Volume II

Keynote Lecture 2
Information Geometry of Neuro-Manifolds
Shun-ichi Amari (RIKEN)

Plenary Lecture 1
Signal Decomposition by Fast ICA
Erkki Oja (Helsinki University of Technology)

Plenary Lecture 2
Translation of Motivation into Action in the Basal Ganglia
Okihide Hikosaka (Jyuntendo University)

Special Organized Session: Dynamic Brain

2a-A-1 Dynamics of Cortical Reorganization: Evidence
for Task- and Modality-Specific Coding of Plasticity (Invited)
H. R. Dinse, O. Schluter, R. Leonhardt, H. Reinke, W. von Seelen (Ruhr-University Bochum)

2a-A-2 The Effect of Chaotic Stimulation to Induce Long-Term Potentiation in
The Hippocampal CA1 Area
H. Matsuda, T. Aihara (Tamagawa Univ.), M. Tatsuno (Waseda Univ.),
M. Tsukada (Tamagawa Univ.)

2a-A-3 Neuro-flow Dynamics and Model of Hippocampal LTP/LTD under
Time-structured Stimuli
M. Tatsuno (Waseda University)

2a-A-4 Long-Term Potentiation and Synaptic Coding of Time-Varying Inputs (Invited)
M. Stiber, B. Lau (Univ. of Washington, Bothell)

2a-A-5 Temporal-Pattern Dependent Spatial-Distribution of LTP and LTD in
Hippocampal CA1 Area
T. Aihara, M. Tsukada (Tamagawa University)

Organized Session: Selection and Optimization of Neural Architectures

2a-B-1 BKYY Three Layer Net Learning, EM-Like Algorithm, and Selection
Criterion for Hidden Unit Number
L. Xu (The Chinese University of Hong Kong)

2a-B-2 Theoretical Concept of Network Pruning Based on Functional Convergence
P. Geczy, S. Usui (Toyohashi University of Technology)

2a-B-3 Statistical Methods for Construction of Neural Networks (Invited)
W. Duch, R. Adamczak (Nicholas Copernicus University)

2a-B-4 Controlling Structural Information to Improve Generalization
R. Kamimura (Tokai University)

2a-B-5 Empirical Study on Generalization Capability of Neural Networks
with Respect to Network Complexity
S. Park, C. H. Park (Korea Advanced Institute of Science and Technology)

Early Vision 2 and Self Organization

2a-C-1 Self-Organization of Shift-Invariant Receptive Fields through Pre- and
Post-Synaptic Competition
K. Fukushima, K. Yoshimoto (Osaka University)
### Distributed Processing Systems 2

2a-D-1 Statistical Learning in Optimization: Gaussian Modeling for Population Search 675
*S. Akaho (Electrotechnical Lab.)*

2a-D-2 Neuro-Controllers Using Competitive Associative Nets Requiring Neither Parameterization of Plants nor Special Training 679
*S. Kurogi, A. Ikushima, S. Ren (Kyushu Institute of Technology)*

2a-D-3 An Analysis of Competitive Associative Nets 683
*S. Kurogi, T. Sakamoto, S. Ren (Kyushu Institute of Technology)*

2a-D-4 SUM-PI Network: A New Multi-Layered Feed-Forward Network 687
*N. R. Pal (Indian Stat. Inst.), K. Banerjee (Banaras Hindu Univ.), Y. Hayashi (Meiji Univ.)*

2a-D-5 A Comparison of Learning Transfer in Networks and Humans 691
*S. Phillips (Electrotechnical Lab.)*

2a-D-6 Two Co-adaptation Schemes of Evolution and Learning for An Optimal VQ Codebook 695
*D. Kim, S. Ahn (DongA University)*

### Other Applications

2a-E-1 Modeling Dehydriding Behavior of Hydrogen Storage Materials with Neural Networks 703
*K. Pal, N. R. Pal (Indian Statistical Institute)*

2a-E-2 Smoothing of Chemical Analysis Data by Neural Networks 707
*T. Watanabe, S. Kishida, T. Kawai, K. Ishihara, H. Tokutaka (Tottori University), S. Fukushima (Nat. Inst. for Res. in Inorganic Materials)*

2a-E-3 Structural Analysis of Multi-Storey Frames Through Neural Network 710
*M. T. A. Chaudhary (University of Tokyo)*

2a-E-4 Computing Iterative Roots with Neural Networks 713
*L. Kindermann (FORWISS)*

2a-E-5 Medical Diagnosis Using Hierarchical Structured Selective NeuroFuzzy System 716
*J.-Y. Shim (Yohgln Technical College), C.-S. Hwang (KOREA University)*

2a-E-6 Logic Operation on an Excitable Field 720
*I. Motoike, K. Yoshikawa (Kyoto University)*

### organized Session: Independent Component Analysis and Related Problems 1

2a-G-1 The Nonlinear PCA Approach to ICA 725
*E. Oja (Helsinki University of Technology)*
2a-G-2 Two-stage Blind Deconvolution Using State-space Models (Invited) .............................................. 729
   A. Cichocki, L.Q. Zhang (RIKEN)

2a-G-3 Adaptive Algorithms for Implementing the Single-Stage Criterion for
   Multichannel Blind Deconvolution ............................................................................................................. 733
   Y. Inouye, S. Ohno (Shimane University)

2a-G-4 A Method of Blind Separation on Temporal Structure of Signals ..................................................... 737
   N. Murata, S. Ikeda (RIKEN)

2a-G-5 Blind Separation for Convolutive Mixtures of Non-stationary Signals ............................................. 743
   M. Kawamoto, A. K. Barros, A. Mansour (RIKEN),
   K. Matsuoka (Kyushu Inst. of Tech.), N. Ohnishi (RIKEN)

Soft Computing & Optimization & Learning ................................................................................................... 747

2a-H-1 Harnessing of Chaotic Dynamics for Solving Combinatorial Optimization
   Problems ........................................................................................................................................... 749
   M. Hasegawa, T. Ikeguchi, K. Aihara (Science University of Tokyo)

2a-H-2 Signal Separation Method Using Independent Component Analysis ................................................. 753
   M. Yoshioka, S. Omatu (Osaka Prefecture University)

2a-H-3 Combination of Fast and Slow Learning Methods for Fast Adaptation
   and Pruning of Redundant Cells ............................................................................................................ 757
   K. Yamauchi, N. Ishii (Nagoya Institute of Technology)

2a-H-4 An Incremental Learning Method of GRBF with Re-Generation of Input Patterns
   — Application for Case Based Reasoning Systems — .............................................................................. 761
   K. Yamauchi, T. Imai, N. Ishii (Nagoya Institute of Technology)

2a-H-5 Parallel State Space Search for SAT with Lagrange Programming
   Neural Network ..................................................................................................................................... 767
   M. Nagamatu, T. Yanaru (Kyushu Institute of Technology)

2a-H-6 High Performance Recognition of Pathology Objects by Using
   Evolutionary Self Growing Network ........................................................................................................ 771
   I. Nagayama, M. Kudaka, T. Takara (University of the Ryukyus)

Special Organized Session : Dynamic Brain 4 ................................................................................................. 775

2e-A-1 Dynamics of The Hippocampus: Multiple Strategies (Invited) .......................................................... 777
   P. Erdi (Hungarian Academy of Sci.), A. Kepecs (Brandeis Univ.),
   M. Lengyel (Hungarian Academy of Sci.), K. Obermayer, Z. Szatmary (TU Berlin)

2e-A-2 Nonlinear Dynamics Generating Theta Phase Precession in Hippocampal
   Closed Circuit and Generation of Episodic Memory ............................................................................... 781
   Y. Yamaguchi (Tokyo Denki University), B. L. McNaughton (The University of Arizona)

2e-A-3 Some Theoretical Animal Associative Learning Questions and Their Relevance
   for The Modelization of Some Aspects of Psychotic States in Humans (Invited) ................................... 785
   G. Sandner (University Louis Pasteur)

2e-A-4 Dynamic Representations of Mutual Information Transmission in Human
   Brains Doing Mental Tasks (Invited) ......................................................................................................... 787
   F. Gu, F. Chen (Fudan University), J. Xu (Academia Sinica)

Organized Session : Selection and Optimization of Neural Architectures 2 .................................................. 791

2e-B-1 Genetic Algorithms for the Design of Fuzzy Neural Networks ......................................................... 793
   M. Watts, N. Kasabov (University of Otago)

2e-B-2 Molecular Self-Organization in a Developmental Model for the Evolution
   of Large-scale Artificial Neural Networks ................................................................................................ 797
   H. Bolouri, R. Adams, S. George, A. G. Rust (University of Hertfordshire)
2e-B-3 Evaluating Input Dependency in a Feedforward Neural Network
D. K. Y. Chiu, M. Y. W. Leung (University of Guelph)

2e-B-4 Adaptive Regularization in a Constructive Cascade Network
N. K. Treadgold, T. D. Gedeon (The University of New South Wales)

2e-B-5 A Structure Adapting Feature Map for Optimal Cluster Representation
D. Alahakoon (Monash Univ.), S. K. Halgamuge (Univ. of Melbourne),
B. Srinivasan (Monash Univ.)

Early Vision 3

2e-C-1 A Self-Organizing Neural Network Model of the Primary Visual Cortex (Invited)
R. Miikkulainen, J. A. Bednar, Y. Choe, J. Sirosh (The University of Texas at Austin)

2e-C-2 Knowledge-Dependent Perceptual Grouping (Invited)
A. Guo, H. Sun, L. Liu (Chinese Academy of Sciences)

2e-C-3 From Receptive Fields to Connection Strengths
N. Iannella (RIKEN), A. Bouzerdoum (Edith Cowan Univ.), S. Tanaka (RIKEN)

2e-C-4 Perception of Global Orientation Psychophysical and Computational Analysis on Tilt Illusion
K. Sakai, S. Tanaka (RIKEN)

2e-C-5 Lateral Inhibition Model Taken Account of the Duality of Receptive Fields and Its Behavior for RGB Inputs
T. Sakamoto, T. Kato (Electrotechnical Lab.)

Reinforcement Learning 2

2e-D-1 Q-Learning with Recurrent Neural Networks as a Controller for the Inverted Pendulum Problem
A. Onat (Kyoto Univ.), H. Kita (Tokyo Inst. of Tech.), Y. Nishikawa (Osaka Inst. of Tech.)

2e-D-2 Strategy Acquisition for the Game “Othello” Based on Reinforcement Learning
T. Yoshioka, S. Ishii, M. Ito (Nara Institute of Science and Technology)

2e-D-3 Agents that have Desires and Adaptive Behaviors
C.-Y. Liou, C.-H. Tan, H.-T. Chen, J.-H. Chen (National Taiwan University)

2e-D-4 Hierarchical Reinforcement Learning of Low-Dimensional Subgoals and High-Dimensional Trajectories
J. Morimoto (Nara Inst. of Sci. & Tech.), K. Doya (ATR)

2e-D-5 Active Data Partitioning for Building Mixture Models
S.-J. Kim, B.-T. Zhang (Seoul National University)

Sensory Motor Integration

2e-E-1 Learning Sound Source Localization by Interaction between Motion and Sensing
— In a Non-Linear Motor System —
H. Nakashima (Nagoya University), N. Ohnishi (RIKEN)

2e-E-2 A Consideration of Perceptual-Motor Coordination with Active and Passive Movements
T. Maeda, S. Tachi (University of Tokyo)

2e-E-3 Self-Development of Hand-Eye Coordination for Robotic Grasping via “Learn-by-Doing”
J. M. Chung, N. Ohnishi (RIKEN)

2e-E-4 A Neural Network Model for Extracting Correlated Information in Sensory Integration
N. Fukumura, S. Otane, Y. Uno (Toyohashi Univ. of Tech.), R. Suzuki (Kanazawa Inst. of Tech.)
Contents

2e-E-5 Bayesian Ying-Yang System and Theory as a Unified Statistical Learning Approach: (V) Temporal Modeling for Perception and Control (Invited) ........................................877
L. Xu (The Chinese University of Hong Kong)

Organized Session: Independent Component Analysis and Related Problems 2 ..........885
2e-G-1 Progress in Unsupervised Neural Nets for Blind Communication De-Mixing ........887
H. Szu, C. Hsu (The Univ. of Southwestern Louisiana), T. Yamakawa (Kyushu Inst. of Tech.)
2e-G-2 Signal Separation Method Using Independent Component Analysis ................891
M. Yoshioka, S. Omata (Osaka Prefecture University)
2e-G-3 Independent Component Analysis for Parallel Financial Time Series ...............895
K. Kiviluoto, E. Oja (Helsinki University of Technology)
2e-G-4 Comparison Among Three Estimators for High Order Statistics ....................899
A. Mansour, A.K. Barros, N. Ohnishi (RIKEN)
2e-G-5 Rival Penalized Competitive Learning Based Separator on Binary Sources Separation .................................................................903
Y.-M. Cheung, L. Xu (The Chinese University of Hong Kong)

Knowledge & Rule Extraction .........................................................................................907
2e-H-1 Direct Rule Extraction from a MLP Network that Performs Whole Life Assurance Risk Assessment .................................................................909
M. L. Vaughn, E. Ong, S. J. Cavill (Cranfield University)
2e-H-2 A Mathematical Investigation for Oligosaccharide Analysis Using Neural Network for Better Diagnosis .................................................................915
K. Oguri (Aichi Prefecture University), A. Iwata (Nagoya Inst. of Tech.)
2e-H-3 A Formal Model of an Artificial Neural Network Used to Store and Recognize the Semantics of Some Sentences of Natural Language ........................................919
T. Pelc, M Sc (Wroclaw University of Technology)
2e-H-4 A Model for Emotional Aspects on Visual Art Works ......................................923
K. Yoshida, T. Kato, T. Yanara (Kyushu Institute of Technology)
2e-H-5 Data Mining Using AI Techniques to Enhance Decision-Making and Investments in the Capital Markets .................................................................927
G.-S. Khoo (Nanyang Technological Univ.), W. C. Yeong (Man-Drapeau Res.)
2e-H-6 Knowledge Extraction Based Multilayer Feedforward Neural Networks (Invited) ................... 931
Y. Wu, C. Fang, X. Lin, X. Ding (Tsinghua University)

Poster Session 2 ............................................................................................................937
Mathematical Theory of Brain Functions
2P-1 Analysis of Orthogonal Memory Patterns ............................................................939
L. Yujian, W. Xiangdong, C. Chuan (Academy of Sciences)
2P-2 Storage and Recall of Spatio-Temporal Sequences Using Any Multi-Associative Neural Networks .................................................................943
L. Wang (Deakin University)
2P-3 The Memory Capacity of Recurrent Neural Networks for Storing Spatio-
Temporal Sequences ..................................................................................................947
J. Ma (Shantou University)
2P-4 Stochastic Resonance by Modulation Detecting Neuron ......................................951
Y. Sakumura, K. Aihara (The University of Tokyo)
2P-5 Static Properties of a Neural Network Composed of Two Kinds of Neurons ........955
Y. Nakamura (Nagoya University), A. R. Ferchmin (Polish Academy of Science)
Contents

2P- 6 Emergent Synchronous Patterns in a Multilayer Neural Network ................................. 959
   O. Araki, K. Aihara (The University of Tokyo)

2P- 7 A Method to Evaluate Associated Temporal Activity of a Neural Group Characterized by Different Activation Levels ................................................................. 963
   H. Hiyayama (Asahikawa Medical College), Y. Okita (National Inst. of Special Edu.)

2P- 8 Fractal Structure of Linear Recurrent Neural Networks with Temporal Input ..................... 969
   R. Wada, S. Sato, K. Gohara (Hokkaido University)

2P- 9 The Inhibition beyond the Receptive Field of Visual Cortical Neuron .............................. 973
   X.-C. Pan (Tamagawa University), Y.-J. Wang, X.-L. Qi (Academia Sinica)

2P-10 Characteristics Improved by Noise in Pulse Neural Cell Model ..................................... 977
   Y. Sigematsu (Electrotechnical Lab.)

2P-11 Plastic Effect of Feedback Connections to Memory Compression and Formation of Knowledge Structure Based on Hebb Rule and Inhibitory Cells .............................................. 981
   M. Takase

Soft Computing & Optimization & Learning

2P-12 Hybrid Learning Algorithm for Curvature Smoothing ...................................................... 987
   S.-Y. Jeong (KAIST), M. Lee (Kyungpook National Univ.), S.-Y. Lee (KAIST)

2P-13 Learning Algorithm for Intermodular Connection Networks for Multimodular Associative Networks ................................................................. 991
   M. Mochizuki, H. Minamitani (Keio University)

2P-14 Application of Evolved Neural Networks to Real World Task ......................................... 995
   M. Kotani, N. Shiba, K. Akazawa (Kobe University)

2P-15 Lagrange Programming Neural Network for Wire Routing Problem .................................. 999
   S. Ismail, M. Nagamatu, T. Yanaru (Kyushu Institute of Technology)

2P-16 Reliability Estimation of Electrical Parts by Using Evolutionary Neural Computation ........ 1004
   I. Nagayama, H. Haneji, T. Takara (University of the Ryukyus)

2P-17 Accelerating the Learning Speed of Multilayer Perceptrons with a New Error Function for Hidden Layer .................................................................................. 1008
   S.-H. Oh, S.-Y. Lee (ETRI)

Prediction

2P-18 Neural Approach to Time Series Prediction with Noise Addition ....................................... 1012
   T. C. Jo (Samsung S. D. S. Co., Ltd)

2P-19 Rock Porosity Prediction Using Multilayer Perceptrons ..................................................... 1016
   M. Jang, S. Cho, P. Wong, C. C. Fung,
   K. W. Wong (Pohang University of Science and Technology)

2P-20 Chaotic Time Series Prediction via Hierarchical Bayesian Neural Net ............................... 1020
   T. Matsumoto, H. Hamagishi, J. Sugi, M. Saito (Waseda University)

2P-21 The Development of a Feedforward NN for Financial Time-Series Forecasts .................... 1024
   A. I. Cristea, T. Okamoto (University of Electro-Communications)

2P-22 A Fuzzy-Hybrid Approach to Stock Trading ...................................................................... 1028
   R. Herrmann, M. Kreuddler, D. Seese, K. Zabel (University of Karlsruhe)

2P-23 Model Comparison for Monthly Forecasts of the CAC 40 ................................................ 1033
   M. Crucianu, R. Boné, J. P. A. de Beaunue
   (Ecole d'Ingénieurs en Informatique pour l'Industrie)

2P-24 Forecasting Precipitation with Integrated and Separated pattern Generation Using Virtual Terms for MLP Training ......................................................... 1037
   T. C. Jo (Samsung S. D. S. Co., Ltd)
Contents

2P-25 Neural Network for Time series Prediction and Its Application ................................................. 1041
Y. Wang, J. Zhou, S. Wang (Northeastern University)

2P-26 RBF Neural Network Is more Suitable for Function Approximating than Modeling in Nonlinear Time Series Analysis ................................................................. 1045
Z. Shi, Y. Tamura, T. Ozaki (The Institute of Statistical Mathematics)

2P-27 Comparison between Mixture of ARMA and Mixture of AR Model with Application to Time Series Forecasting ................................................................. 1049
H. Y. Kwok, C. M. Chen, L. Xu (The Chinese University of Hong Kong)

Image Processing

2P-28 Facial Expression Synthesis by Caricature .................................................................................. 1053
K. Miyazaki, H. Nakayama (Konan University)

2P-29 A Study of ART1 Classification Method without Depending on the Presentation Order of Patterns ................................................................. 1057
T. Takaoka (Shikoku Reserch Inst.), M. Izumida, K. Murakami (Ehime University)

2P-30 A Robust Segmentation Algorithm for the MRF Texture Images and Its Implementation by a Neural Circuitry ................................................................. 1061
B. Zhang (Comm. Res. Lab.), M. N. Shirazi (Osaka Inst. of Tech.), H. Noda (Kyushu Inst. of Tech.)

2P-31 Pattern Classification Using Multiple SOMs .............................................................................. 1065
P. N. Suganthan (University of Queensland), N. R. Pal (Indian Statistical Institute)

2P-32 Adaptive Classification of Untypical Urinary Sediment Images Using Feedback Learning ................................................................. 1069
S. Mistuyama, J. Mitoike, H. Matsuo (Hitachi)

2P-33 Recognition System of Pattern Similarity in Time Series Signals Using Neural Network being Composed of "Biochemical Neurons ................................................................. 1073
K. Tanaka (Kyushu Institute of Tech.), T. Sekiguchi (Maebashi Inst. of Tech.), K. Kawamoto, M. Okamoto (Kyushu Institute of Tech.)

2P-34 Gray Scale Picture Transform into Binary Picture by Hopfield Neural Network ................................................................. 1078
T. Hayashi, K. Nagasaka (Hosei University)

2P-35 Vision Supporting System for Car Driver using Neural Network ................................................................. 1082
M. Nakamura (Suzuka College of Tech.), S. Kodama (Nagoya Inst. of Tech.), N. Kitamura (Suzuka College of Tech.), M. Umeno (Nagoya Inst. of Tech.)

Pattern Recognition

2P-36 Recognition of Hand-Written Characters by a Multi-Layered Competitive Net ................................................................. 1086
S. Kurogi, T. Nishida, S. Ren (Kyushu Institute of Technology)

2P-37 Printed Chinese Optical Character Recognition by Neural Network ................................................................. 1090
M. Zhao, Y. Wu (Tsinghua University)

2P-38 Numeral Recognition Using a Multi Neural Network Model ................................................................. 1094
Y. Inooka, M. Fukami, N. Akamatsu (University of Tokushima)

2P-39 An Approach to Free Viewpoint Character Recognition by Using Modular Neural Network ................................................................. 1098
I. Nagayama (University of the Ryukyus)

Robotics & Control

2P-40 Early Fault Detection for Nuclear Power Plant Using Recurrent Neural Network ................................................................. 1102
2P-41 Autonomus Navigation of Mobile Robots using Neural Nets with Single Sided Reflex ......................................................... 1106
R. Chatterjee, F. Matsuno (Tokyo Institute of Technology)

2P-42 Self-Tuning Neuro-PID for SIMO Systems ....................................................... 1110
S. Omatu, Y. Kishida, M. Yoshioka (Osaka Prefecture University)

2P-43 Inverse Modeling of a Mobile Robot Using Feedback Error Learning ..................... 1114
S. Yamaguchi, H. Itakura (Chiba Institute of Technology)

Other Applications

2P-44 Noisy Digit Recognition with MLP and HMMS Using Modified Cost Function in MCE Training ......................................................... 1118
P. Salmela, M. Lehtokangas, J. Saarinen (Tampere University of Technology)

2P-45 Application of SOM to Quantitative Chemical Data Analysis ................................ 1122
K. Iwamoto, H. Tokutaka (Tottori Univ.), K. Yoshihara (National Res. Inst. of Metals), K. Fujimura, T. Watanabe, S. Kishida (Tottori Univ.)

2P-46 An Application of ELISA to Perfect Hashing with Deterministic Ordering ..................... 1126
M. Bianchini (Univ. degli Studi di Firenze), S. Fanelli (Univ. di Rome Tor Vergata), M. Gori (Univ. degli Studi di Siena)

2P-47 Knowledge Discovery from the MLP Network that Performs Low Back Pain Classification ......................................................... 1130
S. J. Cavill, M. L. Vaughn (Cranfield Univ.), S. J. Taylor, M. A. Foy, A. J. B. Fogg (Princess Margaret Hospital)

2P-48 A New Model of Recurrent Neural Networks for Speech Recognition ..................... 1134
X. Wei, Z. Xiaoyan (Tsinghua University)

2P-49 Connectionist Parser for Japanese sentence with Embedded Clauses ..................... 1138
M. Motoki, Y. Shimazu (Kyushu Sangyo University)

2P-50 Neural Networks for Tsume-Go Problems ......................................................... 1141
N. Sasaki, Y. Sawada (Tohoku University)

2P-51 Bispectrum Estimation by Recurrent Network with Third-Order Moment Controllable Noise Source ......................................................... 1145
T. Ogawa (Takushoku Univ.), Y. Kosugi (Tokyo Inst. of Tech.), H. Kanada (Takushoku Univ.)

2P-52 Evaluation of the PCA Encoding Ability in Speech Recognition ..................... 1149
K. Akatsuka, H. Tsujino (HONDA R & D Co., Ltd.)

2P-53 Speaker Adaptation Based on Spectral Transformation with Limited Adaptation Words ......................................................... 1153
J.-H. Jeong, S.-Y. Lee (Korea Advanced Institute of Science and Technology)

2P-54 Learning of Simple Oscillating Wave Form by Adaptive Subspace SOM ..................... 1157
Y. Yata, H. Tokutaka, K. Fujimura (Tottori University)

2P-55 Identification of a Real Open-Channel Irrigation System Using a Neural Network Model ......................................................... 1160
H. Elfawal-Mansour, D. Georges, G. Bornard (Laboratoire d’Automatique de Grenoble)

2P-56 A SOM with Virtual Connection and Its Application to Fuzzy Systems ..................... 1164
H. Aoki, T. Saito (Hosei University)

2P-57 A Telephone Number Corrector Using A Counterpropagation Network ..................... 1168
J. Moreno, G. Sebastian, M. A. Fernandez, A. F. Caballero (Universidad de Castilla-La Mancha)

2P-58 New and Used Bills Classification Using Competitive Neural Network Based on Cepstrum Pattern ......................................................... 1172
M. Teranishi (Nara National Coll. of Tech.), S. Omatu (Osaka Pref. Univ.), T. Kosaka (Glory Ltd.)
