Remote Sensing – From Research to Operational Applications in the New Europe

EDITED BY:
ROBIN VAUGHAN
APEME, UNIVERSITY OF DUNDEE, SCOTLAND, U.K.
Table of Contents

Preface IX
Organisation XI

1. From Research to Operation

Problems and applications of a Landsat-TM based land use classification of the trinational region of the Southern Upper Rhine Valley (Germany, France, Switzerland) D. Scherer, G. Bing, U. Heinzmann, E. Parlow, M. Wüthrich – Basle (Switzerland)

From research to operational ice service using ERS-1: The Swedish Sea Ice Service for the Baltic J. Askne, T. Thompson, H. Ottersten, O. Fäst – Göteborg, Norrköping, Linköping, Stockholm (Sweden)

Ship traffic monitoring and oil spill detection using the ERS-1: SAR A. Skøelv, K. Eldbuset, T. Wahl, T. Anderssen-Kjeller (Norway)

A new generation of space photographs for large-scale image mapping K.-H. Marek, K. Schmidt, A. Weigelt, S. Wewetzer – UVE Remote Sensing Centre, Potsdam (Germany)

2. Instrumentation and Techniques

The MOMS-02/D2 mission – First assessment and thematic evaluation J. Bodechtel, L. G. Lörcher, S. Sommer – University Munich (Germany)

Development of real-time software for a variable interference filter imaging spectrometer X. Sun, J. M. Anderson – University Dundee (United Kingdom)

Role of the ambiguity function for comparing impulse and CW modulations in imaging radars T. Doka, I. Bozsoki, E. Gödör, R. Seller, B. Farkas, S. Mihaly – Technical University Budapest (Hungary)
Quicklook: A viewer for on-line AVHRR data available from the University of Dundee
P. M. Cochrane, D. E. Gazis, L. Hayes, M. W. F. Krynitz – University Dundee (Scotland),
University of the Aegean (Greece), Inst. Meteorologie, Free University Berlin (Germany)

Regularization and resampling for co-registration in remote sensing P. M. Atkinson,
University of Bristol (United Kingdom)

Selecting the spatial resolution of airborne MSS imagery P. M. Atkinson, University
of Bristol (United Kingdom)

A portable suite of programs for reading magnetic tapes that contain data derived from
a range of satellite and aircraft sensors N. G. Paton, L. Hayes, A. Forrest – University
of Dundee (United Kingdom)

This Place, This Time: Data requirements for improved classification performances
A. J. Wells, N. W. T. Chisholm – University College of Wales, Aberystwyth (United Kingdom)

The EARSEC Imaging Spectrometer – Concept and status of a tool for operational remote
sensing applications in the new Europe G. Maracci and A. J. Sieber – JRC Ispra (Italy)

A single artificial neural network for a dual task cluster assignment function and
compression/decompression of remotely sensed images A. Basile, F. Butini – SMA,
Florence (Italy); L. Alparone, V. Cappellini – University of Florence (Italy)

Fractal configuration in land surface: the relation to remote sensing L. Vasiliev – Institute
of Geography, Moscow (Russia)

3. Land

Mediterranean ecosystem monitoring with Earth observation satellites J. Hill, W. Mehl,
M. Smith, J. Méquier – IRSA, CEC Joint Research Centre, Ispra (Italy)

Interpretation of daily NDVI maps D. Koslowsky – Inst. Meteorologie, Free University
Berlin (Germany)

Degradation of TM data for monitoring a Tuscan valley on different spatial scales
F. Maselli, C. Conese, A. Rodolfi – I. A. T. A./CNR, Florence (Italy)

Determination of land surface temperatures by means of satellite measurements: from
research to application V. Caselles, C. Coll, E. Valor – University of Valencia (Spain)

L.I.S. TOPOL: the new tool of remote sensing utilization in the Czech Republic O. Smid,
T. Benes – Lesprojekt, Brandys nad Labem, Czech Republic

Vegetation Classification and Mapping in South Sumatra, Indonesia, using SPOT
multispectral data T. Priyadhi and J. A. Soulsby, University of St. Andrews, Scotland
(United Kingdom)

High-resolution KFA-photography for integration with geo-informations systems – a case
study of Fertő-tó National Park (Austria, Hungary) E. Csaplovics, J. Kanonier,
A. Sindhuber – University of Technology, Vienna (Austria)
Soil erosion and sand movement in the southern part of Hungary L. Mucsi – University of Szeged (Hungary)

Appraisal of the interactions between pre-protohistoric settlements and hydrological/hydrogeological features in a large area fo southern Etruria (Italy) N. Parmegiani – Ist. Miceneo-Egeo-Anatolico CNR, Rome (Italy) M. Poscolieri – Ist. Astrofisica Spaziale CNR, Frascati (Italy)

AVHRR for operational monitoring of volcanic activity: a case study A. J. L. Harris, R. A. Vaughan – APEME, University of Dundee (United Kingdom)

Multitemporal vegetation analysis in an East German open coal mining area by remotely sensed data M. Pilarski, K. Schmidt, S. Wewetzer – UVE Remote Sensing Centre, Potsdam (Germany)

Remote sensing and GIS methods in the indication of waste disposals in Hungary J. Toth – University of Szeged (Hungary)

4. Radar

Precise Orbit Determination for ERS-1 M. J. Fernandes, – University of Porto (Portugal) Dowman, J. C. Iliffe – University College London (United Kingdom)

A pilot study to estimate the applicability of remote sensing data (C-SAR, TIR) for the derivation of the spatial distribution of soil moisture on a local scale M. Wüthrich, M. Föhner, J. Karel, University of Basle (Switzerland)

Microwave radiometry applied to forest fires: some preliminary experimental results F. Coppo, P. Ferrazzoli, S. Gagliani, G. Luzi – Fondazione Scienza per l’Ambiente, Florence (Italy) L. Guerriero – University Tor Vergata, Rome (Italy), T. Mazzoni – Officine Galileo, Florence (Italy)

Microwave remote sensing and hydrological modelling as support to soil erosion forecasting L. Chiarantini, P. Coppo, S. Fini, G. Luzi, S. Gagliani – Fondazione Scienza per l’Ambiente, Florence (Italy)

A comparative study on the performance of spatial filters for speckle reduction in ERS-1 SAR data G. Metternicht – I. T. C., Enschede, The Netherlands

5. The Hydrosphere

Mapping and characterising snow cover in Scotland from Landsat imagery J. A. T. Young, C. J. Place – University of Edinburgh (United Kingdom) G. G. Wright – Macaulay Land Use Research Institute, Aberdeen (United Kingdom)

Monitoring the marginal seas of Europe with optical observations V. Barale, P. Schlittenhardt – IRSA, CEC Joint Research Centre, Ispra (Italy)
Algorithm using SeaWiFS data for identification of low concentration blooms of the marine cyanobacterium "trichodesmium" S. Tassan – IRSA, CEC Joint Research Centre, Ispra (Italy)

Oil slick detection by NOAA satellites C. Ulivieri – University "La Sapienza" Rome (Italy) G. Borzelli – Telespazio SpA, Rome (Italy)

Sea surface temperature retrieval from AVHRR data in areas of sunglint S. B. Mansor, A. P. Cracknell – University of Dundee (United Kingdom)

Comparisons of intertidal sediments in two coastal embayments in eastern Scotland using remote sensing techniques W. A. Ahmad, J. McManus, University of St. Andrews, Scotland (United Kingdom)

The extraction of near-surface water quality parameters using FLI spectral mode data for the North Adriatic Sea Y. Wang, A. P. Cracknell – University of Dundee (United Kingdom)

An objective approach to hydrometeorological interpretation of multispectral satellite images A. Sharov – Moscow (Russia)

Macro and micro sediment forms and sequences using multi-platform remotely sensed imagery in the Eden Estuary, S. E. Scotland J. McManus and J. A. Soulsby, University of St. Andrews, Scotland (United Kingdom)

6. Atmospheres

The Global Climate Observing System (GCOS) D. L. Croom – Rutherford Appleton Laboratory, Didcot (United Kingdom)

Martian surface anomalies from Phobos-2 data R. D. Osborne, R. A. Vaughan, A. P. Cracknell – University of Dundee (United Kingdom)

Atmospheric correction for thermal infrared data on a pixel by pixel basis – Comparison between AVHRR and MOS VTIR data K. Abdullah, A. P. Cracknell, R. A. Vaughan – University of Dundee (United Kingdom)

Cloud study by ATSR/ERS-1 satellite data V. S. Djepa-Petrova, Bulgarian Academy of Sciences, Sofia (Bulgaria)

Cloud parameters determination by ATSR/ERS-1 satellite data V. S. Djepa-Petrova, Bulgarian Academy of Sciences, Sofia (Bulgaria)

Automatic determination of the absence of cloud over the U. K. B. Khan, L. W. B. Hayes, A. P. Cracknell – University of Dundee (United Kingdom)

Operational bi-angle approach to retrieve the Earth surface albedo in the visible band Y. Xue, A. P. Cracknell – University of Dundee (United Kingdom)

Study of the heat island over the city of Rome from Landsat-TM satellite in relation with urban air pollution U. Poli, A. F. Pignatoro, V. Rocchi, L. Bracco, ISPESL/DIPIA, Rome (Italy)

Colour Plates
