PROCEEDINGS

EUROPEC
European Petroleum Conference
Volume 2

“Applied Technology: A Driver for Performance and Growth”

20–22 October 1998
The Hague

Society of Petroleum Engineers (SPE)
CONTENTS—VOLUME 2

SPE 50123 Production Strategy Yields Unique Perforating, Cost-Efficient Multilateral Drilling Solution in the Beryl Field .................................................. Hani Sadek, Mobil North Sea Ltd.; C.R. Williams, Halliburton Energy Services Inc.; and Michael Smith, Weatherford Enterra Inc .................................................. 13

SPE 50633 Curvilinear Local Grid Refinement .................................................. S. Ghosh, ARCO E&P Technology .................................................. 29

SPE 50634 Modern Reservoir Modelling for Rehabilitation of a Giant Oil Field .................................................. D.N. Bolotnik and G.G. Sarkisov, ONICS Oil & Gas, and F.A. Sharifullin, Nijnevartovsk Oil & Gas .................................................. 45

SPE 50635 Integrated Reservoir and Surface Network Simulation in Reservoir Management of Southern North Sea Gas Reservoirs .................................................. John Tingas and Robert Frimpong, Amoco U.K. Exploration Co., and James Liu, Amoco E&P Technology Group .................................................. 51

SPE 50636 Petroleum Reservoir Simulation Coupling Flow and Deformation .................................................. F. Cuisiat and M. Gutierrez, Norwegian Geotechnical Inst., and R.W. Lewis and I. Masters, U. of Wales .................................................. 63

SPE 50637 Ageing: An Origin for Quicksands and a Predictive Tool for Sand Production .................................................. R. Razoaki, Portsmouth U.; N. Kageson-Loe, Norsk Hydro ASA; N.J. Langdon, Portsmouth U.; and G. Stokken-Ostby, Norsk Hydro ASA .................................................. 73

SPE 50638 Improved Reservoir Evaluation in Norway Wells From High-Resolution Productivity Measurements .................................................. S.J. Jacobsen, J. Phillips, and E. Cheruvier, Schlumberger Oilfield Services .................................................. 81

SPE 50640 Neural Net Identification of Flow Regime Using Band Spectra of Flow Generated Sound .................................................. Alex van der Spek, Shell Intl. E&P, and Alix Thomas, Edinburgh U. .................................................. 93

SPE 50641 Brage Field, Lessons Learned After 5 Years of Production .................................................. S.C. Lien, S.E. Lie, H. Fjellbirkeland, and S.V. Larsen, Norsk Hydro ASA .................................................. 103

SPE 50642 Computer Aided History Matching of a Real Field Case .................................................. Th. Grussaute and P. Gouel, Elf Exploration Production .................................................. 121

SPE 50643 Application of Novel Upscaling Approaches to the Magnus and Andrew Reservoirs .................................................. M.J. King, D.G. MacDonald, S.P. Todd, and H. Leung, BP Exploration Operating Co. Ltd .................................................. 133

SPE 50644 Production Forecasting of an Unstable Compacting Chalk Field Using Uncertainty Analysis .................................................. T. Hegdal and R.T. Dixon, Enterprise Oil Norge Ltd., and R. Martinsen, Amoco Norway Oil Co .................................................. 149

SPE 50645 Water-Alternating-Gas Flooding in Venezuela: Selection of Candidates Based on Screening Criteria of International Field Experiences .................................................. E. Manrique, G. Calderón, L Mayo, and M.T. Stirpe, PDVSA Intevep .................................................. 161

SPE 50646 Application of a Multisegment Well Model to Simulate Flow in Advanced Wells .................................................. J.A. Holmes, GeoQuest; T. Barkve, Norsk Hydro ASA; and Ø. Lund, Statoil .................................................. 171

SPE 50650 A Novel Technique for Single-Selective Sand Control Completions Cuts Completion Costs in Half: Method Development and A Case History From the Gulf of Mexico .................................................. P. van Wulfften Palthe, Schlumberger Dowell; J. Smith, Chevron U.S.A.; and T. Achee, C. Dancause, and M. Parlar, Schlumberger Dowell .................................................. 191

SPE 50652 A Global Perspective on Sand Control Treatments .................................................. T.M. Sherlock-Willis, R.H. Morales, and P. Price, Schlumberger Dowell .................................................. 201
Coiled-Tubing Technology: An Application of High-Pressure Jet Cleaning in a Deep, High-Temperature, Sour Marine Environment

History of and Applications for a Coil-Tubing-Conveyed, Inflatable, Selective Injection Straddle Packer

M.J. Loughlin and Mark Plante, Baker Oil Tools

Conversion of an Unprofitable Multireservoir Gas/Oil Field Into an Attractive Development Object

S. Zakirov, A. Brusilovsky, and E. Zakirov, Oil and Gas Research Inst.; I. Zakirov, Norsk Hydro ASA; V. Piskarev, UKOS; E. Karlinsky, B. Smirnov, and J. Doroshenko, VNIPIGasDobicha; and V. Krylov and N. Shepkina, Oil and Gas Research Inst.

Inflow Performance Relationships of Horizontal and Multibranched Wells in a Solution-Gas-Drive Reservoir

Albertus Retnanto and M.J. Economides, Texas A&M U.

Unique Test Process Resolves Junction Difficulties in a Multilateral Completion on the North Sea Statfjord Field

Sigve Hovda, Statoil; Arild Arrestad, Rogaland Research; H.M. Bjørneli, Halliburton Oilfield Services; and Austin Freeman, Halliburton Energy Services Inc.

Real-Time Geosteering in the Tern Field for Optimum Multilateral Well Placement

A New Low-Risk Technique of Forming a Level 6 (TAML) Multilateral Junction

W.C. Hogg and Alan MacKenzie

4D Seismic: Synergy, Not Just Integration of Geophysics Engineering

J.R. Waggoner, Western Geophysical EAME

Assessing the Feasibility of a 4D Seismic Reservoir Monitoring Project

Reservoir Monitoring Using Time-Lapse Saturation Loss and 4D Seismic Improves Drainage Understanding in the Gullfaks Field

Rune Instefjord and Eirik Berg, Statoil

4D Seismic Interpretive Processing: Optimizing Differential Imaging for Reservoir Monitoring

C.S. Burns, CGG R&D

Screening Criteria for Evaluating the Development Potential of Remaining Oil in Mature Fields

K.J. Weber and H. Dronkert, Delft U. of Technology

A Permanent System for Measurement of Downhole Flowrates—North Sea Examples

Younes Jalali and Alain Charron, Schlumberger Wireline & Testing

Interpretation of Falloff Tests on Fractured Wells of the Barsukov Oil Field in West Siberia

A.N.P. Dros, Hagoort & Assocs.; A.M. Kuznetsov, Purneftegas; and J. Hagoort, Hagoort & Assocs.

Nonintervention Solutions to the Loss of Downhole Data in a Subsea Field

Drilling of an Intermediate Radius Long Lateral in the Dunbar Field

Ph. A. Charlez and M. Ryan, Total Oil Marine, and G. Brandie, Baker Hughes INTEQ

North Sea Harding Project: A Well Engineering Case History Success

SPE 50677 Cuttings Flow Meters Monitor Hole Cleaning in Extended Reach Wells  
M. Naegel, E. Pradie, and T. Delahaye, Total Austral SA, and C. Mobile and G. Roussiaux, 
Geoservices SA

SPE 50678 Breakthrough Well Suspension Operations in West of Shetland  
Horizontal Wells  
G. Elliot, BP Exploration Operating Co. Ltd., and G.D. Makin, S.E. Ferguson, and 
P.B. Moyes, Petroleum Well Systems Ltd.

SPE 50679 The Most Significant Application of Horizontal Wells in Eastern Europe  
Peter Kristof, Ivan Vukov, Tamas Kecses, and Balazs Ordogh

SPE 50680 Buoyancy Assist Extends Casing Reach in Horizontal Wells  

SPE 50681 Multiphase Metering: Experimental Results From the Analysis of Acoustic 
Noise Through a Choke  
Marco Piantanida, Agostino Mazzoni, and Alessandro Tanzi, ENI-Agip Div., and B.R. Hope, 
Sensorteknikk A/S

SPE 50682 Maximizing Production From Gravel Packed Wells at Gullfaks Field by 
Stimulation and Installation of Multiphase Booster Pumps  
K.I. Andersen, Statoil A/S

SPE 50683 Multiphase Transportation: A Kinetic Inhibitor Replaces Methanol to 
Prevent Hydrates on a 12-in. Pipeline  
E.M. Leporcher, Elf Petroleum Norge; J.M. Fourest, Elf Exploration Production; 
C. Labes-Carrier, Elf Petroleum Norge; and M. Lompre, Elf Exploration Production

SPE 50684 Industrial Application of Vortex Tube Separation Technology Utilizing the 
Ranque-Hilsch Effect  
Manfred Lorey, Filtan Anlagenbau GmbH; Jürgen Steinle, BEB Erdgas und Erdöl GmbH; and 
Keith Thomas, Falk & Thomas Engineering GmbH

SPE 50685 A New Approach to Gas-Liquid Separation  
A.C. Stewart, N.P. Chamberlain, and M. Irshad, Kvaerner Paladon Ltd.

SPE 50686 Safe Removal and Disposal of Naturally Occurring Radioactive Materials from 
Oilfield Equipment  
I.R. Janssen and B. van der Last, Kema Nederland B.V.

SPE 50688 Studies on the Prevention of Gas Hydrates Formation in Pipelines Using 
Potassium Formate as a Thermodynamic Inhibitor  
F.H. Fadnes, Norsk Hydro E&P Research; T. Jakobsen, Norsk Hydro E&P Operations; 
M. Bylov, Calsep A/S; A. Holst, Norsk Hydro; and J.D. Downs, Hydro Chemicals (U.K.)

SPE 50689 Effect of Reservoir Fluid Production on Gas Hydrate Phase Boundaries  
K.K. Østergaard, A. Danesh, B. Töhidi, A.C. Todd, and R.W. Burgass
No manuscript received in time for publication:

SPE 50571 Laboratory Investigation of Multiphase Flow in Porous/Fractured Rocks  
A. Makurat, E. Rose, and F. Cuisiat, Norwegian Geotechnical Inst.

SPE 50584 Coiled Tubing Parabolic Loop System—A New Approach to Tubing Handling  
C.A. Johnston, R.L. Ewen, and A.K. Dean, Baker Hughes INTEQ

SPE 50596 Gannet E Subsea ESP: The Application of Technology in Practice  
S.J. Harrall and D. Nevelsteen, Shell UK Exploration & Prod.

SPE 50600 Unusual Logs in an Unusual Formation: NMR in the Athel Silicilyte  
J. Alixant, Petroleum Development of Oman, and W.J. Looyestijn and J. Hofman,  
Shell Intl. E&P B.V.

SPE 50602 The Response of a Low-Permeability, High-Porosity Rock to Stress:  
Experimental Data on Silicilyte  
J. Coremans, E. Van der Geest, and P.M. Schutjens, Shell Intl. E&P BV, and J. Alixant,  
Petroleum Development of Oman

SPE 50615 Determining Fracture Behavior Using Treatment Diagnostics: Establishing the  
Predictive Capability of Treatment Diagnostics  
S. Gulrajani and K.G. Nolte, Dowell

SPE 50625 Enhancing Field Performance Through Seismically Constrained Reservoir Modelling  
F. Ray and B.K. Howe, Shell Intl. E&P B.V.

SPE 50648 Large Mature Gas-Condensate Field: 3D Reservoir Modelling and Simulation  
G.G. Sarkisov, D.N. Bolotnik, E.S. Makarova, and A.V. Rybnikov, ONICS

SPE 50651 Laboratory Development of a Novel, Simultaneous Cake-Cleanup and Gravel-Packing  
System for Long, Highly Deviated or Horizontal Openhole Completions  
M. Parlar, R.J. Tibbies, F.F. Chang, and D. Fu, Dowell

SPE 50653 First Coiled Tubing Intervention on a Subsea Well From a Monohull Vessel  
E.M. McGennis, Coflexip Stena Offshore Ltd.; E.G. Enkababian, Dowell; and A. Bruce,  
Shell UK Ltd.

SPE 50656 A Techno-Economic Feasibility Study of Asphaltene Inhibition Squeeze Treatments  
C. Carniani, ENI—Agip E&P Div.; A.G. Di Lullo and T.P. Lockhart, ENITecnologie; and  

SPE 50673 Openhole Horizontal Well Cleanup in Sand Control Completions: State of the Art  
in Field Practice and Laboratory Development  
C.J. Price-Smith, Dowell; C.L. Bennett, BP Exploration Inc.; S.A. Ali, Chevron U.S.A.  
Production Co.; R.M. Hodge and R.C. Burton, Conoco Inc.; and M. Parlar, Dowell

SPE 50674 Successful Application of Synthetic OBM to Openhole Completions—Linking Laboratory to the Field  
F.J. Elliott and J.M. Gilchrist, BP Exploration Co. Ltd.; M.S. Aston and P.M. Wilson,  
BP Exploration Inc.; and B.L. Estes, Baroid Drilling Fluids Inc.

SPE 50794 Real-Time Production Optimization Technology  
A. Mortimer, MDC Technology
