5th World Conference on Timber Engineering

August 17–20, 1998
Montreux, Switzerland

PROCEEDINGS

Volume 1

Edited by J. Natterer and J.-L. Sandoz

Presses polytechniques et universitaires romandes
PLENARY SESSION I

Wood in Architecture from Prehistory to Crystal Palace 1-2
Prof SCHWEITZER

Wood Utilization Using New Technologies for Timber Engineers 1-7
Prof NATTERER

SESSION 1: GENERAL ISSUES IN WOOD CONSTRUCTION

Aspects of Conformance to Quality Standards of Timber Roof Structures in South Africa 1-16
Mr Malherbe

International Guidelines for Design of Stress Laminated Timber Bridge Decks 1-24
Mr Crews

An Overview of the Wood in Transportation Program in the United States 1-32
Ms Rimal Duwadi, Mr Ritter, Mr Cesa

Microtremore Measurement on Japanese Traditional Wooden Houses, Which Are Important Cultural Properties 1-40
Mr Maekawa, Mr Kawai

Conclusions from Analysis and Construction of Timber Roof Structures 1-48
Prof Straka

SESSION 2: COMPOSITE STRUCTURES

Efficient Structural Use of Modern Wood Composites 1-55
Mr Furrer, Mr Sharp

Timber/Concrete Composite Beam with Partial Interaction 1-62
Ms Magalhães, Mr Souza, Mr Chahud

Development of a Screw-Laminated Bridge Deck 1-70
Mr Meierhofer

Fire Behaviour of Timber Concrete Composite Slabs 1-76
Prof Fontana, Mr Frangi

Stiffness Evaluation of Stressed-Skin Panels of Mixed Construction 1-84
Prof Pellicane, Prof Kliger

Reconstruction of Old Wooden Floors by Use of the Composed Elements 1-92
Ms Misztal, Mr Tarczewski

SESSION 3: MULTI-STORY CONSTRUCTIONS

Research Activities in VTT on the Functionality of Multi-Storey Timber Houses in Finland 1-98
Dr Toratti, Mr Mikkola, Mr Nummi, Mr Oksanen, Mr Ranta-Maunus, Mr Sipari

Wooden Multi-Storey Buildings – Structures and Moisture Physical Behaviour 1-106
Mr Lehtinen, Mr Rautamäki
Fire Resistance of Inter-tenancy Wall Connections in Multi-residential Timber – Framed Buildings
Mr Collins

Timber Frame Engineering for Medium-Rise Structures
Mr Mettem, Mr Milner, Mr Bainbridge, Mr Enjily

Multi-Storey Timber Housing in the Nordic Countries
Prof Thelandersson

SESSION 4: GLULAM

Production of Radiata Glulam to Demanding Specifications
Dr Walford

Analysis of Strain in Finger-Jointed Lumber
Mr Hernandez

Application of Plywood in Glued-laminated Portal Frames
Mr Scapozza

Creep Behavior of FRP-Reinforced Glulam Beams
Prof Dagher, Mr Breton

Comparison of Combine-laminated Specimens of Keruing and Alder Laminations, with Solid Alder for Joists
Prof Ebrahimi

SESSION 5: MECHANICAL CHARACTERISTICS I

Load Introduction and Load Transfer Perpendicular to Grain
Prof Gehri

Modification of Brittle Fracture Theory for the Determination of Size Effects on Timber Strength
Mr Burger

A Weak-zone Model for the Bending Strength of Structural Timber
Mr Källsner, Prof Ditlevsen

Improvement of Tensile Strength and Stiffness of Solid Wood
Ms Schrepfer

In-Place Shear Strength of Wood Beams
Mr Rammer, Prof McLean, Prof Cofer

The Shear Strength of Full-Scale Structural Lumber using Torsion Tests
Ms Heck, Prof Gupta, Mr Miller

SESSION 6: FIRE PROTECTION AND WOOD PRESERVATIVES

Non-Toxic Wood Preservatives Based on Boric Acid-Protein Associations
Mr Thévenon, Mr Pizzi, Mr Haluk

Charring Rate Slowing by Means of Fiberglass-Reinforced Coatings
Mr del Senno, Mr Cont, Prof Piazza

Mechanical Properties of Wood Exposed to Fires
Prof Buchanan
Degradation of Mechanical Properties in Compression of Radiata Pine in Fire
Dr Young, Mr Clancy

Wood Surface Modifying with Silicones
Dr Zverev, Mr Chernyshev

SESSION 7: GLUED JOINTS I
Glued Truss Joints Analysed by Fracture Mechanics
Prof Gustafsson, Mr Serrano

Structural Behaviour of Glued Bolt Joints Using FRP
Dr Guan

Investigations on High Strength Glulam Frame Corners with Glued-in Steel Connectors
Dr Aicher, Mr Herr

Joints in Glulam using Groups of Epoxy Grouted Steel Bars plus an Alternative to Epoxy Bonding
Mr Gaunt

Structural Joints in Glulam
Mr Batchelor, Mr McIntosh

SESSION 8: MECHANICAL CONNECTIONS MODEL
Material Models Used to Predict the Mechanical Behavior of Bolted Wood Connections
Ms Patton-Mallory, Prof Pellicane

Modelling of Semi-rigid Joints and their Influence on the Behaviour of Structures
Mr Jensen, Prof Larsen

Influence of Damage Models on the Prediction of High Stressed Joint Failure
Dr Chaplain, Dr Fournely, Prof Vergne

Fracture Analyses of Bolted Joints Using the Finite Small Area Criterion
Prof Masuda

Stress Analysis of One- and Two-Bolt Timber Connections
Ms Kharouf, Dr McClure, Prof Smith

Progress in Timber Joint Development and Modelling
Prof Haller

SESSION 9: DYNAMIC PERFORMANCE OF JOINTS
Fracturing Process Simulation of Joints under Dynamic Loading
Prof Ohta

Modeling of Timber Shear Walls with Nailed Joints under Cyclic Loading
Mr Davenne, Mr Daudeville, Mr Richard, Mr Kawai, Mr Yasumura

Friction-Damped Energy Dissipating Timber Connections
Prof Duff, Prof Black, Prof Mahin, Mr Blondet
Time-Dependent Behavior of Nailed Connections in Direct Shear

Prof Fridley, Prof Rosowsky

Influence of Cyclic Loads on Strength and Stiffness of Bolted Timber Connections

Mr Mohammad, Prof Quenneville, Prof Smith

PLENARY SESSION II

New Opportunities for Wood using Engineered Wood

Mr MERZ

SESSION 10: SHEAR WALLS AND DIAPHRAGMS

Effect of Asymmetric Shear Wall Layouts on Full-Sized Japanese Wooden House Construction

Prof Tsuchimoto, Prof Arima, Mr Hirano, Mr Furusawa, Mr Suzuki, Mr Nishiyama

Seismic Resistance of Wood Shear Walls with Oversize Sheathing Panels

Mrs Durham, Mr He, Prof Lam, Prof Prion

Construction Practices that Increase Diaphragm Strength and Stiffness

Mr Gebremedhin

Pseudo-Dynamic Test on Shear Walls

Mr Kawai

Analysis and Design of Breakaway Walls

Prof Kasal, Prof Tung, Mr Rogers

SESSION 11: EVALUATION & REHABILITATION

Determination of the Effective Bending Stiffness of Nailed Laminated Wood Beams

Prof de Oliveira Almeida, Mr Ferreira

Inspection and Assessment of Timber Piles

Mr Anthony, Mr Pandey, Mr Arnette

The Effectiveness of Bracing in Non-domestic Timber Trussed Rafter Roofs

Mr Bainbridge, Mr Mettem, Mr Gordon, Mr Studer, Mr Reffold

Long Term Observation Experiences of the Glue Laminated Wood Structures

Prof Zakic

A Non Destructive Diagnostic Method on Ancient Timber Structures:
Some Practical Application Examples

Ms Bertolini, Ms Brunetti, Ms Cavallero, Mr Macchioni

SESSION 12: COMPUTER AIDED DESIGN FOR STRUCTURES

Nonlinear Analysis as Basis for Design of Timber Structures

Mr. Eggen, Mr Bell, Mr Haugen

Numerical Modeling of Wood Structures – Benefits and Drawbacks

Dr Kasal
ANN for Design of 3D Glulam Three-Hinged Arches 1-478
Prof Zagar

Computer Based Routine Design for Timber Structures 1-486
Prof Haller, Mr Menzel

SESSION 13: COMPOSITE MATERIALS I

Development of a Prototype Composite-Reinforced Timber Railroad Crosstie 1-494
Prof Davalos, Mr Qiao

Structural Insulated Panel (SIP) Fractional Creep Deflection 1-502
Mr Taylor, Mr Manbeck, Mr Janowiak

High Resistance Assemblies by Modification of Local Load Bearing Characteristics of Wood 1-510
Mr Bléron, Mr Duchanois, Mr Triboulot, Mr Pizzi, Prof Calvi

A New Shear Connector for Wood-Concrete Composite Structures 1-518
Dr Mungwa, Prof Jullien, Mr Foudjet, Mr Hentges

Innovative Designs of Wood-Bamboo-Brick Composites 1-526
Mr Datye, Mr Gore

Studies on Particle Composites from Wood Particle Mixed with Coating Paper 1-534
Prof Lee, Mr Kim, Mr Son

SESSION 14: MECHANICAL CHARACTERISTICS II

The Effect of Weather Changes and Surface Coating on the Load Bearing Capacity of Curved Glulam Structures 1-541
Mr Ranta-Maunus

Glued Laminated Timber : Reliability and High Performance 1-549
Prof Sandoz

Strength Grading of Construction Timber with Large Cross Sections 1-557
Prof Kessel, Mr Plinke, Mr Augustin, Mr Huse

Full Scale Lateral Loading Test on Improved Post and Beam Construction 1-563
Prof Hirashima, Mr Suzuki, Mr Kamiya

SESSION 15: PHYSICAL PROPERTIES

Dimensional Stability of Wood Composite Boards : Effect of Waterproofing Sealers 1-571
Prof Tang, Mr Lee

Dielectric Relaxation of Water Adsorbed on Wood 1-578
Mr Zhao, Mr Norimoto

Moisture-Induced Distortions of Timber – A Parametric Study of Shape Stability 1-586
Mr Ormarsson, Dr Dahlblom, Mr Petersson

Warping and Deformations of Plywood Panels in Constructions 1-594
Ms Lehtinen, Mr Koponen, Mr Saavalainen
SESSION 16: NON DESTRUCTIVE TESTING AND POLES

Strength Characteristics for Small Roundwood in Bending and Compression from a UK Resource
Prof Barnard, Dr Griffiths 1-602

Repair of Timber Poles by Injection Grouting
Prof Alawady, Prof Avent, Prof Mukai 1-610

Assessment of Characteristic Properties for Utility Poles in Australia
Mr Crews, Ms Horrigan, Prof Boughton 1-618

NDE of Wood Utility Poles Integrating Results of Gamma Densitometrie and of Visual Inspection
Mr Taras, Mr Iordanescu 1-626

Methods to Determine Mechanical Properties in Order to Grade Roundwood
Mr Gard, Mr de Vries, Mr Lanvin 1-634

Nondestructive Strength Evaluation of Pinus Sylvestris Poles in the U.K.
Mr Anthony, Mr Renforth, Mr Nelson 1-642

SESSION 17: TIMBER & ECOLOGY

The Ecological Challenge in Architecture and Urban Planning
Prof Volz 1-649

The Ecological Benefits of Increased Timber Utilization
Prof Wegener, Mr Zimmer 1-656

Economical and Ecological Aspects of Multistory Timber Buildings in Europe
Prof Winter 1-664

Ecological Multistory Housing with « Sun-Belt-Facade » in Timber
Mr Erat 1-669

SESSION 18: NON DESTRUCTIVE EVALUATION I

Nondestructive Evaluation Techniques for Timber Bridges
Mr Emerson, Mr Pollock, Mr Kainz, Prof Fridley, Prof McLean, Mr Ross 1-670

Evaluation of Lumber Properties by Applying NDT to Logs for Korean Species
Prof Jang 1-678

Small Roundwood Grading by Non Destructive X-Rays and Ultrasonic Waves Methods
Mr Adjanohoun, Mr Guillot, Mr Lanvin, Mr Cholat 1-684

Nondestructive Evaluation of Structural Timber
Prof Kuklík, Mr Dolejš 1-692
POSTERS : STRUCTURES

Timber Education in Australia – 2000 and Beyond 1-700
Prof Boughton, Dr Woodard

Use of Particleboard as Structural Diaphragms in Housing 1-702
Mr Taylor, Mr Milner

Environmental Life Cycle Assessment: Implementation within 1-704
the Plywood Industry
Ms Mitchell, Dr Hyde
Timber Tower and Ladder Frame Structures
Mr French, Dr Hyde

Performance Criteria, Design and Construction of a Timber Coke Quencher Tower
Mr Crews, Mr Donnelly, Mr Joyce, Ms Cartledge

Cypress Pine – The New Australian Bridge Glulam
Mr Carlin-Smith

The Mur River Wooden Bridge
Dr Schickhofer, Mr Pischl

Influence of Knots on Bending Strength of Small Diameter Roundwood as Basis for a Simple Strength Grading Model
Ms Patzelt, Mr Olbrich

Diaphragm Action in Timber Post-Frame Buildings
Mr Baraldi, Prof Calil Jr

Effect of Butt Joints on Prestressed Timber Decks
Mr Okimoto, Prof Calil Jr

Design Rationalization and Consumption in Wood Roof Structures
Mr Pinheiro, Prof Lahr

Formwork System: Timber Truss and Towers
Mr Prata, Mr Stamato, Mr Ferreira

Glulam in Architecture: Systematization of Designs Created by Brazilian Producers
Mr Bono, Prof Ino

Laminated Eucalyptus Edification: Constructive Method
Prof Mantilla Carrasco, Ms Paoliello

Design of Windows in Eucalyptus Wood for Housing
Prof Della Noce, Ms Martins de Castro Rabbat, Mr Duarte de Souza

Model to Predict Fire Resistance of Wood-Stud Walls – The Effect of Insulation in the Cavity and Shrinkage of Gypsum Board –
Dr Takeda

Braced Timber Frames for Earthquake Regions
Mr Popovski, Prof Prion, Mr Karacabeyli

Timber Tennis Hall Structure in Rovinj
Mr Haiman, Mr Baljkas

Load Carrying Capacity of Plywood Floors
Mr Saavalainen, Mr Koponen

Prefabricated Timber-Concrete Composite Floor Slab Unit for Multi-Storey Timber Frame Buildings
Mr Nykyri, Prof Kilpeläinen

Small-Scale Modeling of Metal-Plate Connected Wood Truss Joints
Mr Kittel, Prof Gupta, Prof Miller
The Jean Marie Tjibaou Center in Noumea 1-742
Mr Rat, Mr Quost, Mr Racher, Mr Biger

Ms Giannico, Ms Goffi

Field Test and Analysis of Four Spans Continuous SLTD Highway Bridge 1-746
Prof Honda, Prof Usuki, Prof Iijima, Mr Mishina

Timber Housing Damage in the 1995 Southern Hyogo Earthquake 1-748
Dr Arima

Restoring Properties of Japanese Traditional Wooden Frame 1-750
Mr Hayashi, Mr Karube, Mr Harada

Durability of a Wood Frame Construction House Built in the 1920's 1-752
Mr Nanami, Dr Nakajima, Dr Arima, Mr Kawai, Canada

Shaking Table Test on Base Isolated House Model 1-754
Mr Iiba, Mr Midorikawa

Physiological Evaluation of Floor-Impact Sound Insulation of a Wooden House 1-756
Dr Sueyoshi, Mr Miyazaki, Mr Morikawa

Wooden Space Truss Roof is Constructed of Thinning Lumber Skeleton-unit 1-758
Dr Sadakata, Mr Nobusawa, Mr Suzuki

Comparison of Simulated Racking Strengths of Various Framed Walls 1-760
Prof Takemura

Increase of Load Bearing Capacity of Timber Members 1-762
Dr Cechavicius

Promoting Effective and Greater Usage of Structural Timbers in Malaysia 1-764
Dr Jumaat

Integral Building Concept Using Large Sandwich Panels 1-766
Mr Moonen

Cyclone Resistant Timber Housing and the Insurance Industry 1-768
Mr Nicholls

The New Romanian Code Regarding the Design of Wood Structural Elements 1-770
Dr Darie, Mr Vacareanu

Fire Protection of Wooden Architecture Memorials 1-772
Prof Pokrovskaya, Ms Beltsova

Reliability-based Optimisation and Evaluation of Timber Structures 1-776
Mr Vratuša

Design of Timber Bridges 1-778
Mr Iglesias Rodríguez, Mr Bradineras Escó

Towards a Systematic Focusing on the Learning of Timber Structural Design 1-780
Mr Rodríguez Nevado

Statical Behaviour of the Timber Roof Structure of a Medieval Castle 1-782
Mr Olsson
Complex Timber Products for Multiple Demand Applications 1-784
Mr Zoellig

The Modular-Hotel « Swisstube » 1-786
Mr Steffen, Mr Menétry

A Perspective on Measuring Dynamic Properties of Wood Floor Assemblies 1-788
Mr Taylor, Mr Sharp, Mr Hu

Linking Static and Dynamic Wood Floor Attributes to User Acceptability 1-790
Mr Sharp, Mr Taylor

Evaluation and Testing of Timber Railroad Bridges 1-792
Mr Ritter, Prof Wipf, Mr Wood

Using Kinetics-based Models to Address Serviceability Concerns for Fire Retardant Treated Wood at Elevated In-Service Temperatures 1-794
Dr Winandy

Roof Systems : Light Frame Truss System Analysis 1-796
Mr Gjinolli, Mr Wolfe, Mr Misini, Mr Plana

Effectively Spliced Large Timbers and Full-scale Tests on Spliced Timbers 1-798
Prof Kim, Mr Kim

Testing Results of Three Wood Trusses and Joints of Shear Walls 1-800
Prof Zakic, Mr Čakic, Ms Kočetov

Composite Timber-Glass Construction 1-802
Prof Natterer, Mr Hamm

High Wind Resistance of Light-Frame Shear Walls with Various Overturning Restraints 1-803
Mr Heine, Prof Dolan

POSTERS : CONNECTIONS

Finger Joints in Glulam : Brazilian Test Method Evaluation 1-804
Mr Macêdo, Prof Calil Jr

Polyurethane Adhesive Based on Castor Oil to Glued Laminated Timber Beams 1-806
Mr De Jesus, Prof Chierice, Prof Calil Jr

Wood Plane Frame-Truss Analysis by Computer 1-808
Prof Demarzo, Prof Menezes

Stiffness of Nailed Connections in Wooden Composite Beams 1-810
Ms Santana, Prof Mascia

Sandwich Beams with Wood and Steel Section, a Comparison between the Bending Performance of the Rigid and Flexible Connectors 1-812
Prof Mascia, Mr Batista

Application of Fracture Theories to Predict the Strength of Bolted Timber Connections 1-814
Ms Kharouf, Mr Tan, Prof Smith, Dr McClure
Strength and Behavior of Full-scale Split Ring Connections
Prof Quenneville, Mr Sauvé

Bridged Crack Model of Wood Fracture : Experimental Analysis and Numerical Modeling
Ms Vasic, Mr Smith

The Open Joist 2000 used in Floors with a System of Triple Angular Fingerjoint
Mr Ménard, Prof Sandoz

The Metal Joints for the Space Timber Structures – The Non-linear Behaviour
Dr Vašek, Mr Mikeš

Block Tearing Failure in Nailed Steel-to-Timber Joints
Mr Kangas

Innovative Connections for Glulam Timber Grids
Mr Cenci, Mr Noseda Pedraglio

Structural Behavior of Wooden Truss Jointed by New Connecting System
Prof Inoue, Mr Shimizu, Mr Tanaka, Mr Okibayashi, Mr Goto

Strength of Heavy Timber Frame Jointed by Metal Connector and Adhesive
Prof Inoue, Mr Shimizu, Mr Okibayashi, Mr Tanaka, Mr Goto

Development of LVL Frame Structures Using Glued Metal Plates Joints
Mr Pirvu, Prof Yoshida, Mr Yasumura, Mr Inayama, Prof Taki

Mechanical Property of Japanese Traditional Carpentry Joints
Mr Karube, Mr Hayashi, Mr Harada

Evaluation of Seismic Performance and New Seismic Design Method of Wooden Dwelling Houses
Prof Miyazawa, Mr Kohara

Experimental Study on Stiffness and Strengths of Moment-Resisting Drift-Pin Joints of Glue-Laminated Wood Members
Mr Ono, Mr Andoh, Mr Nishina, Mr Idota

Glue-capsule Anchor Technique to the Metal Box Type Beam to Column Joint
Mr Nobusawa, Dr Sadakata

Lateral Resistance of Mechanical Timber Joints
Mr Hirai, Mr Wakashima

Hysteretic Properties of Mechanical Timber Joints
Mr Wakashima, Mr Hirai

Timber Structures with Prestressed DVW Reinforced Joints
Mr Leijten

Characteristics of Fingerjoints in Radiata Pine as made in New Zealand
Mr Collins, Dr Walford

Study of Shearing Resistance of Adhesive Joints
Ms Mocanu, Prof Curtu

Theoretical and Experimental Analysis of Laterally Loaded Nail
Mr Kanocz
