CONTENTS

Preface ........................................................................................................................................... v

Opening Lectures

1. China's Refractories Heading for the New Century .......................................................... 3
   Zhong Xiangchong

2. The Development and Outlook for the Chinese Steel Industry ......................................... 14
   Weng Kuqing

Invited Lectures

1. Prospects and Structure Optimization of the Steelmaking Production in China ............. 25
   Su Tiansen

2. Precast Tabular Alumina Castable Shapes ....................................................................... 33
   George MacZura, Masaki Madono

3. Progress in Refractories for Iron and Steelmaking During the Past Half Century in Japan 41
   Kiyoshi Sugita

4. Refractory Consumption and Steel Ladle Lining--New Materials and Technologies .......... 49
   Manfred Koltermann

Section I  Refractories for the Metallurgical Industry

1. Ongoing Research Program of Japanese Refractories Industry at Okayama Ceramic ........ 53
   Center (Invited)
   Keisuke Hiragushi

2. Special Refractories for DC-ARC Furnaces (Invited) .................................................... 61
   Ravin Jhunjhunwala, M. M. Sahu, P. C. Padhi

3. Development of MgO-C Gunning Material for Critical Application (Invited) ............... 70

4. Characterization After Exposure of Property and Texture Gradients in Various
   Refractory Lining Systems (Invited) ................................................................................. 77
   Musa Karakus, Robert E. Moore

22. Bauxite Based High Alumina-Spinel Castables and Their Application in Steel Ladles ................................. 216
   Zhou Ningsheng, Zhang Sanhua. Chen Zhiqiang, Cui Tianhong, Li Zaigeng

23. Bauxite-MA Spinel Bricks for Ladle ........................................................................................................ 224
   Hong Xueqing, Yang Xiwen. Chen Jiawei, Zhang Changli, Liu Wenge

24. The Effect of Spinel on the Properties of Corundum Low Cement Castables ............................................ 230
   He Zhiyong, Zhang Xiaojun. Li Lin

25. Refractory Selection for Stainless Steelmaking Processes ........................................................................... 235
   Dr. Stradtmann, Dr. Kuhlmann. C.D. Hahn. R.C. Thomas

   Dr. Stradtmann, Dr. Kuhlmann. G. Wenclawiak, R.C. Thomas. C.D. Hahn

27. Considerations for Creating Successful Bosh, Belly & Stack Refractory Systems ............................... 250
   Albert J. Dzermejko

28. Development and Application of Unshaped Refractory for Hot Repair of Linings of Large-size Blast Furnace ........................................................................................................................................ 256
   Chen Deling, Zhang Ruoyong, Sun Xianfeng, He Huiqing, Zheng Qibo, Zhang Yu

29. Development of Materials and Repair Techniques for Blast Furnace Stack Repairs ............................... 266
   Tom Alsop, Alan Hey. Dave M Pickard

30. Research and Application of Al₂O₃-C Bricks ............................................................................................... 272
   Dong Zhihe. Dong Shutong

31. Application of Low-Creep Rate Bricks for the Hot Blast Stove of Blast Furnace .................................... 280
   Shao Shuying. Chai Junlan

32. Properties and Application of Al₂O₃-SiC-C Based Self-Flow Castable for Blast Furnace Trough ................. 284
   Ye Guotian, Liao Guihua, Zhang Xindong, Li Liyin

33. Super Quality Silica Bricks for Modern Coke Ovens to Reduce Pollution ............................................ 289
   J. D. Panda, G. Goswami, P. Sahu. R. H. Dalmia, S. K. Choudhury

34. Research and Application of Pre-fabrication of Low Cement Corundum Product ............................... 296
   Zhang Hanli

35. Development and Application of High Quality Silica Brick for Coke Oven ........................................... 299
   Wang Hongmei. Wei Jianguo, Shu Guiyng

Section II Refractories for the Cement, Glass, Porcelain and Other Industries

   Ren Dehe. Zhang Yongbin. Zeng Dafan

   - ix -
2. Recent Improvement of A Low Permeability Refractory Brick for Lower Transition Zone of Rotary Cement Kiln
   Geraldo E. Goncalves, Adam A. Wajdowicz, Alamar K. Duarte

3. Magnesite Chrome-Magnesite Silicate Basic Combinal Brick
   Chen Feng, Ren Dehe, Cheng Zhaokan, Zhang Yongbing, Liu Jianping, Chang Liang, Qin Feitao

4. Development of Improved Tin Bath Bottom Blocks for Float Glass Lines
   Claus Metzger, Hans Petschauer

5. Chromic Oxide Blocks for Use in Glass Container Industry
   F. Gebhardt, G. Boymanns, E. Goerenz, C. Metzger, P. Frolov

6. A High Duty Castable for Glass Tank Bottom
   Yuan Lin, Chen Shengling

7. Development of the High-Strength, Extra-light Silica Bricks
   Shen Shuhui, Chen Zuofu, Shen Yujum, Li Baogeng, Zhang Chuhua

8. In Situ Synthesis of Xonotlite for Making Insulating Refractory
   Chen Yufeng, Li Maoqiang, Chang Qing

9. Slip Casting and Sintering of Recrystallized Silicon Carbide
   Yin Qingli, Li Jianxiang, Li Jianhui

10. Study on Mould Technique of Si₃N₄-Bonded SiC Shelf
    Gao Lichun, Peng Dayan, Wang Zijiang, Zhao Fenghuan, Zhang Geng

11. Further Advancements in High Alumina and Chrome-Alumina Brick
    Yongshan Dai, David V. Stiles

12. Investigation on Picrochromite Refractories for Slagging Coal Gasifiers
    Guo Zongqi, Li Fengqiu, Zhang Dongliang

13. Study on Honeycomb High-Duty Silica Bricks
    Le Jun, Sun Chengxu, Chen Zuofu, Shen Shuhui

14. Magnesia Spinel and Dolomite Refractories – The Chrome-Free Alternative for High Temperature Industrial Applications
    U. Bongers, J. Hartenstein, R. Prange, J. Stradtmann

Section III  Raw Materials for Refractories

1. Developments in the Magnesia Industry in Israel in the 1990's
   Arieh Tabic

2. Solid Solution between MgO and CaO in Synthetic Magnesia-Dolomite Clinker and Its Effect on Hydration Resistance
   Zhang Lihua, Wang Zilian and Li Fang
3. Sinterability and Resistibility to Hydration of Synthetic MgO-CaO Refractories Doped Cerium Dioxide ................................................................. 412
   Zhao Huizhong, Zhang Wenji, Wang Houzhi, Gu Huazhi

4. Influences of Additives on Synthesized MgO-CaO Materials ................................................................. 418
   Tian Fengren, Chen Shujiang, Wu Wenfang, Wang Zilian

5. Effect of Zircon Additive on Improving Hydration Resistance of Magnesia-Dolomite Refractory ................................................................. 424
   Zhu Xiuying, Sun Qinyin, He Zhiyong

6. Study on the Mechanism of Magnesia Alumina Spinel Damage Retarded by ZrO$_2$ ............................... 432
   Sun Jialin, Hong Yanrou, Li Zhijian, Do Shuju

7. Production and Application of Bauxite-Based Spinel Clinker ................................................................. 436
   Dong Hai, Pei Ergang, Shi Kai

8. Development and Application of Corundum by Direct Fusion of Bauxite ................................................................. 444
   Li Zaigeng, Luo Xingyuan, Zhang Luming, Zhang Lihua

9. Recent Development of Andalusite Refractories in China ................................................................. 450
   Wen Hongjie, Li Wenchao, Wang Jinxiang, Miao Pu, Weng Da, Zhang Kening, Ceng Lanzhi, Jin Benli

10. Hydration and Its Control of Calcium Aluminate Cement ................................................................. 458
    Luo Yuchang, Hu Shengxing, Tan Ping

11. Comparison of Different Grades of Microsilica and Their Influence on Properties of Self-Flow Mullite Castable ................................................................. 465
    Wang Zhanmin, Zhang Sanhua, Zhu Cunliang, Chen Zhiquang, Zhou Ningsheng and Li Zaigeng

12. Fabrication and Application of α-Al$_2$O$_3$ Powders ................................................................. 473
    Xu Li, Zhang Jianzhong

13. Effects of Technological Conditions on the Density of Synthetic Magnesium Aluminate Spinel Clinker ................................................................. 477
    Dai Xiaoguang, Yang Xiwen, Tian Xuequang, Wang Houzhi

Section IV Fundamental and Technological Studies

1. Role of O'-Sialon with and without Other Additives on Oxidation Resistance of MgO-C Refractories (Invited) ................................................................. 485
    Michel Rigaud, Weibin Zhong

2. Evaluation of Thermal Shock Resistance Using Refractory Properties (Invited) ................................................................. 492
    Charles E. Semler
3. Corrosion Behavior of MgO-C Refractory with Additives .......................... 501

4. Study on the Properties and Microstructure of MgO-ZrO$_2$-C Materials ........ 508
   Cheng Benjun, Yang Bin, Wang Jinxiang, Zhong Xiangchong

5. Oxidation and Corrosion Resistance of MgO-C Refractories with Antioxidants ........ 514
   Xiangmin Li, Michel Rigaud

6. The Microstructure and Resistance to Alkali, Slag and Molten Iron & Steel of ALON
   Bonded Corundum Materials ........................................... 522
   Li Yawei, Li Nan, Yuan Runzhang

7. Image Analysis of Refractories Textures ........................................ 530
   Koichiro Mori, Keisuke Hiragushi, Kazunori Kijin

8. High Temperature Properties and Microstructure of Boron Nitride-Zirconia/Corundum/
   Mullite Composites ..................................................... 538
   Zhao Hailei, Zhong Xiangchong, Li Wenchao, Wang Jian

9. The Study on the Reinforcement of Al$_2$O$_3$-C Refractories by the In-situ Grown Silicon
   Carbide Whiskers ........................................................ 546
   Wang Tianming, Zou Zongshu, Li Yintai, Chen Weiwu, Dou Shuju

10. Technical Study on Self-Conducting Pressure Sintering of Non-oxide Refractory .... 552
    Peng Dayan, Gao Lichun, Zhao Fenghua, Wang Zijiag

11. Internal Friction and Thermal Shock Damage for Some Silicon Carbide Materials .... 559
    Liu Yanling, Wang Runze

12. In Situ TiB$_2$ Composites .................................................. 565
    Zhang Guojun, Yue Xuemei, Jin Zongzhe

13. Effects of Processing Parameters on the Microstructures of Si$_3$N$_4$ Materials ...... 570
    Li Liusheng, H.-J. Kleebe, G. Ziegler

14. Study About the Dispersion of Electrolyte to Silicon Carbide Fine Powder .......... 578
    Zhang Zhanying, Sun Chengxu, Li Zaigeng

15. Formation of O'-Sialon Matrix and Microstructure Development in the Refractory of
    Si$_3$N$_4$-SiO$_2$-ZrO$_2$-Al$_2$O$_3$ System ................................ 583
    Ke Changming, Du Jing, Li Nan, Sun Chengxu

16. Development of Microstructure During Sintering of $\alpha$-Al$_2$O$_3$ Powder Compacts .... 589
    Li Maoqiang, Zhang Jianzhon

17. Development of Bauxite Based Refractories with Improved Thermo-Mechanical Properties .... 595
    D. Halder, S. K. Garai, D. P. Chakraborti

18. Physical Properties and Phase Composition of Low Cement Corundum Castables after
    Drying and Heating ........................................................ 607
    Wang Jiezeng, Leng Shaolin, Liu Xijun, Liu Genrong
19. On the Volume Stability of High Alumina Castable Refractories ................................................. 617  
   K. H. Hwang, S. M. Kim, B. S. Jun, H. C. Park

20. Mullite Bonded Castables .................................................................................................................. 624  
   Aase M. Hundere, Bjørn Myhre, Bjørn Sandberg

21. Approach to Prevent the Slaking of Magnesia Clinker in Castable ............................................. 631  
   Y. Sasajima, Y. F. He

22. Studies on Deterioration with Time in Castable Refractories ..................................................... 636  
   Cao Hongchen, Wu Hui, Guo Lingfu

23. Refractory Selection Criteria for Coreless Furnace Melting ....................................................... 640  
   Wenzhong Luo

Section V Engineering and Equipment

1. The Mixture Filling Unit to the Press and the Mold as A Starting Point for Correct Forming ........ 647  
   Alessandro Cocquio

2. Pressing Techniques for Pieces Having A Complex Geometry Through the Synchronization  
   of the Moving Parts Movement ....................................................................................................... 654  
   Alessandro Cocquio

   Ma Chunhong, Liang Zhilin, Huang Shaoping, Zheng Xianghua

4. Direct Temperature Measurement in Microwave Ovens for Processing of Refractories ........... 669  
   Shi Shangzhao, Xu Fuqiu, Zhao Shixi, Li Longxing

5. Planning and Production of Moulds in Steel or Tungsten Carbide for the Pressing  
   of Refractory Bricks ......................................................................................................................... 676  
   Roberto Bisio

Appendix ............................................................................................................................................... 683
