## Contents

Preface ........................................................................................................ xi

**Overview**

Needs and Opportunities for NDE in Ceramic Processing .................. 1
   C.H. Schilling and J.N. Gray

**Suspension and Green-Body Characterization**

Ultrasonic Wave Interactions with Colloidal Mixtures .................. 23
   R. Challis and J. Tebbutt

Ultrasonic Array Sensing for In-Situ NDE in Extrusion Process
   for Green Ceramics ............................................................................ 33
   T. Watanabe, T. Aizawa, and J. Kihara

Recent Advances in X-ray Characterization of Composites and
   Tape Cast Ceramics ............................................................................ 45

Fine-Scale Resolution of Microscopic Features by X-ray
   Computed Tomography: An Economical Approach .................... 59
   S.P. Huss, J.N. Gray, and C.H. Schilling

Models Relating Ultrasonic Velocity to the Microstructures of
   Green and Sintered Ceramics: A Review ........................................ 67
   V.J. García and C.H. Schilling

**Characterization of Sintered Ceramics and
   Composites**

*In situ* Measurement of Ultrasonic Sound Wave Velocity during
   Sintering of Ceramic Powders ......................................................... 85
   L.P. Martin, D. Dadon, and M. Rosen

Relationship Between Specific Surface Area and Ultrasonic
   Sound Wave Velocity in Sintered Ceramic Powders .................... 97
   L.P. Martin, D. Nagle, and M. Rosen
Ultrasonic NDE of Fine Ceramics with Reference Test Pieces ............................ 109
Yasushi Ikeda, Yasutoshi Mizuta, Katsuhiro Onda, Hitoshi Domon, and Takashi Udagawa

Nondestructive Evaluation of Woven Fabric Reinforced Ceramic Composites ............................. 121

Ultrasonic Characterization of Microwave-Joined Silicon Carbide/Silicon Carbide .............................. 137
Michael B. House and Paul S. Day

Nondestructive Evaluation of Brittle-Matrix Composites During Loading by Electrical Resistance Measurement ............................. 145
Shoukai Wang, Xuli Fu, and D.D.L. Chung

Surfaces and Films
Quantitative Nondestructive Evaluation of Surface Roughness Using Ultrasonic Reflectivity and Surface Wave Velocity ............................. 159
Tatsuhiko Aizawa and Ikuo Ihara

Microscopic Characterization of Machined High-Performance Ceramics Using Acoustical, Optical, and Mechanical NDT Techniques ............................. 171
V. Scherer, S.U. Fassbender, G. Weides, and W. Arnold

Acoustic Spectro-Microscopy for Quantitative Nondestructive Evaluation of Ceramic Coated Materials ............................. 183
T. Aizawa

Surface and Subsurface Flaw Detection in Silicon Nitride Using Acoustic Microscopy ............................. 195
Pramod Khandelwal

Grain Boundary Characterization and Evaluation by Acoustic SpectroMicroscopy ............................. 205
Y. Xu and T. Aizawa

Process Control of CVD Fiber Coatings ............................. 217
J.G. Jones, P.D. Jero, and D.J. Kent

Piezospectroscopic Characterization of Thermal Barrier Coatings ............................. 229
M.J. Lance, J. Allen Haynes, W. Roger Cannon, and Mattison K. Ferber

Advanced Characterization Techniques
Ultrasonic Velocity Measurement of Molten Liquids ............................. 241
R. Daniel Costley, W.M. Ingham, and Jason A. Simpson
