Third International Symposium on Cavitation

April 7-10, 1998
Grenoble, France

Volume 2

Edited by J.M. Michel and H. Kato
SUMMARY

Volume 1

Invited Lectures .................................................. 1
Bubble Dynamics .................................................. 37
Nuclei and Inception ............................................. 107
Hydrofoils and Partial Cavities ................................. 189
Propellers ........................................................... 251
Fluid Machinery .................................................... 315

Volume 2

Supercavities ...................................................... 1
Instrumentation and Procedures ................................. 71
Cavitation Erosion .................................................. 101
Modelling ............................................................ 231
Miscellaneous ....................................................... 313
CONTENT OF VOLUME 2

SUPERCAVITIES

Supercavities in compressible fluid
A. Vasin
State SRC TsAGI, Moscow, Russia

High-speed body motion at supercavitating flow
Y.N. Savchenko
Institute of Hydromechanics, Kiev, Ukraine

Supercavitating flow past a body of revolution at a small angle of attack in a gravity field
Q. Ye, Z. Cheng
Shanghai Jiao Tong University, P.R. China

Cavity formed by ring flange
S.I. Putilin
Institute of Hydromechanics, Kiev, Ukraine

Instability and oscillation of gas-filled supercavities
V.N. Semenenko
Institute of Hydromechanics, Kiev, Ukraine

Nonlinear theory for a super-cavitating shock-free flapped foil in a cascade
B. Yim
Korea Research Institute of Ships and Ocean Engineering

Experimental investigations of high-speed unsteady supercavitating flows
Y.D. Vlasenko
Institute of Hydromechanics, Kiev, Ukraine

Collapse of artificial cavity
V.T. Savchenko
Institute of Mathematical Machines and Systems Problems, Kiev, Ukraine

The gas absorption into supercavity from liquid-gas bubble mixture
Y.N. Savchenko, V.N. Semenenko
Institute of Hydromechanics, Kiev, Ukraine

Exact solution of problem of unsteady cavitation flow past wedge
Y.A. Semenov
Institute of Technical Mechanics of the NAS of Ukraine

Asymptotic approach for problems of axisymmetric supercavitation based on the slender body approximation
V. Serebryakov
Institute of Hydromechanics of NASU, Kiev, Ukraine
An experimental method for generating unsteady cavitation on a stationary wing

J. Schöön, G. Bark
Chalmers University of Technology, Göteborg, Sweden

Measurements of pressure fluctuations induced by a cavitating propeller in a cavitation tunnel and its correlation between model and full-scale

Y. Ukon, T. Kudo
The Ship Research Institute, Tokyo, Japan
Y. Kurobe
Tokyo University of Mercantile Marine, Japan

Digital image processing for cavitation on marine propellers

V. Godefroy, D. Fréchou
Bassin d’Essais des Carènes, Val de Reuil, France
M. Desvignes, D. Bloyet
ISMRa, Caen, France

Generation of micro air bubbles of uniform size in water

N. Chiba, Y. Takahashi
Miyakonojo National College of Technology, Miyazaki, Japan

Numerical simulation of bubbles cavitation noise on a two dimensional hydrofoil

G. Lebreuilly, V. Godefroy, L. Briançon-Marjollet
Bassin d’Essais des Carènes, Val de Reuil, France

CAVITATION EROSION

Investigations of material damages induced by an isolated vapor bubble created by pulsed laser

J.C. Isselin, A.P. Alloncle, M. Autric
Institut de Recherche sur les Phénomènes Hors Equilibre, Marseille, France

Influence of thickness on cavitation erosion of coating materials (propagation of shock wave and erosion)

S. Hattori, T. Okada
Fukui University, Japan
H. Mori
Kobe Steel Ltd., Hyogo, Japan
K. Shibata
Fukui Machinery Co.Ltd., Japan

Energetical approach and impact efficiency in cavitation erosion

R. Fortes Patella, J.L. Reboud
Laboratoire des Ecoulements Géophysiques et Industriels, Grenoble, France

Investigations on possibilities to control the erosive cavitation aggressiveness by hydrodynamic effects

R. Boehm, M. Hofmann, G. Ludwig, B. Stoffel
Darmstadt University of Technology, Germany
Cavitation erosion monitoring of a prototype Francis turbine by vibration analysis. M. Kaye, P. Dupont, X. Escaler, F. Avellan
Ecole Polytechnique Fedérale de Lausanne, Switzerland

Japan

Cavitation characteristics of submerged water jet. S. Fujikawa, N. Takasugi, G. Peng
Toyama Prefectural University, Japan
N. Terasaki
Sugino Machine Ltd., Toyama, Japan

Useful correlations for cavitating jets. H. Soyama
Tohoku University, Sendai, Japan
A. Lichtarowicz, D. Lampard
University of Nottingham, UK

Bubble collapsing behavior and damage pits of separated vortex cavitation. K. Sato, Y. Sugimoto, K. Hoshino
Kanazawa Institute of Technology, Ishikawa, Japan

Damage due to spot cavitation on hemispherical cylindrical body. S. Shimizu, K. Tsurusaki, M. Hara, T. Nakagawa
Hiroshima Institute of Technology, Japan

Non-stationary flow conditions: evaluation of experimental techniques for cavitation erosion. M. Kjeldsen, M. Oledal
Norwegian University of Science and Technology, Trondheim, Norway

A method to evaluate cavitation erosion in valves. Y. Lecoffre
YLec Consultants, Saint-Ismier, France
A. Archer
Electricité de France, Chatou, France

S. Kawasaki, H. Handa, K. Titikawa, Y. Baba
Japan

An erosion prediction method due to cavitation applied to the erosion damage measured on a ship propeller and the results obtained at the cavitation tunnel. J. Masip, R. Quereda, L. Pangusion
Canal de Experiencias Hidrodinamicas de El Pardo, Madrid, Spain

Cavitation pitting map of a centrifugal pump. A. Archer
Electricité de France, Chatou, France
Correlation between cavitation erosion rate with both the parameters of the vibratory apparatus and the physico-mechanical properties of the material

I. Bordeasu, I.M. Anton
Universitatea Politehnica Timisoara, Romania

Flow erosive intensity measurement (corrosion - abrasion - shock - jet - cavitation)

L. Chincholle
Laboratoire de Génie Electrique de Paris, France

The modified Cavermod device: hydrodynamics, force measurements and erosion tests

E.G. Filali, J.M. Michel
Laboratoire des Ecoulements Géophysiques et Industriels, Grenoble, France
S. Fujikawa
Toyama Prefectural University, Japan
S. Hattori
Fukui University, Japan

Cavitation intensity map in pumps

Effect of flow rate and NPSH on cavitation intensity

K. Uranishi, S. Saito, H. Kato, T. Ikohagi, T. Okamura, H. Ozawa, A. Sato
R. Oba, K. Minemura, M. Maeda, Y. Jittani, T. Ishibashi
Japan

Considerations regarding the total duration of vibratory cavitation erosion tests

M.O. Popoviciu, I. Bordeasu
Universitatea Politehnica Timisoara, Romania

Comparison between pitting rate and erosion rate for three materials

B. Le Fur, J.F. David
Centre Technique des Industries Mécaniques, Nantes, France

MODELLING

Re-entrant jet modelling of partial cavity flow on two dimensional hydrofoils

J. Dang, G. Kuiper
Maritime Research Institute, The Netherlands

Numerical modeling of unsteady cavitating flows by a VOF method

L. Dieval, M. Arnaud
Centre Technique des Systèmes Navals, Toulon, France
R. Marcer
Principia, La Seyne-sur-Mer, France

Numerical simulation of unsteady cavitation on a 3D hydrofoil

O. Boulon, G.L. Chahine
Dynaflow Inc., Fulton, Maryland

Numerical simulation of sheet cavitation

H.W.M. Hoeijmakers, M.E. Janssens, W. Kwan
Delft University of Technology, The Netherlands
A generalized asymptotic approach to nonlinear problem for the flow past a supercavitating lifting surface of large aspect ratio under free boundary
G.M. Fridman, K.V. Rozhdestvensky
Marine Technical University of St-Petersburg, Russia

Stability of a cylindrical cavity
G.J. de Bruin, D.F. de Lange
Twente University, The Netherlands

Theoretical investigation of cavitating flows
A.G. Terentiev, N.A. Dimitrieva
Chuvash State University, Cheboksary, Russia

Numerical simulation of cavitating flows on 3-dimensional wings and marine propeller by a surface vortex lattice method
H. Kai, M. Ikehata
Yokohama National University, Japan

Computing shock waves in cloud cavitiation
C.E. Brennen, T. Colonius, F. d'Auria
California Institute of Technology, USA

Numerical simulation of cavitating flows by single-phase flow approach
C.C.S. Song, J. He
St. Anthony Falls Laboratory, Minneapolis, USA

A numerical study of unsteady cavitating flows
B.R. Shin, T. Ikohagi
Tohoku University, Sendai, Japan

Computational modeling of the dynamics of sheet cavitation
C.L. Merkle, J. Feng, P.E.O. Buelow
University of Tennessee Space Institute, Tullahoma, USA

MISCELLANEOUS

Dynamic shock wave-bubble interaction - Implications to shock wave lithotripsy
P. Zhong, X. Xi
Duke University, Durham, North Carolina, USA

The research of condensation-induced steam bubble collapse in nuclear power plant
F. He, Z. Yao, X. Wang
Tsinghua University, Beijing, P.R. China

Cavitation erosion in diesel engines
P. Chantrel, A. Hellion
GEC-ALSTOM-ACB, Grenoble, France

On the influence of stochastic processes on the generation of cavitation noise from mutually interacting cavities
J.F.E. Hollander
Chalmers University of Technology, Göteborg, Sweden
