# TABLE OF CONTENTS

**Technical Sessions**  
**Tuesday, July 7, 1998**  
**Volume I**

**Keynote:** DoCoMo's Vision Toward the 21st Century  
Shiro Tsuda, Executive Vice President,  
NTT Mobile Communications Network, Japan  

**Keynote:** Personal Communications from Space - The Future is Now  
Ray Leopold, Vice President & Chief Technical Officer,  
Satellite Communications Group, Motorola, USA

## Session A: Current Systems

<table>
<thead>
<tr>
<th>Session</th>
<th>Title</th>
<th>Authors/Institutions</th>
<th>Page</th>
</tr>
</thead>
<tbody>
<tr>
<td>A-1</td>
<td>Cellular Extension Via Satellite</td>
<td>R. Kerr, J. Sydor, M. Moher, Communications Research Centre, Canada</td>
<td>1</td>
</tr>
<tr>
<td>A-2</td>
<td>Dynamic Service Areas for Group Calls in Cellular Dispatch</td>
<td>A. Pashtan, Motorola, USA</td>
<td>11</td>
</tr>
<tr>
<td>A-3</td>
<td>Quality Maximisation using DCA and Adaptive Handoff Techniques for TDMA Systems</td>
<td>T. Billon, G. Senarath, A. Abu-Dayya, L. Le Bris, Nortel, Canada</td>
<td>18</td>
</tr>
<tr>
<td>A-4</td>
<td>Performance Analysis for Integrated Voice and Data Traffic in Mobile Cellular Radio Networks with Hand-Off</td>
<td>W. Yue, N. Fukui, Konan University, Japan</td>
<td>29</td>
</tr>
<tr>
<td>A-6</td>
<td>An Integrated FEC Code Design for ATM Transmission Via Geostationary Satellite Networks</td>
<td>W. Hamouda, P. McLane, Queen's University, Canada</td>
<td>44</td>
</tr>
</tbody>
</table>

## Session B: Experimental Systems

<table>
<thead>
<tr>
<th>Session</th>
<th>Title</th>
<th>Authors/Institutions</th>
<th>Page</th>
</tr>
</thead>
<tbody>
<tr>
<td>B-1</td>
<td>Performance-Controlled Integrated Adaptive Wireless Communications Systems</td>
<td>W. Ma, D.G. Daut, Rutgers University, USA</td>
<td>51</td>
</tr>
<tr>
<td>B-2</td>
<td>Data Rate Increase in Digital Wireless Communication Systems</td>
<td>G. Núñez, A. Fernández, P. Werheit, J. Casajús, J. Páez, Alcatel, Spain</td>
<td>59</td>
</tr>
<tr>
<td>B-3</td>
<td>A Versatile Multi-Mode Handheld Phone</td>
<td>M. Lee, J. Nisbet, Nortel, USA</td>
<td>71</td>
</tr>
<tr>
<td>B-5</td>
<td>Radio Broadband Delivery on Fiber</td>
<td>B. Davies, J. Conradi, TRLabs, Canada</td>
<td>91</td>
</tr>
<tr>
<td>B-6</td>
<td>Comma, A Communication Manager for Mobile Communications</td>
<td>D. Kidston, J. Black, T. Kunz, M. Nidd, M. Lioy, B. Elphick, M. Ostrowski, University of Waterloo, Canada</td>
<td>103</td>
</tr>
</tbody>
</table>
Session C: CDMA

>1 Capacity Evaluation of Media Access Control Method in DS-CDMA
M. Nagatsuka, Y. Ishikawa, J. Hagiwara, T. Nakamura, S. Onoe, NTT, Japan

>2 Forward Link Design Issues in Multiservice CDMA Wireless Systems
R. Krenz, W. Krzymien, A. Jalali, TRLabs, Canada

>3 Semi-Blind Decorrelating Multi-User Detectors for CDMA: Subspace Methods
A. Hast-Madsen, KJIST, Korea

>4 Coherent Block Demodulation of W-CDMA Packet Data Transmitted over Frequency Selective Fading Channels
S. Abeta, M. Sawahashi, F. Adachi, NTT, Japan

>5 Joint CDMA/TDMA Protocol for Integrated Voice/Data Multiple Access Systems
D. Gingras, S. Lapic, SPAWAR, USA

>6 Decision Feedback Adaptive Combined Space-Time Receiver for Multi-User Interference Rejection in CDMA Systems
A. Legnain, D. Falconer, A. Sheikh, Carleton University, Canada

Session D: Antennas

D-1 Antenna Solutions for KA Band Systems
R. Douville, Communications Research Centre, Canada

D-2 Pre-Slot Selection Antenna Diversity at the Mobile Handset for TDMA Systems
M. Majmundar, SBC Technology Resources, USA

D-3 Efficiency Improvement of Stripline Fed Array
D. Gray, L. Shafai, TRLabs, Canada

D-4 Miniature Dielectric-loaded Personal Telephone Antennas with Low SAR
O. Leisten, B. Rosenberger, Rosenberger Hochfrequenztechnik, Germany

D-5 Smart Antenna Realization of a PCS Band Space Division Multiple Access System
K. Winand, R. Johnston, R. Kelly, E. Tung, TRLabs, Canada

Session E: Modulation/Coding/Equalization

E-1 Performance of Two-Dimensional M-ary Signaling in Fading
X. Dong, N. Beaulieu, P. Wittke, Queen's University, Canada

E-2 Performance of a Low-Complexity Turbo Decoder and its Implementation on a Low-Cost, 16-Bit Fixed-Point DSP
K. Gracie, S. Crazier, A. Hunt, J. Lodge, Communications Research Centre, Canada

E-3 Adaptive Viterbi Decoding for ARQ and Reduced Complexity Decoding
B. Harvey, Florida State University, USA

E-4 Channel Decoding Short Frames of Voice Data
F. Ross, N. Van Stralen, M. Grabb, S. Koch, R. Zinser, J. Anderson, General Electric, USA

E-5 Blind Equalization and Interference Cancellation
S. Sankaran, L. Beex, Virginia Tech, USA

E-6 Adaptive Equalization of \(\pi/4\)-QPSK Signals on Frequency Selective Fading Channels Using a Maximum Signal-to-Interference Ratio Criterion
D. Boudreau, C. Dubuc, Communications Research Centre, Canada
Session F : Future Systems

F-1 Hyperactive Chipmunk Radio ................................................................. 279
G. McGibney, S. Nichols, TRLabs, Canada

F-2 Authentication Scheme for Global Roaming on Digital Mobile Communications .................. 288
J. Park, K. Lee, ETRI, Korea

F-3 Performance of Digital FM Radios in a Very High Frequency Fading Environment ........... 294
N. Chan, C. Jansen, Computing Devices, Canada

Session G : Source Compression/Encryption

G-1 Chaotic Dynamic Systems for Cryptography: Part II ............................................. 308
C. Zarowski, Queen's University, Canada

G-2 On a Pitch Search with the Quantization Error Decimation of Speech Signal in CELP Type Vocoder ............................................................... 321
J. Bae, M. Bae, Soongsil University, Korea

G-3 High Speed Encryption Using a 2-D Cellular Automata Implemented in a Single FPGA .... 325
R. Mason, C. Zhang, S. Lee, M. Deng, Carleton University, Canada

Session H : CDMA

H-1 Model & Approximation of Silence Reallocation in a Code Division Multiple Access System .......... 332
M. Watson, T. Mitchell, North Carolina State University, USA

H-2 Novel Spreading Scheme for DS/CDMA Systems with Blind Interference Suppression .... 344
F. Hui, T. Lok, Chinese University of Hong Kong, Hong Kong

H-3 Performance of Direct Spread and Multicarrier Forward Link Designs of cdma2000 Proposal ........ 354
A. Jalali, Nortel, USA

H-4 Multi-user Detection for Multi-rate Multi-code CDMA using FWT for Mobile and Personal Communications ............................................................ 361
M. Madkour, S. Gupta, Southern Methodist University, USA

Session I : Protocols

I-1 Towards Enhanced Usability for Mobile Devices with the Wireless Mark-Up Language .... 371
J. Herstad, D. Van Thanh, E. Kristensen, University of Oslo, Norway

I-2 Performance of an Improved MAC Protocol for Reverse Link Short Packet Data Transmission in UMTS ................................................................. 379
R. Hang, W. Krzymien, C. Despins, TRLabs, Canada

I-3 All-Successful Channel Occupations in PRMA-DCA Mobile Wireless PCS. A Software-Agent Approach ................................................................. 398
M. Toloo, S. Abu-Hakima, H. Mouftah, National Research Council, Canada

Session J : Modulation/Coding/Equalization

J-1 Time-Shift-Keyed Equicorrelated Signal Sets for Impulse Radio M-ary Modulation .... 404
F. Ramírez-Mireles, R. Scholtz, University of Southern California, USA

J-2 A Study on Phase Error Compensation for Burst OFDM Signal .................................. 409
N. Shirakata, H. Hayashino, Y. Harada, Matsushita Electric, Japan

J-3 The Performance of a Spectrum-Efficient Multi-Carrier Transmission System with Phase and Timing Offsets ......................................................... 418
M. Sablatash, W. McGee, J. Lodge, Communications Research Centre, Canada
Technical Sessions
Wednesday, July 8, 1998
Volume II

Keynote: A GBIT in Your Pocket
Peter Cochrane, Head of Research, British Telecom Laboratories, U.K.

UNAVAILABLE AT TIME OF PRINTING

Session K: Channel/Combining

K-1 Models of Fade Duration Distributions
P. Vigneron, K. Moreland, S. Kularatna, Communications Research Centre, Canada

K-2 Effect of Nakagami Fading and Branch Correlation on a Macrodiversity Cellular System
V. Aalo, J. Zhang, G. Efthymoglou, Florida Atlantic University, USA

K-3 Field Strength Measurements to Support Rician Propagation Modeling in the 1.8 to 2.0 GHz Frequency Spectrum
F. Bohn, P. Major, H. Bock, L. Taylor, Telos Federal Systems, USA

K-4 SNR Analysis of DMT Using the Parametric Channel Model
S. Sandhu, A. Paulraj, Stanford University, USA

K-5 Ship Compartment Channel Effects on Wireless FM Speech Performance
E. Quincy, US Dept. of Commerce, USA

Session L: Wireless ATM

L-1 Performance of TCP over Wireless ATM Networks
S.J. Shafaeddin, A. Fapojuwo, Nortel, Canada

L-2 Data Link Control for Indoor Wireless ATM Networks
J. Meierhofer, Swiss Federal Institute of Technology, Switzerland

L-3 Hand-over in Wireless ATM: Signalling and Simulation Results
M. Teughels, E. Van Lil, A. Van de Capelle, ESAT-TELEMIC, Belgium

L-4 Wireless ATM Architectural Standards Issues
A. Arunachalam, Nortel, USA

L-5 Wireless ATM-based Multi-code CDMA Transport Architecture for MPEG2 Video Transmission
P. Chang, G. Shiao, National Chiao-Tung University, Taiwan

Session M: Experimental System/Location

M-1 Locating an IS-95 Mobile Using Its Signal
G. Messier, M. Fattouche, B. Petersen, TRLabs, Canada

M-2 Direction-of-arrival Determination using a 3-axis Crossed Array and the EM-algorithm
R. Eckhoff, H. Hanebrekke, Norwegian University of Science & Technology, Norway

M-3 Global versus Local Mobility Tracking Strategies. Performance Analysis Using SANs
V. Casares Giner, J. Mataix, P. Garcia, Universidad Politecnica de Valencia, Spain

M-4 A Statistical AVL Technique Using LMMSE Estimates and Time Diversity
I. Nomay, J. Dunham, Southern Methodist University, USA

M-5 QoS Satisfaction in Wireless Systems Using Mobile Agents
P. Dini, Computer Research Institute of Montreal, Canada
Session N: Framework/Spread Spectrum

N-1 The Wireless Application Framework - An Infrastructure to Support Wireless Applications Development.................................................................611
D. Wolf, Lucent Technologies, USA

N-2 A Hybrid Multi-user Detection Scheme for CDMA Systems.................................................................622
E. Rezaaifar, A. Elhakeem, Concordia University, Canada

N-3 Optimum Detection of Spread Spectrum Signals.................................................................639
Y.T. Chan, H. So, Q. Yuan, R. Inkol, Royal Military College, Canada

N-4 Design Considerations for Frequency Hoppers Against Follower Jammers .................................................................648
B. Felstead, Communications Research Centre, Canada

N-5 Multi-rate OFDM by Digital Frequency Shaping .................................................................655
A. El-Arabawy, S. Gupta, Southern Methodist University, USA
