Proceedings of the 13th Triennial Congress of the International Ergonomics Association
June 29 - July 4, 1997
Tampere, Finland

"From Experience to Innovation"
IEA'97

Volume 4
Musculoskeletal disorders
Rehabilitation

Organizers:
IEA International Ergonomics Association
NES Nordic Ergonomics Society
FES Finnish Ergonomics Society
Tampere University of Technology
Tampere University
Finnish Institute of Occupational Health
Finnish Ministry of Labour

Editors:
Pentti Seppälä
Tuulikki Luopajärvi
Clas-Håkan Nygård
Markku Mattila

Technical editors:
Kristiina Kulha
Ella Hänninen

Finnish Institute of Occupational Health
Helsinki 1997
CONTENTS – VOLUME 4

PREFACE

KEYNOTES

Manual handling of loads: the point of view of experts involved in the application of Directive EC 90/269
Antonio Grieco, Occhipinti E, Colombini D, Molteni G

The scientific basis for making guidelines and standards to prevent work-related musculoskeletal disorders
Eira Vilkari-Juntura

1 MUSCULOSKELETAL DISORDERS

1.1 RISK FACTORS AND EPIDEMIOLOGY

Back pain with sitting posture in the workplace
Aarás A, Ro O

13

Effect of wrist rest use and keyboard tilt on wrist angle while keying
Albin TJ

16

The effect of seniority on the development of musculoskeletal disorders
Bellemare M, Cloutier E, Chicoine D, Kuorinka I, Lechasseur C

19

A prospective study among unskilled female industrial workers with respect to neck- and shoulder ailments and environmental factors
Björkstén MG, Boquist B, Talbäck M, Edling C

22

Biomechanical and postural analysis of machine repair tasks with relatively high complaints of low back pain
Chung MK, Choi Ki, Lim JH, Lee MS, Ha MW, Lee SK

25

The relationship of employee perceived stress and other variables to the development of repetitive strain injury symptoms
Cohns DRH

28

IEA TC activity: introductory presentation to the special session "exposure assessment for the evaluation of manual material handling"
Colombini D

31

Proposal by the IEA TC for description and assessment of repetitive movements risks
Colombini D, Occhipinti E

34

ISO/CEN standards on risk assessment for upper limb repetitive movements
Delleman NJ

37

The strain index: a method to analyze jobs for risk of distal upper extremity disorders
Garg A, Moore JS

40

Typing skill, exposure, and occupational stress as risk factors for neck and shoulder injury in non-secretarial computer users
Patterson K, Evans O

Power hand tool dynamics and eccentric exertions
Radwin RG, Oh S

Is sedentary work hazardous to the back – epidemiologic evidence
Riihimäki H

A comparison of musculoskeletal symptom profiles among workers from various occupations
Rosecrance JC, Cook TM, Zimmermann CL

Pain, muscle activation and behavior among VDU-operators with unilateral shoulder myalgia and controls
Røe C, Bjørklund R, Waersted M, Vellestad NK

The use of checklists for upper limb risk assessment
Silverstein B

The effect of light manual precision work on shoulder muscles – an EMG study
Sporrong H, Palmerud G, Kadefors R, Herberts P

Psychosocial work environment and "ergonomic coping" among car mechanics
Torp S, Rilse T, Moen BE

Incidence of musculoskeletal disorders in a cohort of power industry workers
Tornqvist S, Kilborn Å, Bergqvist U, Hagman M, Knave B

Follow-up study of a pelvic belt on a sitting work – investigation in crane work
Udo H, Yoshinaga F, Tanida H, Umino H, Yoshitoka M

Development and validation of a CTD risk index
Weston RL, Freivalds A

The effects of gender, wrist angle, exertion direction, angular velocity, and simultaneous grasp force on isokinetic wrist torque
Wilhelm GA, Hallbeck MS

A study of work postures for hair dressers
Yeh K, Lai J

1.2 EXPOSURE ASSESSMENT

Combined approach for determining lifting load limits
Ayoub MM

A practical approach to musculoskeletal risk assessment in the real workplace
Buckle P, Li G

Musculoskeletal injuries and their prevention – assessment of interventions
Buckle P

Is the work cycle time a good variable to distinguish between high and low risk work load?
Christensen H, Søgaard K, Pilegaard M, Olsen HB

An electromyographic investigation of asymmetric lifting and moving of a load
Das B, Mabaleka G
Relationships between EMG and spinal load
Dolan P, Adams MA

Exposure assessment methods of occupational low back disorders risk factors
Fathallah FA, Burdorf A

Prediction of loads at the lumbar intervertebral disc in complex work situations
Frigo C

Revised NIOSH guide for manual lifting: a method for job evaluation to prevent overexertion injuries
Garg A

Rapid entire body assessment (REBA) in the health care industry
Hignett S, McAtamney L

Magnetic resonance imaging – a technique for studies of anthropometric internal data

Wrist load in computer work

Assessment of low-back load during manual materials handling
Jäger M, Luttmann A

Evaluation of working situations using the cube model approach
Kadefors R

Physiological responses during heavy work: consequences of mechanical and energetic loading in refuse collectors
Kemper HCG

Parameter integration for injury control
Kumar S

Assessment of stresses occurring in selected load handling activities
Landau K, Mücke St., Imhof-Gildein B

A simple model for trunk bending, of a seated worker
Lim J, Hoffmann E

An EMG-assisted model and validation of spine loads occurring during trunk forward bending, lateral bending and twisting motions
Marras WS, Granata KP

Ergonomic exposure assessment adapted to production system design
Mathiassen SE, Winkel J

Using biomechanical models to reduce occupationally related low back Injury
McGill SM

Movement repetitivitiy assessment
Meyer J-P, Horwat F, Didry G, Turpin E

Comparison of four methods of determining peak spinal loading in a study of occupational low back pain

Muscular rest – a measure of physical exposure
1.3 SURVEILLANCE AND PREVENTION

On the use of cycle time, force, posture and movement to characterize physical stresses associated with manual work
Armstrong T, Latko W

How do expert handlers choose a work technique?
Authier M, Lortie M

RULA in action: enhancing participation and continuous improvements
Axelsson JRC

Evaluation of the effects of a training programme on the prevalence of musculoskeletal problems among video display terminal users
Brisson C, Montreuil S, Punnatt L

The developing of methods/tools to help participatory approaches to prevention of musculoskeletal disorders at work
Buckle P, Li G

What exposures should be considered in hazard surveillance for musculoskeletal disorders?
Buckle P
1.4 MISCELLANEOUS

The OERC framework for understanding upper extremity musculoskeletal disorders research, theory and management
Adams E, Bettendorf B, Hoffman M, Purvis C

Subjective assessments of grip strength during work compared to EMG measurements: a field study
Aptel M, Atain-Kouadio JJ

Trunk axial strength and muscle activity of tractor drivers and office workers during twisting
Bodén A, Öberg K

The influence of the application of keyboard support on the m. trapezius right load in VDT operators
Bugajska J, Gedliczka A, Wolska A, Konarska M

The effect of activation mode and horizontal distance on hand-arm stress of operating pneumatic screwdrivers
Chang CH, Wang MJ

Fitting jobs to people: ergonomics intervention to reduce CTDs on an electronic manufacturing for automotive industry
Chaves C, Ferreira J
Ergonomical profilactic program and low back pain in high school students
Da Silva MG

Shoulder adduction exertion in industry and musculoskeletal disorders
Gil Coury HJC, Menegon N, Rosa SMG, Camarotto JA, Walsh IP

WWW-pages for prevention of musculoskeletal disorders of computer users
Grinchenko T, Bondarovskykaia V, Landsman A

Reliability of a postural index of upper extremity repetitive movement risk-factors
James CPA, Harbum KL, Kramer JF

MUSKELI II/6: physical work load in the etiology of musculoskeletal disorders: exposure assessment
Kallio M, Viikari-Juntura E, Hakkonen M, Toivonen R, Raua S, Riihimaki H, Takala E-P

Work-related musculoskeletal disorders in sonographers
Magnavita N, Mirk P, Fileni A, Carbone A, Bevilacqua L

The role of height in musculoskeletal health: a case study of tea pickers of Kericho and Kisii in Kenya
Muruka AO

Assessment of the upper extremity musculoskeletal disorders among telecommunication operators in Korea
Park H-S, Park M-Y, Song J

Dynamic postural analysis of a movement retraining method used in prevention and rehabilitation of work related musculoskeletal disorders

An ergonomic study to implement job rotation in an automotive electrical systems factory
Pires P, Simoes A, Acabado F

Problems with the use of seat pressure distribution in the prediction of driver discomfort
Porter JM, Gyi DE

Evaluation of a functional test for assessing dynamic balance of fire fighters
Punakallio A, Louhevaara V, Lusa-Moser S

Repetitive strain injury in glassworkers: an ergonomic study
Queiróz MFF

Ergonomics and fitting people to chairs: a chair selection process
Schoor W

Self-reported musculoskeletal symptoms among off-/onshore workers in a Norwegian oil-drilling company: a descriptive study
Spekla E M

MUSKELI II 8: health and functional capacity of the musculoskeletal system: methods of testing
Takala E-P, Viikari-Juntura E

MUSKELI II/6: physical work load in the etiology of musculoskeletal disorders: direct measurements of physical work load
Toivonen R, Viikari-Juntura E, Takala E-P, Kallio M, Hakkonen M

Analysis of load in lower extremities joints during a vertical jump
Tokarski T, Fidelus K
2 REHABILITATION

2.1 ENVIRONMENT, PRODUCTS AND TECHNIQUES

How to optimise the wheelchair for the sportive handicapped subjects
Arabi H, Kapitaniak B, Monod H

A computer system dedicated to sign language
Braffort A

Assessment and prediction of thermal comfort of the aged in indoor environments
Cena K, de Dear R J

A stepping EMG profile index to discriminate muscular activation between stoke patients and normal subjects
Chiou W-K, Lee M-Y, Liao JC

Effect of the radiant heating on the elderly
Enomoto-Koshimizu H, Kubo H, Isoda N, Yanase T

The present thermal environment of homes for the aged in Japan
Kaneko K, Yoshida JA, Hachisu H

The elderly in the great Hanshin-Awaji earthquake
Kumakawa T, Yamada H, Ozawa T

The research of operational stability and efficiency of man-machine interface for the walking aids
Lai HH

Clinical evaluation of a new biofeedback standing balance modality
Lee MY, Wong MK, Tang FT, Chiou WK

Case reports of design for rehabilitation
Lin R, Yang J

Access to new technologies in blindness
Martinez-Sarocchi F

Integrating prevention of musculoskeletal disorders (MSD) in vehicle conception at Peugeot Sochaux
Moreau M, Castang A, Sérusclat P, Le Métayer S

Ergonomics of disabled workers in Finland
Nevala-Puranen N, Seuri M, Simola A, Elo J

Criteria for the development of a corpus of 3D natural movements for gesture representation, generation and recognition
Richardson J, Gibet S, Lebourque T
Color discernment of interior finishing colors in age-related yellow vision 1
Sakuraba S, Yoshida CA, Yoshida AM

Walker design for children with cerebral palsy
Shiau K-A, Liu T-H, Lin R-T

The design of ergonomic products for the disabled: a case study of wheelchairs
Soares MM

Sakuraba S, Yoshida CA, Yoshida AM

Ther design of ergonomic products for the disabled: a case study of wheelchairs
Soares MM

Ergonomic aspects of the patient bed
Stålhammmar HP, Alen J, Alaranta H

Temperature regulation and thermal comfort of the elderly
Tochihara Y, Ohnaka T, Tokuda T

A research on the stability of using walking-aid from the design viewpoint of
person-machine-environment system
Wu F-G, Hsueh T-C, Lee Z-W

The role of ergonomics in the rehabilitation program for injured workers
Yeh K, Lai J

2.2 PERFORMANCE ASSESSMENT AND DIAGNOSIS

A 2-D simulation model for lifting activities
Ayoub MM, Bernard TM, Lin CJ

Quantitative assessment of mechanical low back load in the field: validation in
asymmetric lifting
Baten CTM, Oosterhoff P, Luinge H, Veltink PH, van Dieën J, Dolan P, Hermens HJ

The effect of a straddle foot stance on the low back load in lifting
de Looze MP, Dolan P, Kingma I, van Dieën JH, Baten CTM

The importance of box tilting in manual handling: a biomechanical evaluation of
specific manoeuvres
Gagnon M, Delisle A

A study on wheelchairs and users in rehabilitation
Gilad I

Performance evaluation of new types of prosthetic prehensors
Gilad I, LeBlanc M

Ergonomics of HCI for the disabled
Göbel M, Luczak H, Springer J

Lumbar load associated with symmetrical holding of asymmetrical loads
Hafez H, Jäger M

The use of a steering ball for single-handed steering to drive a car
Hermans V, Hautekiet M, Spaepen A

Discrimination of subjects with and without shoulder/neck disorders by an iso-electric
endurance test
Hägg GM, Torgén M, Fredriksson K

Electromyographic and subjective methods for the assessment of the ergonomic
quality of file handles
Kluth K, Kellerman H, Strasser H
2.3 THEORETICAL AND VOCATIONAL CONSIDERATIONS

Evaluation of the headwand used by persons with disabilities
Fernandez JE, Kattel BP, Gokhale CM

Motivating and demotivating factors for return to work
Gard G, Sandberg AC

Rehabilitation of the work-injured: test-retest reliability of biomechanical movement parameters in self-paced work simulation treatment
Harboum KL, Kramer JF, Speechley M, Rollman G, Spaulding SJ, Potter P

Physical activity intervention among male construction workers during unemployment
Kaukialnen A, Nygård C-H, Virranen P, Salonleml A

Assessment of psychophysical abilities of disabled people before their employment in Poland – a new idea
Kurkus-Rozowska BU, Bugajska J, Wilderszal-Bazyl M, Najmiec A

The research of real needs of the barrier-free environment for the lower-extremity handicapped
Lai HH

Can ergonomic principles be applied to disability accommodation?
Malzahn DE, Fernandez JE, Kattel BP, McMulkin ML
What kind of tasks can coronary heart disease victims do?  
Mital A, Kumar GM  

Influence of group activities related to exercise behavior on female farmers' physical activity, functional capacity and work ability – a three-year follow-up  
Perkkö-Mäkelä M  

How to develop an IT-infrastructure for the disabled persons in Barents Region?  
Sandberg KW  

UHK health-related fitness test battery – a new method to promote physical activity among adults  
Suni J, Oja P, Milunpalo S, Pasanen M, Vuori I  

Quality of life in the third age: expectations for the American workforce  
Winn FJ, Bittner AC  

Participation in health promotion activities during unemployment  
Virtanen P, Saloniemi A, Nygård C-H  

AUTHOR INDEX
