WATER RESOURCES ENGINEERING 98

Volume 1

PROCEEDINGS OF THE INTERNATIONAL WATER RESOURCES ENGINEERING CONFERENCE

SPONSORED BY THE
Water Resources Engineering
Division of the American Society of Civil Engineers

CO-SPONSORED BY THE
U.S. Geological Survey
U.S. Environmental Protection Agency, Wetlands Division

HOSTED BY THE
West Tennessee Branch, ASCE
Ground Water Institute, University of Memphis

IN COOPERATION WITH THE
Alabama Water Environment Association
American Fisheries Society
American Society of Agricultural Engineers
Arkansas Water Resources Center
California Department of Water Resources
City of Memphis, Tennessee
International Association for Hydraulic Research
International Association of Hydrological Sciences
International Water Resources Association
Society of American Military Engineers
U.S. Army Corps of Engineers

August 3–7, 1998
Memphis, Tennessee

EDITED BY
Steven R. Abt, Jayne Young-Pezeshk and Chester C. Watson

American Society of Civil Engineers

1801 ALEXANDER BELL DRIVE
RESTON, VIRGINIA 20191–4400
MINI-SYMPOSIA ON BRIDGE SCOUR  
CHAIR: JORGE. E. PAGAN-ORTIZ, FEDERAL HIGHWAY ADMINISTRATION  

SESSION BS-1  
Scour Countermeasures I  
Sponsored by Task Committee on Bridge Management for Scour Safety  
Moderator: Richard L. Voigt, University of Minnesota  

Status of the Scour Evaluation of Bridges over Waterways in the United States .......... 2  
Jorge E. Pagan-Ortiz, Federal Highway Administration  

Bridge Scour and Stream Instability Countermeasures ........................................ 5  
P. F. Lagasse, M. S. Byars, and L. W. Zevenbergen, Ayres Associates  

Cable-Tied Blocks as an Alternative for Protecting Bridge Piers Against Scour  
under Mobile-Bed Conditions .................................................................................. 15  
Carlos Toro-Escobar, Richard Voigt, Jr., and Gary Parker, University of Minnesota  

SESSION BS-2  
Scour Countermeasures II  
Sponsored by Task Committee on Bridge Management for Scour Safety  
Moderator: J. Sterling Jones, Federal Highway Administration  

From Art to Science: Bridge Scour Countermeasures .............................................. 21  
Lisa M. Fotherby, Inter-Fluve, Inc.  

Flow Modification Techniques to Control Pier Scour .............................................. 27  
M. Leonard Oppenheimer, Polygon  

Overview of the July 1997 Spring Creek Flood-Fort Collins, Colorado ..................... 33  
J. R. Richardson, University of Connecticut, and F. L. Ogden, University of  
Missouri - Kansas City  

Sacrificial Piles and Iowa Vanes as Pier Scour Countermeasures ............................... 39  
Bruce W. Melville, Anna C. Hadfield, and Christine S. Lauchlan, University of  
Auckland - New Zealand  

SESSION BS-3  
Scour Countermeasures III  
Sponsored by Task Committee on Bridge Management for Scour Safety  
Moderator: Jorge E. Pagan-Ortiz, Federal Highway Administration  

Impact of Scour Monitoring and Instrumentation in the United States ....................... 45  
A. Ginsberg, Federal Highway Administration, and J. D. Schall, Ayres  
Associates
Caltrans Countermeasures and Their Costs ................................................................. 51
Catherine Avila, Steve Jaques, and Paul Davies, Caltrans

Scour Monitoring of the Woodrow Wilson Bridge .................................................. 57
Beatrice E. Hunt, Hardesty & Hanover, LLP; Louis N. Triandafilou, FHWA,
Paul A. Carreras Jr., Virginia DOT; David A. LaBella, Maryland SHA; and

SESSION BS-4
Tidal Scour I
Sponsored by Task Committee on Bridge Management for Scour Safety
Moderator: Stanley R. Davis, Maryland State Highway Administration

Federal Highway Administration Concept for Designing and Evaluating Tidal
Influenced Bridges for Scour ......................................................................................... 63
Johnny L. Morris, Ayres Associates, and Jorge E. Pagan-Ortiz, Federal
Highway Administration

Tidal Hydraulic Modeling for Bridges ........................................................................ 68
Lyle W. Zevenbergen, Peter F. Lagasse, and Everett V. Richardson, Ayres
Associates

A Simple Interactive Computer Program for Routing Tidal Flow Through Bridges ...... 74
Raja Veeramachaneni, Fred Chang, and Stanley R. Davis, Maryland State
Highway Administration

Evaluating Existing Tidal Bridges in Virginia For Scour ............................................. 80
James C. Filson, II, T. Y. Lin International, and William S. Springer,
Dewberry and Davis

SESSION BS-5
Tidal Scour II
Sponsored by Task Committee on Bridge Management for Scour Safety
Moderator: Michael A. Ports, Parsons Brinckerhoff Quade & Douglas, Inc.

Local Scour Under Tidal Flow Conditions ................................................................ 86
D. Max Sheppard and Edward Albada, University of Florida

Sensitivity of Currents and Water Elevations in Tidal Waters to Storm Surge
Parameters ................................................................................................................... 92
D. Max Sheppard and Athanasios Pritsivelis, University of Florida

Bridge Scour Assessments Following Hurricane Danny in Southern Alabama .......... 98
Stephen A. Simpson, Leon Pinkston, Alabama Department of Transportation,
and Michael A. Ports, Parsons Brinckerhoff Quade & Douglas, Inc.

Runup of Wind Waves on Riprap ................................................................................ 104
Donald L. Ward, U.S. Army Corps of Engineers - WES

SESSION BS-6
Scour Risk, Reliability, and Uncertainty
Sponsored by Task Committee on Bridge Management for Scour Safety
Moderator: Peggy A. Johnson, The Pennsylvania State University

Fault Tree Analysis of Bridge Scour ........................................................................... 110
Peggy A. Johnson, The Pennsylvania State University

vi
Estimating the Risk of Scour Vulnerable Bridges
Stuart M. Stein, G. Kenneth Young, and David R. Pearson, GKY & Associates, Inc., and Roy E. Trent, Federal Highway Administration

Design and Construction of the First Bored Tunnel Under the Nile River
Michael A. Ports and Conor Shea, Parsons Brinckerhoff Quade & Douglas, Inc.

SESSION BS-7
Unknown Foundations
Sponsored by Task Committee on Bridge Management for Scour Safety
Moderator: Edward J. Kent, Earth Tech

Nondestructive Assessment of Unknown Bridge Condition
Paul S. Fisk, NDT Engineering, Inc.

Dispersive Wave Methods for Unknown Pile Lengths
J. Darrin Holt, FDH, Inc.

NCHRP 21-5 Research Results on Determination of Unknown Bridge Foundation Depths
Marwan F. Aouad and Larry D. Olson, Olson Engineering, Inc.

Evaluating Unknown Bridge Foundations: It is Worth It?
William A. Horne, Clough, Harbour & Associates LLP

SESSION BS-8
Complex Scour I
Sponsored by Task Committee on Bridge Management for Scour Safety
Moderator: David Froehlich, Parsons Brinckerhoff Quade & Douglas, Inc.

Scour Measurements Under Ice
Leonard J. Zabilansky, U.S. Army Corps of Engineers - CRREL

Computer Model for Prediction of Scour at Bridges Affected by Large Woody Debris
N. P. Wallerstein and C. R. Thorne, University of Nottingham - United Kingdom

SESSION BS-9
Complex Scour II
Sponsored by Task Committee on Bridge Management for Scour Safety
Moderator: Catherine Crossett-Avila, Caltrans

Effects of Pier Shape On Local Scour
Bruce W. Melville, University of Auckland - New Zealand

Maryland SHA Procedure for Estimating Scour at Bridge Abutments, Part 2: Clear Water Scour
Fred Chang and Stanley Davis, Maryland State Highway Administration

Local Scour Increment by Successive Bridge Construction
This chapter appears in the “Additional Papers” section; see page xxxvii.

Abutment Scour in Compound Channels for Variable Setbacks
T. W. Sturm and A. Chrisochoides, Georgia Institute of Technology
SESSION BS-10
Complex Scour III
Sponsored by Task Committee on Bridge Management for Scour Safety
Moderator: Catherine Crossett-Avila - Caltrans

Testing Abutment Scour Model.................................................................180
G. Kenneth Young, Xibing Dou, Kamal Saffarinia, GKY & Associates, Inc.,
and J. Sterling Jones, Federal Highway Administration

HEC-RAS Hydraulic and Scour Analysis of Ten Mile River Bridge Under the
Caltrans Seismic Retrofit Program ..........................................................186
Ejaz Mohammad and David T. Williams, WEST Consultants, Inc., Catherine
Crossett-Avila, and Dennis McBride, Caltrans

Scour at Complex Pier Geometries .........................................................192
D. Max Sheppard, University of Florida, and J. Sterling Jones, Federal
Highway Administration

Using a 3-D Model To Predict Local Scour..............................................198
Xibing Dou, G. Kenneth Young, and Stuart M. Stein, GKY & Associates; and
J. Sterling Jones, Federal Highway Administration

Innovative Instrumentation Techniques for Detecting and Measuring the Effects
of Sediment Scour Under Ice .................................................................204
N. E. Yankielun and L. J. Zabilansky, U.S. Army Corps of Engineers -
CRREL

SESSION BS-11
Bridge Scour Field Measurements I
Sponsored by Task Committee on Bridge Management for Scour Safety

Scour Measurements at Contracted Highway Crossings in Minnesota, 1997........210

The Collection of Clear-Water Contraction and Abutment Scour Data at Selected
Bridge Sites in the Coastal Plain and Piedmont of South Carolina.................216

Rapid-Estimation Method for Assessing Scour at Highway Bridges .................222
Stephen R. Holnbeck, U.S. Geological Survey

SESSION BS-12
Bridge Scour Field Measurements II
Sponsored by Task Committee on Bridge Management for Scour Safety

Hydraulic Evaluation of I-65 at the Alabama River Peninsula ........................228
John Curry and Leon Pinkston, Alabama Department of Transportation

Detail Scour Measurements Around a Debris Accumulation ..........................234
David S. Mueller, U.S. Geological Survey; and Arthur C. Parola, University
of Louisville
Numerical Simulation of Flow Patterns at a Bridge with Debris 
Arthur C. Parola Jr., Sridhar Kamojjala, University of Louisville; 
John E. Richardson, Flow Science, Inc., and Michael W. Kirby, PDR 
Engineers, Inc.

Detecting Bridge Scour by Measuring the Thermal Variation Across the 
Stream Bed 
Charles V. Camp and Shahram Pezeshk, University of Memphis; and 
Terry D. Leatherwood, Tennessee Department of Transportation

SESSION BS-13 
Scour on Rock and Cohesive Soils I 
Sponsored by Task Committee on Bridge Management for Scour Safety 
Moderator: Albert Molinas, Hydraul-Tech

Effect of Cohesion on Abutment Scour 
Albert Molinas, Colorado State University, Nagy G.Y. Reiad, Water Research 
Center, Hydraulics Institute-Egypt; and J. Sterling Jones, Federal Highway 
Administration

Proposed Pier Scour Procedure for Rock Formations 
George W. Annandale, Golder Associates, Inc., and Steve P. Smith, URS 
Griener

Time to Scour Experiments as an Indirect Measure of Stream Power Around 
Bridge Piers 
David A. Bertoldi, GKY & Associates; and J. Sterling Jones, Federal 
Highway Administration

The Erodibility Index: Practical Aspects 
George W. Annandale, Golder Associates, Inc.

SESSION BS-14 
Scour on Rock and Cohesive Soils II 
Sponsored by Task Committee on Bridge Management for Scour Safety 
Moderator: Larry A. Arneson, Federal Highway Administration

Effect of Clay Content on Bridge Scour 
Albert Molinas, Colorado State University, and Ahmad Abdeldayem, 
Egyptian Environmental Affairs Agency

Pier Scour Depths Affected by Clay in Mississippi 

Pier Scour in Montmorillonite Clay Soils 
Albert Molinas, Colorado State University, Magdy Hosny, International 
Center for Water Research; and J. Sterling Jones, Federal Highway 
Administration

Local Scour at Bridge Piers in the Cohesive Soil in the Yellow Sea 
This chapter appears in the “Additional Papers” section; see page xxxvii.
SESSION BS-15
Stream Stability I
Sponsored by Task Committee on Bridge Management for Scour Safety
Moderator: Pete F. Lagasse, Ayres Associates

Alluvial Fan Dynamics-Hazards to Highways .................................................... 298
S. A. Schumm and Pete F. Lagasse, Ayres Associates

Gravel Mining Impacts on San Benito River, California ................................. 304
Michael D. Harvey, Mussetter Engineering, Inc. and Thomas W. Smith, Ayres
Associates

SESSION BS-16
Stream Stability II
Sponsored by Task Committee on Bridge Management for Scour Safety
Moderator: Pete F. Lagasse, Ayres Associates

Hydraulic Design of Bridge with Erodible Road Embankments ......................... 310
Howard H. Chang, San Diego State University, and Jack Abcarius, T.Y. Lin
International

Comparison of Erosion and Channel Characteristics ......................................... 315
Gene W. Parker, U.S. Geological Survey

Investigation of Velocity Patterns Under a Bridge Deck in a Pressure
Flow Condition ........................................................................................................ 320
Christopher I. Thornton, Colorado State University, and Larry A. Arneson,
Federal Highway Administration

Pier Scour on Slightly Skewed Double Bridges .................................................... 326
D. A. Lyn, E. Neseem, T. Cooper, A. R. Rao, and A. Altschaeffl, Purdue
University

MINI-SYMPHOSIUM ON STREAM BANK PROTECTION
CHAIR: DAVID S. BIEDENHARN, U.S. ARMY CORPS OF ENGINEERS - WES

SESSION SP-1
Streambank Protection, Case Studies I
Sponsored by U.S. Army Corps of Engineers
Moderator: David Biedenharn, U.S. Army Corps of Engineers - WES

Case Histories in Soil Bioengineering Streambank Protection .......................... 334
Robbin B. Sotir, Robbin B. Sotir & Associates

Bioengineered Bank Stabilization on the Little Miami River ............................ 340
Lisa M. Fotherby, Todd R. Hoitsma, and Dale E. Miller, Inter-Fluve, Inc.

New Adventures in Bioengineering, Willow Curtains and Willow Poles ............ 346
David L. Derrick, U.S. Army Corps of Engineers - WES

Utilization of Natural Vegetation Groins as a Bank Protection Measure .......... 352
Shoji Fukuoka, Hiroshima University - Japan
Pore Pressure and Bank Stability: The Influence of Matric Suction ...........................................358
Andrew Simon and Andrea Curini, USDA - Agricultural Research Service

A 1995 Bank Erosion Survey Along the Illinois Waterway ...................................................364
T. W. Soong, N. G. Bhowmik, and M. Bera, Illinois State Water Survey

The Mechanism of Bank Caving of Lower Yantze River .....................................................370
Yin-Chuan Chen, Hydraulic Bureau of Nanjing and Xing-Xiang Zhou, Management Department of Yantze River of Nanjing Reach-China

Monitoring & Modeling Streambank Subsurface Water Conditions in North Queensland, Australia
This chapter appears in the “Additional Papers” section.

Remediation of HAZWOPER Floodplains, Wetlands, & Streambanks .....................................376

Restoration Techniques for Urban Streams ...........................................................................381

Bank Stabilization Experience on the Middle Rio Grande .....................................................387
Drew C. Baird, U.S. Bureau of Reclamation

Soil-Cement for Channel Bank Stabilization ............................................................................393

Nontraditional Erosion Control Projects Constructed on the Missouri River ..................399
D. L. LaGrone and J. I. Remus II, U.S. Army Corps of Engineers

Rootwad Bank Stabilization on the Middle Rio Grande .........................................................405
Shawn Boelman and Drew C. Baird, U.S. Bureau of Reclamation
Four Years Later, Harland Creek Bendway Weir/Willow Post Bank Stabilization Demonstration Project ................................................................. 411
   David L. Derrick, U.S. Army Corps of Engineers - WES

Stability of Biological Engineering Methods ................................................................. 417
   Andreas Dittrich, University of Karlsruhe - Germany

SESSION SP-6
Streambank Protection, System Response
Sponsored by U.S. Army Corps of Engineers
Moderator: Andrew Simon, USDA - Agricultural Research Service

Channel Stability of Turkey Creek, Nebraska ................................................................. 423
   David L. Rus, and Philip J. Soenksen, U.S. Geological Survey

Effectiveness of Grade Control Structures in Incised River Channels of North Mississippi ................................................................. 429
   Chester C. Watson, Colorado State University, and David S. Biedenharn, U.S.
   Army Corps of Engineers - WES

Evidence of Willow Post Induced Deposition ................................................................. 435
   Gregory V. Wilkerson, Colorado State University

SESSION SP-7
Streambank Protection, Processes II
Sponsored by U.S. Army Corps of Engineers
Moderators: Lisa Fotherby, Inter-Fluve, Inc., and Douglas Shields Jr., USDA - Agricultural Research Service

Application of Deformable Stream Bank Concepts to Natural Channel Design ........ 441
   Dale E. Miller and Peter B. Skidmore, Inter-Fluve, Inc.

The Relationships Between Soil Conditions and Growth of Willow Posts on Streambanks ........................................................................ 447
   S. R. Pezeshki, University of Memphis; F. D. Shields, USDA - Agricultural
   Research Service, and P.H. Anderson, University of Memphis

River Bed Deformation Computed from Shear Stress .............................................. 453
   Saeed Reza Khodashenas, André Paquier, Division Hydraulique – France,
   and Bernard Gray, U.M.R.-CNRS – France

Improvement of Flow and Bed Profile Due to Gentler Bank Slopes in a Curved Channel ........................................................................ 459
   Shoji Fukuoka, Hiroshima University – Japan, and Tatsuya Nishimura, CTI
   Engineering Co., Ltd. – Japan

SESSION SP-8
Streambank Protection, Design Guidance II
Sponsored by U.S. Army Corps of Engineers
Moderator: Chester C. Watson, Colorado State University

Bendway Weirs and Highway Protection in Colorado: A Case Study on the Blue River ........................................................................ 465
   Steve Smith, URS Griener, Inc. and Rodney J. Wittler, U.S. Bureau of
   Reclamation
Corps of Engineers Riprap Design for Bank Stabilization ........................................ 471
Stephen T. Maynord, U.S. Army Corps of Engineers - WES

Soil Bioengineering Streambank Techniques ......................................................... 477
Robbin B. Sotir, Robbin B. Sotir & Associates

The WES Stream Investigation and Streambank Stabilization Handbook .............. 483
David S. Biedenharn, U.S. Army Corps of Engineers - WES, Charles M.
Elliott, Private Consultant, and Chester C. Watson, Colorado State University

MINI-SYMPOSIUM ON HYDRAULICS AND HYDROLOGY OF WETLANDS
CHAIR: LISA C. ROIG, U.S. ARMY CORPS OF ENGINEERS

SESSION HW-1
Hydrology of Natural Wetlands
Sponsored by U.S. Army Corps of Engineers
Moderators: Raymond Walton, WEST Consultants, Inc.
and Lisa Roig, U.S. Army Corps of Engineers - WES

A Hydrological Study in Minesing Swamp, Ontario ........................................ 490
Andrea L. Bradford and W. Edgar Watt, Queen’s University - Canada

Monitoring Fluctuation in Wetland Groundwater Elevation ............................... 496
John Gregoire, Massachusetts Water Resources Authority, and Scott Egan,
ENSR Environmental Consulting, Inc.

Estimating Flow Velocities Through a Natural Wetland ..................................... 502
David A Stern, City University of New York, Lorraine L. Janus, New York
City Department of Environmental Protection, Reza Khanbilvardi, City
University of New York, James C. Alair, William R. Richardson, P. Bryce
McCann and Yuri A. Gorokhovich, New York City Department of
Environmental Protection

Hydrologic Impacts of Groundwater Fluctuations on Wetland Systems .............. 508
Randal S. Switt, Michael D. Annable, William R. Wise, University of
Florida, and Jo Anne E. Walser, U.S. Military Academy

SESSION HW-2
Wetland Modeling I
Sponsored by U.S. Army Corps of Engineers
Moderators: Allen Hjelmfelt, University of Missouri
and Ananta Nath, South Florida Water Management District

Storage-Outflow Modeling of a Headwater Wetland ......................................... 514
Robert McKillop, N. Kouwen, and E.D. Soulis, University of Waterloo -
Canada

Two-Dimensional Flow and Transport Modeling for Hydraulic Design and
Analysis of Treatment Wetlands ................................................................. 520
Kirk R. Barrett, Bioengineering Group, Inc.
SESSION HW-3
Wetland Modeling II
Sponsored by U.S. Army Corps of Engineers
Moderators: Elliot Silverston, URS Griener and Jobaid Kabir, LCRA

PIV and Numerical Modeling for Flow Analysis..........................526
Ehab A. Meselhe, University of Southwestern Louisiana, A. A. Bradley,
Anton Kruger, and Marian V. I. Muste, University of Iowa

Integrated Hydrological Modelling in South Florida Water Management District......532
Jason Yan, South Florida Water Management District, Emily Hopkins,
Henrik Refstrup Sørensen, and Jesper Tonnisen Kjelds, Danish Hydraulic
Institute - Denmark,

Diffusion Model To Study Mangrove Hydrodynamics ..................................538
V. T. Deeptha, University of Cincinnati, and B. S. Thandaveswara, Indian
Institute of Technology - India

Investigating Isolated Wetland—Aquifer Interaction Through Modeling...........544
Jo Anne E. Walser, U.S. Military Academy, William R. Wise, Michael D.
Annable, and Randal S. Switt, University of Florida

SESSION HW-4
Flow Through Vegetation
Sponsored by U.S. Army Corps of Engineers
Moderators: Lisa Roig, U.S. Army Corps of Engineers - WES
and Raymond Walton, WEST Consultants, Inc.

Hydraulics of Submerged Flow Constructed Wetlands with Plants...................550
Allen Thompson, Xiaoli Sun, and Allen Hjelmfelt, University of Missouri

A Model for Flow with Flexible Vegetation-Covered Bed........................556
Tetsuro Tsujimoto, Nagoya University - Japan, and Tadanori Kitamura,
University of Mississippi

SESSION HW-5
Riparian Wetlands
Sponsored by U.S. Army Corps of Engineers
and Jim Poppleton, Environmental Consulting and Technology, Inc.

Critical Watershed Identification for West Tennessee Streams Using GIS........562
Roger A. Gaines, U.S. Army Corps of Engineers, James Outlaw, Federal
Express, and Jerry L. Anderson, University of Memphis

River Restoration Projects of South-West Germany: Aim and Development........568
Günter Hartmann and Andreas Dittrich, University of Karlsruhe - Germany

Development of Sand Island with Vegetation in Fluvial Fan River Under
Degradation ......................................................................................574
Tetsuro Tsujimoto, Nagoya University - Japan

Interaction Between River-Bed Degradation and Growth of Vegetation Zone
in Gravel Bed River........................................................................580
Tetsuro Tsujimoto, Nagoya University - Japan, and Tadanori Kitamura,
University of Mississippi
SESSION HW-6
Coastal Wetlands
Sponsored by U.S. Army Corps of Engineers
Moderator: Jobaid Kabir, LCRA, and Elliot Silverston, URS Griener

Sediment Transport in the Barataria Basin
Donald E. Barbe, Yong Mo, University of New Orleans, and James F. Cruise, University of Alabama - Huntsville

Management of Mangrove Forest for Coastal Wetland Restoration
Junaid K. Choudhury, Conservator of Forest - Bangladesh

Wetland Wave Attenuation and Shore Protection
Paul A. Tschirky, Kevin R. Hall and David J. Turcke, Queen’s University - Canada

SESSION HW-7
Wetlands Hydrology and Hydraulics of Florida Everglades
Sponsored by U.S. Army Corps of Engineers
Moderator: Ananta Nath, South Florida Water Management District, and Elliot Silverston, URS Griener

Selection of Spatial and Temporal Discretization in Wetland Modeling
A. M. Wasantha Lal, South Florida Water Management District

Simulation of Overland and Groundwater Flow in the Everglades National Park
A.M. Wasantha Lal, Mark Belnap and Randy Van Zee, South Florida Water Management District

Correcting Spillway Design Deficiencies
Ronald Mierau, South Florida Water Management District, and Richard Bunnel, U.S. Army Corps of Engineers

SESSION HW-8
Wetland Hydrology in Florida
Sponsored by U.S. Army Corps of Engineers
Moderators: Elliot Silverston, URS Griener and Ananta Nath, South Florida Water Management District

H & H Modeling in High Water Table-Low Relief Area
Michael Walters and Elizabeth Geurink, Dames & Moore, Inc., Ananta Nath and Gail Abbott, South Florida Water Management District

SESSION HW-9
The Role of Hydrology in Wetlands Creation or Restoration: Case Studies
Sponsored by U.S. Army Corps of Engineers
Moderators: Jim Poppleton, Environmental Consulting and Technology, Inc. and Lisa Roig, U.S. Army Corps of Engineers - WES

Hydrologic Investigations of the Loxahatchee Mitigation Bank
Hydrologic Problems and Freshwater Wetland Creation ...........................................634
Mark M. Brown, Florida Department of Transportation

Restoring Wetland Hydrology in Farmed Wetlands ...........................................640
Doreen B. Donovan, Environmental Consulting & Technology, Inc.

MINI-SYMPOSIA ON CHANNEL RESTORATION
CHAIR: PETER C. KLINGEMAN, OREGON STATE UNIVERSITY

SESSION CR-1
Starting Points for River Restoration
Sponsored by Task Committee on Sedimentation Engineering for River Restoration
Moderator: Rebecca Seal, U.S. Army Corps of Engineers - WES

The Need for Clearly Defined Objectives in Stream Restoration Design........648
Eric R. Brown and Peggy A. Johnson, The Pennsylvania State University

Institutional Structures for River Restoration ...........................................654
Courtland L. Smith and Peter C. Klingeman, Oregon State University

Woody Vegetation in River Restoration: Problems and Opportunities........660
F. Douglas Shields, Jr., USDA - Agricultural Research Service

SESSION CR-2
Technical Analyses for River Restoration
Sponsored by Task Committee on Sedimentation Engineering for River Restoration
Moderator: Richard D. Hey, University of East Anglia, United Kingdom

Geo-Hydraulic Diversity Index (GDI): A Method for Assessing the Sustainability of Rivers .................................................................666
Kevin S. Skinner, Peter W. Downs, University of Nottingham – United Kingdom, and Andrew Brookes, The Environmental Agency – United Kingdom

River Restoration and Near-Channel Gravel Mining ...........................................672
Peter C. Klingeman, Oregon State University

On Sediment and Habitat in the Upper Animas River Watershed, Colorado ....678
Robert T. Milhous, U.S. Geological Survey

Hourly Water Temperature Modeling of the Guadalupe River, California ......684
Russ T. Brown and Anne Huber, Jones & Stokes Associates, Inc.

SESSION CR-3
Habitat Assessment in Rivers
Sponsored by Task Committee on Sedimentation Engineering for River Restoration
Moderator: William Fullerton, FLO Engineering, Inc.

Predicting Trout Habitat with Hydraulic Models ...........................................690
D. W. Crowder, E. J. Pert, D. J. Orth, and P. Diplas, Virginia Polytechnic Institute and State University

xvi
Restoration of Boreal Lowland Rivers in Finland: Problems and Approaches with Respect to Conservation and Flood Protection

Juha Jarvela, Helsinki University of Technology, and Jukka Jormola, Finnish Environment Institute - Finland

The Sacramento—A River in Repair

Richard A. Welsh, U.S. Bureau of Reclamation

SESSION CR-4
Sponsored by Task Committee on Sedimentation Engineering on River Restoration
Moderator: F. Douglas Shields, Agricultural Research Service
Panelists: Jerry Bernard, USDA - Natural Resource Conservation Service,
Ronald Tuttle, USDA - Natural Resource Conservation Service,
George Ice, National Council of the Paper Industry for Air and Stream Improvement, Inc.,
and Ronald R. Copeland, U.S. Army Corps of Engineers - WES

Federal Interagency Stream Corridor Restoration Document
F. Douglas Shields Jr., USDA-ARS-NSL, Jerry M. Bernard, and Ronald W. Tuttle, USDA-NRCS

SESSION CR-5
Gravel Bed & Cobble Bed Rivers
Sponsored by Task Committee on Sedimentation Engineering on Rivers Restoration
Moderator Peter C. Klingeman, Oregon State University

Equilibrium Gravel Bedload Transport
Robert G. Millar and Colin D. Rennie, University of British Columbia

Sediment Sampling for Environmental Monitoring
Panayiotis Diplas, Vinod Lohani, John Petrie, and Dan Stare, Virginia Polytechnic Institute and State University

Bedload Transport in Cobble-Bed Rivers
Duo Fang and Guoliang Yu, Sichuan Union University - China

Scour Depth of Salmon Redds Relative to nearby Bed
Colin D. Rennie and Robert G. Millar, University of British Columbia - Canada

SESSION CR-6
Fluvial Processes in Restoration
Sponsored by Task Committee on Sedimentation Engineering for River Restoration
Moderator Rodney J. Wittier, U.S. Bureau of Reclamation

Perturbations of Stage Hydrographs Caused by Channelization and Incision
Martin W. Doyle, Inter-Fluve, Inc. and F. Douglas Shields, Jr., USDA - Agricultural Research Service

Simulation of Alluvial Processes in Evolving Channel Networks
Eddy J. Langendoen and Ronald L. Bingner, USDA - Agricultural Research Service
Resistance to Flow at the Channel-Overbank Interface .......................................................... 748
Chad E. Morris, Steven R. Abt, Christopher I. Thornton, Colorado State University, and J. Craig Fischenich, U.S. Army Corps of Engineers - WES

GENERAL CONFERENCE PAPERS

SESSION C-1
Hydrologic Disaster Reduction and Prevention - I
Case Studies and Lessons Learned
Sponsored by Task Committee on Hydrologic Disasters
Moderator: Anand Prakash, Dames and Moore

Perspectives on the 1997 Flooding: Red River of the North .................................................. 756
L. Douglas James, National Science Foundation, Scott F. Korom, University of North Dakota, and Gerald Galloway, National Defense University

The 1997 Red River Floods: What Went Wrong? ..................................................................... 762
Roger A. Pielke, Jr., National Center for Atmospheric Research

Non-Structural Method to Reduce Local Pier Scour ................................................................. 768
J. R. Richardson and D. L. Roberts, University of Missouri - Kansas City

SESSION C-2
GIS Applications in Surface Water Hydrology
Sponsored by Task Committee on GIS Modules and Distributed Models of the Watershed
Moderators: Rafael G. Quimpo, University of Pittsburgh, and Paul DeBarry, RKR Hess Associates

Data and Uncertainties for GIS Based Hydrologic Modeling ................................................... 774
Jurgen Garbrecht and Patrick J. Starks, USDA - Agricultural Research Service

GIS-Hydrologic Model Integration ............................................................................................. 780
Fred L. Ogden, University of Connecticut

GIS Data Exchange for the Hydrologic Engineering Center's Hydraulic and Hydrologic Models ......................................................................................................................... 786
Thomas A. Evans, U.S. Army Corps of Engineers - HEC

 Constituent Loads and Water Quality in the Corpus Christi Bay System ............................. 790
Ann M. Quenzer and David R. Maidment, University of Texas - Austin

SESSION C-3
Detention & Debris Basin Design & Considerations
Moderator: Adnan Alsaffar, Bechtel International

Single Outlet Detention Pond Design and Analysis Equation .................................................. 796
D. Lee Currey and A. Osman Akan, Old Dominion University

Design Considerations for Multiple Detention Systems .......................................................... 802
James C. Y. Guo, University of Colorado - Denver, John P. Clark, Montgomery Watson, and Ken Gilberth, VTN-nevada
Overtopping Prevention of the Harrow Debris Basin in Los Angeles County ..........808
David T. Williams and Martin J. Teal, WEST Consultants, Inc., and Sree
Kumar, Los Angeles County Department of Public Works

Water Quality Detention Basin Analysis ..........................................................814
A. Osman Akan, Old Dominion University

Reliability Assessment in Detention Basin Design .............................................820
A. Melih Yanmaz, Middle East Technical University - Turkey

SESSION C-4
Impinging Jets
Moderator: George W. Annandale, Golder Associates Inc.

Plunge Pool Recirculating at Dam Toes ............................................................826
Joseph P. Juergensen and Steven R. Abt, Colorado State University

Plunging Jet Measurement Improvements Using ADV ........................................832
Kevin D. Nielsen, Marian Muste, and Larry J. Weber, University of Iowa

SESSION C-5
Environmental Aspects in Coastal Areas
Sponsored by Task Committee on Physical Processes in Tidal Wetland Restoration
Moderator: Mark S. Dortch, U.S. Army Corps of Engineers - WES

Model of Suspended Solids, Light and SAV ....................................................838
Carl F. Cerco and Mark S. Dortch, U.S. Army Corps of Engineers - WES

Tidal Circulation in the Southern Indian River Lagoon ......................................844
Guangdou Gordon Hu and David Unsell, South Florida Water Management
District

Evaluation of Methods Used in Estimating Outflow Rates in Coastal Watersheds ......850
D. M. Amatya, G. M. Chescheir and R. W. Skaggs, North Carolina State
University

Environmental Change by a Water Front Development ......................................856
Moon Ock Lee, Sam No Lee, and II Heum Park, Yosu National University -
Korea

Numerical Simulation of Tidal Flow in JN Port, Bombay, India ..........................862
Fayi Zhou, University of Alberta - Canada, Uram Ramesh, Central Water
Power Research Station - India, and C. C. S. Song, University of Minnesota

SESSION C-6
Hydrologic Disaster Reduction and Prevention II: Modeling
Sponsored by Task Committee on Hydrologic Disasters
Moderator: Jerry Richardson, University of Missouri - Kansas City

An Overview of Hydrologic Disasters Prediction Models ...................................868
Shou-shan Fan, University of Wisconsin - Milwaukee

Application of Remote Sensing Technology for Monitoring Floods ....................874
Edwin T. Engman, Goddard Space Flight Center, NASA

Application of GIS in Hazardous Remedial Action System ..................................880
Tsung-Han Lin and Kwang K. Lee, University of Wisconsin - Milwaukee
Methodology for Using Post-Disaster Information To Improve the Accuracy of Flood Mapping ......................................................................................................................... 885
Zhida Song-James, Dewberry & Davis

SEVEN C-7

Application of Artificial Neural Networks in Hydrology I
Sponsored by the Committee on Surface Water Hydrology
Moderators: Rao S. Govindaraju and A.R. Rao, Purdue University

Scaling Issues in Artificial Neural Network Modeling and Forecasting of Algal Bloom Dynamics ......................................................................................................................... 891
Mark French, University of Louisville, Friedrich Recknagel, University of Adelaide, and G. Lynn Jarrett, University of Louisville

Using Modular Neural Networks To Predict Watershed Runoff ................................................................................................................................. 897
B. Zhang and R. S. Govindaraju, Purdue University

Modeling of Watershed Flood Forecasting with Time Series Artificial Neural Network Algorithm ......................................................................................................................... 903
Cho-Chung Yang, National Chiao Tung University, Chang-Shian Chen, Feng Chia University, and Liang-Cheng Chang, National Chiao Tung University – Taiwan, R.O.C.

SEVEN C-8

Drainage Design in Water Resources Engineering I: Construction
Sponsored by Task Committee on Conflicts in Drainage Design and Water Resources Engineering Construction
Moderator: William F. Ritter, University of Delaware

Bid Preparation and Construction Sequence ......................................................................................................................... 909
Charles F. Keltch, Consulting Engineer

Specifications and the Contracting Process: Owners Viewpoint ................................................................................................................................. 914
Thomas R. Weichel, U.S. Bureau of Reclamation

Design Data Collection for Preparing Job Specifications ................................................................................................................................. 920
Glen D. Sanders, U.S. Bureau of Reclamation

International Drainage Construction Conflicts ................................................................................................................................. 926
Walter J. Ochs, Consultant

SEVEN C-9

Endangered Species and Their Impacts on Reservoir Operations
Sponsored by the Committee on Research and Education
Moderator: Donald K. Frevert, Bureau of Reclamation

Pacific Northwest Salmon Reservoir Operation Issues ................................................................................................................................. 932
Jim Fodrea, U.S. Bureau of Reclamation

Modeling and Management of Water in the Klamath River Basin:
Overcoming Politics and Conflicts ................................................................................................................................. 938
First-Year Selective Withdrawal Performance of the Shasta Dam Temperature Control Device
Tracy B. Vermeyen, U.S. Bureau of Reclamation

Remediating Selenium Impacts on Endangered Fish in the Upper Colorado River
Delbert M. Smith, U.S. Bureau of Reclamation

SESSON C-10
Hydrologic Disaster Reduction and Prevention III: Management & Environment Aspects
Sponsored by Task Committee on Hydrologic Disasters
Moderator: Fred Ogden, University of Connecticut

Environmental Concerns and Hydrologic Disasters
Robert W. Brocksen, EPRI

Flood Hazard Identification and Management in Storage Flood Areas
Mathini Sreetharan and Zhida Song-James, Dewberry & Davis
