Volume II

Air pollution from Combustion Processes and Control
Energy Conversion and Utilization
Renewable Energy and Alternative Fuels
Internal Combustion Engines and Pollution Control

Organizing Institutes:

Energy Research Institute
and Faculty of Engineering,
Chulalongkorn University,
Bangkok, Thailand

Department of Energy Development and Promotion,
Ministry of Science, Technology and Environment,
Bangkok, Thailand

in collaboration with
The Institute of Engineering Thermophysics,
Chinese Academy of Sciences,
Beijing, People's Republic of China

### Volume I: Keynote Lecture

- **Fundamental Combustion**
  - Practical Combustion Systems and Hazards Control
  - Computational Combustion

### Keynote Lectures

- Recent Progress in Researches on Flame Propagation through Combustion
  - Prof. Toshisuke Hirano ......................................................................................... K-1

- Experiences in Implementation of the Energy Conservation Program
  - Dr. Prathes Sutabutr ............................................................................................ K-11

- Aerodynamic of Flames
  - Prof. Chung K. Law ............................................................................................. K-14

### Fundamental Combustion

- Measurement and Rehabilitation of Flame Temperature Field by Tomography Technology
  - Li Jingding, Jiang Xiawen, Luo Zhizhong, and Chu Shuhua .................................. 1

- Turbulent Combustion of Organic Dust - Air Mixture in Confined Flows and Explosions
  - Hazards
  - N.N. Smirnov, V.F. Nikitin, A.B. Kiselev, A.P. Boychenko, V.V. Baskokov, R. Klemens, P. Woansky and J.C. Legros ................................................................. 6

- Stability and Shapes of Premixed Flames in a Cylindrical Burner.
  - Leon Sinay and Fernando Fachini Filho .................................................................. 19

  - C.M. Trinh and F.M.B. Andersen ........................................................................... 27

- Shock Temperature Role in the Limits of Detonation Waves.
  - Fariborg Roshidi, Zohreh Milani, Rasoul Rajabi and Amir Kabir .......................... 35

- Nox Formation by Fuel - NO Mechanism in Highly Turbulent Opposed Jet Premixed Flames
  - Yashinobu Kotani and Akira Yoshida .................................................................. 46

- An Experimental Study on Characteristics of Elliptic Sprays.
  - Gong Yunyi, Liu Changwen, Huang Yezhou and Peng Zhijun .............................. 52

- The Stream of Diffusion Flame, CO₂ and NO₂ Gas in the Magnetic Field.
  - Hidenori Tanaka, Koji Yoshida, Hideo Shoji and Atsushi Saima .......................... 58

- Lean Limit Flame Propagation under Microgra

</table>
An Investigation of Stability of Diffusion Flames At Various Conditions.

Experimental Studies on Flame Characteristic of Hydrogen Turbulent Jet Diffusion Flame
Monoj Kumars, N.Ravindranath and Satesh Kumar .......................................................... 232

Ben.T.Zinn .......................................................................................................................... 241

Influence of the Mean Chemical Rate Expression on the Structure of Premixed Turbulent Flames.
D.Karmed and M.Champion .............................................................................................. 255

Effects of Ambient Pressure and Natural Convection on Fuel Droplet Evaporation.
Hiroshi Nomura and Yasushige Ujiie ............................................................................... 266

Studies on Interference Effects in Spray Combustion.
C.P.Sarathy and R.Natarajan ............................................................................................. 272

**Practical Combustion Systems and Hazards Control**

Study on Burning Heavy Oil in Diesel with Introduction Stream Technique.
Zhang Lijun, Liu Shitang and Li Jingding ........................................................................ 292

Design and Performance of a Pilot Burning for Swirl Augmentor.
Tan Hua Yuan and He Xiao Ming ...................................................................................... 298

Structure and NOx Formation in Premixed and Non-Premixed Opposed Jet Burner.
Akira Yoshida, Kohichi Hirose and Yoshinobu Kotani ..................................................... 304

H.S.Couto, J.A.Carvalho, JR. And D Bastos-Netto ............................................................ 310

A Simple One-Dimensional Model For Liquid Fuel Vitiated-Air Heater For Screamjet Direct-Connected Test Facilities.
A.L.S.Guimaraes, L.Sinay and Bastos-Netto ................................................................. 316

A Comparison of Elutriation Rates when Burning Coal on Coal-Water Slurry in a Fluidized Bed Combustor.
Longin Przyblski .............................................................................................................. 324

Sumreung Jugjai and Amorn Sanjetlertcharoen ............................................................... 331

An Influence of Gas-Aerosol Compositions on Flammability Limits of Gases and Vapours.

M.Vidal, A.Zumino, M.Champion, B.Deshaies and L.F.Figueira da Silva ......................... 348

Minimum Explosible Concentration of Thai Indigeneous Powders.
W.Tanthapanichkoon, T.Charimpanikul, H.Duriyabunleang and V.Chongvisal ................ 355

Estimation of the Cell size of Detonation by Numerical Analysis.
Tadayoshi Sugimura and Toshihiro Nanaka ................................................................. 361
Combustion Experiment of Monodisperse and Mono-Sized Alcohol Fuel Droplet Clouds Generated by Condensation Method.
Youichi Maratani, Jun'ichi Sato, Hiroshi Nomura, Yasusige Ujiie, Michikata Kono and Haruhiko Kawasaki

Computational Combustion

A Model of Steady-State Convective Combustion of Gas-Permeable Propellants.
Wang Boxi

A Tomographic Algorithm for Reconstructing Local Probability Density Functions in Turbulent Flames.
Robert Gouland, Catherine Mavriplis and Pumyos Vallikul

A Pure Two-Fluid Model for Simulating Spray Combustion in a Dual-Injet Dump Ramjet Combustor.
Y.C.Guo, W.Y.Un and L.X.Zhou

Numerical Simulation of Dynamic Premixed Turbulent Open V-Flame.
B.L.Zhang, C.K.Chan and K.S.Lau

Spatial Distribution Computation of Radiation Heat Flux in Diesel Engines.
Chen Shuo, Pan Keyu, Liu Mingan, Li Benwen and Zhou Longbao

C.Corvellec, P.Bruel and V.A.Sabel'nkov

M.Mbarawa, R.T.Casey and B.E.Milton

C.K.Chan, K.S.Lau and H.Q.Zhang

C.A.Gurgel Veras, Saastamoinen and J.A.Carvalho Jr

Integral Analysis of Stretched Flames.
J.H.M.Ten Theje Boonkkamp and L.P.H. de Goey

Mathematical Modeling of Ozone Reactions and Dispersions from Combustion Productions in Atmosphere.
B.Dabir, Kh. Badil, S.M.Alaie, M.Nikazar and M.Shaebain-Sanghabadi

A Set of Governing Equations For Reactive and Diffusive Mixtures Applied to Combustion.
E.Lundgren

Valery Morgenthaler, Luis Fernando, Figueira da Silva, Bruno Deshaies, Vladi mir and A.Sabel'nkov

A Continuum Mechanical Model for Spray Combustion.
D.Palmqvist, E.Lundgren and S.I.Moller
Volume II: Air Pollution From Combustion Processes and Control

Energy Conversion and Utilization

Renewable Energy and Alternative Fuels

Internal Combustion Engines and Pollution Control

• Air Pollution From Combustion Processes and Control

The Prospect of Desulphurization Technology Development in China.
Wang Qinghuan and Wang Ning................................................................. 518

Temperature Prediction of Pulverized Coal Combustion in Multiple Opposed Jets Flow.
Q W Zhao and H F Zhao.............................................................................. 522

L Bonnieau, C Massiot, J C Goudeau, Y Rogaume, M Anzanneau, B Bregen
and B Sztal................................................................................................... 527

The Emission of CO and NO From Small Premixed Flames On Domestic Burners.
L P H de Goey, R L G M Eggels, L M T Somers and A J M Gielan.................. 534

Investigation on Diesel Particulate Oxidation Using Metal Oxide Coated Ceramic Foam Filter.
C G Saravanan and K Jeyachandran.............................................................. 544

Catalytic Hydrogenation of Carbon Dioxide Over Rh/SiO2 Catalyst Prepared From Water-In-Oil Microemulsion.
Masahiro Kishida, Kyotaro Onoue, Hideo Nagata and Kalsuhiko Wakabayashi......... 560

Modelling the Effects of Fuel Injection Characteristics and Secondary Injection on Diesel Engine Emissions.
G Devaradjane and N Buluswamy................................................................. 563

Development of Anodic Oxidation Catalyst For Catalytic Combustion of Exhaust Gas.
Intan Elizabeth Sungkono, Wei Yong Ying, Kyoke Yamamoto, Hideo Kamey
and Toshiyuki Koya....................................................................................... 570

Investigation On Reduction of CO in SI Engine with Catalytic Converter.
C M Vara Prasad, C Prabhakar Reddy and M V S Murai Krishna......................... 576

• Energy Conversion and Utilization

A Case Study for Life Cycle Value Assessment (LCVA) as an Energy Decision Making Tool: Conventional Gasoline and Reformulated Gasoline.
Mario Reynolds, M D Checkel, R A Fraser and R Macintosh................................ 583

Technical and Economic Analysis For Conversion of An Emergency Generator into A Cogeneration System: Study of Case For a Hospital.
Jose' Luz Silva, Mauro Jose' Cavalcanti Leite, Francisco Eulalo, Alves Dos Santos.
and Carlo Alberto Luengo.............................................................................. 606

Technical Guide For Exergy Analysis.
Chen Mingzheng, Zheng Danxing and Song Zhiping......................................... 611

Equation Oriented Modelling of Plant Utility Systems and Their Optimisation using A Novel SQP Method.
William Morton and Miguel Angel Rodriguez - Toral...................................... 619
Combined Heat And Power (CHP) Plants and Environment.
Sukru Bekdemir, Recep Ozturk and Muammer Akgun ................................................................. 629

Study on Catalyst Assisted Combustion With Catalyst Temperature Limiting.
Fumikiro Hanba, Mitsuaki Tanabe and Kiyoshi Aoki ................................................................. 637

A Case Study of Air Enrichment with Oxygen in the Incineration of Industrial Wastes.
G.F. Melo, P.T. Lacava and J.A. Carvalho Jr ................................................................. 644

Rapid Pyrolysis of Agricultural Residue at High Temperature.
Rolando Zanzi, Krister Sjostrom and Emilia Bjornborm ................................................................. 651

Combustion of Oil Sludge in a Bubbling Fluidized Bed Incinerator.
Adi Surjosatyo, Fand Nasir Hj Ani and Md Zahid Abdullah ................................................................. 657

Energy and Exergy Analysis of a Food Industrial Plant.
Ruchira Taprap and Sujitta Raungrusmee ................................................................. 664

Flow in Elliptical Domain With a Circular Wellbore at the Center and Application to Cyclic Steam Stimulation.
Mohammad Tamin and S.M. Faroug Ali ................................................................. 674

FPRDI Combustor For Coffee Drying.
Belen B. Bisana and Antonio B. Layong Jr ................................................................. 687

The Monte Carlo Simulation Method For Calculating Spot Prices Hourly of Electricity in Energy Generation System.
Ricardo Villarroel Davalos and Edvaldo A. De Somtana ................................................................. 692

Experimental Investigations About the Performance of A Two Wheeler With Two Stroke SI Engine For Fuel Economy and Lean Burning.
Shivayogi S. Hiremath and S.N. Kurbet ................................................................. 700

Experimental Investigation on a Lambretta Scooter Engine by Adopting Different Carburettors to Evaluate the Matching Feasibilities - In View of Road Test.
Shivayogi S. Hiremath, R.Nagaraj and S.N.Kurbet ................................................................. 707

Development and Testing of Low Cost Gen Set For Fuel Economy and Lean Burning.
Shivayogi S. Hiremath, D.D.Chillal and S.N. Kurbet ................................................................. 714

M.Hadjieva, R.Kirilov, R.Stoykov and Tz. Filipova ................................................................. 719

Common Movement Characteristic and Modeling of Municipal Solid Wastes Matter inner Martin Stocker.
Jian Ruimin, Chen Dong and Zhang Hesheng ................................................................. 723

Experimental Investigations on Performance of CI Engine With as Alternate Fuel A Dual Mode Operation Case.
Shivayogi S. Hiremath, R.Nagaraj and S.N.Kurbet ................................................................. 728

Experimental Investigation of Heat Transfer by Impingement.
Wang Baoguan ................................................................. 734

• Renewable Energy and Alternative Fuels

Efficient Combustion of Wet Biomass Fuel.
Heikki Oravainen ................................................................. 740
Analysis on the Modelling of Gasification Kinetic Data of An Argentinean Coal Char
Under Chemical - Diffusional Control Conditions.
J.Ochoa and A.L.Cukierman..............................................................................744

Thermal Degradation of Hardwoods Residues : Kinetics and Effects of Pyrolysis Conditions
on Chars Features.
P.A.Delia Rocca, E.G.Cerrella, P.R.Bonelli and A.L.Cukierman..........................750

Gasification of an Agricultural product : A Study Towards Actived Carbons Preparation.

Pyrolytic Oil and Char Recovery From Rice Husk Waste.
Mohammad Nurul Istam and Fand Nasir Ah..................................................762

Modelling of the Rapid Pyrolysis of Wood.
M.Nik-Azar, A.M Mirfakhri and B.Dabir.........................................................769

Investigations on Crude and Esterified Jatropha Oil as Substitute Fuels in Diesel Engine.
C.M.Vara Prasad, C.Prabhakar Reddy, M.V.S.Murali Krishna and
K.Sud hakar Reddy..........................................................................................782

Studies on Methanol-Diesel Mixtures With Air Gap Insulated Piston and Liner in Diesel
Engine.
C.M.Vara Prasad, C.Prabhakar Reddy, M.V.S.Murali Krishna and
K.Sudhakar Reddy.........................................................................................791

- Internal Combustion Engines and Pollution Control

Effect of combustion Chamber Deposits on Hydrocarbon Emission in a spark Ignition
Engine.
Zhohua Huang, Haitao Guo, Keyu Pan, Longbao Zhou and Deming Jiang........802

Ultrasonic Evaporation Carburetor.
Z.D.Yan and M.L.Wong................................................................................808

Development of a Fast, Low Cost Data Acquisition and Analysis System for DI Diesel
Engines.
Jamil Ghojel and S.K.Tang.............................................................................813

Analytical Heat Release Function for DI Diesel Engines.
Jamil Ghoje....................................................................................................8211

Performance of a Lean Burn S.I.Engine with Catalytically Coated Composite Piston.
Parthasarathy, S............................................................................................830

Experimental Investigation of Spatial Distribution of Heat Flux on the Cylinder Head of
A DI Diesel Engine.
C.S.Cheung....................................................................................................838

Analysis of Combustion Noise in Automobile Diesel Engine.
Zhang Zongjie, Zhang Biaobiao, Suo Haitao and Yu Qiang............................846

The Enhanced Cooling of Ramjet Engine Combustor.
Gu Weizao and Liu Wenyan...........................................................................852

Investigation of Aftermarket Products For Improving Fuel Economy and Emissions
Somchai Chanchaona.....................................................................................858
Studies on Water-Diesel Emulsion in Diesel Engine.
C.M. Vara Prasad and C. Prabhakar Reddy ................................................................. 863

Effect of catalytic Converter on two Wheeler Engine Performance & Emissions.
A. Rekman and K.C. Singhai ......................................................................................... 876

Design and Testing of Pin-Fixed Copper Oxide Metal Foil Catalytic Converter.
S.P. Venkatesan, C.G. Saravanan and K. Natarajan ..................................................... 885

An Experimental Study of In-Cylinder Tumbling Air Motion in a Four-Valve S.I. Engine
by LDA.
Shu-liang Liu, Yu Feng Li, Shao-Xi Shi, Ming-Zhi Feng, Zhen-Zhong Xu and
Kong Li ......................................................................................................................... 892

A Study of the Effects of the Grooved Combustion Chamber on Fuel/Air Mixing in
A Small D.I. Diesel Engine.
Wanhua Su, Rongwen Lin, Hui Xie and Shao Xi Shi .................................................... 899

Effects of Fuel Injection Mode and Combustor Exit Geometry on Swirl Combustion with
Preheated Air.
P.C. Chisale, M. Masuda and T. Nakajima .................................................................. 905

Combustion in a Lean-Burn Piston Engine with Catalytic Prechamber.
Josef Jarosinski, Ryszard Lapucha and Jacek Mazurkiewicz ........................................ 913

NOx Reduction in a Diesel Engine with Ceramic Coating on the Top of the Piston.
P.K. Bose, R.A. Beg, B.B. Ghosh, S.K. Das and Amitava Majumder .............................. 919

Combustion and Exhaust gas Emission Characteristics of Lean Mixture Ignited by Gas-Oil
Injection.
Koji Yoshida, Hideo Shoji, Atsushi Saima and Hidenori Tanaka .................................. 928

A New Method of Diagnosing In-Cylinder Combustion Deficiency by Utilizing Intra-cycle
speed fluctuation Based on Fuzzy Classification Theory.
Chen Hongyan, Wu Feng and Yan Zhaoda .................................................................. 940

Analysis of Combustion in Low Heat Rejection Diesel Engine with Two Zone Combustion
Model and Different Heat Transfer Models.
P. Tamilporai and N. Buluswamy .............................................................................. 950

The Performance of the Dual-Fuel LPG/Gasoline Vehicle.
Hewu Wang and Yaozhang Bian ................................................................................ 962

Experimental Study on a New Type Direct Injection Circularly Stratified Charge Combustion
System for Gasoline Engines.
Longbao Zhou and Hui Zhao ..................................................................................... 968

Lean Burn Spark Ignition Engine With Charge Turbulized by Directed Jet.
Andrzej Kowalewicz, Grzegorz Pawlak and Andrzej Rożyczyki .................................. 976

Ethanol Fumigation Close to the Intake Value at Increased Injection Pressure and with
Ignition Improve Enhances Performance and Reduces Emission in a DI Engine.
B.K. Venkanna and P.B. Gangavati ............................................................................. 983

Increased Injection Pressure in a D.I. Engine Enables Higher Water Percentages in
Water/Diesel Emulsion and Improves Performance & Reduces Emissions.
B.K. Venkanna and Smt Swati B. Wadawadagi ........................................................... 945
Improved Performance and Reduced Emissions in a D.I. Engine by Fumigating Methanol with Ignition Improver and with Increased Injection Pressure.
   B.K. Venkawna and Smt Swati B. Wadawadagi

   Yasushi Ota, Katsunori Komuro, Toshiyuki Matsushima, Koji Yoshida,
   Hideo Shoji and Atsushi Saima

Advanced Stratified Charge Combustion In Two-And Four Stroke Rotary Engines.
   H. Heitland, R. Rinne and K. Wislocki

Performance of A LPG Fuelled Two Wheeler With Four Stroke S.I. Engine - An Overview on Road Test.
   Shivayogi S. Hiremath, A.M. Lakkanagavi and S.N. Kurbet

   Shivayogi S. Hiremath, A.M. Lakkanagavi and S.N. Kurbet

Jet Ignition of Lean Mixtures for IC Engine Applications.
   Walanski P
