Contents

Invited Talks

Interacting in Chaos ................................................................. 1
  Dan Jr. Olsen

The Viability of Modelling Socially Organised Activity ....................... 9
  John C. McCarthy

Papers Presented

Deriving Business Object Definitions from User Work Process Models ....... 24
  Keith Butler, Chris Esposito and Ron Hebron

Inference and Information Resources: A Design Case Study ................. 41
  Robert E. Fields and Nicholas A. Merriam

An Ontology for Task World Models .......................................... 57
  Martijn van Welie, Gerrit C. van der Veer and Anton Eliëns

Formal Models for Cooperative Tasks: Concepts and an Application for En-Route Air-Traffic Control ....................................................... 71
  Fabio Paternò, Carmen Santoro and Sophie Tahmassebi

The Role of Formal Proof in Modelling Interactive Behaviour ................. 87
  Richard Butterworth, Ann Blandford and David Duke

Validating Semi-Formal Specifications of Interactors as Design Representations .......................... 102
  Panos Markopoulos, Giorgios Papatzanis, Peter Johnson and Jon Rowson

The Role of Informal Representations in Early Design........................ 117
  Sara Jones and John Sapsford

Pragmatic Formal Design: A Case Study in Integrating Formal Methods into the HCI Development Cycle ................................................................. 134
  Meurig Sage and Chris Johnson

The Role of Verification in Interactive Systems Design ....................... 155
  José C. Campos and Michael D. Harrison

Integrating Rendering Specifications into a Formalism for the Design of Interactive Systems .......................... 171
  Remi Bastide, Philippe Palanque, Duc-Hoa Le and Jaime Muñoz
Practical Dialogue Refinement ................................................................. 191
Kurt R.E. Stirewalt and Gregory D. Abowd

Which Widgets? Deriving Implementations from User-Interface Specifications ...... 206
Andrew Hussey and David Carrington

A Framework for Generating Spatial Configurations in User Interfaces ............ 225
Markus Fischer

Using Model Checking for the Automatic Validation of User Interfaces Systems ... 242
Bruno d'Ausbourg

Specification and Verification of Media Constraints using UPPAAL .................... 261
Howard Bowman, Giorgio P. Faconti and Mieke Massink

Modelling Direct Manipulation with Referent and Statecharts .......................... 278
Hallvard Tretteberg

Integrating Joint Behaviour and Dialogue Description ..................................... 293
Gavin Doherty and Michael D. Harrison

Working Group Discussions
Discussion Topics for the DSV-IS’98 Working Groups ................................. 309
Panos Markopoulos and Peter Johnson

Working Group 1 Report ............................................................................. 312
Michael D. Harrison

Working Group 2 Report ............................................................................. 316
Jon Rowson

Working Group 3 Report ............................................................................. 320
David Duce
