers, Vicksburg, MS; RONALD T. WOOLEY, US Army Corps of Engineers, Vicksburg, MS

A Vessel Traffic Simulation Model for the North Sea Channel Area
FRANK HENDRICKX, Policy Research Corp., Antwerp, Belgium; BERT TAEYMANS, InControl Business Engineers, Antwerp, Belgium; MICHEL BOUWMAN, InControl Business Engineers, The Netherlands

The Prediction of Tug Performance To be Used for Port Design Studies
JOHAN H. WULDER, Marine Safety International Rotterdam, Rotterdam, The Netherlands; ARTHUR B. MORRIÉN, Marine Safety International Rotterdam, Rotterdam, The Netherlands

Vessel Access Simulation To Rationalize the Tug Assistance Programme in the Port of El Tablazo, Venezuela
CIRO GUTIÉRREZ NAVARRO, Petrochemical Industry of Venezuela, Maracaibo, Venezuela; CONSTANTIN A. STERE, Haskoning Royal Dutch Consulting Engineers and Architects, Nijmegen, The Netherlands

SESSION 10D

WATERWAYS AND LOCKS

Olmsted Locks and Dam
HOLLY A. GITTINGS, US Army Corps of Engineers, Louisville, KY

Ohio River Main Stem Systems Study: Lock and Dam Risk and Reliability
DAVID M. SCHAAF, US Army Corps of Engineers, Louisville, KY

Mid-Life Retrofit of Welland Canal (1986-91), St. Lawrence Seaway, Canada
MUMTAZ H. REHMAN, Quontacon Associates, Beaconsfield, Canada

Port of Amsterdam: Reconstruction of Entrance Locks
MARCEL A. HERMANS, Dutch Ministry of Transport, Utrecht, The Netherlands
