Probabilistic Safety Assessment and Management

PSAM 4

Proceedings of the 4th International Conference on Probabilistic Safety Assessment and Management, 13-18 September 1998, New York City, USA

Volume 3

Edited by
A. Mosleh and R.A. Bari
CONTENTS

Risk Impacts from Plant and PSA Upgrades
Benefits of Re-drafting and Updating the EDF 1300 MW Nuclear Power Plant PSA of J. Bohunice VI NPP
Vincent Sorel, Corinne Bieder, Gilles Feuillade .................................................. 1475
Level 1 PSA Results for Safety Upgrading of J. Bohunice VI NPP
I. Přiček, Z. Kovács ................................................................................................. 1481
PSA & Backfitting of the Borssele Nuclear Power Plant
M.v.d. Borst, M.F. Versteeg ..................................................................................... 1487
Risk Based Management, Probabilistic Safety Assessment (Living PSA), Total Safety Management – How do they interact?
Hans-Peter Balfanz ................................................................................................. 1494

Probabilistic Methods Applied to Waste Management
Determining the Appropriate Spatial Scale for Managing Environmental Risks
Deborah H. Bennett, William E. Kastenberg, Thomas E. McKone ..................... 1503
Kd Determination Using Fuzzy Sets Theory
Francisco Luiz de Lemos, Terry Sullivan ............................................................... 1509
Management in the Face of the Unknown Known: On the Use of Groundwater Driven Health Risk Assessment in Contaminated Waste Site Management
Reed M. Maxwell, Susan D. Pelmulder, William E. Kastenberg,
Andrew F.B. Tompson ........................................................................................... 1515
Risk Assessment of Radioactive Waste Repositories: A Biased Monte Carlo Simulation for the Transport of Radionuclide Chains
O.F. Smidts, J. Devooght ....................................................................................... 1521

Risk Management in Aviation
Risk-Based Decisionmaking for Aviation Safety Using Bayesian Belief Networks
James T. Luxhøj ...................................................................................................... 1529
Risks to Third Parties in the Vicinity of Airports
E.J. Smith ............................................................................................................... 1535
The Management of Third Party Risk Around a Major Airport
Dr. B.J.M. Ale ........................................................................................................ 1541
Models for the Assessment of Third Party Risk Due to Aircraft Accidents in the Vicinity of Airports
Michel A. Piers .................................................................................................... 1547
(Roundtable) – Risk-Based Analysis of Operational Events
Round Table Discussion on Risk-Based Analysis of Operational Events

On the Interaction of Social Science and Technology in Risk Assessment
On the Interaction of Social Science and Technology in Risk Management
David Okrent ...................................................... 1563
A Systematic, Comprehensive Framework for Environmental Health Risk Management
Gail Charnley ......................................................... 1569
Informing the People’s Discretion About Environmental Risks: Can This Challenge Be Met?
D. Warner North ...................................................... 1576
Stakeholders, Decisions and Risk
Nick Pidgeon .......................................................... 1583

Risk and Safety Based Design-Methodology
Conception Optimization Based on the Definition of Availability Allocations Taken into Account Costs Constraints
Hervé Desille, Fabienne Meunier, Antoine Rauzy, Philippe Thomas .......................... 1591
Structured Design and Assessment of Safety Systems Based on Principles
Stanley D. Spray, J. Arlin Cooper .................................. 1597
The Influence of Probabilistic Safety Assessment on Design-Experience from the BNFL Sellafield MOX Plant
B.R. Martin, A.J. Tilstone .............................................. 1603
Managing Risk as a Resource Using the Defect Detection and Prevention Process
Steven L. Cornford .................................................. 1609

Risk Comparisons in Decision Making
The Problem of Comparability – Making Judgements Based on PSA Results
Michael Knochenhauer ................................................ 1617
A Perspective on Risk in the Chemical Process and Nuclear Fuel Enrichment Industries
Sumeet Chhibber, Roger M. Blond, Rob Woolley ................................................... 1623
S. Hirschberg, R. Dones ............................................... 1629
Incorporating Institutional Issues in Environmental Decision Making  
*Louise L. Wells, William E. Kastenberg* .............................................. 1635

**Licensing and Regulatory Applications of PSA**  
Regulatory Applications of PSA in Finland  
*Lasse Reiman, Reino Virolainen* ...................................................... 1643
The Use of PSA Methods for Licensing and Regulatory Processes at HEW  
*H. Ohlmeyer, B. Schubert* ................................................................. 1649
On Risk Based Regulation  
*Kjell Sandve, Terje Aven* ................................................................. 1654
Insights and Lessons from PSA for Nuclear Power Plants: Experience of the Belgian Regulatory Body  
*P. De Gelder, D. Gryffroy* ................................................................. 1660

**Decision Analysis in Waste Management Applications**  
Development of a Comprehensive Risk Management Program for the Chemical Stockpile Disposal Program  
*G.J. Boyd, M.D. Brandyberry* ............................................................ 1669
On the Need for Policy Regarding Risks Arising Hundreds and Thousands of Years in the Future from Hazardous Waste Disposal Sites and Municipal Landfills  
*Richard Z. Shu, David Okrent* ......................................................... 1675
Application of a Systems-Level Model in Support of Performance-Based Management on the WIPP Project  
*Michael B. Gross, Roger A. Nelson, James Mewhinney, George Basabilvazo* ................................................................. 1681
Importance Measures for Nuclear Waste Repositories  
*Norman A. Eisenberg, Budhi Sagar* ................................................ 1687

(Roundtable) – New Generation HRA Techniques  
A Discussion of New Generation HRA Techniques: Introductory Remarks  
*Ann Ramey-Smith* ................................................................. 1695

**Expert Judgment Methods and Applications 1**  
The Context of the Phase I of the Benchmark Exercise on Expert Judgement Techniques in Level 2 PSA: The JRC FARO L-24 Experiment  
*G. Cojazzi, L. Pinola, U. Pulkkinen* ................................................... 1699
Application of a Formal Expert Judgement Methodology to Forecast Results of a Fuel-Coolant Interaction Experiment  
*Eduard Hofer* ................................................................. 1705
The NNC Expert Judgment Methodology and Its Use in the Prediction of Some Results of the FARO L-24 Test

Dr. I.M. Coe ................................................................. 1711

A Formal Expert Judgement Methodology and its Application to the Prediction of the Results of a Fuel Coolant Interaction Experiment

Urho Pulkkinen, Reino Virolainen ........................................ 1717

Insights from Chemical and Process PSAs

Assessment of Mitigation Features in a Chemical Agent Disposal Facility Using MELCOR

S.E. Bayley ................................................................. 1725

An Alternative Method for Safety Demonstration of Pressure Cartridges (EED)

Aric Dumai, Dov Tzidony, Yair Baruchi ................................ 1731

Integrated Dynamic Decision Analysis of a Gas Drying Plant: Phenomenological Analysis

N. Piccinini, L. Scataglini, F. De Vecchi .............................. 1737

Risk Ranking Methodology for Chemical Release Events

S. Brereton, T. Altenbach .................................................. 1743

Risk Perception and Public Participation

Public Perceptions of Risk Associated with Major Technological Hazards: a Contextual View

Peter Simmons, Gordon Walker, Alan Irwin, Brian Wynne .......... 1751

The Role of Trust and Accountability in Public Perceptions of Risk

Ian H. Langford, Rosemary J. Day, Stavros Georgiou, Ian J. Bateman, R. Kerry Turner, Tim O’Riordan ........................................... 1757

Risk-Informed Public Participation

Robert L. Goble ............................................................ 1762

On Stakeholder Involvement in Environmental Restoration

George Apostolakis, Evaristo Bonano .................................... 1768

Risk Management in Environment, Safety and Health

Multi-attribute Analysis of Alternatives for Hanford Tanks Remediation System

Florinel Morosan, Mujid S. Kazimi .................................... 1777

A Template Approach to Meeting DOE and EPA Requirements for Emergency Management Hazards Assessment Documents

Robert B. Barnett .......................................................... 1785

Risk-Informed Decision Making for Remedial Action

Susan D. Pelmulder, William E. Kastenberg .......................... 1791

Prioritization of Environmental, Safety, and Health Issues at Brookhaven National Laboratory

V. Mubayi, J. Lehner, C.C. Lin, C. Conrad, W.T. Pratt, R.A. Bari .... 1797
## Analysis and Frequency of Aircraft Crashes
Progression and Advancement of Aircraft Crash Hazard Analysis Models  
*Timothy A. Haley, Roy Karimi, Peter G. Prassinos, Kamiar Jamali.*  
Calculation of the Estimated Probability of an Aircraft Crash into a Structure  
*Ronald E. Glaser.*  
Aircraft Crash Hit Analysis of the Decontamination and Waste Treatment Facility (DWTF) at the Lawrence Livermore National Laboratory (LLNL)  
*Chris Y. Kimura, Gregg Brumburgh.*  
Application of Aircraft Crash Hazard Assessment Methods to Various Facilities in the Nuclear Industry  
Aircraft Data Collection and Risk Evaluation for US Army Facilities  
*S.E. Bayley.*

## Risk Considerations in Land Use Planning
Land Use Planning and Risk Consideration – Some Swedish Lessons  
*Hartmut Pauldrach.*  
Legislative Framework and Guidance Procedures for Land-Use Planning in the European Union  
*Michalis Christou, Sam Porter.*  
Expansion of an Oil Refinery and Land Use Planning  
*Ioannis A. Papazoglou, Zoe S. Nivolianitou, Gerasimos S. Bonanos.*  
From ARIPAR Project a Tool to Support Land-Use Planning Activities  
*G. Spadoni, P. Leonelli, D. Egidì.*

## Dynamic Systems Diagnostics
Model-Based Fault Detection and Diagnosis Part A: Methods  
*Dominik Füssel, Rolf Isermann.*  
Model-Based Fault Detection and Diagnosis Part B: Applications  
*Oliver Nelles, Dominik Füssel, Peter Ballé, Rolf Isermann.*  
A Much Faster Than Real Time Approach to Accident Diagnostics, Analysis, and Management (ADAM)  
A Model-Based Probabilistic Approach to Dynamic System Diagnostics  
*Tunc Aldemir, Laurian Dinca.*  
Diagnostic Systems of Programmable Electronic Systems  
*M.J.M. Houtermans, A.C. Brombacher, D.M. Karydas.*
Human Performance Data in Safety Analysis, Management, and Regulation
Consideration of the Effect of Human Error in a Seismic PSA
*Masao Yokobayashi, Tetsukuni Oikawa, Ken Muramatsu* .......................... 1901

Heuristics for Intention Inferencing in Plant Operation
*K. Furuta, T. Sakai, S. Kondo* .................................................. 1907

A Framework for the Identification of Unsafe Actions and Error Forcing Contexts in a Team Setting Using the Dynamic Flowgraph Methodology
*A. Milici, R.J. Mulvihill* .................................................. 1913

Thoughts on Using Human Reliability Insights as a Focus for Regulatory Practices
*Anne Ramey-Smith, John Wreathall* .................................. 1919

Expert Judgment Methods and Applications 2
Joint EC/USNRC Project: results of Expert Judgement Assessments for the Late Health Effects Models
*Mark Little, Colin Muirhead, Louis Goossens, Roger Cooke, Bernd Kraan, Fred Harper* ........................................... 1925

Mathematical Relations for Incorporating Subjective Expertise into Safety Analyses
*J. Arlin Cooper, Timothy J. Ross* ....................................... 1931

Evaluation of Weighting Schemes for Expert Judgment Studies
*L.H.J. Goossens, R.M. Cooke, B.C.P. Kraan* ......................... 1937

Legal Admissibility vis-a-vis Scientific Acceptability of Expert Judgements in Environmental Management
*Alberto A. Léon, Evaristo J. Bonano* .................................. 1943

Transportation Systems Risk Insights
*Scott J. Ferguson* .................................................. 1951

New Requirements for the Building of Reliability in Civil Aviation
*Jean-Remi Massé, Richard L. Horvath* ................................. 1957

Risk and Cost Centered Management of DB's Railworks
*Udo Steininger, Karl Götz, Helmuth Karff* .......................... 1963

Risk Assessment of High Altitude Free Flight Commercial Aircraft Operations
*G.M. Sandquist, D.M. Slaughter, C.Y. Kinura, Dean L. Sanzo* ... 1970

Risk Perception and Risk Management
Understanding the Process and Consequences of Risk Perception
*Lennart Sjöberg* .................................................. 1979

Staking Out Risk Management
*Richard B. Belzer* .................................................. 1985
### Contents

#### Risk Comparison: Uncertainties and Ranking
Elizabeth Paté-Cornell .......................... 1991

#### What Researchers Think They Know About Risk Perception
Branden B. Johnson .......................... 1997

#### External Events in Nuclear Plant PSA
CANDU Design Characteristics in View of External Events Induced Risk
Sun-Koo Kang, Beom-Su Lee .......................... 2001

External Events Analysis of the Ignalina Nuclear Power Plant
J. Augustis, E. Ušpuras .......................... 2007

The Importance of Using Both Probabilistic Models and Physical Deterministic Models in Modeling External Events for a Level 1 PSA
Peter Jacobsson .......................... 2013

Improved methods for Probabilistic Safety Analysis of “Area and External Events”
Anders Angner .......................... 2019

#### Structural Reliability – Pipes
Probabilistic Design of Structures: Example of a Pressure Vessel Design
Mr. Fournier Clair .......................... 2027

Heavy Water Research Reactor Pipe Leak and Rupture Frequency Assessment
Leiming Xing, David H. Johnson, Donald J. Wakefield .......................... 2033

Uncertainty Analysis of Probabilistic Fracture Mechanics Calculations of Piping Failure Probabilities
M.A. Khaleel, F.A. Simonen .......................... 2040

Probabilistic Assessment of the Puncture of Cylindrical Containers
D.R. Christman, R.T. Bailey .......................... 2046

#### Dynamic Systems Risk and Reliability – Methods 1
DDET and Monte Carlo Simulation to Solve Some Dynamic Reliability Problems
S. Marchand, B. Tombuyses, P.E. Labeau .......................... 2055

Interest and Implementation of the Fictitious States Method in Markovian Modeling
Lamine Ngom, André Carbarbey, Jean-Claude Geffroy .......................... 2061

Taking into Account of Dependency Relations in the Monte-Carlo’s Simulation of Non-coherent Fault Trees
Lamine Ngom, André Carbarbey, Claude Baron .......................... 2067

Graph and Algebra of Words: Application to Reliability
Nathalie Bigot, Jérôme Collet, Jean-Francis Michon .......................... 2073
Human and Organizational Factors in Risk Assessment

System Performance Modeling for Quantification of Organizational Factors in Chemical Installations
*I.A. Papazoglou, O.N. Aneziris* ................................................................. 2081

The Interface between the Technical and the Management Model for Use in Quantified Risk Analysis
*Ben J.M. Ale, Jos G. Post, Linda J. Bellamy* ............................................... 2087

An Audit Method for the Modification of Technical Risk Assessment with Management Weighting Factors
*A.R. Hale, F. Guldenmund, L. Bellamy* ..................................................... 2093

Latent Weaknesses in Complex Systems Identification and Quantification
*Mitja Kožuh, Janez Peklenik* ................................................................. 2099

Expert Judgment Methods and Applications 3

Learning from the Past: Revisiting Expert Judgments Related to the Lifesaving Potential of Airbags
*Kimberley M. Thompson, Maria Segui-Gomez, John D. Graham* .................. 2107

Expert Judgement and the Montserrat Volcano Eruption
*Willy Aspinall, Roger M. Cooke* ............................................................. 2113

KEEJAM Expert Judgment Methodology: Application to the Prediction of the Results of a Fuel Coolant Interaction Experiment
*G. Cojazzi, G. Guida, L. Pinola* ............................................................. 2119

A Case Study on Application of Expert Judgment Methodology to HRA of NPP Shutdown Conditions
*Pekka Pyy, Peter Jacobsson* ................................................................. 2125

Reliability Data and Analysis

The Reliability Data Collecting System A Compromise Between Demands of Deterministic and Stochastic Approaches
*Joanna Duda-Gwiazda* ............................................................................. 2133

A Generic Component Reliability Database for Use in Probabilistic Risk Assessment of Soviet-Designed VVER and RBMK Nuclear Power Plants
*Martin A. Stutzke, Tyrone R. Blackburn, Thomas A. Vehec* ......................... 2139

The Significance of Zero Failures and its Effect on Risk Decision Making
*Joseph R. Fragold, Martin L. Shooman* ................................................. 2145

A Database for Reliability Centered Maintenance Management
*R. Righini, A. Bottazzi, C. Fichera, M. Papastathi, L. Perasso* ..................... 2151

Risk Communication and the Media

“The Risk Communication Food Chain”
*Jon Palfreman* ....................................................................................... 2159
Communicating Health Risks Based on Extrapolation Beyond the Bounds of Observation
Roger O. McClellan .......................................................... 2167

The Seven Deadly Environmental Risk Communication Sins
Robert L. Nitschke ............................................................. 2173

The Mass Media and Concerns about Risk: Demon, Angel, or Merely Befuddledly Human?
Branden B. Johnson ......................................................... 2179

Risk-Informed Decision Making
Risk Informed Decision Making – Use of a Simplistic Risk Estimation Procedure
D.J. Hewkin ................................................................. 2183

Uncertainty in PRA and its Implications for Use in Risk-Informed Decision-Making
Gareth W. Parry ............................................................. 2190

Risk Based Regulation under Intentional Uncertainty
Vincent Brannigan, Carol Smidts ............................................ 2196

A New Paradigm to Establish the Safety Basis for Nuclear Explosive Operations
Stewart R. Fischer, Steven Clement, Desmond W. Stack ............. 2202

Author Index ................................................................. 2927
