Proceedings

47th Annual International Appliance Technical Conference

May 13-15, 1996

Purdue University
Stewart Center
West Lafayette, Indiana, USA

Sponsored by
The Ray W. Herrick Laboratories
School of Mechanical Engineering
Purdue University, West Lafayette, Indiana
Robert J. Bernhard, Director
Table of Contents

Steering Committee .................................................................................................................................................. v

Session A-1
Gas Technology
Rod Rinholm, Session Chair

Performance Results and Design Guidelines for Pre-Mixed, Non-Radiant, Low-NO\textsubscript{x} Burners ................................................................................................................................. 1
   J. Gerstmann, A. D. Vasilakis, and Sergei Brussovansky, Advanced Mechanical Technology, Inc.

Condensation in the Vents of Category III Appliances .......................................................................................... 13
   G. Stickford, A. Rutz, S. Talbert, and D. Ball, Battelle; and L. Brand, Gas Research Institute

Porous-Insert Technology for Emissions Reduction from Gas Appliances .............................................................. 25
   J. J. Reuther, Battelle, and I. H. Billick, Gas Research Institute

SESSION B-1
Components
Jack Pardee, Session Chair

Shielded Connectors: More than Meets the Eye ........................................................................................................ 35
   Jim Nadolny, AMP Incorporated

Positive Locking Disconnects: New Design Addresses Industry Requirements for Discrete Wire Applications .................................................................................................................. 47
   Tom Kelly, Panduit

Technological Update on Wiring Harnesses for Appliances ..................................................................................... 57
   Joachim Goeke, Stocko Metallwarenfabriken (GERMANY)
SESSION C-1
Refrigeration
Santai Hwang, Session Chair

Experimental Evaluation of R-407C in Retrofitted Heat Pump and Air-Conditioning Equipment ................................................................. 71
M. Di Flora, P. Hatzikazakis and J. Tolbert, Bristol Compressors, Inc.

Thermal Load Optimization of a Two-Door Household Refrigerator/Freezer .............. 83
Marco E. Marques, Multibrás S.A. Eletrodomésticos (BRAZIL)

Novel Appliances Using Solid Gas Complex Compound Sorption Refrigeration ...... 91
Lance Kirol and Uwe Rockenfeller, Rocky Research

SESSION A-2
Gas Technology
Craig Farnsworth, Session Chair

Thermodynamic Performance of a New Design in a Gas-Fired Space Heater and Its Comparison to Universal Space Heaters ...................................................... 101
B. Ghassemi, University of Isfahan (IRAN), and
S. M. Mousavi, Mahya Gas Company of Iran (IRAN)

Radiant Heat Flux as a Parameter for Selecting Polymeric Materials for Use in Gas Appliances ................................................................................. 111
D. Philips, D. Ball, S. Talbert, Battelle;
J. Allen, Underwriters Laboratories; and
L. Brand, Gas Research Institute

SESSION B-2
Materials/Processes
Joe Adamski, Session Chair

The Application of Die Casting Technology to Automated Small Component Assembly ................................................................. 123
M. J. Muir, Fishertech Div. of Fisher Gauge Ltd. (CANADA)

Ultra-High Solids and 100 Percent Solids Liquid Compliance Coatings Systems for the Major Appliance Industry ................................................................. 135
David M. Grafflin, Tioga Coatings Corporation
SESSION C-2
Refrigeration
Terry Chapp, Session Chair

High-Efficiency, Multi-Evaporator System and Control of a Refrigerator/Freezer ..... 147
Hai-Min Lee, H. W. Lee, and J. H. Lim, Samsung Electronics (KOREA)

Advances in Foam Adhesion to Refrigerator Liners and Other Substrates ............ 159
J. B. Nichols, J. Bonekamp, and R. Miller, The Dow Chemical Company

SESSION A-3
Laundry
Joe Jancsurak, Session Chair

A Systems Approach to Horizontal-Axis Laundry Questions .................................. 179
M. M. Sanik and C. J. Noel, The Ohio State University

Building Intelligence into Laundry Machines to Create User-Friendly Features ..... 191
Shou-Heng Huang, Amana Refrigeration

Evaluation Methods for Washing Performance of Washing Machines ................. 203
H.-G. Hloch, wfk-Research Institute for Cleaning Technology (GERMANY)
H. Kruessman, wfk America

SESSION B-3
Energy Efficiency
Sue Badenhop, Session Chair

Quality Criteria for Cookware with Good Heat Transmission Characteristics ........ 215
Thomas Beerhorst, Schott Glaswerke (GERMANY)

A New Test Method to Measure Energy Consumption in Ovens ............................ 227
E. Junker, R. Bergendal, and D. Dixen,
Electrolux European Product Div. Hot Tech Centre (DENMARK)

Energy-Efficient Use of Residential Freezers .................................................. 239
J. R. McFadden, L. K. Hawks, and K. Datwyler, Utah State University
SESSION C-3
Refrigeration
Donald Grob, Session Chair

Stirling Coolers for Solar Refrigerators ................................................................. 249
   D. M. Berchowitz, Sunpower Incorporated/Global Cooling BV
   (THE NETHERLANDS)

Evaluation of R-134A Stress Tests ........................................................................ 259
   Paul Nash, Richard DeVos, Qin Zhou, and Kip Krause, Frigidaire Company

Next Generation Insulation Foam Blowing Agents for Refrigerator/Freezers .......... 271
   G. J. Haworth, Maytag, for the Appliance Industry/Government
   CFC Replacement Consortium (AHAM—ARC)

SESSION A-4
Cooking
Virginia Peart, Session Chair

Conventional Cooking in Half the Time ................................................................. 283
   D. M. R. Brunton, Apollo Enterprises, Ltd. (ENGLAND), and
   K. I. Eke, Apollo USA

Induction-Heated Cooking Appliance Using Zero-Voltage, Soft-Switching
   PWM Resonant Inverter with Power Factor Correction ......................................... 299
   K. Izaki, I. Hirota, H. Yamashita, and H. Omori,
   Matsushita Electrical Industrial Co. Ltd. (JAPAN); and
   S. P. Wang and M. Nakaoka,
   Yamaguchi National University (JAPAN)

Sugar Cookie Color: Analysis of Consumers' Preferences and
   Correlation of Objective and Subjective Methods for Performance Testing
   of Residential Ovens ............................................................................................ 313
   E. A. DeMerchant, R. P. Lovingood, and D. Brochetti,
   Virginia Polytechnic Institute & State University
SESSION B-4
Energy Efficiency
Dean VonBank, Session Chair

Managing the Home by Remote Control ................................................................. 325  
B. Kuhlin, Bosch-Siemens Hausgeräte GmbH (GERMANY)

Analysis of the Efficiency of European Washers, Dryers, and Dishwashers ........ 337  
Benoît Lebot, Max Belot, and Paul Waide,  
Agence de l'Environnement et de la Maîtrise de l'Energie (FRANCE); and  
René Kemna, Van Holsteijn en Kemna (THE NETHERLANDS)

Steel Appliances are Recycled by Design .............................................................. 347  
G. L. Crawford, Steel Recycling Institute

SESSION C-4
Compressors
Mike Woodford, Session Chair

The Design of a Discharge Valve System for Reduced Noise ............................... 355  
P. C. Wagner, P. N. Pandeya, and M. A. Di Flora, Bristol Compressors

The Design of an Integrated Sound Abatement Cover for an  
Air-Conditioning/Heat Pump Compressor ............................................................ 363  
C. S. Robinson, P. N. Pandeya, and M. A. Di Flora, Bristol Compressors

Linear Compressors for Non-CFC Refrigeration .................................................. 373  
R. Z. Unger and N. R. van der Walt, Sunpower Incorporated

SESSION A-5
Controls
Dean VonBank, Session Chair

Industrial Induction-Heating Power Appliance Using Voltage-Fed,  
Zero-Current, High Frequency Switching Inverter with Phase-Locked  
Loop Control Scheme ............................................................................................... 381  
A. Okuno and H. Kawano, Shinko Electric Company (JAPAN), and  
A. Kojina, J. M. Sun, and M. Nakaoka, Yamaguchi National University (JAPAN)
Auto-Protected MOSFETs: A New Design Approach for Cordless Drill Applications..389
T. J. Castagnet, SGS Thomson Microelectronics, Inc.

S. Watanabe and M. Nakaoka, Yamaguchi National University (JAPAN); and Y. Uchihori, Seta-Kosan Chemical Industrial Co. Ltd. (JAPAN)

X-Ray Power Generator Using High-Frequency, Linked, Resonant Converter 407
H. Takano and T. Hatakeyama, Hitachi Medical Corporation (JAPAN); and J. M. Sun and M. Nakaoka, Yamaguchi National University (JAPAN)

SESSION B-5
Design
Annette Bach, Session Chair

Application of Structural Analysis and Injection Molding Process Simulation for Part Design Optimization 417
Robert Sherman, Bluegrass Plastics Engineering, Inc.

Ergonomic Design Criteria for Kitchen Appliances: Improving Human Performance and Safety 429
B. G. Rutter, Metaphase Design Group, Inc.

Computer-Aided Design and Concurrent Engineering Applied to a Unique Cooking Appliance 439
Edward Cook, Amana Refrigeration

Less is More—Universal Design: Ergonomics of a Changing Marketplace 449
Margaret A. Wylde, ProMatura Group

SESSION C-5
Motors
Len Swatkowski, Session Chair

Significance of the Flexural and Transverse Vibrations of V Belts on the Noise Emission of Universal Motors 461
C. Öztürk, B. Gök, and H. Ağıköz, Türk Elektrik Endüstrisi A.S. (TURKEY); and A. Balıkçıoglu, Arçelik A.S. (TURKEY)
Variable Speed Brushless Motor Drive for Mass Production ........................................473
Jean Marie Bourgeois, SGS-Thomson Microelectronics (FRANCE)

Implementation of a Novel Fault Detection System on Fractional Horsepower
Electrical Motors ................................................................. 481
H. Serafettinoglu, T. Durakbasa, and A. K. Tugcu,
Arçelik A. S. (TURKEY); and
A. Duyar, Florida Atlantic University

A New Phase-Sensitive Technology for Capacitor Start Motor
Simplifies Application .......................................................... 491
Joe Borrelli and Rich Burkhart, White-Rodgers Div.,
Emerson Electric Company

---

SESSION A-6
Controls
Charles Scott, Session Chair

An Intelligent Appliance Control .............................................. 503
C. A. Maher, PER Associates, and
George McMahon, Pitco Frialator, Inc.

Convection Automated Logic Oven Control .................................. 515
M. A. Boyer and K. I. Eke, Apollo USA Inc.

---

SESSION B-6
Standards
Jack Weizeorick, Session Chair

SO 14000 Environmental Management System (EMS) Standards .............. 527
Paul E. Rolland, International Approval Services

The Pressure of New Standards Development on Household
Refrigerator Manufacturers .................................................. 537
John Sabelli, Inchcape Testing Services/ETL Testing Laboratories
Motorized Dental Flosser .............................................................. 549
   Bill Zebuhr and Brett Gouveia, Dynaproducts Inc.

The Development and Direction of the Fully Automatic Washing Machine in China..563
   Jia-Hua Yang,
   China Household Electric Appliances Research Institute (CHINA)

Thermal Resistance of Superinsulation/Foam Composite Panels ....................... 573
   K. E. Wilkes, R. S. Graves, and K. W. Childs,
   Oak Ridge National Laboratory

Author Index ................................................................................. 587
