PROCEEDINGS

1998 SPE Annual Technical Conference
and Exhibition

Drilling and Completion

27–30 September 1998
New Orleans, Louisiana

SOCIETY OF PETROLEUM ENGINEERS INC.
CONTENTS

SPE 48926 Effects of Shear Planes and Interfacial Slippage on Fracture Growth and Treating Pressures ................................................................. 11
R.D. Barree and P.H. Winterfeld, Marathon Oil Co.

SPE 48928 Parameters Affecting Azimuth and Length of a Secondary Fracture During a Refracture Treatment .............................................. 17
E. Siebrits and J.L. Elbel, Schlumberger Dowell; E. Detournay, U. of Minnesota;

SPE 48929 Scale Effects on Fracture Growth Resistance in Poroelastic Materials ................................................................. 29
Jacob Shlyapobersky, Shell E&P Technology Co.; Mohsen Issa, Mahmoud Issa, and M.D.S. Islam, UIC; J.W. Dudley, Shell E&P Technology Co.; and Yuiri Shulkin and Alexander Chudnovsky, UIC

SPE 48930 A New Two-Dimensional Model for Acid Fracturing Design ................................................................. 39

SPE 48939 Techniques for Solving Torque and Drag Problems in Today’s Drilling Environment ................................................................. 55
M.S. Aston, P.J. Hearn, and G. McGhee, BP Exploration

SPE 48940 Improved Sliding Through Chemistry ................................................................. 69
R.G. Bland and W.S. Halliday, Baker Hughes INTEQ

SPE 48941 Drilling and Completing a High-Angle Well With Coiled Tubing Technology ................................................................. 81
B. Samsonsen, B.G. Jacobsen, T. Skagestad, and S. Kerr, Statoil

SPE 48942 Extended-Reach Drilling—What is the Limit? ................................................................. 87
C.J. Mason, BP Exploration Co. Ltd., and A. Judzis, BP Exploration (Alaska) Inc.

SPE 48944 Extended Reach Drilling at the Uttermost Part of the Earth ................................................................. 99
M. Naegel, E. Pradii, K. Beffa, J. Ricaud, and T. Delahaye, Total Austral S.A.

SPE 48975 Prediction of Sand Problems of a Horizontal Well From Sand Production Histories of Perfaced Cased Wells ................................................................. 113
N. Morita, Waseda U., and G.F. Fuh, Conoco Inc.

SPE 48976 Advancing Horizontal Well Sand Control Technology: First OHGP Using Synthetic OBM ................................................................. 121
J.M. Gilchrist, L.W. Sutton Jr., and F.J. Elliott, BP Exploration Inc.

SPE 48977 Harding A Field Case Study: Sand Control Strategy for Ultra High Productivity and Injectivity Wells ................................................................. 133
G. McKay and C. Bennett, British Petroleum; C. Price-Smith, Schlumberger Dowell; and W. McLeilian, British Petroleum

SPE 48978 An Evaluation and Design Approach to Gravel-Pack Treatments in Gullfaks Field ................................................................. 149
Simen Karlstad, Terri Sherlock-Willis, and Surya Rajan, Dowell, and Bianc Samsonsen and P.A. Monstad, Statoil

SPE 48979 Application of Reservoir Strength Characterization and Formation Failure Modelling to Analyze Sand Production Potential and Formulate Sand Control Strategies for a Series of North Sea Gas Reservoirs ................................................................. 159
R.C. Burton and E.R. Davis, Conoco Inc.; N. Morita, Waseda U.; and H.O. McLeod

SPE 48980 Operational Design Considerations for Frac-and-Pack Tools to Reduce Risk ................................................................. 169
Jeff Smith, Chevron Production Co.; Tim Landry, BJ Services; and Dave Wagner, Chevron Production Technology Co.

SPE 48982 Stability and Flowing Properties of Aqueous Foams for Underbalanced Drilling ................................................................. 185
J-F. Argillier, Inst. Français du Pétrole; S. Saintpere, Total Exploitation Production; B. Herzhaft, Inst. Français du Pétrole; and A. Toure, Cenergys

SPE 48983 Ultrasonic Technology: Creating a New Approach to Drill Cuttings Disposal ................................................................. 199
| SPE 48985 | The First Cuttings Injection Operation Worldwide in a Subsea Annulus: Equipment and Operational Experience Arild Saasen, Arthur Bale, Rune Corneliusen, and P.B. Kristiansen, Statoil, and Bjørn Ofteidal, Procon Drilling Services a.s. | 207 |
| SPE 48986 | Interaction Between Shale and Water-Based Drilling Fluids: Laboratory Exposure Tests Give New Insight Into Mechanisms and Field Consequences of KCl Contents P. Horsrud, IKU Petroleum Research; B. Bostrom, SINTEF; E.F. Sonstebø, IKU Petroleum Research; and R.M. Holt, NTNU and IKU Petroleum Research | 215 |
| SPE 48987 | The Mounds Drill Cuttings Experiment: Determining Placement of Drill Cuttings By Hydraulic Fracturing Injection Z.A. Moschovidis, Amoco Production Co.; R.P. Steiger, Exxon Production Research Co.; Xiaowei Weng, ARCO E&P Technology; and A.S. Abou Sayed, BP Exploration Inc. | 227 |
| SPE 49041 | Taking Low Gels to New Highs R.B. Herring, Conoco Inc., and L.L. Diede, BJ Services Co. | 267 |
| SPE 49042 | Successful Application of a Novel Fracturing Fluid in the Wasatch Formation in Eastern Utah J.C. Dawson, H.V. Le, and Dave Cramer, BJ Services Co. | 275 |
| SPE 49043 | Results of Relative-Permeability Modifier Combination with a Fracture-Stimulation Treatment E.D. Dalrymple, P. Creel, and C. Rohwer, Halliburton Energy Services Inc., and H. Crabb III, Enron Oil & Gas Co. | 285 |
| SPE 49044 | Understanding Fracture Performance By Integrating Well Test & Fracture Modeling C.L. Cipolla and M. Mayerhofer, Pinnacle Technologies | 293 |
| SPE 49049 | Completion and Stimulation Practices in the Prolific Cotton Valley Reef Trend of East Texas M.F. Richardson, Union Pacific Resources Co. | 323 |
| SPE 49057 | Computational Hydraulic Analysis of a Deepwater Well Drilled With Synthetic-Based Mud in a Riserless Drilling Configuration H.R. Lima, Petrobras/Texas A&M U., and H.C. Juvkam-Wold, Texas A&M U. | 347 |
| SPE 49058 | Well Control Aspects of Riserless Drilling Jongeun Choe and H.C. Juvkam-Wold, Texas A&M U. | 355 |
| SPE 49059 | Makarem-1 Relief Well Planning and Drilling V.C. Roes, Petroleum Development of Oman; R.A. Hartmann, Shell Intl. Research and Technical Services; and J.W. Wright, John Wright Co. | 367 |
| SPE 49060 | Practical Application of a Multiple-Survey Magnetic Correction Algorithm A.G. Brooks, P.A. Gurden, and K.A. Noy, Baker Hughes INTEQ | 379 |
| SPE 49061 | Application of Interpolation In-Field Referencing to Remote Offshore Locations H.S. Williamson, BP Exploration; P.A. Gurden, Baker Hughes INTEQ; D.J. Kerridge, British Geological Survey; and G.M. Shiells, Baker Hughes INTEQ | 387 |
| SPE 49097 | The Impact of Formation Damage and Completion Impairment on Horizontal Well Productivity R.C. Burton and R.M. Hodge, Conoco Inc. | 399 |
SPE 49098 Optimization of Stimulation Chemistry for Openhole Horizontal Wells .......... 415
L.N. Morgenthaler, R.I. McNeil, R.J. Faircloth, A.L. Collins, and C.L. Davis,
Shell E&P Technology Co.

SPE 49099 New Water-Soluble Perforation Ball Sealers Provide Enhanced Diversion in
Well Completions ................................................................. 427
D.M. Bilden, L.L. Lacy, and F.H. Seiler, BJ Services Co., and N.D. Ischy and C.S. Fox,
BioProducts Inc.

SPE 49100 Multiple Hydraulic Fracturing of Deep Gas-Condensate Wells in Oman .......... 437
A.T. Jones, M.S. Al Salhi, and S.M. Al Shidi, Petroleum Development Oman, and M. England
and R. Pongratz, Halliburton Worldwide Ltd.

SPE 49101 Acidizing in the Teak Field: A Comprehensive Approach ...................... 451
R. Gdanski, V. Jurai, and R. Mohan, Halliburton Energy Services, and R. Chung,
Amoco Trinidad Oil Co.

SPE 49102 Formation Fines Stabilization Using Surface Adsorption Polymerization .......... 461
L.J. Maberry, Dowell; S.A. Ali, Chevron USA Production Co.; and S.B. McConnell and
J.J. Hinkel, Dowell

SPE 49103 Fluid Placement Model for Stimulation of Horizontal or Variable
Inclination Wells ................................................................. 473
L.D. Eckerfield, D. Zhu, and A.D. Hill, U. of Texas at Austin; R.L. Thomas and J.A. Robert,
Schlumberger Dowell; and K. Bartko, ARCO E&P Technology

SPE 49104 Waterfracs—Results from 50 Cotton Valley Wells ............................... 489
M.J. Mayerhofer, Pinnacle Technologies, and D.N. Meehan, Union Pacific Resources

SPE 49106 Proppants, We Still Don't Need No Proppants—A Perspective From
Several Operators ................................................................. 497
R.N. Walker, Union Pacific Resources Inc.; J.L. Hunter, Pennzoil Co.; A.C. Brake,
Amoco Production Co.; P.A. Fagin, Valence Operating Co.; and N.P. Steinsberger,
Mitchell Energy Corp.

SPE 49107 Case History: Gullfaks C-36AT3, A Multipurpose Oil-Production/Gas-Injection
Well in the North Sea ............................................................. 505
Arild Austigard, Leif Erichsen, and Ståle Vikra, Statoil A/S

SPE 49111 An Example of the Drilling Analysis Process for Extended Reach Wells .......... 515
Keith Millheim, Mining U. Leoben; Eric Maidla, CSIRO Petroleum; and Simon Kravis,
CSIRO Mathematical and Information Sciences

SPE 49112 The “Well Learning System”—The Evolution of a Tool Into A Modern
Management System for Drilling Operations .................................. 525
R.C. Minton, BP Norge AS, and R.B. Vik, Triangle OGCI AS

SPE 49114 Using Downhole Annular Pressure Measurements to Anticipate
Drilling Problems ................................................................. 535
Mark Hutchinson, Anadrrill, and Iain Rezmer-Cooper, Schlumberger

SPE 49115 Field Hydraulic Tests Improve HPHT Drilling Safety and Performance .......... 551
P. Isambourg and D. Bertin, Elf Exploration Production, and M. Brangetto,
Elf Exploration UK Plc

SPE 49116 Optimization of Cuttings Removal by Use of Real-Time Annulus Pressure
Measurements While Drilling .................................................. 565
B.R. Pedersen, Baker Hughes INTEQ, and J. Zajaczkowski, Statoil

SPE 49190 In Situ Stress and Moduli: Comparisons of Values Derived from
Multiple Techniques ............................................................. 569
N.R. Warpinski, Sandia Natl. Labs; R.E. Peterson and P.T. Branagan, Branagan & Assocs.;
B.P. Engler, Sandia Natl. Labs; and S.L. Wolhart, Gas Research Inst.

SPE 49193 Downhole Tiltmeter Fracture Mapping: A New Tool for Directly Measuring
Hydraulic Fracture Dimensions .............................................. 585
C.A. Wright, E.J. Davis, and L. Weijers, Pinnacle Technologies Inc.; G.M. Golich, Aera
Energy LLC; and J.F. Ward, S.L. Demetrius, and W.A. Minner, Pinnacle Technologies Inc.
No manuscript received for the following:

SPE 48931  Impact of New Stress Profiling Method on Hydraulic Fracture Geometry and Field Economics: Examples from South Texas Canyon Sands and California Diatomite
  J.E. Olson, U. of Texas Austin; T.L. Blanton, Mobil E&P Technical Center; and G.R. Stanley, U. of Texas Austin

SPE 48942  Automated Drilling Systems
  V. Krueger, Baker Hughes INTEQ; F. Donati, AGIP SpA; and I.T. Kruspe, Baker Hughes INTEQ

SPE 48984  A Three-Layer Model for Cuttings Transport in Inclined Wellbores
  A.M. Kamp and M. Rivero, PDVSA Intevep

SPE 49038  Fracture Fluid Cleanup—Phase II Investigation Using 3D Numerical Simulations

SPE 49039  Clustering and Enhanced Settling in Non-Newtonian Fluids
  P.E. Clark and Q. Zhu, U. of Alabama

SPE 49045  Optimized Frac-and-Pack Design Results in Production Increase in the Matagorda Island Area

SPE 49048  Qualifying Stimulation Effectiveness in Tight, Naturally Fractured Reservoirs by Combining Three-Dimensional Fracturing and Reservoir Simulators

SPE 49108  Optimized Hydraulic Fracturing Improves Oil Production in the N'Dola Field, Offshore Angola

SPE 49109  Pioneering Subsea Intelligent Completion—Aquila Case History
  M. Marangoni, C. Giuliani, G. Botto, and G. Ferrario, AGIP SpA

SPE 49110  Development of Skin Fracturing Operations in the Cusiana Field in Colombia
  M. Rylance, BP Exploration Colombia Ltd.; L.G. Acosta, BPX Colombia (Bogota); K.F. Lizak, Halliburton Energy Services; and E.H. Lizzcano Olejua, BPX Colombia (Bogota)

SPE 49191  Fracturing Operations Complicated by Unusual Stress Regimes in the Capigua Field in Colombia
  M. Rylance, BP Exploration Colombia Ltd.; J.E. Rodriguez, BPX Colombia (Bogota); S.J. Knopp, BJ Services S.A.; and J.L. Hester, BPX Colombia (Bogota)

SPE 49192  Completion Analysis and Tracer-Derived Proppant Distribution Improve Completion in the Piceance Basin
  D.L. Holcomb, ProTechnics Intl. Inc.; M.A. Balderston, Snyder Oil Corp.; and J.D. Stabenau, Halliburton Co.

SPE 49207  Using Downhole Dynamics To Understand Better the Drilling Process With Positive Displacement Motors and PDC Bits

SPE 49249  Correlation of Polymeric Fragment Damage and Damage Removal to the Original Rock and Proppant Pack Permeability

SPE 49250  Post-Fracture Cumulative Load Recovery Analysis Provides New Insights into Well Productivity
  H.D. Brannon, R.M. Tjon-Joe-Pin, and M. Ault, BJ Services Co. USA

SPE 49253  Evaluation of Mechanical Performance of Carbon Steel Tubulars
  D. Fourmaintraux, Elf Exploration Production; A. Bois and K. Merrien, SIMECSOL; and J. Guerin and S. d’Agata, Elf Exploration Production

SPE 50557  Systematic Approach Enhances Drilling Optimization and PDC Bit Performance in North Slope ERD Program
