ICEC '98 19. ITK

19th International Conference on Electric Contact Phenomena

19. Internationale Tagung über Elektrische Kontakte

14 – 17 September, 1998
Nuremberg, Germany

Conference Chairman:
K.-H. Schröder, Germany

Organized by
Power Engineering Society (ETG) and Information Technology Society (ITG) of VDE,
sponsored by EUREL

ETG VDE ITG
VDE-VERLAG GMBH • Berlin • Offenbach
# Inhalt

## Session 1
**Electrical Contacts for Automotive Application and Telecommunication (Session 1-4)**

*Elektrische Kontakte für Kraftfahrzeuge und Nachrichtentechnik (Sitzung 1-4)*

**Chairman:** Prof. Dr. J.-G. Zhang, China,  
**Co-Chairman:** Dr. Th. Schöpf, Germany

### Switching Contacts - Low Loads

<table>
<thead>
<tr>
<th>Title</th>
<th>Author(s)</th>
<th>Pages</th>
</tr>
</thead>
<tbody>
<tr>
<td>Switching Contacts - Low Loads</td>
<td>J. Weiser, Siemens, Hohenschäftlarn, Germany</td>
<td>15</td>
</tr>
<tr>
<td>Characteristics of Contact Materials on Contact Compatibility of Single Organic Vapours and their Mixtures</td>
<td>H. P. Koidl, W. F. Rieder, Q. R. Salzmann, University of Technology Vienna, Austria</td>
<td>23</td>
</tr>
<tr>
<td>Contact Resistance Behavior of Micro Relay with a Group of Ag-Pd Alloy Contacts in Silicone Vapor Environment</td>
<td>R. Tamai, A. Sato, S. Ito, Hyogo University of Teacher Education, Japan</td>
<td>31</td>
</tr>
<tr>
<td>Extended Life of Telecom Relais by using SF6</td>
<td>W. Johler, AXICOM AG, Switzerland</td>
<td>37</td>
</tr>
<tr>
<td>Contact Performances of some Ag-based Materials at Various Surface Conditions</td>
<td>M. Bizjak, Iskra Stikala, Kranj; L. Koller, K. Požun, J. Leskovšek, IEVT, Slovenia</td>
<td>47</td>
</tr>
</tbody>
</table>

## Session 2
**Switching Contacts – Medium Loads**

Schaltende Kontakte für mittlere Lasten

**Chairman:** Dr. H. Merz, Switzerland,  
**Co-Chairman:** R. Schnabl, Germany

### Micronewton Contact Characterization for MEMS Relays

<table>
<thead>

Session 3
Switching Contacts – Medium Loads
Schaltende Kontakte für mittlere Lasten

Effects of Different Loads on the Surface of Silver Metal Oxide Contacts for General-Purpose Relays
Th. J. Schoepf, I. Hundt, Siemens AG, Berlin; Germany;
F. Hauner, Siemens AG, Redwitz, Germany

A Study of New Contacts Materials under Break Arc in Automobile Area
L. Morin, N. B. Jemaa, University of Rennes, France;
D. Jeannot, Métalor Electronic, Courville-Sur-Eure, France;
J. Pinard, Métalor Electronic, Neuchatel, Switzerland;
L. Nedelec, J. P. Mercier, Division Systèmes de Liaisons Electriques Automobile, Annemasse, France

The Switching Behavior of Different Silver-Tin-Oxide Materials in Automotive Relays
P. Braumann, A. Koffler, K.-H. Schröder, Degussa, Hanau-Wolfgang, Germany

Session 4
Electrical Contacts for Automotive Application and Telecommunication (Session 1-4)
Elektrische Kontakte für Kraftfahrzeuge und Nachrichtentechnik (Sitzung 1-4)
Chairman: Dr. A. Carballeira, France
Co-Chairman: Dr. E. Vinaricky, Germany

Lifetime of Riveted and Welded Contacts in Powersupply Relay
E. Bolmerg, Heraeus GmbH, Hanau, Germany

Experimental Study on the Application of Digital Image Measuring System to Damage Analysis of Electrical Sliding Contact Surface
M. Taniguchi, Meijo University, Nagoya, Japan;
T. Takagi, Nihon University, Kohriyama, Japan

Measuring the Constriction Resistance in Low Power Applications Using Non-linear Techniques
C. Maul, J. W. McBride, J. Swingler, University of Southampton, U.K.

Session 5
Connectors for Automotive Application and Telecommunication (Session 5-7)
Steckverbinder für Kraftfahrzeuge und Nachrichtentechnik (Sitzung 5-7)

Contacts in Motion
P. van Dijk, AMP European Development Centre, The Netherlands

Methodical Approach to the Improvement of Connectors Performance
W. Moritz, J. Song, Grote & Hartmann GmbH & Co. KG, Wuppertal, Germany
Concerning Estimating Connector Reliability: Laboratory Simulations and Reliability Modeling .......................................................... 135
R. S. Mroczkowski, AMP Inc., Harrisburg, USA

The Synergistic Relationship of Stresses in the Automotive Connector ................................................................. 141
J. Swingler, J. W. McBride, University of Southampton, U.K.

Atmospheric Corrosion of Some Materials used in Electrical Contacts ................................................................. 147
C. Perrin, D. Simon, CNRS-CERI, Orléans, France

Session 6
Deposits, Contact Surfaces
Beschichtungen, Kontakttoberflächen
Chairman: Dr. J. B. P. Williamson, United Kingdom,
Co-Chairman: Dr. J. Horn, Germany

RF Interconnects for Future Highly Integrated Systems ................................................................. 153
D. Löffler, W. Wiesbeck, University of Karlsruhe, Germany

Characterization of the Corrosivity of an Automobile Environment ................................................................. 157
I. O. Wallinder, Royal Institute of Technology, Stockholm, Sweden;
P. Eriksson, Swedish National Testing and Research Institute, Borås, Sweden

Contact Resistance Measurements at Coatings on Copper Alloys
after Long-Term Exposure ................................................................. 163
I. Buresch, Wieland-Werke AG, Ulm, Germany

Mass Diffusion in Polycrystalline Metal / Electroplated Gold Planar Couples ................................................................. 169
P. W. Lees, Technical Materials Inc, Lincoln, USA

TRIBOR - An Innovative Coating System for Electrical Contacts and Connectors ................................................................. 173
J. Herrmann, Collini-Flühmann AG, Dübendorf, Switzerland

Session 7
Fretting, Wear
Reibkorrosion, Verschleiß

Investigations on Fretting Performance of Connector Materials by Model Tests ................................................................. 181
D. Klaffke, M. Hartelt, Federal Institute of Material Research and Testing, Berlin, Germany

Fretting Degradation of Tin-Plated Contacts studied by Means of a New Electrical Cartography Technique based on Atomic Force Microscopy ................................................................. 187
O. Schneegans, F. Houzé, P. Chrétiens, S. Noel, C. Bodin, L. Boyer, Laboratoire de Génie Electrique de Paris, Gif-Sur-Yvette, France;
L. Tristani, E. M. Zindine, FCI Joint Research Centre, La Ferté-Bernard, France

An Effect of Breaking Arc in Dielectric Liquids on Contact Reliability ................................................................. 195
N. Minoura, T. Hayakawa, K. Sawa, Keio University, Yokohama, Japan
Brush Wear in Gasoline of DC-Motor for Automotive Fuel Pump

K. Sawa, K. Nagakura, Ch. G. Shen, Keio University, Yokohama, Japan

Session 8
Contacts in Semiconductors – Alternatives and the Future (Session 8-9)
Kontakte in elektronischen Bauelementen, Zukunft und Alternativen
(Sitzung 8-9)
Chairman: Dr. A. Steinmetz, The Netherlands
Co-Chairman: Dr. M. Werner, Germany

Metal-Metal and Metal-Semiconductor Contacts
M. Werner, VDI/VDE-Technologiezentrum Informationstechnik GmbH, Germany
D. Amft, TU, Chemnitz-Zwickau, Germany

Contact Metals and Degradation Mechanisms
H.-J. Fecht, University Ulm, Germany
M. Werner, VDI/VDE-Technologiezentrum Informationstechnik GmbH, Germany

Contacts of SiC for Power Electronics
R. Held, R. Getto, N. Karrinski, E. Niemann, W. Wondrak, E. Niemann,
Daimler-Benz AG, Frankfurt a. M., Germany

Session 9
Thermomechanical Behaviour of Metal Contacts and Interconnections
for Information Technology
E. Kaulfersch, A. Schubert, B. Michel, Fraunhofer- Institute for Reliability and Microintegration,
Berlin, Germany

New Materials and Coatings for Wire Bonding in Electronic Assemblies
J. Ganz, F. Kaspar, W. Macht, E. Marka, DODUCO GmbH, Pforzheim, Germany

Plastic Optical Fibre for Car Application
K. Wiese, AMP-Deutschland GmbH, Germany
(The Paper was not available by the date of printing)

Session 10
Electrical Contacts for Power Applications (Session 10-15)
Elektrische Kontakte der Energietechnik (Sitzung 10-15)
Chairman: Prof. Dr. W. Rieder, Austria,
Co-Chairman: Dr. D. W. Branston, Germany

Electric Contacts for Power Interruption: A Review
P. G. Slade, Cutler Hammer, USA

Comparison of Different Contact Materials for Low Voltage Vacuum Applications
V. Behrens, Th. Honig, A. Kraus, AMI DODUCO GmbH, Pforzheim, Germany;
S. Allen, AMI DODUCO, Export, USA
Control of Vacuum Arc Motion by Three Layer Cu-Cr Contacts in Concentric Circles . . . 253
T. Kusano, T. Seki, A. Yamamoto, T. Okutomi, J. Sato, M. Homma, I. Ohshima,
Toshiba Corporation, Tokyo, Japan

Post-Arc Currents of Vacuum Interrupters with Radial and Axial Magnetic
Field Contacts – Measurements and Simulations ........................................... 259
B. Fenski, M. Lindmayer, Technical University Braunschweig, Germany

Session 11
High-Voltage Technique, Joining Technique
Hochspannungstechnik, Verbindungselemente

Greep-Ageing of Bolted Electrical Busbar Joints ....................................... 269
St. Schöft, H. Löbl, J. Kindersberger, Technical University Dresden,
St. Großmann, RIB Elektrotechnik, Radebeul, Germany

Pulse Current Behaviour of High Current Connections ................................. 277
G. Staperfeld, A. Brenner, Harting KGaA, Germany

Effect of Contact Load on the Contact Resistance Behaviour of Different Conductor
and Contact Materials under Fretting Conditions ...................................... 283
M. Braunovic, MB Interface, Montreal, Canada

Structural Changes Caused by Short Arcs on Contact Materials ..................... 289
C. Gorgius, J. Scheibler, Hochschule für Technik, Wirtschaft und Sozialwesen
Zittau/Görlitz, Germany; Th. Schoenemann, ABB Hochspannungstechnik AG Baden, Switzerland

Electronic Control of Electromagnetic Contactors ..................................... 295
Th. Roschke, Technical University Dresden, Germany

Session 12
Electrical Contacts for Power Applications (Session 10-15)
Elektrische Kontakte der Energietechnik (Sitzung 10-15)
Chairman:  Dr. R. S. Timsit, Canada,
Co-Chairman: Prof. Dr. D. Amft, Germany

Welding Behaviour of Closed Contact Material Combinations of Silver/Graphite
against Copper with and without Electrodynamic Lift-off in Different Atmospheres ...... 301
E. Vinaricky, V. Behrens, DODUCO GmbH, Phorzheim, Germany

Investigations about the Behaviour of the Electric Contacts
(by Testing and Exploitation) ............................................................................ 307
I. Tschalakoff, D. Malamov, M. Asenova, St. Shishkova, I.-T. U. Maslarov, Z. Kemalova,
St. Kukushe, Testing of Electrical Apparatus, Plovdiv, Bulgaria

Computer Controlled Investigations of the Static Welding Behaviour
of Silver-Tin Oxide Contacts ............................................................................ 311
E. Walczuk, D. Boczkowski, K. Holi, Technical University of Lodz; Poland
K. Bziawa, K. Kaliszuk, D. Wojcik-Grzybek, Institute of Electronic Materials Technology
Warsaw, Poland
AgFe and AgFe$_2$O$_3$ Contact Materials for Low Voltage Switchgear .......................... 317
F. Hauner, Metalor Contacts Deutschland, Redwitz, Germany;
D. Jeannot, Metalor Contacts France, Courville-sur-Eure, France
J. Pinard, Métaux Précieux SA Metalor, Neuchâtel, Switzerland

Session 13
Contactors
Schütze, Motorschalter

The Importance of Characterizing the Make and Break Operations to allow Effective Contact Material Development ............................................. 325
P. Braumann, A. Koffler, Degussa AG, Hanau-Wolfgang, Germany

Optimization of the AC3-Lifespan with Electronic Controlled Magnet System Using an Example of Contactors for Nominal Currents between 185 and 820 A ............................................. 335
St. Jörgens, Klöckner-Moeller GmbH, Germany

Parametric Study of the Dynamic Welding of Power Electrical Contacts .................................................. 343
Ch. Poulain, J. Devautour, Schneider Electric SA, Nanterre, France

Field vs. Erosion Model Investigation for Contactor Contacts ................................................................. 349
E. Hetzmannseder, K. v. Eckroth, EATON Corporation, Milwaukee, USA

Dynamic Welding Resistance Comparisons of Silver and Silver Metal Oxide .............................................. 355
G. Witter, Z. Chen, Chugai Inc., Waukegan, USA.

Session 14
Power Circuit Breakers, Miniature Circuit Breakers
Leistungsschalter, Leitungsschutzschalter
Chairman: Dr. J. Kulsetás, Norway,
Co-Chairman: Dr. F. Berger, Germany

Simulation of Arc Motion Between Divergent Arc Runners ................................................................. 361
F. Karetta, M. Lindmayer, Technical University Braunschweig, Germany

Force Calculations for the Movable Contact of Circuit Breakers .............................................................. 369
H. Stammberger, Klöckner-Moeller GmbH, Bonn, Germany

Analysis of the Current Transfer in a Breaking Device ................................................................. 375
D. Cajal, A. Laurent, F. Gary, M. Mercier, Blaise Pascal University, France
(The Paper was not available by the date of printing)
Session 15
Power Circuit Breakers, Miniature Circuit Breakers, Contactors
Leistungsschalter, Leitungsschutzschalter, Schütze

Variable Impulse Generators for Short-Circuit Testing ......................... 377
K. Fr. Eichhorn, A. Grzeganek, Hochschule für Technik, Wirtschaft und Kultur Leipzig, Germany;
P. Meckler, U. Reichert, E. Schneider, E-T-A Elektrotechnische Apparate GmbH, Germany

Determination of the RE-ignition Parameters by Means of Magnetic Diagnostic ........ 383
C. Brdys, J. P. Toumazet, G. Velleaud, A. Laurent, M. Mercier, Laboratoire d'Electrotechnique de Montlucon, Grenoble, France

A Method of Investigations of Arc Erosion Influence on the Contact Resistance
during Switching High Currents ....................................................... 389
E. Walczuk, D. Boczkowski, Technical University of Lodz, Poland
(The Paper was not available by the date of printing)

Contacting Highly Filled Polymers ................................................. 391
A. Wabner, D. Amft, Technical University Chemnitz, Germany;
F. Richarz, T. Hindert, Klöcker-Moeller GmbH, Bonn, Germany

Tungsten Based Contact Materials for Low Voltage Contactors .................. 397
W. Hartmann, K.-D. Rohde, Siemens AG, Erlangen, Germany
(The Paper was not available by the date of printing)

Measurement of the Dielectric Recovery Strength and Analysis of Reignition Process in Deion Plate Chambers of the AC Contactor ......................... 399
D. Chen, X. Gu, X. Wang, Y. Geng, Xi'an Jiaotong University, P. R. China

Poster Sessions

Butterfly Model of Arc Transition from Metallic to Gaseous Phase at High Pressure .... 405
M. Rong, Q. Wang, D. Chen, Xi'an Jiaotong University, P. R. China

Model to Assess the Temperature of the Constriction Area of Joints Used in Electrical Power Engineering ......................................................... 409
R.-D. Rogler, THETA Ingenieurbüro, Germany; M. Kubat, H. Löbl, Technical University Dresden, Germany; J. Schmidt, RIBE Electrical Fittings, Germany

Switch Contacts State Prediction of High Voltage Devices ....................... 415
D. Vătău, F. Şurianu, L. Moldovan, University of Timișoara, Romania

Contribution to the Study of Copper "Intrinsic" Erosion under the Action of an Electric Arc ................................................................. 419
J. Andlauer, T. Leblanc, Ph. Teste, J.-P. Chabriere, Laboratoire de Génie Electricque de Paris CNRS-Université, Gif sur Yvette, France

Analysis of the Choice of Electrical Contacts ..................................... 425
St. Kulas, Warsaw University of Technology, Warsaw, Poland
New Assembly Techniques for Repair and Redesign of Station Disconnecting Switches ........................................... 429
Ph. Nguyen-Duy, S. Boisvert, IREQ, Quebec, Canada; Y. Turcotte, Trans Énergie, Montreal, Canada

Arc and Erosive Processes in Switching Devices with Different Arc-Extinguishing Medium ........................................ 435
V. V. Borisov, St. Petersburg State Technical University, Russia

Mathematical Modelling and Related Interfacial Phenomena in AC Contactor Contacts ........................................... 441
H. Nouri, M. Keavey, University of the West of England, UK (The Paper was not available by the date of printing)

Predicting Arc Boundary Conditions with Finite Elements ........................................... 443
M. Fairhurst, British Steel, UK, T. S. Davies, H. Nouri, University of the West of England, UK (The Paper was not available by the date of printing)

A Comparative Erosion Assessment of Different Silver Based Contact Materials under Inductive and Capacitive Loads ........................................... 445
T. S. Davies, H. Nouri, J. Head, University of the West of England, UK (The Paper was not available by the date of printing)

Non-Destructive Method for Quality Control of Contact Junctions for Electrical Devices ........................................... 447
N. N. Shoylev, University of Chemical Technology, Sofia, Bulgaria

Wearing Out of the Electrical Apparatuses Contacts as Function of the Defects in their Welding to the Contact Carriers ........................................... 451
N. N. Shoylev, University of Chemical Technology, Sofia, Bulgaria

Optoelectronic Method for Experimental Research of the Dynamic Characteristics of Automatic Breakers ........................................... 455
I. Valkov, D. Malamov, Technical College „John Atanassov“, Plovdiv, Bulgaria

High Speed Break Arc Movies of Contactors and Circuit Breakers ........................................... 461
E. Hetzmannseder, EATON Corporation, Milwaukee, USA; K. Berger, P. Zeller, Technical University of Vienna, Austria

Morphological Box for New Switches in Power Engineering and Information Technology ........................................... 467
K.-W. Jäger, FH / Nürnberg, Germany; J. Kanzler, Leonhardy GmbH, Germany; J. U. Peterreins, Peterreins Schalttechnik GmbH, Germany (The Paper was not available by the date of printing)

Rotary Contacts. Effects on Arc Quenching and Electromechanical Drive ........................................... 469
R. Burlica, ICPE Trafil lasi, Romania; E. Hnatiuc, TU of lasi, Romania

An Investigation into Arc Contact Immobility and Current Limiting Performance of Miniature Circuit Breakers using the Taguchi Design of Experiments ........................................... 473
P. A. Jeffery, J. W. McBride, J. Swingler, P. M. Sweaver, University of Southhampton, UK (The Paper was not available by the date of printing)
Erosion Characteristics of the Multi-Reed Switch under Inductive Load .......... 475
L.-J. Xu, J.-G. Zhang, Beijing University of Posts and Telecommunications, P. R. China;
B. Miedziński, Wroclaw University of Technology, Wroclaw, Poland

Arc Heating of Two-Layer Contact Body ........................................... 479
St. Shishkova, D. Boyadzhiev, I. A. Maslarov, I. Chalakov, G. Ganev,
Technical University Plovdiv, Bulgaria

Copper Sliding Contacts in Automotive Application: Erosion
and Contact Resistance Study ...................................................... 483
R. Ratke, J. Dahlstrom, United Technology of Automotive, Dearborn, USA;
N. B. Jemaa, L. Morin, University of Rennes, France

Hybrid Switching Technology: A Review ........................................... 489
J. Swingler, J. W. McBride, University of Southampton, U.K.
(The Paper was not available by the date of printing)

The Automotive Connector: Contamination through Cable Capillarity ............. 491
J. Swingler, J. W. McBride, University of Southampton, U.K.
(The Paper was not available by the date of printing)

A New Proposal for Life Reliability Test Method of Electrical Contacts .......... 493
Mano Kunio, Mano Research and Development Technical Center, Nagoya, Japan

Computerised System to Measure and Analyse Low Current Contact Resistance ..... 499
Z. Złonkiewicz, Lublin Technical University, Lublin, Poland

A Modelation Possibility of the Sliding Contacts Behaviour ........................ 503
E. Hnatiuc, B. Hnatiuc, Technical University IASI, Romania
(The Paper was not available by the date of printing)
