CONTENTS

Preface xv
Symposium Organization xvii
Welcome Address xix
  H. Ejiri
Opening Address xxi
  K. Ikeda

Few-body Systems 1

Three-Nucleon Scattering: Numerical Challenges
and Physical Insights 3
  W. Glöckle, H. Witala, D. Hüber, H. Kamada and J. Golak

Calculation of Scattering Observables in Three- and
Four-Nucleon Systems 12
  M. Viviani, A. Kievsky and S. Rosati

Four-Body Bound States for Nucleons and Hyperons 21
  H. Kamada, A. Nogga and W. Glöckle

Faddeev-Separable-Expansion Approach to Nuclear and Atomic
Three-Body Systems 29
  Y. Koike

Multi-Faddeev Equations for Three-Cluster N-Body Systems 38
  S. Oryu, S. Nemoto and P. U. Sauer

Gaussian-Basis Coupled-Channel Variational Calculations
of Various Three- and Four-Body Systems 47
  M. Kamimura, E. Hiyama and Y. Kino

Monte-Carlo Methods 57

Progress and Prospects in Quantum Monte Carlo Studies
of Light Nuclei 59
  J. Carlson
Applications of the Stochastic Variational Method
K. Varga and Y. Suzuki

Computational Nuclear Structure: Challenges, Rewards, and Prospects
D. J. Dean

Quantum Monte Carlo Diagonalization Method for Nuclear Shell Model
M. Honma, T. Mizusaki and T. Otsuka

Light Unstable Nuclei and Few-body Systems

Complex Scaling Method and Unstable Nuclear Physics
K. Katō, S. Aoyama, T. Myo, T. Yamada and K. Ikeda

Complex Scaled Orthogonality Condition Model for Three-Body Cluster System
S. Aoyama, K. Katō and K. Ikeda

Variation after Angular Momentum Projection with Antisymmetrized Molecular Dynamics and its Application to Excited States in Unstable Nuclei
Y. Kanada-En’yo and H. Horiuchi

AMD+GCM for Many-Body Cluster System
N. Itagaki, S. Aoyama and S. Okabe

Parity Projected Skyrme Hartree Fock Method
S. Takami, K. Yabana and K. Ikeda

Application of the RGM — Algebraic Version to Light Three-Cluster Nuclei
S. V. Korennov

Molecular Structure of Be and C Nuclei by a Multi-Configuration Cluster Model
S. Okabe and N. Itagaki

Effects of Δ-Isobar Excitation on Neutron-Deuteron Scattering
S. Nemoto, K. Chmielewski, J. Haidenbauer, S. Oryu and P. U. Sauer
Four-Body Structure of Light Hypernuclei
   E. Hiyama

Faddeev-Hahn-Type Equations and its Application to Three
Charged Particle Systems
   R. A. Sultanov

Coupled-Rearrangement-Channel Calculation of Metastable States
of Antiprotonic Helium Atoms
   Y. Kino, M. Kamimura and H. Kudo

Monte-Carlo Study of Few-Body Bound States with the Method
of Continued Fractions
   H. Masui and T. Sato

Method of Fractional Parentage Coefficients in the Full \((0 + 2)\hbar\omega\)
Configuration Space for the 1p-Shell Nuclei
   G. Kim, A. V. Khugaev and Il-Tong Cheon

The Development of Sturm-Liouville Method and Halo-Like
States in Light Nuclei
   A. V. Khugaev and G. Kim

Reproducing Independent-Particle Model Eigenstates in a
Close-Packed Lattice: The FCC Model of Nuclear Structure
   N. D. Cook and T. Hayashi

Shell Model and Effective Interactions

Total and Parity-Projected Level Densities of Iron-Region
Nuclei by the Shell Model Monte Carlo Method
   H. Nakada and Y. Alhassid

Structure of Unstable Nuclei Studied by Monte Carlo Shell Model
   Y. Utsuno, T. Mizusaki, T. Otsuka and M. Honma

Calculation of Excited-State Properties with an Auxiliary-Field
Monte Carlo Method
   K. Sato, K. Kume and Y. Umemoto

Effective Interaction Theory and Unitary-Model-Operator
Approach to Ground-State Properties in Finite Nuclei
   R. Okamoto, K. Suzuki and H. Kumagai
Unitary-Model-Operator Approach to $^{17}$O and Single-Particle Energy of Lambda  
S. Fujii, R. Okamoto and K. Suzuki  

The Numerical Calculation in the Relativistic Many-Body Theory for Spherical Nuclei  
Jiang Wei-Zhou and Qiu Xi-Jun

Nuclear Reactions and Structures

Nuclear Calculations on Lagrange Meshes  
D. Baye

Solution of the Lippmann-Schwinger Equation in Configuration Space by a Chebyshev Expansion Method  
G. H. Rawitscher, I. Koltracht and R. A. Gonzales

Heavy-Ion Resonance and Multi-Cluster States in Highly Excited Nuclei  

Microscopic Cluster Description of Exotic Light Nuclei  
P. Descouvemont

Nuclear Physics Input for Solar Models  
A. Csótó

Momentum Distributions of the Core Fragment from the Nuclear Breakup Reaction within the Glauber Model  
Y. Ogawa

Three-Dimensional TDHF Calculations for Reactions of Unstable Nuclei  
Ka-Hae Kim, T. Otsuka and P. Bonche

$3\alpha + 3\alpha$ Structure of Highly Excited States in $^{24}$Mg  
M. Ito, Y. Sakuragi, Y. Hirabayashi and Y. Abe

Four-Body Faddeev-Yakubovsky Calculations on $^2$H($\vec{d},n$) $^3$He Reaction in keV-Energy Region  
E. Uzu, S. Oryu and M. Tanifuji
Analysis for the $^3\text{He} (\bar{d}, p) ^4\text{He}$ Reaction at Forward Scattering

Multi-Dimensional Integrations in the Relativistic $(p, 2p)$ Reaction

J. Mano, K. Himura and Y. Kudo

QCD and Lattice

Supercomputing in Lattice QCD

S. Hioki

Confinement Physics and Topology in QCD

H. Suganuma, K. Amemiya, A. Tanaka and H. Ichie

Tamm-Dancoff Approximation to Light-Front Field Theory

M. Yahiro and T. Sugihara

Variational Calculation of the Effective Action

T. Sugihara

Properties of the QCD Vacuum in the Dual Ginzburg-Landau Theory

S. Umisedo, H. Toki and H. Suganuma

Precise Determination of the $(\lambda\Phi^4)_4$ Effective Potential on the Lattice

A. Agodi, G. Andronico, P. Cea, M. Consoli and L. Cosmai

Monopoles in QCD

H. Ichie and H. Suganuma

Dual Wilson Loop and Inter-Monopole Potential in Lattice QCD

A. Tanaka and H. Suganuma

Gluon Propagator in Maximally Abelian Gauge and Abelian Dominance for Long-Range Interaction

K. Amemiya and H. Suganuma

Thermalization of Rho Meson in Pionic Heat Bath

H. Shin

Behavior of Monopole Trajectories in the Instanton and Anti-Instanton System at Finite Temperature

F. Araki, H. Suganuma and H. Toki
Quarks and Strangeness

Lippmann-Schwinger Approach in the Quark Model of the $NN$ and $YN$ Interactions

Y. Fujiwara, C. Nakamoto, T. Fujita, Y. Suzuki and M. Kohno

Scattering Observables of the $NN$ and $YN$ Interactions in the $SU_6$ Quark Model

T. Fujita, Y. Fujiwara, C. Nakamoto and Y. Suzuki

Baryon-Baryon Interaction with $S = -2$ in the Quark Model

C. Nakamoto, Y. Fujiwara and Y. Suzuki

H-Dibaryon Matter in the Skyrme Model on a Hypersphere

T. Sakai and H. Suganuma

Application of Hyperspherical Harmonics Approach to Extended Fock Space Baryon Wavefunction

S. Sanyal

Nucleon Resonances in the Constituent Quark Model with Chiral Symmetry

H. Kowata, M. Arima and K. Masutani

Hadronic Flux-Tubes in the Dual Ginzburg-Landau Theory

Y. Koma, H. Suganuma and H. Toki

Stark Mixing in Exotic Helium Atom Cascade Process

T. Koike and Y. Akaishi

Hartree-Fock Methods and Collective Motion

Self-Consistent Methods in Nuclear Structure Physics

J. Dobaczewski

The Mean-Field Method on a 3D Mesh: Principles and Applications

Hartree-Fock-Bogoliubov for Deformed Neutron-Rich Nuclei

N. Tajima
Ground-State Properties of Unstable Nuclei in the Relativistic Mean Field Framework

352

The Comparison and Application of RCHB with both Finite Range and Zero Range Pairing Force

J. Meng

361

Relativistic Mean Field Description of Nuclear Collective Rotation — The Superdeformed Rotational Bands in the A ~ 60 Mass Region —

H. Madokoro and M. Matsuzaki

366

A Method of Calculation of Fields in Mesh Hartree-Fock Method with Gaussian Two-Body Force

T. Matsuse

369

Tetrahedron and Triangular Prism Shapes of Z = N Nuclei in Mass Region A ~ 60–80

S. Takami, K. Yabana and M. Matsuo

372

Chaos, Order and Damping of Collective Rotation in Warm Nuclei

M. Matsuo, K. Yoshida, T. Døssing and E. Vigezzi

375

Effect of Shell Structure in Single Particle Alignment on Rotational Damping

K. Yoshida and M. Matsuo

380

Fractal Analysis of Damped Collective Motion

H. Aiba and M. Matsuo

383

Quantum Mechanical Diffusion in Complex Surrounding

S. Mizutori and S. Åberg

386

Statistical Property of Spectra in Large Deformed Nuclei

Xizhen Wu, Yizhong Zhuo, Zhuxia Li and Jianzhong Gu

389

Heavy Ion Reactions

Two-Particle Correlations in Intermediate Energy Heavy-Ion and Proton-Induced Collisions

W. Bauer

393

395
Fermionic Molecular Dynamics and Short Range Correlations  404
  H. Feldmeier, T. Neff, R. Roth and J. Schnack

Fragments in Gaussian Wave-Packet Dynamics with and without Correlations  413
  P. Danielewicz and D. Kiderlen

Simulated Annealing Algorithm for Early Cluster Recognition in Heavy Ion Reactions  423
  R. K. Puri, C. Hartnack, R. Nebauer and J. Aichelin

Boltzmann-Langevin Approaches  434
  Ph. Chomaz

Antisymmetrized Molecular Dynamics Calculation of Collisions of Heavy Nuclei  443
  A. Ono and H. Horiuchi

Anomalous Diffusion in Peripheral Heavy-Ion Collisions and the Langevin Formalism  452
  M. Ploszajczak and T. Srokowski

Multi-Dimensional Diffusion Model for the Synthesis of Superheavy Elements  461
  T. Wada, Y. Aritomo, T. Tokuda, K. Okazaki, M. Ohta and Y. Abe

Molecular Dynamics with Quantum Fluctuations and its Application to Heavy Ion Collisions  470
  A. Ohnishi and J. Randrup

Effects of Quantum Fluctuations in Antisymmetrized Molecular Dynamics  475
  Y. Hirata, A. Ohnishi, Y. Nara, T. Harada and J. Randrup

Alpha-Clustering Effect in $^{12}\text{C}$ Fragmentation  478
  H. Takemoto, H. Horiuchi and A. Ono

Quantum Molecular Dynamics Approach to the Nuclear Matter below the Saturation Density  481
  T. Maruyama, K. Niita, K. Oyamatsu, T. Maruyama, S. Chiba and A. Iwamoto
On the Possibility of Super $\alpha$-Chain State in a Microscopic Model

A. Tohsaki and M. Kosako

CA Experiments on Excited Systems of Nucleons

A. Lejeune, J. Perdang and J. Richert

Mean-Field Simulations of Heavy-Ion Fusion at Near-Barrier Energies

V. N. Kondratyev, A. Iwamoto and A. Bonasera

The Role of Higher Excited Baryonic Resonance in Heavy Ion Collisions at AGS Energies

N. Otuka, Y. Nara, A. Ohnishi and T. Maruyama

Ultra-Relativistic Nuclear Collisions in a Parton-Hadron Cascade Model with Minijet Production

Y. Nara

Summary

INNOCOM97: Summary Talk

D. M. Brink

Symposium Program

List of Participants
