# TABLE OF CONTENTS

**Volume I**

**Active Noise Control**

Implementation of a Broad Band Multi-Point Acoustic Noise Canceler ........................................1
J. Garas, P.C.W. Sommen, A.C.P. van Meer, Eindhoven University of Technology, The Netherlands; J.L. van der Laar, Prodrive BV, The Netherlands

Adaptive Processing

A Comparison of Adaptation Algorithms for TDMA Digital Beamforming ............................................6
Liza Boland, Joseph Meehan, Silicon & Software Systems, Ireland

A Fast Least Mean Square Adaptive Second-Order Volterra Filter .......................................................11
Junghsi Lee, Yuan-Ze University, Taiwan

A Method for Tracking and Removing Motion Artifacts in Computerized Tomography Imaging Systems ....16
Amar C. Dhanantwari, University of Western Ontario, Canada; S. Stergiopoulos, Defence and Civil Institute of Environmental Medicine, Canada

A TMS320C80 DSP-Based Prototype Pam Engine for HDSL2 ..............................................................22
Kuo-Ruey Han, Pairgain Technologies, Inc., USA

Adaptive Noise Cancellation Combined Tree-Structured Sub-Band Filtering with Cross-Talk Adaptive Filtering: A Double-Microphone Approach .................................................................27
Hwai-Tsu Chang, Shih-Chien Lin, Yung-Cheng Sung, Huang-Lin Yang, CCL/ITRI, Taiwan

Adaptive Signal Analysis and Synthesis with Functional-Link Net .......................................................32
Gong-Huan Du, Bo-Ling Xu, Chong-Zhi YU, Zhong-Xuan Yuan, Nanjing University, P.R. China

An Adaptive IIR Filter for Phase Equalization in Electronic Energy Meters ...........................................37
Sriram Jayasimha, M.S. Shastri, Signion Systems, Ltd., India

An Efficient Orthonormal Adaptive IIR Realization ................................................................................42
Juan Cousseau, Leandro Salama, Universidad Nacional del Sur, Argentina

Complexity Reduction Techniques for DSP Based Multi-Channel Echo Canceller Systems ..................47
Shrirang Jangi, K. Harinath Reddy, Radisys Corporation, USA

Flat Decorelated NLMS for Acoustic Echo Canceller in Multi-Tasks Applications ...............................51
Gaby Gur Cohen, DSP Group, Inc., Israel

Improved Echo Canceller Design and Implementation ..........................................................................56
Dr. Prabhat Gupta, Marcus Harte, Kevin Hay, Mu Tian, Danny Yip, Dialogic Corporation, USA

Nonlinear Adaptive Filters: Comparisons of the Wiener and Volterra Models .....................................61
Shue-Lee Chang, Tokunbo Ogunfunmi, Santa Clara University, USA
The Generalized Subband Decomposition of the Adaptive FIR Filters by Using the Wavelet Transform and a Sparse Subfilter with Diadic Sparsity Factor .................................................................66
Nam-chun Park, Kyungnam University, Korea; Sun-kyu Park, Jinjoo Professional College, Korea

Tradeoffs in DSP Implementations of NIMS Based Echo Cancellers ........................................72
Jamil Chaoui, Sebastien De Gregorio, Yves Masse, Texas Instruments, Inc., France

Transform Domain Adaptive Filters with Non-Linear Eigenmode Equalization ..............................77
Rafik A. Goubran, Trevor Moat, Carleton University, Canada

Advanced TV and Video Technology
A Programmable Architecture for Digital Television .................................................................81
Neil Mitchell, Jaap Veerhoek, Giri Venkat, Philips Semiconductors, USA

A Reconfigurable Decision Feedback Equalizer for ATV Receivers ...........................................86
Jay Bao, Mitsubishi Electric ITA, USA

Audio and Video Quality Meter for Digital Television Networks ................................................90
Jamal Baina, Pierre Bretillon, D. Nasse, J. Prudent, TDF-C2R, France

Echo Reduction Performance Comparison Between a Classical Adaptive Noise Canceller and Wavelet Packet Adaptive Noise Cancellers .................................................................................95
Trina Adrian de Perez, Francisco D’Alvano, Maria Cristi Stefanelli, Universidad Simón Bolívar, Venezuela; Jorge Aguero, UNEXPO, Venezuela

Joint Video Coding of MPEG-2 Video Programs Transmitted Over a Constant Bit Rate Channel Based on Rate-Distortion Estimation .................................................................100
Sung-Hoon Hong, Seong-Dae Kim, Korea Advanced Institute of Science and Technology, Korea

Parameter Optimization and Simulated Performance of a DVB-T Digital Television Broadcasting System .........................................................................................................................105
Ana Garcia Armada, Beatriz Bardon, Miguel Calvo, Universidad Politecnica de Madrid, Spain

Using TMS320C80 to Implement Demultiplexer ...........................................................................110
Jufeng Dai, University of Toronto, Canada; Chengming Guo, Hua Li, Kaihua Liu, Shiqin Wang, Si-Le Yu, Yuhang Zhao, Tianjin University, P.R.China

Aerospace
Design of a Robust Control Algorithm for Vibration Reduction of Flexible Structures Based on Experimental Data ..........................................................................................................................115
Umberto Ciniglio, F. Corraro, Felice De Nicola, M. Naddei, Italian Aerospace Research Center, Italy

Microgravity Vibration Isolation Mount an Example of Multi-Processor Architecture in a Space Application ......................................................................................................................................120
Jean de Carufel, William Y. Stewart, Bjarni V Tryggvason, Canadian Space Agency, Canada; Ian Main, Spectrum Signal Processing, Canada

System Architecture of the Space Vision System ..............................................................................126
Steven Miller, Neptec Design Group Ltd., Canada

Audio
3D Sound Generation System for the Sound Effects on 3D Game Softwares ..................................131
Hyun Bin Kim, Poong Min Kim, Jae Woo Kim, Systems Engineering Research Institute, South Korea

A Real-Time LD-CELP CODEC on Pentium ......................................................................................135
Binuraj Kanjilil, Manish Singhal, Amit Roy Chowdhury, Motorola India Electronics Ltd., India

Communications

A Blind Deconvolution Based on Adaptive Signal Subspace Method ........................................... 223
Saeed Gazor, University of Toronto, Iran; A. Goli, Masoud Karimi, Isfahan University of Technology, Iran

A Chaotic Approach for DOA Estimation of FH Signals ................................................................. 228
Qi Ding, Xian Ci Xiao, Jian Yuan, University of Electronic Science and Technology of China, P.R. China

A Real-Time Implementation of Tone and Phase Reversal Detections of the ITU G.165 Echo Canceller on the
Motorola DSP568xx ....................................................................................................................... 233
Lunji Qiu, Cindy Quay, Boh Lim Sim, Motorola, Singapore

A WSSUS Multipath Channel Model with a Scaling Function as the Shaping Pulse .................... 238
Frederick Fairman, Mingyu Liu, Christopher Zarowski, Queen's University, Canada

An All-Digital Frequency Domain High Rate Receiver ................................................................. 243
Chien Chen, Andrew Gray, Meera Srinivasan, Jet Propulsion Laboratory, USA

An Approach for Quick Development of High-Powered Telecom Applications on the C6201 DSP ........ 248
Geoffrey Kimball, Radisys Corporation, USA

Bayesian Equalization Strategy: Performance Versus Number of Clusters .................................... 253
Charles Cavalcante, Universidade Federal do Ceará, Brazil; Bernadette Dorizzi, INT/EPH, France; Montalvao Filho
Jugurta Rosa, Joao Mota, Institut National des Télécommunications, France

Channel Equalization Using Error Perfect Reconstruction for Wavelet-Modulation Systems ........ 258
T. Liu, Mansour Tahernezahidi, Northern Illinois University, USA

Circular Trellis-Coded Modulation with Simplex Signal Constellation ........................................ 262
Jeffrey C. Dill, Yung-Cheng Lo, Ohio University, USA; Alan R. Lindsey, US Air Force Research Laboratory, USA

Design of Phase Offset Calculation Circuit for Binary Code .......................................................... 267
Young Yearl Han, Young Joon Song, Hanyang University, Korea

Dynamic Range in DSP-Based Narrowband Receivers ................................................................. 272
Ian Whitworth, Cranfield University, UK

High Rate Digital Demodulator ASIC ............................................................................................. 277
Parminder Ghuman, Gerald J. Grebowski, Salman Sheikh, SGT, Inc., USA; Andrew A. Gray, Jet Propulsion
Laboratory, USA; Scott Hoy, Steve Koubek, Lockheed-Martin, USA

Implementation of a Real-Time 16 kbps CVSD Digital Voice Codec on a Fixed-Point DSP ............. 282
Carlos O. Alva, James A. Norris, Steve Conahan, Harris Corporation, USA

Passive Time Delay Estimation Techniques: Applications to Jonosperic Links ................................. 287
Francis Castanie, Benoit Escrig, Daniel Roviras, National Polytechnics Institute, France

Performance Comparison of GMSK Modulation with BT 0.5 and Filtered BPSK Modulation .......... 292
Gee Lui, The Aerospace Corporation, USA

RAVEN - A Real-Time Analysis and Verification Environment ..................................................... 297
Thorsten Groethker, Synopsys, Germany; Andrea Mueller, Guido Post, RWTH Aachen, Germany

Viterbi Decoding for IS-95 CDMA Systems: Implementation on SH3 RISC Processors and Some
Related Issues ................................................................................................................................. 302
Christopher Aldridge, Zhongjun Wang, Eswin Tedja, Institute of Microelectronics, Singapore
Viterbi, Trellis and Turbo Code Implementation on a Next-Generation DSP ........................................307
Walter Croce, Ramon Cruz, LSI Logic Corp., USA

Wavelet Division Multiple Access (WDMA) .................................................................................................312
Ismail Jouy, Lafayette College, USA

Consumer Products
A Test of Some Internet Methods for Supporting Embedded Systems Work ..................................................317
Mary Ann Paul, TNG, Inc., USA

Innovative Digital Telephone Answering Device (DTAD) Solution Using a New Low Cost DTAD Chip from Texas Instruments (MSP58P70) .................................................................322
Rashid Khan, Alex Urquizo, DSP Software Engineering, Inc., USA

R.E.A.L. DSP Technology for Telecom Baseband Processing .........................................................................327
Peter Kievits, E. Lambers, Kees Moerman, Philips Research National Laboratory, The Netherlands; Rob Woudsma, Philips Semiconductors, The Netherlands

Robust Adaptive Equalization in DVB 64/256-QAM Receiver for Digital CATV Applications .........................332
Shlomo Ovadia, Qin Zhang, General Instrument Corporation, USA

The DSP56652 Dual Core Processor .............................................................................................................337
Tim Baggett, Brian Branson, Kirk Porter, Motorola Semiconductor Products Sector, USA; Ezra Baruch, Dan Mauricio Bruck, Liviu Faibish, Yaron Gold, Gilad Hazan, Yuval Itkin, Moshe Raefeli, Shai Shperber, Mark Yosefin, Harry Yosub, Motorola Semiconductor Israel, Israel

Data Acquisition
Acquisition Performance Comparison of the Generalized Maximum a Posterior Symbol Synchronizer Versus the Data-Transition-Tracking Loop ....................................................................................342
Loc Lam, Warren Martin, Jet Propulsion Laboratory, USA

An Acquisition System for Propagation Measurements ....................................................................................347
Sebastian Gonçalves, Armando Rocha, Décio Rodrigues, Universidade de Aveiro, Portugal

Data Acquisition in Time-Resolved Fourier Transform Infrared Spectroscopy Using DSP .................................352
Ken Dunne, Life Imaging Systems, Inc., Canada; Erik Kruus, UQAM, Canada; Jesse Greener, Milan Kovar, Peter R. Norton, University of Western Ontario, Canada

Improved Analog to Digital Conversion Using Digital Equalization ..............................................................357
Steve Conahan, Harris Corporation, USA; Adly T. Fam, State University of New York at Buffalo, USA

Single Chip Processor for Voice & Telephony Applications ............................................................................362
Jim Ryan, Analog Devices BV, Ireland

Data Communications
A 26 Mbps Wireless OFDM Transceiver .........................................................................................................367
Michel Fattouche, Bob Heise, Mohsen Hosseinian, Knud Knudsen, Wi-LAN, Inc., Canada

A Hardware Test Set for Rapid Verification of Low Error Rates in Digital Communication Systems .............372
Irfan Acar, Steen Parl, Signatron Technology Corporation, USA

A Software Implementation of the Multiplexer and the Framer Functions for DSL Modems ...........................377
Mansoor A. Christie, Paul Hunt, Ramesh A. Iyer, Texas Instruments, Inc., USA
Adapative Kalman Estimators for the Land-Mobile Satellite Channel Suitable for DSP Implementation

Michael Kaiser, Dornier Satellitensysteme, Germany; Andreas Lang, Nortel Dasa, Germany; Mohammad Y. Sharif, Napier University, UK

Hardware and Software Architecture for High Quality PC Audio

Mark Iretton, Luis Llorens, Cirrus Logic, USA

Implementation in Single ASIC Chip, of a Multicarrier SCPC-TDMA Demodulator for a Regenerative DVB Payload

G. Cangini, G. Chiarini, Giuseppe Chiassarini, M. Gouta, E. Rossini, P. Tabacco, Space Engineering S.p.A., Italy; V. Piloni, Alenia Aerospazio, Italy

Digital Filter Realizations

A Multipurpose Wideband Digital Communications Receiver Filter ASIC Design

Leland Langston, Joel McWilliams, Scott Wentzel, Raytheon Systems Company, USA

Design and Implementation of Digital Shelving and Constant-Q Equalization Filters

Ren Li, Shure Brothers Inc., USA; Mansour Tahernezhadi, Northern Illinois University, USA

Design of FIR Filters for Images by Successive Method

Naoyuki Aikawa, Masamito Sato, Tokyo Metropolitan University, Japan

Filtering of Broadband RF Signals Using Lower Bandwidth Digital Components

Laurence Barker, Tony Newman, Racal Radar Defence Systems Limited, UK

Highly Efficient Bandwidth Control for OFDM and DMT Based Communication Systems

Ravi Chandran, Daniel J. Marchok, Tellabs Research Center, USA

Implementation of Digital Filters on Pipelined Processor with Multiple Accumulators and Internal Data Paths

Chun Pyo Hong, Taegu University, Korea

Issues on Medical Image Enhancement

Justin Delva, Ali Reza, University of Wisconsin-Milwaukee, USA; Roy Shley, Camtronics Medical Systems, USA; Bob Turney, Xilinx, Inc., USA

N-Order State-Space Structure Implementation by DSP

Francisco Garcia-Ugalde, Sergio Herrera, Jesus Savage, Mexico; Bohumil Psenicka, Universidad Nacional Autonoma de Mexico, Mexico

New Family of Frequency-Selective Digital Filters

Jose Antonio de la O Serna, Universidad Autónoma de Nuevo León, Mexico

Optimal FFT Implementation on the CARMEL DSP Core

Haim Granot, Anat Hershko, Yniv Nana, Gil Naveh, I.C.COM Ltd., Israel

Optimized Sample Rate Conversion Filters for VLIW Architectures

David J. Hoyle, Vishal Markandey, Texas Instruments, Inc., USA

The RNN Filter for the Noise Reduction of Carrier Wave

Toshiaki Nakatsuka, Mototaka Sone, Musashi Institute of Technology, Japan

Digital Systems

0K/0MIPS Initial Operating System for DSPs

Raymond Horn, Heiko Zeuner, DSspecialists GmbH, Germany
A C Compiler for the R.E.A.L. Embedded DSP Architecture .................................................................464

A Dual Core Engine for Embedded Applications .................................................................469
Noam Benavahu, Uri Danyan, Boaz Perlman, Eval Salomon, Joseph Shor, Noam Sivan, Yosi Tzaveg, Eitan Zmora, Motorola Semiconductor Israel, Israel; Scott King, Paul McAlinden, Bill Moyer, Motorola Inc. Semiconductor Products Sector, USA; John Vaglica, Motorola M.CORE Technology Center, USA

A Flash Memory File System for Embedded DSP Applications ................................................474
Robert Boman, Panasonic, USA

A Hierarchical FSM-Based Architecture for Real-Time DSP Applications ..........................479
Zhiming Ji, New Jersey Institute of Technology, USA

A Multi-DSP System for Pipeline Real-Time Applications ..................................................484
Evangelos Zigouris, Patras University, Greece

Assessing General-Purpose Processors for DSP Applications .............................................489
Jennifer Eyre, Jeff Bier, Ole Wolf, Berkeley Design Technology, Inc. (BDTI), USA

Building Multi-Chassis DSP Systems ...................................................................................494
Richard Jaenicke, SKY Computers, Inc., USA

Carmel - A New High Performance DSP Core ........................................................................499
Gerhard Fettweiss, Dresden University of Technology, Germany; Amnon Rom, I.C.COM Ltd., Israel; Reinhard Niggebaum, Ralph Sucher, Siemens AG, Germany

Design and Implementation Issues of Intrinsic Functions for DSP Compilers ....................505
Huiwen Ru, Wei Zhao, Rockwell Semiconductor Systems, USA

Designing, Developing, and Deploying Real-time High Performance Applications with DSPs ..........................................................510
Elizabeth Keate, Texas Instruments, USA

DSP Software Development Lifecycle Issues ........................................................................516
Robert Oshana, Raytheon Systems, USA

Fast Calculation of Common Mathematical Functions with Floating-Point DSPs ..........521
Laszlo Hars, Panasonic Information and Networking Technologies Laboratory

Fibre Channel Technology Applied to Advanced DSP Systems ........................................526
Thomas O. Bohman, Systran Corporation, USA

Fixed-Point Extended C Compiler Allows More Efficient High-Level Programming of Fixed-Point DSPs ..........................................................531
Markus Willems, Aachen University of Technology, Germany

Flexible Hardware for Rapid Prototyping of Various Applications ...................................536
Mirko Brehmer, DSPecialists GmbH, Germany

GEDAE - A Graphical Programming and Autocode Generation Tool for Signal Processor Applications ..........................................................541
Harris Zebrowitz, Lockheed Martin Advanced Technology Labs, USA

High Performance DSP Optimization Techniques ...................................................................546
Greg Burnett, Raytheon Systems, USA
Implementation in a Single ASIC Chip, of a Winograd FFT for a Flexible Demultiplexer, of Frequency Demultiplexed Signals

Giuseppe Chiassarini, G. Gallinaro, F. Lerteri, P. Tabacco, Space Engineering S.p.A, Italy

Minimal Application Specific Runtime Systems with Virtuoso's SoftStealth Technology

Eric Verhulst, Eonic Systems, Inc., USA

Motorola DSP56307: 100MIPS Low Power General Purpose Digital Signal Processor

Eli Borowitz, Eytan Engel, David Moshe, Sergey Sofer, Moshe Tarrab, Motorola Semiconductor Israel Ltd., Israel; Avner Goren, Motorola Semiconductor, USA

Multi-Standards Implementation with High Performance Device

Min Wang, Texas Instruments, Inc., USA

On the Design of Data Communication Mechanisms for Parallel DSP Systems

Rolf Matzner, Jiri Vasatko, SSE Czech und Matzner, Germany

Optimizing Data Address Computation in DSP Programs: Analysis and Evaluation

Stefan Froehlich, Martin Gotschlich, Bernhard Wess, INTHFT, University of Technology, Austria

Overflow Avoidance Methodologies in Commonly Used DSP Functions

Rosemarie Piedra, Texas Instruments, Inc., USA

Profile Directed Compilation in DSP Applications

Paul Darcy, John Glossner, Jesse Thilo, Bell Laboratories, Lucent Technologies, USA; Stamatis Vassiliadis, Delft University of Technology, The Netherlands

Reliable Branch Predictions for Real-Time Applications

Harry Dwyer, Bell Laboratories, Lucent Technologies, USA

Retargetable Timed Instruction Set Simulation of Pipelined Processor Architectures

Andreas Hoffmann, Heinrich Meyer, Integrated Systems for Signal Processing, Germany

Salient Features of Practical Implementation of the Interface Circuitry Using High Speed Multiplexing

Hemchandra Shertukde, University of Hartford, USA

Software Estimations for DSPs - Improved Design Flow Shortens Time to Market

Michel Auguin, University of Nice, France; Emmanuel Gresset, VLSI Technology, France

Software Optimisation for Modems Using TMS320C62xx Digital Signal Processor (DSP)

Nairn Dahnoun, Heng Kwee Tong, Bristol University, UK

Super-Scalar Techniques Applied to Digital Signal Processing

John Sweeney, ZSP Corporation, USA

System Level Issues and Solutions for Multiple Board, Multi-Processor DSP Systems

Albert Lo, Spectrum Signal Processing, Inc., Canada

Techniques for Developing DSP Software on the Next Generation (TMS320C67x) Floating Point DSP Devices

John Edwards, Blue Wave Systems, UK

Transformation of Floating-Point into Fixed-Point Algorithms by Interpolation Applying a Statistical Approach

Frank Huertgen, Heinrich Meyer, Markus Willems, Integrated Signal Processing Systems, Germany
Two New DSP Application Software as Teaching Tools: DigiFilter and DSPlus ................................. 635
Xiufeng Cao, Laboratory of Earthquake Electronic Instruments, P.R. China; Hen-Geul Yeh, California State
University, Long Beach, USA

Use of DMA Transfers in Real-Time DSP Systems ................................................................. 640
Joe Barcelo, Dialogic Corporation, USA

Using 0 for Software, Hardware and System Design ............................................................. 645
Joachim Fitzner, Vojin Zivojnovic, AXYS, Germany

Using CAD Techniques to Rapidly Design Handheld DSP Instruments ................................. 650
Boris Donskoy, Andrew Girson, DVP, Inc., USA

Visual Programming Environment for Real-Time Systems (ViPERS) ....................................... 654
Mohammed K. Ibrahim, Stephen Rumsby, DeMontfort University, UK

FPGAs in DSPs
A 100 Megasample/sec FPGA-Based DFT Processor ............................................................... 659
Les Mintzer, Momentum Data Systems, USA

A FPGA Implementation of a Counter-Based Lossless Data Compression ............................. 664
Ruben A. Lalamentik, Armein Z. R. Langi, ITB, Indonesia

A Generator for Pipelined Multipliers on FPGAs ................................................................. 669
Tien-Toan Do, Holger Kropp, Peter Pirsch, LFI University of Hannover, Germany

An Efficient Parallel Design of FFTs in FPGAs ................................................................. 674
Sudip Nag, Hare K. Verma, Xilinx, Inc., USA

Computing Multidimensional DFTs Using Xilinx FPGAs ...................................................... 679
Chris Dick, Xilinx, Inc., USA

FPGA Interpolators Using Polynomial Filters ........................................................................ 684
Chris Dick, Xilinx, Inc., USA; Fred Harris, San Diego State University, USA

FPGA-Based Digit-Serial CSD FIR Filter for Image Signal Format Conversion ...................... 689
Jingyun Chung, Chonbuk National University, Korea; Hanho Lee, Gerald Sobelman, University of Minnesota, USA

Implementation of a Multicode BLQs-CDMA Modem-Codec, in Single PC Board, Using DSP and
FPGAs ....................................................................................................................................... 694
T. Botticchio, C. Campa, Giuseppe Chiassarini, M. Cipriani, Space Engineering S.p.A, Italy

Implementing High-Performance Error Control Coding (ECC) Functions in Programmable Logic ......... 699
Tapan Mehta, Altera, USA; Doug Ridge, Integrated Silicon Systems, Ltd., USA

New DCT Designs for Image Processing Circuits ..................................................................... 703
Yannick Berthoumieu, Laurent Dulau, Patrice Kadionik, Universite Bordeaux I, France

Parameterizable Reed-Solomon Codecs ............................................................................... 708
Martin Langhammer, Kaytronics, Inc., Canada

The Polyphase Downconverter: An Efficient Approach to Wideband Digital Downconversion ............ 713
Jerry Fudge, Mike Legako, Clint Schreiner, Raytheon Systems Company, USA

VHDL Code Generation for Hardware-Software Co-Design of Data Dominated DSP Applications .......... 718
Marleen Ade, Josep Dalcolmo, Rudy Lauwereins, Katholieke Universiteit Leuven, Belgium
Geophysical

Autoregressive Models for Seismic Events Coming from the Guerrero Seismic Gap in Mexico ..........................723
Juan M. Espinosa, Cires, Mexico; Juan Garcia Lopez, Andres O. Pizarro, Instituto Politecnico Nacional, Mexico

Seismic Buffer Recognition Using Mutual Information for Wavelet Based Features Selection .........................728
Alwyn Hoffman, Tonie Tollig, Theo Van der Merwe, Potchefstroom University for CHE, South Africa; Riaan Hoogenboezem, ISS International, South Africa

Wavelet Transforms for Seismic Detection ..............................................................................................733
Trina Adrian de Perez, Francisco D’Alvano, Marilet De Antrade, Ana Cecil Mascoli, Orlando Sucre, Universidad Simon Bolivar, Venezuela

Image Analysis & Coding

A H.263 Video Encoder/Decoder Implemented on the SHARC DSP ............................................................738
Lan Hui, Nanyang Technological University, Singapore

A Parallel DSP Architecture for a New and High Performance Variable Rate Coder .....................................743
Jean-Marie Moureaux, Patrice Nus, CRAN, France; Philippe Raffy, CNRS-UNSA, France

A Parallel Method for Image Distance Transform Calculation ......................................................................747
Franck Amior, Patrick Bonnin, Edwige E. Pissaloux, Universite de Rouen, France

Adaptive Principal Component Extraction (APEX) for Image Compression ...............................................752
Mohamed F. Chouikha, Erwin T. Gilmore, Howard University, USA; Nigel Ziyad, NASA-GSFC, USA

An Efficient Classified Side-Match Finite-State Vector Quantization for Image Compression ...................757
Jiann-Liang Chen, Shinfeng David Lin, Shih-Chieh Shie, National Dong Hwa University, Taiwan

An Improved Algorithm for Image Compression by Adaptive Morphological Subband Coding ..................762
Vasile Lazarescu, D.N. Vizireanu, Anca Vizireanu, "Politechnica" University of Bucharest, Romania
