FIRE SAFETY SCIENCE—
PROCEEDINGS
OF THE FIFTH
INTERNATIONAL
SYMPOSIUM

Editor
Yuji Hasemi Dr.Eng
Tsukuba, Japan

INTERNATIONAL ASSOCIATION
FOR FIRE SAFETY SCIENCE
Contents

Preface iii
International Association for Fire Safety Science v
In Memoriam — Professor Kunio Kawagoe vii
In Memoriam — Professor David Rasbash viii
Symposium Committees ix
Reviewers x
Session Chairs xiii

INVITED LECTURES

Studies on Human Behavior and Tenability in Fire Smoke
Tadahisa Jin 3

Performance-based Fire Engineering Design and its Application in Australia
Vaughan Beck 23

Risk Assessment
Sven Erik Magnusson 41

An Overview of Research on Wildland Fire
Frank A. Albini 59

Aspects of Fire Research Activities in Russia
A. Korolchenko 75

Overview of Sprinkler Technology Research
Cheng Yao 93
Building Firesafety Design against a Large Earthquake
- Based on the 1995 Kobe-Hanshin Earthquake
Shin'ichi Sugahara 111

FIRE BEHAVIOUR OF MATERIALS, FLUID MECHANICS, FIRE SPREAD, FIRE
PHYSICS, FIRE MODELLING AND FIRE CHEMISTRY

A Procedure for Predicting the Heat Release Rate of Furniture
Composites from Measurements on their Components
William J. Parker 129

Determination of Fire Exposure Heat Flux in Cable Fire Tests
Pravinray D. Gandhi, Loren Caudill, James Hoover and Tom Chapin 141

Critical Mass Pyrolysis Rates for Extinction of Fires over Solid
Materials
Michael A. Delichatsios and Mary M. Delichatsios 153

Issues Associated with Combustibility Classification: Alternate Test
Concepts
Frederic B. Clarke 165

The Effect of Sample Size on the Heat Release Rate of Charring
Materials
Steven J. Ritchie, Kenneth D. Steckler, Anthony Hamins, Thomas G.
Cleary, Jiann C. Yang and Takashi Kashiwagi 177

A Three-dimensional Mathematical Model for the Pyrolysis of Wet
Wood
R. Yuen, R. Casey, G. de Vahl Davis, E. Leonardi, G. H. Yeoh,
V. Chandrasekaran and S. J. Grubits 189

Simulations of Swirling Fires Controlled by Channeled Self-generated
Entrainment Flows
K. Satoh and K. T. Yang 201

Modelling the Fireballs from Methane Releases
G. M. Makhviladze, J. P. Roberts and S. E. Yakush 213
Fires in Inclined Trenches: the Effects of Trench and Burner Geometry on the Critical Angle
  P.J. Woodburn and D.D. Drysdale  225

The Balcony Spill Plume—Some CFD Simulations
  S. Miles, S. Kumar and G. Cox  237

Flow Behavior of Ejected Fire Flame/Plume from an Opening Effected by External Side Wind
  Osami Sugawa, Daisuke Momita and Wataru Takahashi  249

Flame and Plume Behavior in and near a Corner of Walls
  Wataru Takahashi, Osami Sugawa, Hirokazu Tanaka and Masanori Ohtake  261

Flame Inclination with Induced Wind through Inlet Opening in a Tall and Narrow Atrium
  H. Satoh, O. Sugawa and H. Kurioka  273

An Empirical Model for Upward Flame Spread over Vertical Flat and Corner Walls
  Cheng Qian and Kozo Saito  285

A Computer Model of Upward Flame Spread on Vertical Surfaces
  Craig L. Beyler, Sean P. Hunt, Naeem Iqbal and Frederick W. Williams  297

Upward Flame Spread on Wooden Surface Products: Experiments and Numerical Modelling
  Matti Kokkala, Djebar Baroudi and William J. Parker  309

Mathematical Models for Wind-Aided Flame Spread of Floor Coverings
  P. Van Hees and P. Vandevelde  321

In-Rack Fire Plumes
  Haukur Ingason  333

CFD Simulation of Upward Flame Spread over Fuel Surface
  Zhenghua Yan and Goran Holmstedt  345
Flame Spread over a Cellulose Sheet Permeated with an Adhesive
Lijing Gao, Ritsu Dobashi and Toshisuke Hirano 357

Numerical Simulation of Combustible Liquid Behavior and
Temperature Distribution in a Solid-liquid Mixed Layer during Flame
Spread over It
Kazunori Kuwana, Masataro Suzuki, Ritsu Dobashi and Toshisuke Hirano 367

Flame Heat Transfer and Concurrent Flame Spread in a Ceiling Fire
Yuji Hasemi, Masashi Yoshida, Yutaka Yokobayashi and Takao
Wakamatsu 379

Transport by Gravity Currents in Building Fires
Ronald G. Rehm, Kevin B. McGrattan, Howard R. Baum and Kevin
W. Cassel 391

Ventilation Effects on Compartment Fire Characterization
Michelle J. Peatross and Craig L. Beyler 403

Effects of Ventilation on the Compartment Enhanced Mass Loss Rate
C.M.Fleischmann and A.R.Parkes 415

Flame Heights of Fuel Arrays with Combustion in Depth
Gunnar Heskestad 427

The Prediction of Fire Propagation in Enclosure Fires

On Zone Models for Flashover
T.L.Graham, G.M.Makhviladze and J.P.Roberts 451

CFD Modelling of Combustion and Heat Transfer in Compartment
Fires
M.J.Lewis, J.B.Moss and P.A.Rubini 463

Modeling on the Interaction of the Turbulent Diffusion Flames
between a Vertical Burning Wall and a Pool Fire
H.Y.Wang and P. Joulain 475

xviii
A New Numerical Calculation Method for Zone Modeling to Predict Smoke Movement in Building Fires

Weicheng Fan and Xinwei Wang 487

Unsteady Burning Rates of Small Pool Fires

Hiroshi Hayasaka 499

Three Dimensional Simulations of Fire Plume Dynamics

H.R. Baum, K.B. McGrattan and R.G. Rehm 511

Three-dimensional Modeling of Intumescent Behavior in Fires

Kathryn M. Butler, Howard R. Baum and Takashi Kashiwagi 523

An Algorithm for Estimating Carbon Monoxide Formation in Enclosure Fires

William M. Pitts 535

A Dynamical Systems Model of Autoignition in the Cone Calorimeter

M.I. Nelson 547

Stoichiometric Combustion Model with Oxygen Threshold

Improved Predictions for Fire Simulation Using a CFD Model

Mingchun Luo and Vaughan Beck 559

The Effect of DDS-Inhibitors on Suppressing the Spontaneous Ignition of Coal

Xilin Dong and Dougal Drysdale 571

STOCHASTIC MODELLING, FIRE RISK, HUMAN BEHAVIOUR, EGRESS, FIRE DETECTION, SUPPRESSION AND SPECIALIZED TOPICS

The Use of Probabilistic Networks to Evaluate Passive Fire Protection Measures in Hospitals

Raymond J. Connoly and David A. Charters 583

A Performance-based Approach for Fire Safety Engineering:
a Comprehensive Engineering Risk Analysis Methodology, a Computer Model and a Case Study

M.K. Mathews, D.M. Karydas and M.A. Delichatsios 595
Structural Fire Design: The Role of Time Equivalence  
G.C. Thomas, A.H. Buchanan and C.M. Fleischmann  607

Modelling Concepts for the Risk-cost Assessment Model FIRECAM™ and its Application to a Canadian Government Office Building  
D.Yung, G. V. Hadjisophocleous and G. Proulx  619

Risk Assessment of Factors Related to Fire Protection in Dwellings  
Jeremy Fraser-Mitchell  631

Building Fire Scenarios - Some Fire Incident Statistics  
Vince P.Dowling and G. Caird Ramsay  643

The Definition of Scenarios for the CESARE-RISK Model  
Longde Zhao and Vaughan Beck  655

Derivation of Partial Safety Factors for Fire Safety Evaluation Using the Reliability Index β Method  
Hakan Frantzich, Bjorn Holmquist, Johan Lundin, Sven Erik Magnusson and Jesper Ryden  667

Fire Risk Assessment Using Multiattribute Evaluation  
John M. Watts, Jr.  679

Quantifying Fire Risk for Telecommunications Network Integrity  
Edward K. Budnick, Lawrence A.McKenna, Jr. and John M. Watts, Jr.  691

Concepts of a Performance-Based Building Regulatory System for the United States  
Brian J. Meacham  701

Human Behavior in the World Trade Center Evacuation  
Rita F. Fahy and Guylene Proulx  713

Simulex 3.0: Modelling Evacuation in Multi-Storey Buildings  
Peter Thompson, Jianhua Wu and Eric Marchant  725
A View to the Requirement of Designated Refuge Floors in High-rise Buildings in Hong Kong
Siu Ming Lo and Barry F. Will 737

Assessment of the Probabilities that Staff and/or Patients will Detect Fires in Hospitals
David A. Charters, Jonathan R. Barnett, Michael Shannon, Peter Harrod, Daniel Shea and Kevin Morin 747

A Consideration on Common Path Length and Single Stairway
Ichiro Hagiwara, Takeyoshi Tanaka and Yoshio Mimura 759

Occupant Decision Making in Office Building Fire Emergencies: Experimental Results
Wendy L. Saunders 771

The Time Delay to Start Evacuation: Review of Five Case Studies
Guylene Proulx and Rita F. Fahy 783

Advanced Occupant Behavioural Features of the building-EXODUS Evacuation Model
M. Owen, E.R. Galea, and P. Lawrence 795

Timing Human Response in Real Fires
Partricia Brennan 807

Analysis of Fire and Non-Fire Signatures for Discriminating Fire Detection
James A. Milke and Thomas J. McAvoy 819

Effect of Water Spray on Re-ignition Characteristics of Solid Fuels
B. Moghtaderi, V. Novozhilov, D.F. Fletcher, J.H. Kent and V.B. Apte 829

Study on Fire Detection at Cultural Assets Buildings with Botanical Roofs
Hiroyuki Tamura, Daisuke Kozeki, Kunihiro Yamashita and Masato Aizawa 841
Suppression of High Speed Flames and Quasi-detonations
William L. Grosshandler and Grzegorz W. Gmurczyk 853

Thermal Sensitivity Evaluation of Recessed, Flush and Concealed Sprinklers
Robert G. Bill, Jr. and Gunnar Heskestad 865

Early Suppression Fast Response (ESFR) Sprinkler Protection for 12m High Warehouses
Hsiang-Cheng Kung, Bennie G. Vincent, Tak-Sang Chan,
Hong-Zeng Yu and Paraskevas Stavrianidis 877

Superdrop Modelling of a Sprinkler Spray in a Two-phase CFD-particle Tracking Model
S.Kumar, G.M.Heywood and S.K.Liew 889

Fire Extinguishing Effect of Mixed Agents of Halon 1301 and Inert Gases
Naoshi Saito, Yuko Saso, Yoshio Ogawa, Yukihisa Otsu and Hiroaki Kikui 901

Fire-induced Winds in the 20 October 1991 Oakland Hills Fire
Javier Trelles and Patrick J. Pagni 911

Heat Absorption by Water in Rack-Storaged Corrugated Cardboard Carton Fires
Hong-Zeng Yu 923

The Development and Mitigation of Backdrafts: a Full-Scale Experimental Study
D.T. Gottuk, F.W. Williams and J.P.Farley 935

The Performance of Fire Protection of Buildings against the Fires Following the Great Hanshin-Awaji Earthquake
Akihiko Hokugo 947

Fire Spread of Urban Area at the Kobe Earthquake
Yoshiro Namba, Kenjiro Yasuno and Tadahiko Nishitani 959
Post-Earthquake Fires and Performance of Firefighting Activity in the Early Stage in the 1995 Great Hanshin Earthquake
Ai Sekizawa 971

STRUCTURAL BEHAVIOUR AND APPLICATIONS

A Review of Formulae for T-Equivalent
Margaret Law 985

A Model Fire Test For Parametric Testing of Half Scale Structural Components
D. J. O'Connor, B. Moris and G.W.H. Silcock 997

Three-dimensional Simulation of a Fire-Resistance Furnace
S. Welch and P. Rubini 1009

Calculation of Load and Deformation Behavior of Structure Elements Taking into Account 3-Dimensional Heat Flow
H. Ohashi and A. Kodaira 1021

A Theoretical Consideration on Heat Transfer in Fire Resistance Furnaces for Furnace Harmonization
Kazunori Harada, Yukihiro Yabuki and Toshio Terai 1033

Harmonization of the Fire Severity in Standard Fire Resistance Test Furnaces
Mohamed A. Sultan and Michael Denham 1045

Influence of Stress History Function in the Schneider-concrete-model under Fire Attack
Takeshi Morita, Ulrich Schneider and Jean-Marc Franssen 1057

Numerical Analysis of Load Bearing Capacity of Concrete-filled Steel Tubular Columns Exposed to the Standard Fire
Hideki Uesugi, Miwa Seki, Hironori Niwa and Hikaru Saito 1069

Design and Tests of Prestressed Concrete Beams
Jean-Marc Franssen and Alois Bruls 1081
Fire Behaviour of Long Span Composite Floor
   Joris H.H. Fellinger and L. Twilt 1093

Behaviour of Axially Restrained Steel Columns during Fire
   Faris A. Ali, Ian W. Simms and David J. O’Connor 1105

Tensile Membrane Action and the Fire Resistance of Steel Framed Buildings
   YC Wang 1117

Large Scale Fire Tests: the British Steel European Collaborative Research Programme on the BRE 8-Storey Frame
   B.R. Kirby 1129

Analysis of Time of Collapse of Steel Columns Exposed to Fire
   V. Chandrasekaran and N.L. Mulcahy 1141

Experimental and Numerical Study on the Behaviour of a Steel Beam under Ceiling Exposed to a Localized Fire
   A. Pchelintsev, Y. Hasemi, Takashi Wakamatsu and Y. Yokobayashi 1153

Numerical Predictions and Experimental Observations of the Structural Response of Steel Columns to High Temperatures
   D.J. Baker, Y.M. Xie and P.H. Dayawansa 1165

Modelling Tension Strength Behaviour of Structural Lumber Exposed to Elevated Temperatures
   Peter W. Lau and J. Dave Barrett 1177

A Method for Calculating the Fire Resistance of Exposed Timber Decks
   Marc L. Janssens 1189

Calculation Model for Predicting Fire Resistance Time of Timber Members
   M. Tavakkol-Khah and W. Klingsch 1201

Estimating Heat Release Rates from Large-scale Tunnel Fires
   George B. Grant and Dougal Drysdale 1213
Effect of Slope on Control of Smoke Flow in Tunnel Fires
Yajue Wu, G.T. Atkinson, J.P. Stoddard and P. James  1225

A Numerical Study of Smoke Movement along an Inclined Coal Conveyor
A.R. Green and D.F. Fletcher  1237

Venting of Deflagrations in Buildings and Equipment: Universal Correlation
Vladimir Molkov, A. Korolchenko and S. Alexandrov  1249

A Real Scenario for a Ghosting Flame
L. Audouin, J. M. Such, J. C. Malet and C. Casselman  1261

Development of a Demountable Fire Test Corridor for Assessment of Floor Coverings
Neville A. McArthur and Colin B. Jolliffe  1273

SMARTFIRE: an Integrated Computational Fluid Dynamics Code and Expert System for Fire Field Modelling
S. Taylor, E.R. Galea, M. Patel, M. Petridis, B. Knight and J. Ewer  1285

Calculation of Free Convection Influence on the Response of Heat Flux Meters
Bror Persson and Margaret Simonson  1297

Experiments on Smoke Behavior in Cavity Spaces
Part 2 The case of a cavity space with an opening at the bottom
Teruhisa Fukuda, Takeyoshi Tanaka and Takao Wakamatsu  1305

POSTER ABSTRACTS

The Development of an International Fire Test Standard for Facades
Kuma Sumathipala and Ingolf Kothoff  1319

Kinetics of Pyrolysis and Combustion of Polyurethane Foams under Fire Conditions
Mingchun Luo and Yaping He  1320
Effects of Density and Thickness of a Solid Combustible on Flame Spread over its Surface
   Takeshi Suzuki  1321

Effects of Humidity on Downward Flame Spread over Combustible Solids
   Masataro Suzuki, Hiromi Kushida, Ritsu Dobashi and Toshisuke Hirano  1322

A Numerical Model for Combustion and Flame Spread on Fuel Surfaces in Building Fires
   Anthony Fernando  1323

Evaluation of the Temperature inside a Fire Compartment Considering Heat Loss Phenomena
   Penh Lamuth, Francis Roy and Marc Cottaz  1324

CFD Modelling of Under-ventilated Fires Using SOFIE with the Flamelet Model
   Heimo Tuovinen  1325

SOFIE-Simulation of Fires in Enclosures
   J.B. Moss and P.A. Rubini  1326

On Two Phase Flows Accompanying Fires in Enclosures
   M. Bowman, Y. Kenyon, G. Makhviladze, J. Roberts and S. Yakush  1327

CFD Modelling of Smoke Movement in Shopping Malls
   Jennifer X. Wen  1328

Prediction of Smoke Spread in Compartment Buildings Using Computation Fluid Dynamics
   H.Y. Li, J.D. Li, M.C. Luo and S.R. Kennet  1329

Entrainment into Vent Flow through an Opening
   J.M. Clement and C.M. Fleischmann  1330

Effects of Inlet Openings on Natural Fire Ventilation
   Bengt Hagglund, Per Werling and Staffan Bengtson  1331

xxvi
Wayguidance Systems Effective in Smoke: Fire Safety Performance Concept for Evacuation through Smoke

A.W. Heskestad, G. Jensen, T. Paulsen and K.S Pedersen  1343

Comparison of Upward and Downward Traveling Escape

Atsuko Tanaka, Masayoshi Takahashi, Takeshi Komai and Takehiro Isei  1344

Application of the Principle of Acceptable Risk to the Development of Building Fire Safety Regulation

Armin Wolski and Brian Meacham  1345

Performance-Based Design: An Engineering Perspective

Doug Belter  1346

Fire Performance of High-Performance Construction Materials

L.Y. Cooper, R.J. Dexter, J-M. Franssen and K. Gilvary  1347

The Thermal Response of Gypsum-panel/Steel-stud Wall Systems Exposed to Fire Environments — A Simulation for Use in Zone-type Fire Models

Leonard Y. Cooper  1348

Charring of Protected Wood Studs

Lazaros D. Tsantaridis and Birgit A-L. Ostman  1349

A Practical Example of a Large Warehouse Fire Analysis

Harry K. Hasegawa and Norman J. Alvares  1350

Scaling of Combustion Products from Chemical Warehouse Fires

Berit Andersson, Vytenis Babrauskas, Goran Holmstedt, Stefan Sardqvist and Goran Winter  1351

Simulated Fires in Substances of Pesticide Type

Berit Andersson, Vytenis Babrauskas, Goran Holmstedt, Stefan Sardqvist and Goran Winter  1352

From Simple Equations to CFD - the Fire Engineering of Modern Airport Terminal Buildings and Railway Stations

Peter Bressington, Andrew Gardiner and Peter Johnson  1353
Investigation into Fires and General Public Behaviors Following the Great Hanshin Earthquake
Tokiyoshi Yamada, Keiko Suzuki, Akihiko Hokugo and Koji Shida

The Future of Bushfire Science
R.O. Weber

The Smoke Alarm Sound Attenuation Levels of Australian Domestic Dwellings
Mahmut Horasan, Joey La, Tracy Schneider and Feng Zeng

The Attenuation of Radiation from Building Fires through Fire-resistant Glazing
G.S. Cowles

Fire Research at the UK Home Office
J.A. Harwood and D.M.S. Peace
