The first European Symposium on Enzymes and Grain Processing

Proceedings of ESEGP-1
Noordwijkerhout
The Netherlands
December 2-4, 1996

Edited by:
S.A.G.F. Angelino
R.J. Hamer
W. van Hartingsveldt
F. Heidekamp
J.P. van der Lugt

TNO Nutrition and Food Research Institute
Zeist, The Netherlands, 1997
CONTENTS

Preface

LECTURES

1 ENDOWNOUS ENZYMES IN WHEAT

Endogenous enzymes-the heroes or villains of cereal quality 13
J.E. Kruger

Arabinoxylan - degrading enzymes in different tissues of wheat grain 23
E. Bonnin, A. Le Goff, L. Saulnier, M. Chaurand, J.-F. Thibault

Polysaccharide hydrolysing enzymes from wheat (Triticum aestivum) flour 34
G. Cleemput, J.A. Delcour, M. van Oort and M. Hessing

Mode of action of some microbial and endogenous arabinoxylan-degrading enzymes 42

2 ENZYMES AND MALT QUALITY

Malt endoproteinases; their synthesis and inactivation during malting and mashing 54
B.L. Jones

Influence of germination temperature on the enzymes of green malt 65
D.L. Griggs and W.B. Oliver

The interaction between hydrolases and their substrates during malting and brewing: some recent studies 74
R E. Muller, G. S. Chandra, J. Moore, M. O. Proudlove and C. W. Bamforth

Large scale purification and analysis of the partial structure of limit dextrinase 87
V. Planchot, M. Kristensen, I. Svendsen and B. Svensson

3 ANALYSIS AND STANDARDIZATION OF ENZYME ACTIVITY

Enzymic modification and measurement of plant polysaccharides 96
B. V. McCleary
Simple approaches for identification of baking active xylanases
L. Popper

Chromogenic substrates of endoglycanases: preparation and application
D. Mislovicová, O. Marković and P. Biely

Automated analysis of enzymes
W. van Hartingsveldt, P. Bosveld, W.A.C. Somers and J.P. van der Lugt

4 ENZYMES AS PROCESSING AIDS

Trichoderma and Aspergillus as sources of cell wall degrading enzymes for cereal processing

Effects of cell wall degrading enzymes on the microstructure of cereals in baking and feeding applications
K. Autio, T. Parkkonen and T. Juokselahti

The application of enzymes in baking
J.H.G.M. Mutsaers

Application of oxidoreductases in baking: impact on gluten structure and dough rheology
J.P. van der Lugt, W.A.C. Somers, W. Lichtendonk en R. Orsel

Xylanases in baking
B. G. Sproßler

Lipoxygenases and breadmaking
R. Casey

Peroxidases in breadmaking
M. van Oort, H. Hennink and H. Moonen

Effect and functionality of lipases in dough and bread
C. H. Poulsen and J. Borch Søe

Cleaning baked wheat starch deposits using enzymes
R.A. Din and M.R. Bird
5 NEW DEVELOPMENTS IN ENZYME PRODUCTION
- SAFETY AND LEGISLATION

Protein engineering investigations of structure-function relationships in barley α-amylase and the inhibiton by barley α-amylase/subtilisin inhibitor
B. Svensson, I. Matsui, T. Gottschalk, N. Juge, D. Tull and K.W. Rodenburg

Improved production of enzymes by genetic modification of the filamentous fungus Aspergillus

Complementation of the malt enzyme spectrum by molecular breeding
L. Mannonen, A. Ritala, A.M. Nuutila, K. Aspegren, T.H. Teeri and V. Kauppinen

Enzyme allergy and the safe use of enzymes in grain processing
T.B. Sorensen

Legislations in the European Union covering the application of enzymes in food
D. Praaning

POSTER PRESENTATIONS

Lipases in baking: new approaches to a mechanistic understanding
J. Borné, A.-C. Eliasson, J.Q. Si, L. Dybdal

Determination of acid and alkaline phosphatase activites in wheat and rye
B. Fretzdorff and A. Völkers

Investigation of structure-mechanical properties of flour-water suspension
R. Grikštas and A. Baltusnikiene

Use of cell-wall degrading enzymes in wheat bread baking
H. Härkönen, T. Laurikainen, K. Autio and K. Poutanen

Purification and partial characterization of low MW barley and malt proteins that inhibit malt endoproteinases
B.L. Jones

Impact of a xylanase on wheat glutenin structure
Marcel Kelfkens, August C.A.P.A. Bekkers, Roel Orsel, Steven A.G.F. Angelino and Rob J. Hamer
Air classification of whole-grain flour from different types of barley
A. Lindström and P. Åman

Effects of pericarp \( \alpha \)-amylase on the Hagberg falling number of
UK wheat (\textit{Triticum aestivum}) grain
G.D. Lunn, P.S. Kettlewell, B.J. Major, R.K. Scott

\( \alpha \)-Amylase activity of wheat varieties in relation with the composition of gluten proteins
\textit{M. Menkovska, M. Zezelj and D. Knezevic}

A novel oxidative enzyme which gives improved flour dough and bread characteristics
\textit{C. H. Poulsen, P. B. Høstrup and J. Borch Søe}

Quality indicators in grain storage
\textit{N. Shah, K.V. Venkatesh}

Activities of carbohydrate degrading enzymes during barley malting
\textit{K. Stenholm, H. Kangas and K. Pietilä}

Use of dynamic rheology to investigate effects of different oxidoreductases for baking
\textit{P. Wagner}
